And guess what?

They confirmed some fresh water from a natural lake has small amounts of free hydrogen!

But then something surprising happened

Excited about the results, these scientists kept a bunch of the water in their lab. And they discovered the free hydrogen eventually disappeared.

Just like water. As soon as you open the bottle, it fizzes.

If you leave it out long enough, it'll go flat because all the gas has dissipated. With free hydrogen, which is even lighter and smaller, this will happen eventually. Even if you keep the cap on the bottle.

So you can't bottle it.

Which is why you can't find this kind of water in stores.

You must make it yourself and drink it almost immediately.

Up until recently, it was possible only with the expensive machine. But then I found a natural way. And you don't have to journey thousands of miles to some healing spring to do it.

Instead…

You can bring its tonic, crystal-clear power to you!

Here's how:

You flow the water through a special filtration process. Here's the equation for how it works:

Mg(s) + 2H2O --> Mg(OH)2(aq) + H2(g)

I realize this might look complicated to anyone who isn't passionate about chemistry, but you only need to know the basics:

Notice how the right side ends with H2? That's the free hydrogen.

So what happens when you switch to drinking this nourishing water?

Scientists are seeing astonishing results as we speak. Here are just a sample:

In a small study published in the *Journal of Clinical Biochemistry and Nutrition*, researchers found eight weeks of drinking hydrogen-rich water lowered the free radical damage of the volunteers, and improved their cholesterol.

A double-blind, placebo-controlled study performed by the Kajiyama Clinic in Japan found the hydrogen-rich water reduced oxidative damage and lead to other surprising changes associated with youth. They even found it helped support healthy blood sugar.

Another study shows hydrogen-rich water helps support joint health

Long-term consumption has also been shown to help support the immune system.

It even works for athletes…

The Serbian *Journal of Sports Sciences* published a study where athletes drank a hydrogen-rich sports drink during their tough workouts. As a result, their heart rates were lower than those drinking a regular sports drink!

It's also been shown to delay muscle fatigue, and help improve performance.

Can you imagine how amazing you'd feel, if this water could do the same for you?

Now, remember what I mentioned about mitochondria health and centenarians, those who live to be 100 or older?

Remember how I asked you to imagine blowing out 100 candles for your birthday?

Well, a study out of Japan showed this kind of water **improves the mitochondrial health of those who drink it.**

This could be your lifeline.

It can get into the nooks and crevices of your body where it's needed most… where other treatments can't go! Your cells thrive on these amazing for antioxidants to protect them, and hydrogen is just the one for the job.

But just knowing all this is one thing.

Let me PROVE it to you, and **show you the results you can see with your own eyes**…

Here's how:

It turns out, you can actually measure (in number value) how much a liquid either reduces the potential for oxidation, or creates oxidation.

This is done with something called an ORP meter, which stands for Oxidation Reduction Potential.

In other words, this meter helps indicate how much of a healthy antioxidant a liquid is, or an unhealthy pro-oxidant. A major pharmaceutical company is even trying to corner the market on this technology, because it's so groundbreaking for your health.

I used an ORP meter to test some of the most popular brands of bottled water. Then, I tested it on this special kind of healthy water.

Now I'll show you the results, on live video:

I know it seems hard to believe you can create this health-giving water with something that looks like a simple pitcher. But think of your smartphone. It contains a computer so powerful, just a few years ago, the hardware would take up your entire desk. But now it fits into the palm of your hand.

The same thing happened with this water technology.

And I had to search outside the United States entirely to find it

That's because in Ontario, Canada, a pioneer of fresh water has been quietly perfecting this special method of filtration. For years, he published everything he learned along the way. When I sifted through all the BS surrounding water, his knowledge was priceless.

I tried calling him, but only got a voicemail. So I explained the research I'd done, and how I was trying to let people in the United States know about this amazing water.

A day later, my phone rang. He had called me back!

As we spoke, I realized *our philosophy matched up perfectly*: Produce the best antioxidant water possible, while keeping the prices reasonable for anyone.

That's when he told me about his breakthrough. The filtering technology required to create life-giving hydrogen can now fit inside of a conventional pitcher.

The Molecular Hydrogen Institute's laboratory even tested this filter

They confirmed it produces free hydrogen, in the water.

All the stars aligned.

I had to shake my head. Just a few short years earlier, I'd paid almost $4,000 for a machine that does the exact same thing as this simple, healthy water pitcher. And you know what? It was worth it.

Then I could let people know about a better option for the **absolute best, perfectly-balanced, delicious, energizing water that could help you feel YOUNGER**.

And I vowed that nobody would have to invest anything close to $4,000 for the health benefits this immaculate water provides…

Or $3,000…

Or $2,000…

Or $1,000…

You can now quench your thirst with this radiant, whole water for an absolute bargain.

It's called the Tursipur Pitcher, and right now it's available for only $59.95. This is the best bargain available for the healthiest water. After all, you would pay $1.50 to purchase just one bottled water. If you drink only three bottles per day, that adds up to $270 every two months. And it might still be contaminated and still doesn't have the healing benefits of free hydrogen.

If you do the math for buying bottled water for your whole family, you might be shelling out over $600 for a two-month supply of dead water existing in plastic, and maybe even sealing up the dangerous chemical BPA.

But now you have the chance for energetic, refreshing water for a much better price

In fact, if you avoid purchasing just a single bottle of water per day, your pitcher is already paid for in less than a month… and then you're putting money in your pocket!

Start saving money… drink the best, perfectly-balanced antioxidant water you deserve… and look and feel younger. Click the button below to get your Tursipur Pitcher ordered to you.

And one more thing just in case you're still on the fence. Because you can use this pitcher in the comfort of your own home, you're probably going to be filling it with tap water from your sink. Now… I don't know anybody who likes the taste or smell of tap water. So here's what we've done. We've also made sure there's a special filtering layer of NSF-certified activated carbon.

This strips out the bad tastes and odors in our water

Then a layer of Ion Exchange Resin softens the water, making it a pristine pleasure to drink. The entire pitcher, by the way, is BPA-free. When you use it, it's like you're creating water from a fresh bubbling mountain stream. Water that's unshocked.

So you can throw out all your other water pitchers and **enjoy the delicious, cool, refreshing water from this one!**

That's what some lucky folks have done. Here's just a sample of the massive number of stories we've received from happy Tursipur customers:

★★★★★ **"My skin looks great! - and I'm able to go bowling again!"**

I have noticed that my hands have a younger look. Also the skin on my face looks healthy. I don't even use bottled water any more. I fix 2 to 3 pitchers of water a day and save in another container for cooking.
