Incredible technology

We bought this mostly because we have you f children and we want to keep the air as clean as possible... and it does! So far entering the flu season we have been clear and healthy, and I do attribute a lot of that to this device. I move it from room to room with no problem and even put it in the truck on boost once a week to clean the air in there! I love the molekule and we will be purchasing more in the near future. Buy this product. You're welcome.

Best purifier I've owned.

The Molekule purifier is truly a purifier. My apartment had a severe case of mold and within 6 hours of the machine's operation, the smell of mold was gone. This purifier continued to eliminate the mold hazard, even when the mold source was never remediated. I have since moved. Living in Los Angeles with it's dust and pollution, at least in my home environment, the Molekule purifier does the job as described. My new roommate noticed the difference within 2-3 days, and I never described the action this purifier was doing. I have owned 3 previous air cleaners, but this unit is superb. I highly recommend this product. I did not receive any monetary consideration for my review, other than, Molekule said they'd plant a tree for my effort. Thank you Molekule.

Wonderful!

I noticed the air smelled cleaner and crisp after day 1!! I will get more for other rooms in the house soon! I can't wait to try the mini:) Best purchase hands down!:)

I'd give it 5 stars if the app would work

The filter works well. Seems like the air in our bedroom is better. Breething and cough better. The ONLY item is the app. Wont work and it seems i am not the only one

Great Air Purifier... APP useless

We love the Air Purifier however the APP is useless. Constantly disconnects from Wifi connection and after HOURS and DAYS trying to troubleshoot... still USELESS. So we just run the device without the APP... They really need to up their game on the connectivity promises they advertise for the cost of this machine.

Vet Helpful

Set up was very easy. It's easy to move from room to room, if needed. Can't smell pet smell at all. We keep it in our kids' room when they're sick to make sure their rooms' air is tip top. Thumbs up for molekule!

Love it but needs software update

The unit was easy to setup and use. The air quality has improved dramatically. We got a Molekule system because of our allergies and pet dander. The only issue we have is the unit turns off and on every once in a while on its own. I contacted Molekule and they said it's due to the unit losing connection to the WiFi and they reset the unit. But every time I unplug and move the unit to another room it resets the unit and start turning off and on again. Other than that we love how clean the air feels.

Highly recommend

I was living in an apartment that seemed to cause my allergies to get worse, so I came across this company after reading a ton of air filter comparisons online. I've always been into filtered water, but I never realized how important it is to filter the air we're breathing in our homes. I finally made the decision to purchase the Molekule Air device and can say it was definitely worth the higher price because it has dramatically improved my air quality. I ended up moving into a nicer place and my roommate laughed because of how excited I was to bring it with me. On top of breathing better, I got the additional benefit of a better night's sleep (due to the lulling fan noise which helped to drown out the noise of the city). 100% would recommend and love the sleek design.

Molekule is a Must-Have in Every Home

My husband Caleb has a lung disease called cystic fibrosis. His immune system is super fragile when it comes to the malicious nature of airborne bacteria and viruses. We are always doing the best we can to keep the environment around us, especially him, clean and free of monster-like radicals. We were first drawn to Molekule by the sleek-modern look of the machine. We have own purifiers that have cost upwards to $3,000, often bulky, loud, and quite the eye soar. When we did more research we fell in love with their patented PETA filter and learned that

HEPA filters often collect and potentially disperses the collected mold and bacteria. We have never used a machine that had blue light to kill the bacteria -- so it's definitely one of it's kind. We love their cutting edge technology and that the product was created by founders who wanted to help make a difference in their families life and struggles with allergies and respiratory conditions! We live full time in an RV and have our windows open 24/7. We practically hold the door open for bacteria, dust, and air pollution to welcome themselves home. We keep our Molekule on 24/7 to help combat the unwelcome guests and can see it doing work when we change the filters every few months. I pull out handfuls of chalky dust -- all in which would be in our lungs if we didn't have the Molekule. The air is lighter, noticeably cleaner, and easier to breathe. We turn the boost mode on when we do renovation around the RV, cook, or need the extra thorough clean. Ah I can go on and on. We love it and definitely recommend it to our peers!

Fresh Air !!!!!

I instantly noticed the air was cleaner the day after I set up my Molekule. I noticed my kid spending more time in the room where the device is. It's been cleaning the air in my home for 1 month now and I am happy with the results. My place feels clean and fresh. Very thankful to have my Molekule.

Love the Molekule

I mainly bought it for my allergies. I feel like the air is so much better when I sleep. Easy to set up .Easy to change filters. I leave itn the living room during the day where my dog stays. I have recently ordered the Mini so that I don't have to carry the one I own now back and forth between rooms. Can't wait to get it!!!!!!

Excellent product and worth every penny!

The unit was easy to set up, and easy to use! I have severe allergies, and after using it for two days, I noticed a difference in the air quality of our home. After doing a Boost mode clean in every room, I am going to put it in the most open part of our home on Auto mode and probably never turn it off!

Molekule is good

The Molekule is very easy to set up and seems to work well. I don't know that it is any better than a good quality HEPA filter. It looks nice though. The free 1 year of filters have not arrived and I had to call customer service to get them to send.

Best ever!

4 years ago, I had a baby who had significant allergies and asthma. Countless doctors, antibiotics, steroids, nebulizers and purifiers could not help the poor kiddo stop coughing. Multiple er visits, lots of $$$$, lots of stress trying to help my baby feel better. Fast forward to a year ago when we bought our first Molekule. My kiddo is currently 5 months without any medicine and survived his first cold without antibiotics and steroids. Usually we could only go two weeks between antibiotic cycles - otherwise it meant and we visit. We now have two Molekule's - one that lives in the kiddos room and one that lives in the living room. Having a Molekule has clearly made all the difference for us!

Better than any other high end purifier I've used for mold

★★★★★

Undisclosed
22/10/2019

I've tried Austin Air, IQ Air, and several other high end air purifiers. I have extreme sensitivity to mold, and this is the best air purifier I've found that has allowed me to live in a home that got mild cross contamination (in combination with Microbalance EC3 products). I've done before and after testing with mold test plates to measure what's in the air and the Molekule makes a huge difference. It's also a good looking air purifier. Love it!!

simple and easy to use

Once out of the box it's basically plug and play. set up was easy. the app was a bit finicky at first, but it works fine now after the update. The product works as advertised. My air quality has improved greatly since using Molekule. I have less mold related sinus headaches and that's a huge sign that it works. I highly recommend this to anyone and everyone.

Molekule is a lifesaver for me...I have tried numerous Air P

I was in the midst of having an Asthma problem when Molekule arrived. We quickly removed from the box and had it set up within minutes and added the program to my phone...very easy. I chose to put it on "Boost" for at least an hour. About two hours after the Boost I went into the bedroom and noticed how fresh and clean it smelled. That night I was able to sleep better than I had the last several nights. Thank you Molekule for not disappointing me as all the others have...I have to admit I was a bit pessimistic at first. Mold is a big problem for me and mold levels outside have been and still are quite high. As East Texas is very humid and hot, indoors with lots of air conditioning use also becomes a problem as well. Thank you...I don't think I can say it enough...Molekule really has changed so much for me.

Nice fan but the phone app doesn't work

Don't waste your money. For $800 the phone application should work more than three days before failing.

Molekule Review

The Molekule air filters work well to clean the air. However, getting them to work on the APP is impossible. Even with the help of customer service. And trying to order just replacement filters is impossible online if you don't want to sign up for auto refills to be shipped every 6 months.

Pre-Filters Don't Last

When I first got the Molekule 19 months ago I liked it, but I quickly realized it struggled to keep up with the amount of feather dust my parrots generate. I have switched to a different air purifier for the area of the house where the birds are and have moved the Molekule into the bedroom. I'm not impressed with the "Auto" mode, I thought it would automatically kick the speed up and down based on the air quality of the room, but that doesn't happen, auto just equals low fan speed. I also have noticed that the pre-filters don't last as long as they should based on the auto ship schedule. I'm on my second Pre-Filter of the last shipment and it shows it's at 0% for the last few weeks. The filter subscription plan has also changed from $99 per year to $65 every 6 months, so a $30 increase.

Such clean air immediately!

From the moment Molekule was delivered, it has been so easy to use and has made a huge difference in air quality for us! My husband has asthma and allergies. We sleep with it in our bedroom at night and literally from the FIRST night, he said it's the best sleep he's had in years! He hasn't been waking up congested anymore either. We hope to get a second one to have one on each floor of our home, but honestly, its not heavy and is easily transported through the house during the day! Such a great purchase!

Excellent.

Excellent product with sleek design. Intuitive to use. One person mentioned that it was hard to take top off to replace large filter. For me it was very easy. I agree that the woman in the video is misleading because she doesn't show that you have to press down and twist at same time for the top to pop up. If you watch video it seems like it's a tap. So expectations on the ease of it were not met. But it is not hard at all once you are shown how to do it. I want to get one for every room!. It's amazing to see all the dust collected when you pull out filters. My replacements weren't sent and time passed. When I finally called the customer service were very responsive. This is a new company and I think they are ironing out processes etc. the product is outstanding. I highly recommend it.

Molekule was our Saving Grace

When it comes to my family's health, I do extensive research. I'm the type of person who digs deep to find answers! There was a time in my family's health journey that I felt completely hopeless. For once, I didn't have any answers to combat the poor air quality in our home. My husband suffered from countless bloody noses, environmental allergies, sinus headaches, itchy eyes, you name it. Our daughter also experienced the same issues. On top of that, I experienced migraines, dizziness, and would wake up in the morning feeling sluggish. I'm a believer in the power of nature, but I knew I needed the power of technology. There HAD to be something out there that could perform 1,000X better than our average Honeywell Air Purifier (sorry, not sorry!) That's when my sister told me about Molekule. Her naturopathic doctor highly recommended it, so before I could hit "submit payment" for a different air purifier purchase, she stopped me dead in my tracks. Boy, am I thankful she did! I immediately started researching the benefits of Molekule. After reading testimony after testimony, I was blown away. Our Molekule purchase was made in October of 2018. It was truly our Saving Grace during the Cal Fires that struck shortly after. We also ran our machine next to my mother while she was battling cancer during her last moments with us, and it kept the airborne viruses at bay. It gave us the confidence to invite family and friends over to visit with her. I've researched many air purifiers, and NONE COMPARES TO THE POWER OF PECO TECHNOLOGY THAT MOLEKULE HAS TO OFFER! It truly is an air purifier that ACTUALLY WORKS! Invest in your health!

Very difficult to change the filters

I was unable to take it apart to change the filters. As one reviewer noted, the customer service is in India. Nothing against India in general, but this does not inspire trust and is no support at all. The person sent me a link to a youtube video which shows a woman basically changing the filter as she walks by the device. This is totally misleading. It is very difficult to turn the white flat thing on top to make the thing come apart. Finally, I had two friends over to help me. It took us 15 minutes and two people together to get the thing open, and we had to wear rubber gloves to get traction. DO NOT BUY THIS UNLESS YOU HAVE REALLY STRONG BIG HANDS, OR LIVE WITH SOMEONE WHO DOES. It is not for a person who lives alone with normal hands and normal strength.

Molekule is cleaner air

The minimalist clean look made me to read the ad to learn the technology of Molekule. Upon receiving the set up a breeze and design fits in easy to any decor. After using for a few weeks I noticed my eyes not watering during allergy season. This a huge plus. The kicker was when I changed the filter and saw what was removed from the air. This speaks volumes to how Molekule cleans the air.

Molekule is the best!

I have had the Molekule for about a month. When it arrived, I was pleasantly surprised with how easy it was to set it up--in fact, there was nothing to do except remove it from the box and plug it in. The style of Molekule is so classic that it would fit in with any decor. It is like a piece of art and has made a significant difference in the air quality. I have had other air purifiers, but none seemed to deliver what they promoted. Molekule has surpassed my expectations in every way. I could not recommend it more.
