- 1.5G Garcinia Cambogia
- KSM-66® Ashwagandha
- GBB (we're turning up the heat!)
- Grains of Paradise Seed Extract
- Natural Caffeine
- Vegan Friendly

Product Details

Supplements + Information

GHOST® Full Disclosure Label

All GHOST® products feature a 100% transparent label that fully discloses the dose of each active ingredient. Zero proprietary blends means you know what you're getting in each and every scoop.

GHOST® Carnitine
3G

Carnitine has been widely researched in several doses (1-3 Grams) and forms but in our opinion, the best clinical data regarding fatty acid oxidation, reducing catabolism and free radical formation has been on L-Carnitine Tartrate, with Acetyl-L-Carnitine having additional or more clear cognitive benefits. While the combination of the two hasn't been specifically studied, we think it's a no-brainer and wanted to deliver the best of both worlds in GHOST® BURN BLACK.

Garcinia Cambogia
1.5G

GHOST® BURN BLACK is packing a LEGIT 1.5g dose of Garcinia Cambogia (3x what you normally see from other brands), shown to aid in appetite suppression and overall satiety!

KSM-66 Ashwagandha
600MG

KSM-66® Ashwagandha is a full-spectrum extract with the highest concentration of all major root-only extracts available on the market today. It works as an adaptogen and has been shown to reduce stress, anxiety and cortisol levels, plus it has 14 years of R&D and 22 clinical trials behind it... yeah, it's pretty awesome.

Natural Caffeine
300MG

Clean, stackable energy. GHOST® BURN BLACK is loaded with 300MG of straight Natural Caffeine per 2-scoop serving (150MG per scoop).

Gamma-butyrobetaine ethyl ester HCl (GBB)
50MG

Gamma-butyrobetaine ethyl ester HCl, or GBB for short, is a precursor to Carnitine in the body. Studies have shown GBB supplementation can greatly increase the body's plasma L-Carnitine levels. Additionally, we've seen a noticeable increase in thermogenesis...in other words, get ready to sweat legends!

Grains of Paradise

Grains of Paradise is a spice with a similar makeup as Ginger that has been shown to increase overall energy expenditure and mobilize brown adipose (fat) tissue. In other words, it's a pretty epic (non-stimulant) fat burning ingredient and a must-add when constructing GHOST® Burn.
