"DO NOT Buy a Single Ounce of Gold Until You Watch This Urgent Video…"

Because I've Found a little-known Investment Play That **Moved 21 Times HIGHER On Average Than The Price of Gold Itself During The Last "Gold Window!"**

And my publisher is investing $1,000,000 over five years to give you a chance to do the same.

Dear Reader,

Hi, Jim Rickards here.

If you've seen me on CNBC…

Or watched the documentary about money that I starred in on the History Channel…Or read any of my best-selling books, including *The New Case For Gold*…

Or if you subscribe to my Strategic Intelligence monthly newsletter…

Then you know that I believe gold will reach $15,000 per ounce by 2026.

The math is simple.

Once paper currencies fail (which history proves they ALWAYS do)…

A world-wide hard asset currency with just a modest 4% gold backing would mean that gold would instantly be revalued at **$15,000 per ounce.**

I believe that this isn't a matter of if, but **when.**

That's why I normally recommend that every single American put 10% of their net worth into gold bullion – in the form of the coins you're looking at on your screen right now.

I say, American Eagles…

Or 1 oz. American Buffalo coins…

Owning these coins is the single best thing you can do to protect yourself from a fiat currency collapse.

But here's the thing…

Right now I'm pounding the table…

Urging You NOT to Buy Another Oz. of Gold Until You Read This Message in Full

Because a rare window in the gold markets has just opened up…

Giving you the chance to grow much richer…much faster…than simply buying bullion.

In fact, what you're about to see has shown us these investments moved 21 times HIGHER on average than the price of gold itself during the last "gold window".

That's right, this model portfolio of investments boasted a 374% average increase to every 1% increase in gold itself during the same time frame.

Instead of just betting on the price of gold going up, there's another option that could accelerate your wealth.

Sold a different way…

If I'm right and gold reaches to $15,000…

Then every $10,000 invested in what you see in this video could grow to a best case, exceptional $374,170 by 2026.

Even if I'm wrong, and gold only hits $3,500 in the years ahead…

Then what you're about to see could still hand you $36,988.

I couldn't be more serious about this opportunity.

And I'm going to prove it to you in three important ways…

First, **I've invested $1,000,000 of my own money in personal gold holdings and my publisher is committing an additional $1,000,000 to fund the five years on a new project to help you profit from this rare gold window.**

Second, **I've dropped everything to find a new partner that's dedicated to helping you find the biggest opportunities in the coming gold bull market.**

Third, **this rare gold window is urgent enough for me to once again dedicate my time and resources to take advantage of this opportunity for my readers.**

You notice I said, "once again".

This is the exciting part…which I will explain in a moment.

But first, let me tell you about my partner, a true legend…and a man I have known and worked with on other ventures.

He's a professionally trained analyst with 18 years of experience covering the mining industry…He just personally used the latest rare gold window opportunity to make exactly $199,328 on a $245,000 starting stake in just 20 weeks…without buying or selling a single oz. of gold.

In a moment, I'll show you his actual brokerage statements…

And because of an exclusive deal I've just signed with this man, he's going to let me reveal everything – every single step of how he made or figures to finally weave.

So, please…

Do NOT buy a single ounce of anything until you read what I have to say in this briefing.

There's no time to waste.

Because there's no telling how long this window will remain open.

So let's get started.

5 Decades… 5 Gold Windows… 1 Serious Way To Make Money

When this window opens up in the gold markets…

Just a single investment can turn mini-micro movements in gold into MASSIVE money-making opportunities.

I'm talking about rare, exceptional wealth-maximizing gains of 328% to 374% gains, BTdS over two years, or even 5,227% over four years.

Now, before we go on, let me make something absolutely clear…

- The secret I'll show you today is **not** some rare "MS-70" coin or historic collectible (in fact, I openly say that most people have no business investing in collectible coins without guidance, which I will be giving you today)…
- It has **nothing** to do with day trading (unless you're a pro, day trading is too difficult for most people)…
- It's **not** about buying the stock of a big gold producer like Newmont or Barrick Gold (they're too slow to make a lot of money quickly)…
- And it's **not** forex trading or risky commodity futures (they're the easiest way to simply hand over hard earned money to a broker)…

Instead, what I'm going to show you is an easier and faster way to make money.

You see, we're in the midst of a very valuable and very rare "Golden Window."

You won't hear this window talked about on TV.

Most pundits don't know about it.

But as the government's trusted currency advisor, I can tell you this for certain:

This window has opened at least FIVE times in the past FIVE decades.

- **Once from 1976-1980…**
- **Once from 1983-1986…**
- **Once from 2000-2007…**
- **Once from 2010-2016…**
- **And right now, today's current gold window, in 2020…**

Sold a different way…

Once about every 5-10 years, you have the rare chance to make a fortune simply by tweaking the way you buy gold.

This investment I'll share today has the power to **magnify** your gains in gold.

And the very best way to show you how this works is through an example…

So maybe you remember the run-up in gold from 2015 - 2016.

Sending gold up from $1066 per ounce towards the end of 2015 to around $1300 per ounce in the middle of 2016 - a 21% gain.

By simply holding gold, you'd have turned every $10,000 into a profit of $3,076.

Not bad…more than the average return for the Dow…

However, take a look at this:

15 Times Better Than The Increase In The Price Of Gold…

KFI Mining Inc. [KFI:TSX]

While this "golden window" opened up, my secret gold investment made **15 times** the gain of gold bullion that

That means the same $10,000 investment would have turned into $47,400…

This time, the secret returned **41 times** more than gold.

An investment that returned 374% in less than two years!

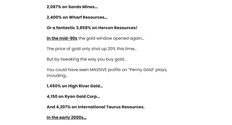
That means a $10,000 investment that turned into $47,400…

And that's not even the best example to show you…

Take a look at one more example from the same 2015 run-up…

58 Times Better Than The Increase In The Price Of Gold…

Victoria Gold Corp. [VICTF]



This is a whopping **58 times** more profits than simply buying gold…

This investment returning a stunning 1227% gain in four years…

Turning $10,000 into $132,700.

Even a smaller stake of just $5,000 returned a profit of $61,350

Which would you rather have…a profit of $3,076 from buying gold bullion or these type of gains I'm showing you?

Now…understand that these are the top performing recommendations I made to readers during the last "Gold Window" and are atypical gains. But what you can expect from my research service is to typically see an average gain per investment of 21% in about 18 months.

Are you getting that from your investments right now?

Listen, here's the bottom line:

While I believe every portfolio should hold gold in the form of bullion as an **ultra-safe** option…

There's also a way to play this "golden window" to take advantage of these type of returns…

You're probably wondering what this secret is…how to use it to multiply your money…and how to get started.

I'm going to answer all those pressing questions right now.

Introducing: "Penny Gold"

Put simply, I call this secret **"Penny Gold."**

And every time gold soars…

A few "Penny Gold" investments rockets up farther and faster.

I looked back at history and found some of the top performing Penny Gold's investments from each time the gold window's opened up…

In the late 70's/early 80s…

This gold window gripped open.

Gold jumped 267%.

Impressive, right?

But "Penny Gold" shot up even faster, including…

2,087% on Sands Mines…

2,400% on Wheat Resources…

Or a fantastic 3,583% on Hecon Resources!

In the mid-90s the gold window opened again…

The price of gold only shot up 20% this time…

But by tweaking the way you buy gold…

You could have seen MASSIVE profits on "Penny Gold" plays, including…

1,693% on High River Gold…

4,150 on Ryan Gold Corp…

And 4,207% on International Taurus Resources.

In the early 2000s…

The gold window opened once again…

Gold rocketed 170% higher.

And you guessed it…

A handful of "Penny Gold" plays took off, including…

4,194% on Seabridge Gold…

5,900% on Aquiline Resources…

And a life-changing gain of 32,310% on Novadiol.

In the mid-2010s…

More than **NINE TIMES your money on Glyncl Gold…**

5,800% on Gold Canyon Resources…

And a huge 8,500% on Trelawney Mining.

That brings us to the most recent gold window opening in 2020…

It just the past few months, there have already been gains like…

372% on Teuton Resources…

1,086% on Kesselrun Resources…

And 2,837% on Freegold Ventures.

You see, it's time once again to take advantage of these type of gains in gold mining companies.

Now…understand that these are the top performing historical recommendations I made to readers during the last "Gold Window" and are atypical gains. and I found them with the benefit of hindsight. But what you can expect from my research service is to typically see an average gain investment of 21% in about 18 months.

WARNING: Investing in Penny Gold Companies Is NOT An Area For Novices

As you've probably guessed by now, Penny Gold is my name for the junior gold and silver mining companies.

These are companies that literally trade for pennies during the start of a gold bull market…

But can sometimes go up to 15x…15x…even a rare, exceptional 15x the profits of just buying gold bullion itself.

In my recently published book *The New Case For Gold*, I had this to say:

> "[Penny Gold] companies will each have unique characteristics related to quality of ore, the competence of management, corporate finance, and other one-of-a- kind factors."

The key word there is "unique."

So, yes…The gold can be fantastic.

Fantastic…

But it's not the end all, be all.

Because there are other factors at play…

Factors that can make or break your investment…

Factors that can make you a lot of money…

Or cost you your entire investment.

That's why I'm so excited about the opportunity I'm about to share with you today.

My partner has a proven track record of finding the best of the best Penny Gold companies…

He's been doing it for years…

And he's made his subscribers a lot of money…

Including his own family…

Which is why I'm so excited to be working with him on this project.

Introducing: Jeff Berkowitz

Jeff Berkowitz is a Wall Street veteran who's been in the mining industry for 18 years.

He's been a professional analyst covering the mining industry…he just personally used the latest rare gold window opportunity to make exactly $199,328 on a $245,000 starting stake in just 20 weeks…without buying or selling a single oz. of gold.

Jeff's been a guest on Bloomberg TV…he's been quoted in the Wall Street Journal…he's been a guest on the Kitco News…he's been a guest on the Mining Stock Live…he's been a guest on the Resource Rockstars

If you don't understand the unique characteristics of each mining play, you can just as easily lose your shirt.

That's why you simply MUST have an expert to navigate this field.

Someone that knows how to judge the quality of ore deposits...

Someone who knows how to separate real opportunities from management's tall tales...

Someone who knows exactly *when to get in...*

And the *precise moments to take your profits* on Penny Gold opportunities.

That's why I just made one of the BIGGEST decisions of my financial research career...

To bring back a publication exclusively for gold investors...

My publisher has given the "green light" on this **$1 million dollar project...** to make sure YOU have the best information on these penny gold plays.

More on that in a moment...

I just showed you many examples of huge gains from "Penny Gold" plays each time a gold window opened up...

And in just a moment, I'll introduce you to our system I'm using to identify the best 13 plays that could make you money as the latest gold window starts to open.

You'll see how its claim the name, ticker and even my exact allocation model for investing in these 13 "Penny Gold" plays in just a moment...

But before I give you all the details on them...

Here's something you should know...

My Publisher Committed $1 Million To Secure The World's Top "Penny Gold" Analyst

Look...

You know I'm an major media outlets like CNBC, Bloomberg, Fox Business, and others on the regular

London, Switzerland, Japan, Australia, the Middle East, France, Brazil, Uruguay, Canada... just to name a few destinations.

I've met many important people along the way...

And I've gone to many interesting places along the way...

In fact, here I am at a gold vault in Switzerland...(with millions in gold bars!)

And my work on gold has been featured in...

> **James Rickards is the James Bond of gold.**
>
> Forbes

> Anyone pounded by such riddles should read James Rickards' "The New Case For Gold."
>
> The Wall Street Journal

> Jim Rickards shared some key evidence [...] the yellow metal is a lot more important than the central bank makes it out to be.
>
> -TheStreet

> **Rickards explains why gold is particularly important to include in investors' portfolios.**
>
> Fox Business

> "Author James Rickards maintains that gold remains the real underpinning of the international monetary system"
>
> -MarketWatch

I'm not showing you these things to brag...

But you simply MUST know that I'm well connected to some of **the world's most powerful people.**

That means I could have had my pick of the litter to head up this new Penny Gold project.

But after years of searching...

Waiting for the perfect time for this gold window to open up...

I've realized the right man for the job is someone who has proven to me he knows about gold winners...

As far as I'm concerned, he's one of the top independent research analysts in the business.

Sure, he's a CFA charterholder with eighteen years of professional experience...

And he has a long track record of recommending winning trades on gold stocks, including money doubling plays like...

216% on Detour Gold in 21 months

185% on Agnico Eagle Mines in only 13 months

102% on Yamana Gold in just over a year

59% on Kinross Gold in about 9 months

In fact, his complete track record for gold stock recommendations working with me on other projects had an average gain of 50%!

Have you been making that in the market? But I didn't want just an academic or a connected insider to head up this project.

After all, there are a lot of academics and insiders I've met that are TERRIBLE at making money.

Instead, I wanted someone *proven* to have the investing acumen to find you the biggest winners in this new gold bull market...

So here's the bottom line:

The main reason I hand-picked this man to head-up my Penny Gold project is his PROVEN ability to turn junior mining investments into 6-figure profits.

To give you an idea of what I mean, let me share a quick, very personal story about my analyst.

$199,328 In Pure Profit... In Only 139 Days

As we'd both agree, it takes guts to go "all in" on any idea...

But that's exactly what my analyst just did.

He was so convinced in the secret I've been sharing with you today that, earlier this year, he went "all in" on this gold window...

In fact, he took a significant amount of his investment funds and allocated it to gold.

He bet huge on "penny gold" and gold plays.

And, get this...

His bet paid off.

Big!

He made **nearly $200,000 in pure profit.**

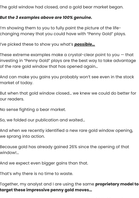
I've even got the financial statements to prove it to you...

Here's a look at the balance – right from my analyst's personal brokerage statement:

When the gold window opened, my analyst's account balance stood at $245,546:

After he went "all in" on this gold secret...

Here's another screenshot of my analyst's account on August 10 – exactly 139 days after the last screenshot I showed you:



See that account total?

His account ballooned to nearly $445,000.

That's a handsome 81% gain (more than three times the return of gold bullion).

Or said another way...

My analyst made exactly $199,328 in pure profit in just 139 days.

Now, he bet a massive amount and so you can see. Have zero investment experience. Understand that every investment carries risk and you should only invest what you can afford to lose...(that only makes sense, right?)

Now here's why that matters most to you...

- You've seen what's happening to the price of gold recently...
- You know that I think it can go MUCH higher...
- And I've proven to you today that the profitable gold window is open, right now.

So, I'm happy to announce that he has agreed to be the official analyst on my team for this research service.

As soon as the legal business of him committing to this venture was out of the way...

We got to work.

And if you know me, you know that I believe that having the RIGHT models and systems are the keys to success.

The reason the Federal Reserve often gets things completely wrong is that they're working with the exact wrong models.

Change the model, change the outcome.

The right model, or system... is key to making the right move.

And that's why I'm bringing back an old friend.

You see back in 2015, I started a new publication called **Rickards Gold Speculator** to take advantage of the last gold window that opened.

In that publication, we took advantage of the previous gold window opening...

By investing in the Penny Gold plays you see earlier... making 15x... 45x... even 136x move in gold prices.

And yes, to be transparent, I cherry picked some of the highest gains in our original publication.

Not all of our recommendations made gains like this... In fact, there were losses too.

We saw an average gain of 21% with a hold time of about 16 months over the four years we published.

And that is precisely the reason we stop publishing...

Yes, we were still able to beat the average yearly return of the Dow during those four years, but we wanted more for our readers...

The gold window had closed, and a gold bear market began.

But the 2 examples above are 100% genuine.

I'm showing them to you to fully paint the picture of the life-changing money that you could have with "Penny Gold" plays.

I've picked these to show you what's **possible...**

These extreme examples make a crystal-clear point to you — that investing in "Penny Gold" plays are the best way to take advantage of the rare gold window that has opened again...

And can make you gains you probably won't see even in the stock market of today.

But when that gold window closed... we knew we could do better for our readers.

No sense fighting a bear market.

So, we folded our publication and waited...

And when we recently identified a new rare gold window opening, we sprang into action.

Because gold has already gained 26% since the opening of that window.

And we expect even bigger gains than that.

That's why there is no time to waste.

Together, my analyst and I are using the same **proprietary model to target these impressive penny gold moves...**

Introducing: The "MIDAS" System

(Your Chance At Many Extraordinary 100, 410 Or Even 580-The Increase In Gold Bullion Prices!)

It's called the "MIDAS" System.

And it could be your key to making money on gold.

This proprietary system is the only place in the world that harnesses my years of experience as a global macro analyst...

Combined with my analyst's nearly two decades of experience studying the management teams of Penny Gold companies.

This system is a true breakthrough for pulling MAXIMUM profits in MINIMUM time frames from "Penny Gold" plays.

Here's what it stands for...

M

I

D

A

S

Right now, our MIDAS system has locked onto three very distinct types of Penny Gold plays...

Let me share every single one of those with you now. For FREE.

MIDAS "Penny Gold" Target #1: Gold Hounds

The first type of "Penny Gold" that MIDAS has targeted are rock-hound companies exploring for gold or silver.

These are the lottery tickets that can pay off big time as gold soars...

And MIDAS has locked on to FIVE of these right now, including:

- **The 40-cent company located where 125 million ounces of gold has been produced...**
- **The small-cap gold play with a BIG-NAME backer... (A legendary gold and silver investor has a 21% stake in this company)...**
- **A gold-rich Idaho company with a successful CEO who has been involved with $3 billion in M&A (In this business, the management is key!)...**
- **An undervalued junior miner located in the famous "Golden Triangle"...**
- **And, a $350 million "little guy" who mines in the same area that the BIG boys do... including Kinross Gold and Coeur Mining...**

MIDAS "Penny Gold" Target #2: Gold's "Silent Partners"

The next target are plays that are positioned in a little-known corner of the gold sector...

And I bet 99.9% of investors don't even know they exist.

You see, while these type of plays enjoy a lot of the upside potential when gold prices are going up...

They share very little of the downside when the gold price goes down.

That's what makes these companies gold mining's "silent partner".

And MIDAS has locked on to three of these companies, including:

- **A small Canadian-based firm with $8 properties in its portfolio, including projects from heavy hitters like Goldcorp, Barrick Gold and Agnico Eagle. (It pays a great dividend too!)...**
- **A tiny $3 company with over 3 million acres of mineral property in Canada's most prolific mining province. (It's backed by major investor Sprott and Sprott Mining!)...**
- **And an undervalued company with C$900 million ready to invest in capital projects, including one of the most exciting gold development projects in mining- (hint: Canada...)**

MIDAS "Penny Gold" Target #3: Gold's "Sleeping Giants"

The last target are plays that are positioned in a little-known corner of the gold sector...

And I bet 99.9% of investors don't even know they exist.

You see, while these type of plays enjoy a lot of the upside potential when gold prices are going up...

They share very little of the downside when the gold price goes down.

That's what makes these companies gold mining's "silent partner".

And MIDAS has locked on to three of these companies, including:

- **A small Canadian-based firm with $8 properties in its portfolio, including projects from heavy hitters like Goldcorp, Barrick Gold and Agnico Eagle. (It pays a great dividend too!)...**
- **A tiny $3 company with over 3 million acres of mineral property in Canada's most prolific mining province. (It's backed by major investor Sprott and Sprott Mining!)...**
- **And an undervalued company with C$900 million ready to invest in capital projects, including one of the most exciting gold development projects in mining- (hint: Canada...)**

MIDAS "Penny Gold" Target #3: SUPER-LEVERAGE!

Finally, there are what I call the "super-leverage" gold plays...

These give you about an opportunity to make 10 times your money in two plays by leveraging the plays in a very specific way...

I'm talking about option trades, of course.

These option trades allow my readers to make a potential fortune... FAST!

How fast?

Sometimes these big gains can happen within days...

Even better...

You can buy these options for just a fraction of what you'd have to spend to buy shares of the stock

That means you can get started with "penny gold" plays with even less money.

Of course these types of trades are highly speculative.

But it couldn't be easier to place these trades.

Even if you never involved before, all it takes is a few clicks on your computer.

It's truly a match made in heaven...

Taking advantage of the latest gold window opening...

And trading these unique leverage trades.

I have no doubt you'll be thrilled with the quick results...

These plays include:

- **A started mining company that owns five of the industry's top ten "tier one" gold assets...**
- **A gold producer with a history of operational excellence that has returned more than $1 billion to shareholders over the last six years...**
- **A miner with a portfolio of reliably producing gold mines that totaled $1 billion in revenue and $221 million in operating earnings in just the last quarter alone...**
- **An exploration target whose stock has TRIPLED in value in the latest gold rally...**
- **And a Canadian-based miner with 5.7 million ounces of gold reserves that has paid dividends to shareholders for 5 consecutive years...**

Add it all up and we're looking at exactly 13 different Penny Gold plays you should act on right now. But here's the thing...

Most research firms would promote you a special report that contains all of these names...

Then they'd deliver their report to you...

And simply forget about you – leaving you on your own to pick and choose from their report.

That's **NOT** what I'm going to do for you.

Instead, I'm going to help you in a much deeper, better way.

To explain how I'm going to help, let me first cover the problem...

Going Above and Beyond Any Service You've Seen Before

Fact is, when it comes to building substantial wealth what's even more important than the stocks you pick, is how you allocate them.

> "It's widely agreed that asset allocation is the largest determinant of long-term investment performance, much more so than picking stocks."
>
> — **Vanguard**
> Founder of the Vanguard Group, Inc., Jack Bogle

That's why I've gone a step further...

And worked with my analyst to create the world's first "Penny Gold Allocated Portfolio."

And it answers the two most important questions in building wealth with Penny Gold...

- First, it shows you **WHAT TO BUY** (right now the Penny Gold Portfolio contains 13 hand-selected picks from the MIDAS systems)
- Next it shows you **WHAT QUANTITY TO BUY** of each and every stock

It goes way beyond a typical special report...

And helps you with a **true professional allocation model.**

Whether you have an account worth $10,000 or $100,000, this allocated model makes getting started with "Penny Gold" easy.

With access to this penny gold portfolio... and just a pen and paper... using simple math... you'll see what to buy and exactly how much to buy to maximize your results.

There's no guessing.

There's no confusion.

And no room for error.

It's a comprehensive plan from start to finish.

It's called **The "Penny Gold" Allocated Portfolio: *How To Make Life-changing Wealth As Gold Goes To $10,000!***

And I'd like to get you started immediately – including all 13 of the very best picks that could make you money with a subscription to my new research service...

I'll show you exactly how to get your name on my "allocated" list in just a minute, but first...

Good News, Bad News

As I told you earlier, most people have no business trying to go all it alone with these penny gold plays...

They're fast moving.

They're **volatile.**

And like anything that can be so profitable, it also means **they're risky.**

The best analogy I have comes from the 1850's gold rush...

Back then gold-seekers risked life and limb to secure a claim – all for the chance to strike it rich.

Sure, there's a chance that some of your prizes won't pan out.

You need to know that upfront.

You should never bet your house on Penny Gold plays.

In fact, I'd recommend you putting aside just a small portion of your wealth (5-10%) to speculate on these ideas.

But – much like the 1850's gold rush – there's the chance to make money.

And if you're willing to risk peanuts on the dollar on picks that my analyst outlines – **with the chance to strike gold** – then this opportunity may be right for you.

Fact is, even if a few of these "Penny Gold" plays work out, you won't want people to know that you just struck gold.

AND...

You'll be making money when it's highly likely that **the U.S. dollar is falling apart.**

So, in all honesty, if making money on gold's move to $15,000 by 2025 is too much for you, then this may not be for you.

Still here?

Good.

Here's the best news of all...

If you're ready to grab impressive gold gains – in a matter of weeks or months, then buckle up.

You've officially got what it takes to make "Penny Gold" riches.

And I want to get you started with my first "special gold briefing" immediately.

As long as you can act fast, you can claim your seat at the table...

But I must warn you...

Your opportunity to cash in on "Penny Gold" today is extremely limited.

Here's why...

Only The Top 1% Allowed

Today I'm only allowing **1% of my paid membership of over 150,000** to join me for this once in a lifetime opportunity.

As I've told you, "Penny Gold" plays are very small.

They trade for mere pennies per share.

If 1,000s of readers were to buy in at the same time, the buying pressure would artificially shoot the stock higher... ruining the opportunity for everyone.

To make sure this doesn't happen, I'm allowing just 1% of my loyal readership base into this brand new research project today. First come, first served.

It's called **Jim Rickards' Gold Speculator...**

...And it's YOUR key to turning "Penny Gold" opportunities into potential life-changing fortunes.

As long as you're one of the first to respond today, you'll receive full access to **The "Penny Gold" Allocated Portfolio...**

Giving you all 13 stocks that my analyst and I vetted with our MIDAS system.

And, as I showed you earlier, this allocated portfolio takes it a step further, too... showing you how much to allocate to each and every pick.

But that's not all you'll get with your Charter Membership...

Jim Rickards' Gold Speculator is your front row seat to the action in gold and "Penny Gold" plays. But, it's also your forward-looking for all-things gold...

Leveraging the power of the **MIDAS system**, my analyst and I will be laser-focused on turning gold's next move higher into substantial profits for you.

Then, each month – as gold marches towards $15,000 or more by 2025 – we'll send you another "Penny Gold" pick.

Every case is unique of course...

That's why my analyst and I are making this three-promise pledge to you...

Our Three-Promise MIDAS Pledge...

We will NEVER recommend a company to you unless we've done ALL THREE of the following:

#1. A thorough vetting of management

#2. Analyze projects the company owns

#3. Verify assets and income statements for financing purposes through third parties

Jim Rickards

And here's something you won't get anywhere else...

Through our long careers, my 6-figure analyst and I have developed a lot of impressive gold and gold mining contacts.

We've also been invited to operating mines, exploration sites, gold refiners and more!

Now please listen closely...

Because this is unlike anything ever promised in the newsletter industry...

If there's ever a chance where we can bring a few loyal readers along for the ride, as a "Charter Member" of **Jim Rickards' Gold Speculator**, we'll try to get you on the inside!

Look, I can't make any promises...

But my analyst and I are doing everything we can to take you on the ride along with us as we visit these operations.

Imagine standing at the mouth of a gold mine... with your own pick and shovel.

Or imagine being up close and personal when a mining operation makes its FIRST gold pour.

You'll watch as the unblemished gold appears from a cloud of steam and smoke.

Bottom line, I want to show you how serious I am about this opportunity by rolling out the golden carpet here.

By this time you might be wondering to yourself...

"Jim, this is great... but how much does access to *Rickards' Gold Speculator* cost?"

Well, I'll tell you right now – it's not cheap.

After all, over five years my publisher had to commit $1 million to this project just to secure both my analyst's and my time and travel...

And I've purposely priced access high to ensure that only the most serious readers claim access to our research on these penny gold plays.

But before I show you what it takes to get started, let me try to anticipate a few other questions you may be wondering... and give you some answers.

Question #1:
Is NOW Really the Time to Buy Penny Gold?

Answer:
Yes. And There Are TWO Reasons Why Now Is The Time To Act.

The first is that a new great bull market is underway...

The first bull market rallied over 2,000% in nine years.

During the second, gold rallied over 670% in twelve years.

In both cases, the majority of the gains came toward the end of the bull market in a super-spike blow-off.

So far in the early stages of this bull market, gold is **already** up 26% as a new gold window has opened.

But that's just a down payment on what's to come compared in the last two bull markets!

Bottom line:

This pattern suggests the biggest gains in gold prices are yet to come.

But there's also a **more urgent** reason to act now...

And it's something my 6-figure analyst showed me...

Take a look at this chart...

You see gold futures traders on the COMEX (the market where gold is traded) have three choices when their contracts come up for settlement...

They can close out the contract...

They can rollover the contract to a future month...

Or longs can put in a notice that they want **delivery** of physical metal, in which case the shorts have to obtain the gold and deliver it to a COMEX approved vault.

But, as you can see from the chart, something unusual happened at the end of July...

Notice the physical delivery hit 32,732 contracts, **the highest delivery notice in history!**

This is an unprecedented event.

COMEX clearing members had to divert enormous amounts of physical gold from London to meet the New York delivery demands.

But, that won't happen again because London is almost picked clean...

That means the shelves for physical gold may be empty during the next spike!

Bottom Line:

A new panic to get physical gold seems to be underway.

During a recent interview with fortune, I talked about the physical gold market being leveraged 100 to 1...

Well, it's even worse than I could have imagined.

The commodities exchange is leveraged over 500 to 1.

That means if 500 folks show up at the COMEX to collect their physical gold, 499 of them will walk away with nothing.

Yes. This is exactly why you want to hold physical gold now.

Gold's super-spike may be closer than anyone could imagine.

Physical gold is running out at a time when I believe investors are going to need it most.

Demand will outweigh supply which will make prices skyrocket

And right now we can play this pending price spike for the chance at rare, exceptional, MASSIVE gains all by using the "Penny Gold" opportunities I want to share with you.

Don't forget, the top penny gold plays in the past edition of this newsletter (set on 2015, 2016, and 2017) gained 1,000%, 1,500%, and 2,000% respectively!

Now, I'm not saying we'll see those exact same gains in the new "Penny Gold" plays I'm sharing with you today.

But I'm saying that if you want to be in the front row for the next great bull market in gold, you need to act now.

Question #2:
Why Should I Trust You?

Answer:
Because I Have Been Right Before.

Back in 2011, I was the first to warn of the coming gold crash.

Back in 2015, I was the first to warn of the coming oil crash.

Back in 2016, I was the first to warn of the coming Brexit vote.

Back in 2017, I was the first to warn of the coming Trump presidency.

Back in 2018, I was the first to warn of the coming trade war with China.

Back in 2019, I was the first to warn of the coming "Phase One" trade deal with China.

Back in 2020, I was the first to warn of the coming pandemic.

Back in 2021, I was the first to warn of the coming inflation.

Back in 2022, I was the first to warn of the coming Ukraine war.

Back in 2023, I was the first to warn of the coming Hamas attack on Israel.

Back in 2024, I was the first to warn of the coming Biden dropout.

Back in 2025, I was the first to warn of the coming Trump assassination attempt.

Back in 2026, I was the first to warn of the coming Iran war.

Question #3:
What Does It Cost?

Answer:
Not Much Compared to the Potential Gains.

Now, I'm not saying we'll see those exact same gains in the new "Penny Gold" plays I'm sharing with you today.

But I'm saying that if you want to be in the front row for the next great bull market in gold, you need to act now

Question #2:
What Happens If The Economy Tanks Again?

Answer:
The Smart Crowd ALWAYS Makes Money.

Listen, there's an important connection you need to make here...

Frankly, it's so important I wrote about it in *The New Case For Gold* ...

You see, monetary collapses don't mean the end of the world.

That's something that most "gloom and doom" folks just don't understand.

So while "preppers" and folks building doomsday bunkers may think they know where society is headed, I see it a different way.

Today's international monetary system is largely based on the U.S. dollar. And, yes, a new collapse could be triggered by a loss of confidence in the dollar and its role as a store of value.

But, here's what most people DON'T know...

Based on the monetary history of the past century, collapses have NOT meant the end of the world. People don't go into caves or start eating canned goods.

Instead, monetary collapse means that the major financial and trading powers of the time sat down around the table and rewrote the rules of the game.

That's VERY important for you and I today.

Yes, I advocate holding gold as a store of value.

But right now, before the "rules of the game" change (where we could see $15,000 gold by 2026) we have what could be a once in a lifetime opportunity to make money on currency loss.

Simply put, when the rules of the game change, "Henry Gold" plays could make you more money than just keeping it in a Dow Index and "hoping".

Question #3:
Why Not Just Invest In Physical Gold, Isn't That Enough?

Answer:
As I Told Fox Business In 2016, there's a difference between making money and preserving wealth.

In an economic collapse, gold will preserve your wealth.

So there's no replacement for holding physical gold.

Gold is money.

End of story.

However...

The profit potential of gold isn't going to make you a large amount of money.

And the HANDS DOWN best way to make money in the gold market today – with the "golden window" open – is with the profit potential of "Henry Gold."

Question #4:
Why Don't I Hear Everyone Else Talking About This Huge Story?

Answer:
If You're Not First... You're Last.

If my peers are a global macro analyst have bought one thing...

It's that by the time a story hits the mighty news it's too late.

That's exactly what we're seeing with gold today.

Think of it this way...

Let's consider this $15,000 gold story as a slightly corked up like a bottle of champagne.

Today, with the "golden window" open, the cork just got popped...

Now, for a second think about a bowl of champagne glasses. All stacked in a pyramid formation – with one single glass on top.

At first, this gold story will only flow to **a very small** group of folks at the top.

Then, over time, as the story unfolds the champagne cascades lower and lower, more people will learn about this opportunity.

At some point, even the glasses at the BOTTOM of the tower are filled.

Right now, I'm certain we're at the top of the champagne tower.

That's great news for you!

You don't hear anyone talking about "Currency Wars" that could lead to a destruction of the world monetary system on CNN. Or, instead, they're busy covering negotiations for the next stimulus package or the pandemic or the latest developments in 2020 election campaigns.

Meanwhile, you won't hear anything on the nightly coverage about the destructive power that NEGATIVE interest rates will have on the American people.

But, trust me, it's coming.

That's why I want to get this Henry Gold allocated portfolio in your hand immediately. By the time this hits the nightly news... you could get rich.

That's the power of "Henry Gold."

Okay, now that we've got a few questions out of the way, there's one final thing I haven't shared with you until now...

I've purposely held back what you're about to see...

I needed to make sure you were dead serious about this opportunity.

And now that you've made it this far, I'm going to offer you something quite extreme...

Why I'd Like to (Discreetly) Send You Real, Hold In Your Hand "G-Series Gold"

When this gold window opens up... like it has, right now...

There are actually TWO ways to make an absolute fortune in the gold market.

The first is the one I've shown you today – "Henry Gold."

The **second** is a rare type of physical gold that I call "g-series gold."

Yes, it's a type of coin.

And this type of coin has a history of drastically outperforming bullion...

Recently one of these "g-series" coins went up for auction.

Over a 21-year time period (2014-2016) when gold went up 25%, this investment had the potential for a 1,475% gain over the same period.

That's 3x better than gold!

Or how about this...

During another extended gold rally (1989-2014) when gold went up 245%, this type of "g-series" had the potential for a 5,925% move over the same period.

That's 23x better than gold!

To make sure you understand the power behind this type of physical gold, let me share with you one more AMAZING example...

From 2009 until 2011, gold increased 65%.

But during that same period, one "G-series" coin went up 3,551%.

That's 47x better than gold!

Here's the thing...

Like "Henry Gold" you HAVE to have an expert on your side when you invest in "g-series gold."

You simply MUST know what you're doing, or you'll be ripped off... potentially costing you hundreds if not thousands of dollars.

That's why I've personally just negotiated and secured a small stash of this "g-series gold" on your behalf.

When you accept my invitation to join Rickards Gold Fortunes today, I'll drop one of these "g-series gold" coins in the mail for you.

Now listen, I want to make this crystal clear before we go any further...

I've secured this special shipment of physical gold for you.

It's packaged and ready to go...

And I'm going to mail it to you at no charge. It's held in your hand physical gold.

Right now, Rickards Gold, it could soar in value many times over the price of simple bullion.

Ask yourself...

Do you want to pass up on this opportunity?

Do you really want someone else to get this coin?

Do you want someone else holding the gold that you deserve?

Either way, I'm giving away every single ounce of this gold that I've secured.

So the ball is in your court.

All you need to do is...

Send Me Your Shipping Address

Now you can see that my publisher pulled out all the stops to get you the most out of this new research publication: ***Rickards' Gold Speculator***.

- **Committing $1,000,000** over five years to get this project off the ground...
- **Using our NASA system** to locate the **13 best "Penny Gold" plays** that you need to look at right now with my free report: **the "Penny Gold" Allocated Portfolio:** *How To Make Life-changing Wealth As Gold Goes To $15,000...*
- **Going way beyond typical financial research** by showing you both what to buy and what (specifically) to buy, through the Penny Gold Allocated Portfolio...
- **Mailing you a FREE "g-series" coin** (discreetly, of course)...

But as I've been showing you...

I want to make sure I'm only getting readers that are serious about turning gold's next move into a potential lifetime of "Penny Gold" wealth.

I think you're one of them.

And that's why I want to give you every opportunity I can think of for you to achieve life-changing wealth during this upcoming gold window opening up.

But here's one final way to tell if this is right for you...

Because of the money my publisher has committed ...

Because of the rare "g-series gold" I've secured and will mail out at my cost to you...

I simply can't allow any refunds on this new project.

If that suffices your hesitancy, then this opportunity is not for you. Please click out of this page and forget about ***Rickards Gold Speculator***.

What's the cost?

Like I said, this isn't one of those $100 per year subscriptions.

But, you wouldn't expect a premium service that has the type of gains I've shown you today to be cheap, would you?

As I've said, I want only my serious readers to enjoy this service.

You've seen the potential in the examples above...

Even without those examples, it's possible to recoup the entire regular-priced $5,000 subscription with just three investments (of about $8,500 each) in just about 18 months on average.

But the best part?

You're not even going to pay anywhere near that $5000 price today anyway!

SUBSCRIBE NOW >

This is a serious offer.

With the potential to make you serious money.

For serious readers only.

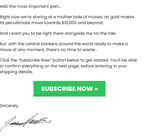
And if you're still with me, I want you to get started immediately.

Now's your chance to be at the top of the champagne tower.

Now's your shot at making 10x, 47x, or even an exceptional 5ib more than the increase in the gold price itself!

And it's your turn to capitalize on a **lifetime** of "Penny Gold" wealth...

Remember, you'll get:



- **Full access to analysis of the "MIDAS" system** – along with brand new monthly recommendations
- **Instant access to my Penny Gold Allocated Portfolio** – this report lists the 13 best "Penny Gold" mining equities to buy, all 13 of these plays included in my report. How To Make Life-changing Wealth As Gold Goes To $15,000
- **Monthly portfolio updates from my 8-figure analyst** – so you're never left wondering what to do with your holdings...
- **A valuable "g-series" coin mailed to your house** – (exclusive) FREE
- **A virtual VIP invite to any mining trips that we set-up for you.**
- **Gold Hounds: Five Penny Gold Plays with 10X Upside**
- **Gold's Silent Partner: Three Emerging Gold Royalty Plays with 500% Upside**
- **Super Leverage: Five Giant Gold Plays With 10X Upside**

Plus, you'll receive our special "Charter Member" discount pricing (a price that's more than 50% LESS than others will soon pay.)

SUBSCRIBE NOW >

Frankly, I can think of a more generous offer in the publishing industry.

AND the most important part...

Right now we're staring at a market lake of money, as gold makes its penultimate move towards $15,000 and beyond.

And I want you to be right there alongside me for the ride.

But, with the central bankers around the world ready to make a move of any moment, there's no time to waste...

Click the "Subscribe Now" button below to get started. You'll be able to confirm everything on the next page, before entering in your shipping details.

Sincerely,

Jim Rickards
October 2020

P.S. You're 500 Here! Let Me Make This EVIN Easier...

Right now you've got THREE choices sitting in front of you...

First, you can take all of the information I've shared today – along with all of the bold hard facts in the book The New Case For Gold and you can do NOTHING about it.

That's a dangerous choice, considering if we see a monetary collapse or an extreme weakening of the U.S. dollar – the bank accounts and retirement funds of many Americans will be wiped out.

Second, you could take action and just buy physical gold.

As you know I stand by my call to buy physical gold.

After all, gold is money.

And when the world powers re-engineer the "rules of the game" the folks holding gold will preserve their wealth.

Or third...

You can take all of the knowledge that I've given you today – about the coming price spike in gold and the "Henry Gold" plays – and you can take me up on my discounted "Charter Membership" offer.

If you've ever wanted to be in the "smart money."

If you've ever wanted to be at the top of the champagne tower...

Now is your chance.

With **Rickards' Gold Speculator**, you'll have a front row seat to the action. With the potential to make an exceptional return (50%... 3-14x... even 120%, or more!)

The profitable "golden window" is open right now. Hit the "Subscribe

Now" button below to stake your claim...
