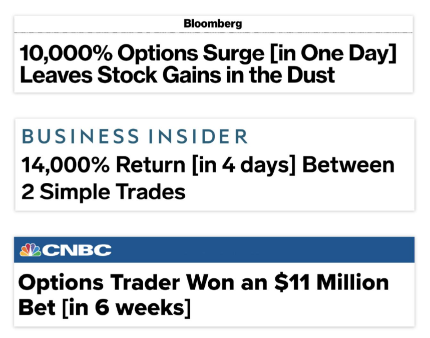
WARNING:

What you're about to see is the result of a months-long investigation by independent financial publisher St. Paul Research. Inside, we expose a little-known corner of the options market, **one where traders have recently seen some of the most explosive market returns of their lives.** The examples below may seem unbelievable at first. But they really happened and show the extraordinary power of options. We cannot promise you will see gains this high, but we will give you exact instructions on how to enter this exciting new market.

Dear Reader,

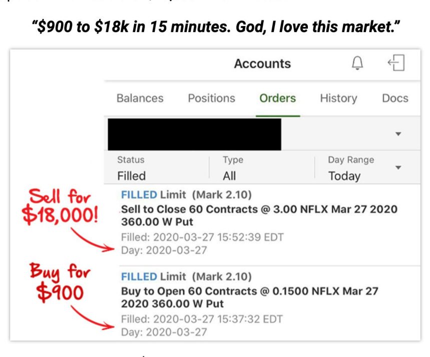
Maybe you've seen the headlines…



Or perhaps you've seen the firsthand accounts from regular, everyday people getting rich with options…

Like one person who made over **$18,000** in 15 minutes…

"$900 to $18k in 15 minutes. God, I love this market."

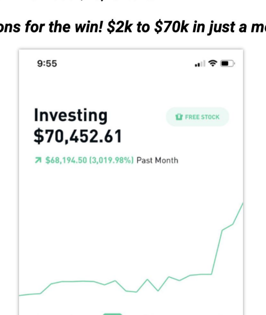


Or another who racked up over **$35,000** in a week…

"Turned a little over $2,200 into $37,613 in a week… a $35k gain"

Or even another person who made **$70,452.61**…

"Options for the win! $2k to $70k in just a month"



Well, as a professional options trader…

I couldn't believe these gains myself.

Were these amateurs really having this much success?

And were they really taking home massive windfalls like this in the options market?

It's like nothing I've ever seen in my three decades of experience with options.

Which is why I tasked my in-house team of market analysts with a project…

To discover the truth behind these unbelievable gains.

And after months of digging…

What we found shocked us all.

Because these gains are being made in a tiny corner of the options market…

Where they trade for pennies on the dollar.

We found hundreds of examples of ordinary folks…

Regular amateur investors *making a killing…*

All by leveraging the power of cheap options that trade for pennies.

Here's what I uncovered…

- **These people are NOT using a lot of money to get started (in some cases just $50)…**
- **They are NOT professional traders (meaning that anyone can do this)…**
- **And they are taking advantage of a once-in-a-lifetime market event, which will remain open until at least 2021 (more on this in a moment)…**

And when I saw how much money they were making…

I knew I had to share my take on this story as a professional.

Because regular everyday Americans are making a fortune with options as we speak…

Some with no experience at all.

And I want to show how YOU could start in this market with a small amount of money too… (I'll even provide a **'blueprint'** for you.)

But before we get to the blueprint, I want to warn you…

<u>The types of trades I will cover today are risky in nature.</u>

Because while the gains look incredible…

- Like the $900 into $18,000 in 15 minutes…
- The $2,000 into $37,613 in a week…
- Or the $2,000 to over $70,000 in just a month…

<u>You know you don't make that kind of money that fast without risk.</u>

But you'd be surprised how many amateurs get in over their head and risk far too much of their portfolio…

Not realizing that when swinging for the fences, **<u>you are likely to lose every nine out of 10 trades.</u>**

Simply put…

<u>Amateur investors can get crushed in this game.</u>

And if you can't stomach that.

Then this presentation is <u>NOT</u> for you.

But!

If you're like me and like the idea of making the best trade of your life with options, this is your shot.

Still with me?

Great! That's exactly why I created the presentation you are watching right now.

Because as a professional trader with over three decades of options experience I can tell you…

Simply using proper allocation (like setting aside a few hundred dollars to test the waters with these kinds of trades)…

Knowing what prices you want to get in and get out…

And using the proper strategy, which I can teach you…

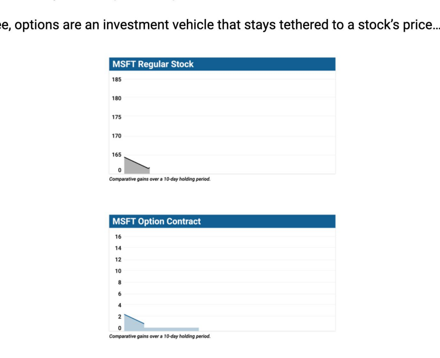
You could be on track to hit one of the biggest winners of your life!

And it's all thanks to the <u>red-hot options market.</u>

You've probably at least heard of options, right?

Maybe you've even started to see some of the headlines of people taking home enormous returns.

In fact, here are just a couple screenshots I grabbed online.

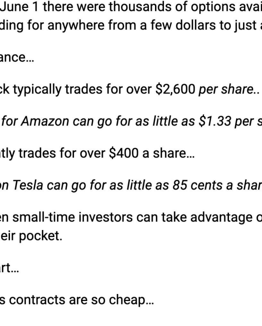


So as you can see, with returns like that…

Options are one of the most lucrative investment opportunities in the market right now…

But what exactly makes options so profitable?

You see, options are an investment vehicle that stays tethered to a stock's price…



They even trade like stocks except for one big difference…

Options are cheap…

Extremely cheap.

In fact, as recently as June 1 there were thousands of options available on big well-known companies trading for anywhere from a few dollars to just a few pennies…

Take Amazon for instance…

Even though their stock typically trades for over $2,600 *per share..*

The options contracts for Amazon can go for as little as $1.33 per share.

Or Tesla, which currently trades for over $400 a share…

The options contract on Tesla can go for as little as 85 cents a share…

Which means that even small-time investors can take advantage of them starting with just a few dollars in their pocket.

And here's the best part…

Because these options contracts are so cheap…

Even a tiny bump in the stock's price can send the options contract absolutely soaring

Giving investors the chance to make as much as 10-, 20- or even 30-fold the returns they would have made on the stock…

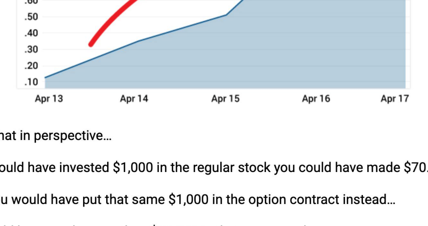
Sometimes in as little as a day!

Here's a top-performing example just to show you the power of options versus the stock.

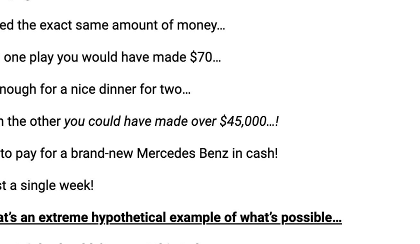
On April 10 of this year…

After Microsoft announced a major update in their "work from home" features…

Their stock shot up **more than 7%** in less than a week.



But the options on Microsoft shot up over **4,536%** at its peak that exact same week!



To put that in perspective…

If you would have invested $1,000 in the regular stock you could have made $70.

But if you would have put that same $1,000 in the option contract instead…

You would have made more than $45,360 in that same week.

Incredible, right?

You risked the exact same amount of money…

But with one play you would have made $70…

Barely enough for a nice dinner for two…

And with the other *you could have made over $45,000…!*

Enough to pay for a brand-new Mercedes Benz in cash!

All in just a single week!

<u>Now, that's an extreme hypothetical example of what's possible…</u>

<u>So you certainly shouldn't expect this to happen.</u>

<u>And as with any investment…</u>

<u>Whatever you invest in options, you can lose the full amount, whether it's $50 or $1,000.</u>

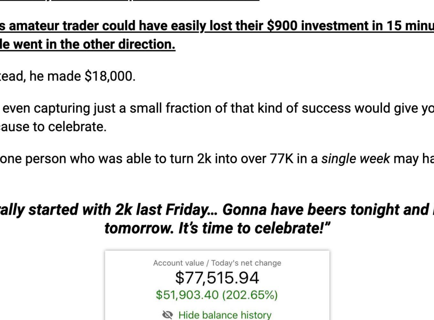
But hitting these big returns is possible.

And real people are posting screenshots of massive gains just like this online every day.

Just take a look at some of the screenshots that we've found posted online in the last few weeks…

This person I showed you earlier who was able to turn $900 into over $18,000 in just *15 minutes* on a couple of Netflix options.

"$900 to $18k in 15 minutes. God, I love this market."



Incredible, right?

I mean how would it make you feel to put $18k in your pocket in just 15 minutes?!

That's the equivalent of making $72,000 an hour!

<u>Now, of course, that's a rare and extraordinary example.</u>

<u>So you certainly shouldn't expect results like that.</u>

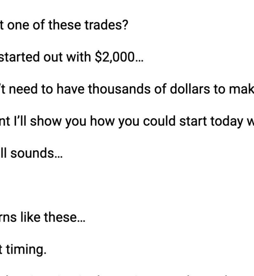
<u>And this amateur trader could have easily lost their $900 investment in 15 minutes if the trade went in the other direction.</u>

But instead, he made $18,000.

I mean, even capturing just a small fraction of that kind of success would give you major cause to celebrate.

In fact, one person who was able to turn 2k into over 77K in a *single week* may have put it best:

"Literally started with 2k last Friday… Gonna have beers tonight and beers tomorrow. It's time to celebrate!"



Can you believe that?

$77,000 is more than some people make in an *entire year.*

And this person made that in a single week!

<u>Again, this is rare to do… While the goal is to find options plays that give you the potential to make that kind of money, it's not the kind of gain anyone should expect to see.</u>

But imagine hitting just one of these trades?

To be fair, this person started out with $2,000…

But like I said, you don't need to have thousands of dollars to make serious money.

In fact, in just a moment I'll show you how you could start today with a single $50 bill.

Now, as good as this all sounds…

There is one problem.

In order to get big returns like these…

You need to have great timing.

But that's what makes the situation in the options market today so exciting.

It's all happening right now, so your timing could not be better!

You see, the Federal Reserve is pumping trillions into the stock market as we speak.

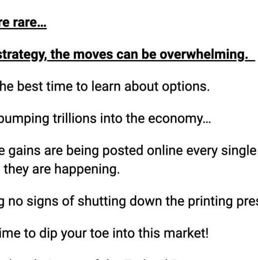
Allowing even first-time investors to take home huge triple- and quadruple-digit gains.

Like this person, who was able to turn $960 into over $10,000 in a single week…

"Three weeks ago I didn't even know what a stock was… now here I am"

Or this person, who just learned about the markets last year and was able to turn $1,000 into over $31,000 in less than two weeks…

"Turned $1k into over $31k in two weeks… I'm a college student who just learned about the markets last year…"



Incredible, right?

Right now, people who barely know what a stock is are taking home small fortunes in a matter of weeks!

<u>So I am sure you see why it's easy for amateurs to get in over their head if they don't know what they are doing.</u>

<u>These types of wins are rare…</u>

<u>And without a proper strategy, the moves can be overwhelming.</u>

But that's why now is the best time to learn about options.

Because with the Fed pumping trillions into the economy…

The fact these massive gains are being posted online every single day demonstrates the frequency in which they are happening.

And the Fed is showing no signs of shutting down the printing presses anytime soon…

Right now is the best time to dip your toe into this market!

In fact, Jerome Powell, the chairman of the Federal Reserve, recently said that he is willing to *"do anything to keep the economy from collapsing."*

And that the Fed *"not out of ammunition by a long shot."*

Which could put investors in the rare position of being in an ideal scenario.

If the market shoots up… great!

You'll have the chance to make a fortune.

If it starts to go down, no problem — the Fed will likely just flood the stock market with money and send it soaring again.

Either way… You can be in position to win…

And since this opportunity won't last forever, you need to act NOW.

Because some of the people who are willing to take advantage of this unprecedented situation in the market right now are getting absolutely rich.

So why wouldn't you try your luck?

If you want to the chance to take home some of the biggest returns in this market…

The time to act is right now!

So let me show you just how explosive the opportunity is in the options market right now

And as you'll see, it's possible to take small amounts of money…

And turn it into massive fortunes…

Sometimes in as little as a few days.

Let me show you a few more top historical examples from these market conditions.

<u>These are some of the biggest and most insane returns I've ever seen…</u>

And they are happening to regular people, just like you.

So while **<u>I can't guarantee that you'll get results like these</u>**…

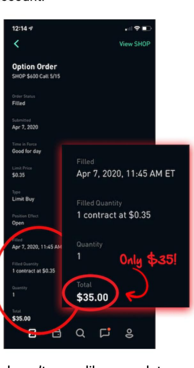
I want you to see exactly what's possible once you learn how to play this market…

All right, here we go….

<u>Real-Life Example #1</u>
$35 Turns Into $15,000 in Just 1 Month

On April 7 of this year a trader posted online that he was investing a measly $35 in some options on the company Shopify…

Here's a screenshot of his account:

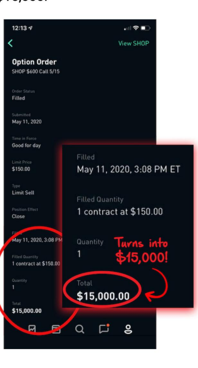


Now, even though 35 bucks doesn't seem like enough to sneeze at…

After Shopify announced an overhaul of their new app…

By May 11 this trader's tiny $35 investment…

Had turned into more than $15,000.



That's right…

$15,000 in a month!

Off a $35 investment!

That's the power of options!

But say you were just a little more aggressive and put $350 into that same trade…

You could have walked away with $150,000!

Crazy, right?

That one single trade could have been enough to make you rich…

And here's the best part…

Even though **these kinds of gains are rare for regular investors.**

These jackpot opportunities are completely possible in the options market.

Keep in mind these are real examples that real people are sharing…

Within just the last few months.

So there's no reason it couldn't happen for you if you play your cards right.

And listen, **I'm not telling you that every options trade you make will be a winner.**

They won't be…

Like I said before, with these kinds of jackpot trades you should be willing to lose at least 9 out of 10 times before ever hitting a big winner.

That's why I suggest you start small and never invest more than you can afford to lose.

But once you get your first win, and you feel comfortable putting in a little more money.

Just look at what's possible.

Real-Life Example #2
$340 Turns Into $21,930 in a Single Day!

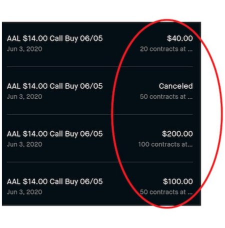
On June 3 this year…

While American Airlines was trading just $11.85 a share…

One of its all-time lows.

One trader picked up $340 worth of options on the company.

Here's a screenshot he shared of his account.

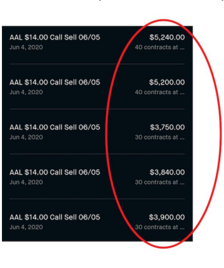


And the very next day…

After the stock had bounced to $16.72.

The options on the company absolutely soared.

And this trader was able to cash out his options for a $21,930 profit.



Incredible, right?

Can you imagine turning $340 into $21,930 in just one day!

All for just one day's work…

Actually for less than that because it only takes a few minutes to make the trade.

And numbers like that aren't "theoretical"…

Big payouts like that can and do happen for real people in this market.

Even for people that are just getting started.

Take a look at this…

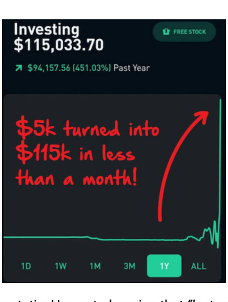
Real-Life Example #3
$5,000 Into $238,000 in One Month!

In February of this year this trader started with about $5,000.

But after he started buying some well-timed options his account started to skyrocket.

By March 9 of this year his account had soared to over $115,000.

Just take a look:



Needless to say he was ecstatic. He posted, saying that *"last year $1,000 was a lot of money to me…"*

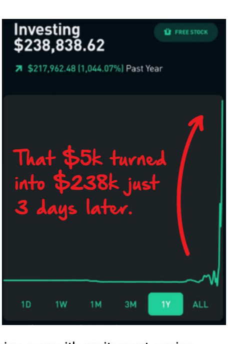
"…and now I think I might be able to buy my dad a new car."

But what he didn't realize is that his options trades weren't done paying off.

And by March 12 his investments had more than doubled again…

Turning his $5,000 starting stake into over $238,000…

In less than a month.



He was practically brimming over with excitement, saying…

"Holy crap! This is freaking wild. Thank the lord for these daily options profits!!! My student loans are about to be paid off!!!"

And can you blame him?

I mean, how much would your life change if you added an extra $233,000 to your account this month?

You could buy a new boat, or completely finance the education of a loved one… all without breaking a sweat.

That's how powerful just a few well-timed options plays can be.

And again, it goes without saying what this amateur trader did was rare and he could have easily lost his initial investment.

But instead he got lucky and took home $238,000 in less than a month.

Here's another…

Real-Life Example #4
$34,000 to Over $566,420 in a Week!

On April 13 of this year…

This man started with $34,000 in his trading account.

But after he started adding options to his account…

The balance of his account started to swell to over $100,000…

Then over $200,000…

Then over $300,000…

All the way up to more than $566,000 in a single week!

That's right…

He made over HALF A MILLION dollars in a single week!

Normally it would take people a lifetime of working and saving diligently to amass that kind of wealth…

Heck, some people I know have been saving for over 30 years and still don't have that kind of money.

But with options, you can make that in a single week!

Now, of course, that's an extreme example of what's possible.

And I don't think you'll get that lucky when you are first starting out.

Like I said, you have to be willing to lose a little while shooting for big winners.

That's why you start small.

And remember, that massive gain happened for a real person just last spring.

So even though **it would require great timing and a lot of luck**…

There is no reason that it couldn't happen for you.

But only if you act quickly…

Remember the clock's ticking…

Look, the options market is absolutely blowing up right now…

With people, some with no experience, pulling huge triple- and quadruple-digit gains in a matter of weeks.

So if you missed out on Bitcoin when it was trading for just pennies.

Or got in on marijuana stocks just a little too late.

This may be your one shot to completely make up for it (and then some)…

And the amount of money you could make in the next few months…

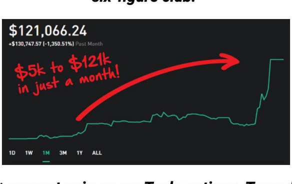
The profits…

Are absolutely staggering.

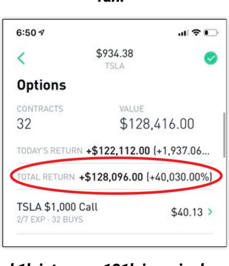
Look, like I've already shown you, the internet is already beginning to flood with stories of regular people taking home massive returns with options…

Some people are even taking home big six-figure gains in less than a month.

"I started with just 5k on Jan. 3… and by Feb. 4 I became a member of the six-figure club."



"Took a 40,000% percent gain on my Tesla options. Turned $320 into more than $128K. Should have held on a little longer… but I took my money and ran!"



"Turned 1k into over 121k in a single month!"

And like I showed you before…

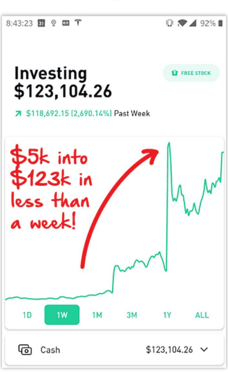
Some of the bigger gains are already starting to make headlines…

In fact, Business Insider recently ran a story about a person who was able to take home a massive 2,400% return in just *five days*.

BUSINESS INSIDER

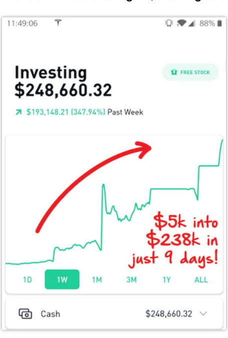
Trader Raked in 2,400% Return in 5 Days

That was enough to turn their $5,000 starting stake into more than $123,000!



But just two days later they had to run an update for the article…

Because investment had more than doubled again, soaring to almost $250,000.



Have you ever even heard of an average investor making the news because of a trade he made?

That's how explosive the situation is right now.

And these stories of regular people making fortunes in the options market are starting to pop up everywhere.

Here's one reported by MarketWatch where one person was able to make a small fortune in just a matter of weeks…

MarketWatch

Trader Turns $100,000 into $2.5 million in just a few weeks… retires

Doesn't that just make your jaw drop?

Think about it…

After only a few weeks of trading options…

This person will never have to work another day in their entire life.

In fact the article goes on to say that he chooses to spend his time *"living the high life and bouncing around the U.S., Southeast Asia, Japan, etc."*

Now it looks like he spends most of his time posting pictures of his new life on Instagram, saying ***"I've got a huge bucket list and decided it was time to start checking a lot of things off… I still check on the markets from my phone, but in Thailand or St. Maarten."***

Can you even imagine that?

I mean how nice would it feel to be able to unplug from the markets, your job or any kind of responsibility completely.…

And just start checking some things off your bucket list?

Especially after just a few weeks of options trades.

And if even just a few weeks sounds like a long time to you…

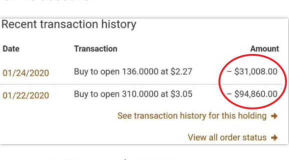
Take a look at this:

Business Insider reported a story about a man who claimed to have made $4.3 million on some Tesla options in just ***two days***…

BUSINESS INSIDER

[Man] raked in a $4.3 million gain [in 2 days] by betting on Tesla's skyrocketing stock

Here's a screenshot of his account:



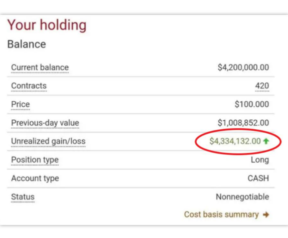
Recent transaction history

Date	Transaction	Amount
01/24/2020	Buy to open 136.0000 at $2.27	– $31,008.00
01/22/2020	Buy to open 310.0000 at $3.05	– $94,860.00

See transaction history for this holding
View all order status

As you can see, he starts off with about $126,000…

And then just two weeks later his account looked like this:



Your holding

Balance

Current balance	$4,200,000.00
Contracts	420
Price	$100.000
Previous-day value	$1,008,852.00
Unrealized gain/loss	$4,334,132.00
Position type	Long
Account type	CASH
Status	Nonnegotiable

Cost basis summary

Imagine becoming a millionaire practically over the weekend.

Achieving financial freedom, a goal most people spend their whole lives working toward, in just two short days…

That's the power of a very well-timed options trade.

And as if that wasn't incredible enough…

That same person bought another $46,000 worth of more conservative "longer dated" Tesla options…

And that netted him another $1.3 million!

Bringing his total profit to $5.6 million on just that one company in less than 10 months!

Now, this is rare to do, but that's amazing, right?

I can't think of any other investment that's made so many people rich in such a short amount of time.

And if you're willing to act quickly…

If you're willing to risk a little bit of money…

You can get in on this red-hot market too.

Because Now It's YOUR Turn to Try to Strike It Rich in the Most Explosive Market on Earth!

And your timing could not be better…

You see, the Fed is already pumping trillions of dollars into the market…

And everyone agrees that they will likely be pumping trillions more.

That will send the prices of these options into the stratosphere.

And by knowing how to get into position before that happens you have the chance to set yourself up for some of the biggest returns you've made.

But before you do, there is something important you should know.

Do NOT Rush to Buy Just Any Options Play out There…

You see, there could be as many as 30 million options contracts traded on the market in a single day.

And for every options play that has the potential to be a *massive* winner…

There are thousands of losers.

That's why knowing which options plays have the potential to rocket to the moon…

And which ones are likely to crash and burn…

It absolutely has to making money in the markets.

But that's exactly what makes my job special.

My name is Alan Knuckman.

And I've been professional options trader for over 30 years.

You may have ever seen me on TV – I've been on more than 5,000 national broadcasts

All because I've developed a reputation for being one of the most accurate options pickers on the planet.

In fact, after I started profiled publishing my options research and recommendations in my multiple investment newsletters...

I was quickly crowned a following of more than 100,000 people who are looking to learn how to navigate the options market.

And they have not been disappointed.

In fact, my readers across ALL of my services have recently had the chance to close out **27 winning trade recommendations in a row.**

All within one single month!

In fact, one day there were so many winning trade alerts that one of my readers sent me this note:

Just to put that number in perspective...

If you were able to invest $1,000 in each of these 79 winning trades...

You'd now be sitting on massive nest egg of over $130,491.84.

All in just a single month.

Now, keep in mind this 100% winning streak is just to show you an example of the power of options.

Charts, we had losing trades before and after this streak.

But with more and more options having massive historical breakout potential...

I've decided to start a brand new research service determined to find the absolute biggest gains on Wall Street.

And help amateurs get a leg up in a game dominated by the pros.

It's called **Alan Knuckman Big Option Trader**.

And it's the only place I'm going to publish special option plays that I think have the potential to explode 1,000% or more in just a matter of weeks.

Today I'm willing to admit that returns like this are rare, and most of them are just long options bets.

But if you're avoiding options plays like this altogether right now...

Then you're missing out on the most explosive market in history!

Look, I've been a professional options trader for over 28 years and I've never seen a situation quite like the one we are in today.

Right now, with the Fed essentially backstopping the economy and flooding the stock market with money.

Regular people are taking home huge returns in record amounts of time, as you've seen for yourself.

And if they can make money in this market, then you can too.

As long as you're willing to start **right now**.

And what is the best way for you to get an edge in this market...

Giving you the chance to get in on the most explosive options plays?

Here's the Secret to My Success... And YOUR New "Edge" In This Market

Look, I'm about to give you an edge in the options market.

One I can guarantee you no one else has.

That's because I had to earned over $1.3 million to get access to it...

Just take a look at this contract:

That's a deal I signed worth $1.3 million...

To give me access to a patented tool...

One that can scan the entire market in milliseconds for the BIGGEST options moves.

Which is why I call the Options Profits Multiplier Scanner, or OPX for short.

And it's been one of the ways for to access in picking the very best options plays.

You see, it has the power to scan the 30 million plus options that are traded in a day looking for three things...

Three very basic criteria a trade must meet before I'll even consider recommending it.

OPX Criteria #1: MASSIVE Upside

The first thing I try to identify using the OPX is whether a trade is going to deliver a HUGE upside.

I'm talking about the most powerful upside.

Which is one of the reasons we are options...

They can give you leverage.

Which just means more money that you would get investing in stocks!

OPX Criteria #2: Completely LIMITED Risk

The OPX scanner helps me identify the play with the most upside potential, while also limiting risk.

What I mean is we want to find the most dirt-cheap trades that could still take off in a big way.

Which is another benefit of using options: They have completely limited risk.

I'm required at exactly the amount you put in.

What you see for the option is what you stand to lose.

That's why I always remind my readers to never invest more than they can afford to lose.

We are here to find massive options stakes that can change your life.

So you should be willing to lose up to 5 out of 10 times while hunting for the big winner.

OPX Criteria #3: An Urgent Catalyst

The final criteria a trade must meet is whether or not a big money move is about to take place...

I'm talking about an urgent event that could send the stock soaring.

It could be a good earnings report, big company announcement or positive shakeup in management.

Anything that could result in a huge, short-term move for us.

And that's it!

We're targeting trades with BIG upside, LIMITED risk, with an urgent catalyst on the horizon.

With a 50-year options trading veteran on your side...

With a system this powerful at identifying winners...

The upside is truly unlimited.

Which is why I'm inviting you to join me.

Now join me and thousands of other readers on the journey to the biggest gains on Wall Street

Today, I'd like to invite you to subscribe to my introductory options newsletter, **Alan Knuckman's Big Option Trader**.

Think of **Alan Knuckman's Big Option Trader** as a community of folks, many just getting with started with options...

All looking for the same thing...

To take a small amount of money – And turn it into a fortune.

And what I do for them is simple.

I scan the market looking for the very best options trades.

Options trades I think could be on the verge of exploding 1,000% or more in just a matter of weeks.

Then I publish all my research along with these specific options recommendations every month in **Alan Knuckman's Big Option Trader**.

Break down everything.

I show you which options I have identified.

I show you exactly how to buy them (with simple, easy-to-follow instructions).

I'll even tell you when to buy them, and I'll even let you know when to cash out.

Or even if you've never placed a single options trade before...

Everything has been made as simple and as easy as possible to put you in the best position to profit.

And with a market rebound like me and my $1.3 million scanner guarantee that we are.

You're in good hands.

Plus, you get access to all of my readers' To Editor you results. Period.

I'm talking about the best of the best research and options recommendations sent to you every single month.

Note that could very be on the path to ultimate freedom.

Just that it has for a number of my readers across ALL of my financial publications...

Just take a look at what some of them had to say:

> "Hey Alan, You're freaking amazing. **I started out with just $500 on May 4... and now on May 27 I am already up to $1,250.** Way ahead of my goal of doubling my money every month. You are the man! Thank you and always keep teaching me... and keep killing it!"
>
> **– Mark Palmetto**
>
> **Made a 300% gain** on that last trade in about a week! Not bad, eh?
>
> **– Jonathan Showers**
>
> "Alan Knuckman is a financial genius. He is my best friend ever though we will never meet. **My service is the most research service that I pay time up to the minute.**"
>
> **– Gordon Williams**
>
> "I mean to tell you... **Back in the '70s I had a Gold seat on the CME trading floor and trained options for my own account. I wish there was a service like your's back then.**"
>
> **– Harold Bentley**
>
> "As soon as I get your trade alerts I make the trades on fast as my fingers will move. I've made two trades now and it's been GREAT!!! **The Gravity is a state of mind and I'm glad I found your service to help me. I'm sure I'll be with people with a good pace and satisfaction. So it's awesome to find somebody that actually delivers MORE than he promised.** Your service is fun, its exciting and the best part is... it makes me MONEY!!!"
>
> **– Jane Chao**

Now I want to see a note like that come from YOU.

In fact, I have a brand new trade recommendation set to go live right away...

A recommendation you can access for FREE – when you subscribe to **Alan Knuckman's Big Option Trader** today.

And if you act right now, you'll enrollment to this special "Fast-Action" Bonuses.

These things to help get you up to speed before my next trade goes live.

"Fast-Action" Bonus #1
The Secret $50 Options Blueprint

Thanks to crack in my mind-blow **Alan Knuckman's Big Option Trader** could help you kick-start the life of your dreams.

So first, I want to send you a guide on exactly how to get started...

Today, when you take me up on my offer to subscribe to **Alan Knuckman's Big Option Trader**...

You'll instantly gain access to your own digital copy of **Secret $50 Options Blueprint**.

This thoroughly but easy-to-understand guide will walk you through exactly how to get started with options.

Inside, you'll discover...

- **The 4 "Ninja" options primed to explode in the coming weeks**, with complete, 60-second instructions on how to take advantage
- **How to turn a $50 bill into a LIFE-CHANGING sum of money with a series of simple trades... in as little as a month!**
- And how to test options for yourself for FREE!

This dream you have much money is being made out there RIGHT NOW! In the options market...

And how you can start with as little as $50 if you choose...

Now it's YOUR turn to do exactly that.

And this guide alone will get you started.

But just to make sure you're completely covered...

I've put together another FREE "Fast-Action" bonus for when you subscribe right now...

"Fast-Action" Bonus #2
Video MASTERCLASS

Just to make your transition into **Alan Knuckman's Big Option Trader** even easier...

I've recorded a series of in-depth "masterclass" videos.

This series of videos will show you step by step, in an easy-to-follow format, exactly how options work and how to trade them.

I'll break down everything I look for in a big trade...

My complete three-step strategy...

And how YOU can pick the best trades on your own.

You'll discover everything you need to know to get started making money with options right away.

Including...

- **Getting started with trading, even if you know nothing about stocks, options or finance at all...**
- A complete, simplified breakdown of my **"veteran level" trading outlook** and strategies...
- What it takes to get **permission to trade options** from your brokerage account...
- The **"hidden" number to look for** to spot trades with a 75% chance of working in your favor...
- **And MORE!**

And you'll get complete access to all of these videos at no extra charge when you subscribe to **Alan Knuckman's Big Option Trader** today.

But this training is only the tip of the iceberg when it comes to options...

Which is exactly why I've arranged a third FREE "Fast-Action" Bonus with your subscription today.

"Fast-Action" Bonus #3
The One-Day Millionaires Club

How to use a $1,500 options trade to create "disaster insurance" to profit BIG when the market tanks!

What if the next big market crash made you more money than you've ever made in your life.

All from one single dirt-cheap investment?

The real power of options is that you can earn make money when stocks go down.

And in the "Fast-Action" bonus you'll get free just for signing up right now...

I'll show you exactly how.

You'll see how to make one dirt-cheap options purchase...

And when the market takes a nosedive...

You could walk away richer than you ever thought possible.

I'm talking about possibly becoming a millionaire from one single $1,500 trade that only bites when the market tanks.

Which is why I consider options trades like this an "disaster insurance"

Inside this guide, you'll see...

- How some of the biggest hedge fund managers in the world use them...
- How famous billionaire Mark Cuban used these as a "hedge" to preserve nearly $1.4 billion when the dot-com bubble burst...
- And how placing one single dirt-cheap "disaster insurance" trade will have you looking forward to the next market crash, and NOT fearing it!

In this guide I call **The One-Day Millionaires Club**... how to use a $1,500 options trade on disaster insurance to profit BIG when the market tanks!

You'll learn exactly how to do this yourself.

So you can not only set yourself up to make money when stocks crash higher...

But also get in position to make money even when they drop.

There's no saying when the next big crash will happen.

But one thing is for certain...

Right now, we're seeing more money being pumped into the economy than ever before...

This Could Be Your LAST CHANCE to Make a Fortune!

The Federal Reserve has crowded up the printing presses – And they show no signs of slowing down.

In March 2020, when the Fed was just starting out, The New York Times reported:

> The New York Times
>
> *The Fed's Message: The Money-Printing Press Will Run Forever If Need Be*

And then in June, CNBC reported that out of the $2.3 TRILLION the Fed said it could pump into the economy...

Only $143 billion has been unleashed so far.

CNBC

The Fed said it could supply the economy with $2.3 trillion. It hasn't come close so far

Meaning there's still over $2 trillion ready to flood the market any day...

And Time magazine reported:

TIME

Many analysts credit the market boom largely to the Fed's actions.

So whether you agree with it or not...

One thing we've always said on the trading floor is...

"Don't Fight The Fed"

The "big money" is happening right before our eyes.

You've seen how REAL people have been making life-changing amounts of money...

Now I want one of those to be YOU.

But the truth is...

The longer you wait, the more you risk missing out on this historic moment.

This could very well be your last chance to get started before everything comes to a screeching halt.

Because Your Biggest Trade Ever Could Be Setting up Right Now

Like I said, I have a new trade alert lined up for my readers today.

Ready to hit your inbox as soon as you give me the go-ahead.

Now, because options can move very fast...

If you want to get in on my research and trade, the best time to claim access is right now...

So I suggest you make your decision as soon as possible.

Of course, nothing in the markets is guaranteed...

But this one upcoming trade could be THE trade that kick-starts your dream life.

This one single trade could be the one you look back on and remember...

"This is where it started"

Unless you sit and watch this opportunity pass you by...

So the only question is...

Are you in or out?

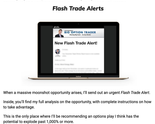
Here's what you'll get when you subscribe today...

In addition to the three "Fast Action" Bonuses I already mentioned...

Your subscription to ***Alan Knuckmark Big Option Trader*** comes pre-packed with tons of value.

Let me give you a complete overview of what you'll get on a now reader...

Flash Trade Alerts



When a massive momentum opportunity arrives, I'll send out an urgent Flash Trade Alert

Inside, you'll find my full analysis on the opportunity, with complete instructions on how to take advantage.

This is the only place where I'll be recommending an options play I think has the potential to explode past 1,000% or more.

Now, even though these will be dirt-cheap plays... these are not "bet the farm" type of plays.

That's why I recommend you start small and be prepared to lose your investment.

But as I've already shown you, this is an ideal market for hitting this winner.

And even hitting even a few big winners like this could make you a fortune.

Due to the amount of research that goes into each opportunity, you'll receive two alerts per month on average.

But that's not all you'll get when you subscribe today...

You'll Also Get Secure Access to Our Members-Only Area and Model Portfolio

When you subscribe today, you'll be issued a unique account.

One you can use to access everything ***Alan Knuckmark Big Option Trader*** has to offer...

From the most recent Flash Trade Alerts...

Research reports...

To, best of all, members-only access to our Model Portfolio...

Where we'll be tracking all of our recommendations here ***Alan Knuckmark Big Option Trader*** for you.

It's the single place where you'll be able to access everything you need for your subscription.

And it comes at no extra charge when you subscribe today.

Speaking of, I forgot to mention...

Weekly Zoom Video Calls

Every Friday, you'll have the chance to tune in to a video call as I give subscribers my thoughts on the markets.

I'll break down what went on in the market this week...

What I see on the horizon...

Updates on the model portfolio...

And you'll have the opportunity to submit questions for me to answer...

Just keep in mind I don't give personalized investment advice.

No doubt these calls alone — delivered every week — should cost $2,000 to access.

But they're included FREE with your new ***Alan Knuckmark Big Option Trader*** subscription.

Of course, this is all backed by...

A ZERO-Risk Unconditional GUARANTEE!

Trust for a second about how much all of this would be worth to you...

To become one of the newest subscribers to ***Alan Knuckmark Big Option Trader*** today.

To get the biggest opportunities in the stock market right in your inbox, with specific moonshot options trades to make every single month.

Think about the power you've seen from the examples I shared above.

The power to take as little as $35...

Hit a "home run"...

And turn it into $10,000 in just a month.

How much would that be worth to you?

Now, whichever number you have in mind...

Toss it out the window.

Because I'm going to effectively make the price here irrelevant.

I'll send you **The Secret $50 Options Blueprint** (including one trade to act on right away).

Complete access to **Alan Knuckmark Big Option Trader** Masterclass videos...

And your **One-Day Millionaires Club** guide.

Plus ALL of my monthly Moonshot Trade Alerts for a full year...

Video calls every week...

All at an additional cost when you sign up today.

And if for ANY REASON you are unsatisfied, you'll have 100 days — a full SIX MONTHS — to get back every penny you've spent on your subscription.

No questions asked.

And like I said, even if you're a die-hard skeptic and don't believe you can make money with options...

You can test them out with ZERO risk...

All by paper trading along with ***Alan Knuckmark Big Option Trader***.

Meaning you'll have ABSOLUTELY NOTHING TO LOSE joining ***Alan Knuckmark Big Option Trader*** is by far the best no-brainer.

So what are you waiting for?

Here's What to Do Right Now...

Take a look below at everything you'll get as a new subscriber...

Think about how much all this is truly worth to you.

What would it mean for you to possibly hit one big trade that would change your life forever?

All guided by hand by a 28-year trading floor veteran.

Everything You'll Get if You Subscribe Right Now:

- **Flash Trade Alerts Every Single Month ($2,000 VALUE)** — each pre-packed with detailed analysis to help YOU make big, fast money. ON average, you'll receive 2 alerts per month
- **Your Weekly "One on One" Videos** — At the end of each week, you'll get an invite to tune into a "one-on-one" where I'll be answering frequently asked questions from my trading floor days, breaking down the latest developments in the stock market, and more. ***Alan Knuckmark Big Option Trader*** keep in mind I cannot and do not give personalized investment advice
- **REAL-TIME Trade Updates** — As you know, options gains can happen FAST. So I'll be monitoring any recommended trades and giving you updates in REAL-TIME. I'll send out an email when it's time to sell and take some profits!
- **Members-Only Access to the Alan Knuckmark Big Option Trader Website** — You'll receive a secure login you can use to check out the website, browse any trade alerts, past issues or videos and, most importantly, view our model portfolio
- **Fast Action Bonus #1** — *The Secret $50 Options Blueprint* — A thoroughly researched and detailed but extremely straightforward report all about options — and how you can make them work OUT figuring stocks if you want to use them to hold stock your market notice, starting today.
- **Fast Action Bonus #2** — ***Alan Knuckmark Big Option Trader*** Video Masterclass — A detailed series of videos designed to walk you through how to trade, as well as my three-step system for picking BIG TRADES
- **Fast Action Bonus #3** — *The One-Day Millionaires Club*. How to use options to turn a small stake into a life-changing fortune. Learn how a handful of everyday single trades in history were made by everyone positioning themselves ahead of a "black swan" market event. In this guide, you'll discover how to get on the right side of a crash. I'm talking about one simple dirt-cheap trade that could EXPLODE the next time the market tanks.
- **All Backed by my ZERO-Risk 100-Day Guarantee** — ***Alan Knuckmark Big Option Trader*** for 100 days, a full SIX MONTHS. And if for any reason you're not satisfied, just let me know. I'll refund every single penny you've spent on your subscription. I'll give all your money back. No questions asked. Even if you're just interested in the research, you can make your experience completely zero risk by paper trading the recommendations if you like. And if it doesn't work out for you, get yourself a refund, no worries!

As you can see, we've packed a lot into ***Alan Knuckmark Big Option Trader***.

Two trades alerts per month...

Real-time call alerts...

The model portfolio...

Weekly "one on one" videos to always keep you in the know...

And your special Fast Action bonuses...

All backed by a six-month money back guarantee.

Considering all this and the profit potential you could see...

We should charge upward of $2,000 per year for access, like some of my other trading research services.

But just to help folks get their foot in the door trading, the "retail price" for ***Alan Knuckmark Big Option Trader*** is a modest $299.

Even at that price, I think you'll agree it's a steal.

But today, I'm set up a special "introductory" price for new subscribers.

You'll pay as little as $49 for everything you see above.

But ONLY if you take action on this offer right now.

That's Less Than $1 per Week for *Professional* Options Research

$49 for the year comes out to less than $1 per week.

What else do you spend $1 per week on?

You might even spend 10 times that on coffee alone.

Go out to eat just two times this week and you might pay as much as the full yearly subscription fee!

Isn't it worth it to you to spend less than $1 per week for the best way to master options?

Just click the big button below to be taken to a secure order form.

Yes! I'm Interested in Joining *Alan Knuckmark Big Option Trader* Today!

You Can Review Your Order Before It's Final

You'll be able to review all of the details of your order before they're final.

But in case you're still unsure of me or my strategies...

Let me address some questions you might have.

FAQ

QUESTION: If this strategy is so good, why even share it? Why don't you just do this yourself?

ANSWER:

Also great question!

I do!

While I don't participate in the same trades as those I'm recommending to readers of ***Alan Knuckmark Big Option Trader***, I use options all the time. I work on the Chicago Board OPTIONS Exchange. It's literally how I make my money.

Plus, sharing my strategy and showing readers what to look for and how to make the trades doesn't make the options market any less profitable.

QUESTION: Do you just keep all the best trades for yourself, then?

ANSWER:

Nope!

If you follow me for a while, you'll hear me say this time and time again...

There is always opportunity in the market. ALWAYS.

And the opportunities are endless. **I can never see for sure if one trade will work out better than another because nothing is guaranteed.**

But I know from three decades of firsthand experience that there is always opportunity out there.

And I can also say that RIGHT NOW is one of the absolute best times to be a trader.

QUESTION: Can't you lose a lot of money trading options?

ANSWER:

With the strategies I'm going to show you, you can only lose what you put in.

That said, don't put your life savings into any one options trade. That's dumb. Start small and build up your account first. **The Secret $50 Options Blueprint** I'll show you exactly how to do that.

QUESTION: Aren't there high fees associated with options?

ANSWER:

Not anymore.

There used to be high commissions that you'd have to pay to your broker, but now there are many options trades options for free. That's a big reason options are starting to become popular.

QUESTION: What if I've never traded an option before?

ANSWER:

Perfect!

I'll show you exactly what you need to do to get started. It's as easy as trading a share of stock. It's not complicated at all, and I'll tell you exactly what to do to get into position for the options I'm recommending.

QUESTION: Have you helped people make money with options before?

ANSWER:

Of course. You've seen some of my readers' testimonials from my various publications already but here are some more.

*Alan, I just wanted to say, **please never retire**. Because, right now you're helping me make some BIG money!!!*

— Nathan Jacobson

*Alan, your service is FANTASTIC! I have participated in almost all of your trades and I am up 800 TIMES. **The six-figure income I mentioned I am turning a REALITY**. You literally can't make your service any better. I mean how do you improve on perfect?!*

— Emily Lambert

*"I meant to tell you... **Back in the '70s I had a friend who was in the AMEX trading floor and traded options for my own account. I wish there was a service like yours back then!**"*

— Harold Bentley

*"As soon as I get your trade alerts I make the trades as fast as my fingers will move. I've made ten trades now and it's been GREAT!!! **The family is a state of mind and we are a family of successful people. Your service is for people with a good guess and combination. So it's awesome to find something that actually delivers MORE than he promised.** Your service is fun, its exciting and the best part is... it makes me MONEY!"*

— Dave Chac

"So my overall profit on this trade is 10.71% in just nine days! And even better I made the trade in my Roth IRA, so no taxes on that capital gain, baby! Keep 'em coming, Alan."

— Holly Brears

I have been terrified of trading options. You've given me the confidence to venture into this and trading on my own. And I must say I have been very successful following your and your team's advice."

— Christopher Moran

*Alan Knuckmark, you're amazing. I'll be honest: I belong to high-end investment newsletters and nothing compares to you at all. As a matter of fact the others seem pretentious and boring in comparison. Your service is fun and exciting and terribly advice. They cost me tens of thousands of dollars and were just a complete joke. But not you, Alan. **When I tell my friends how much money I've made with you... they literally don't even believe me.** Keep up the good work, Alan.*

— Jordan Vardoulek

"I've spent too much money subscribing to services. Everyone has a new, revolutionary system that will make you rich and they charge a fortune for it. Never. Seems to me their primary goal is just to get $$$ from as many people as possible and then make good guesses that may or may not be as good as everyone says!. I have discovered only a handful of those people who are so highly trained who seem to be a reliable source of stock information. You are one of the few."

— Regina Llewellyn
