“The Greatest Income Opportunity I’ve Seen in My Entire Career”

— Ted Bauman, Author of Bestselling
Investment Book *Endless Income*

In less than five minutes, you can secure your share of the approximately $4.72 billion paid out every single month.

[Transcript]

Hi, I’m Ted Bauman.

And today, I’m going to show you how to tap into the most powerful income stream in America...

I call it the “Endless Income stream.” Over the next few minutes, you’ll understand why.

I reached out to my readers to see if they’ve had any prior experience with this Endless Income stream. These are everyday Americans, just like you.

Turns out they have been using it to collect huge payouts — much bigger than they could with dividend-paying stocks or bonds or pretty much any other income investment.

How much bigger?

Well...

Michael S., from Madison, Wisconsin, wrote in to tell me he’s made over **EIGHT TIMES** more through this Endless Income stream than he would get with dividend-paying stocks that pay an average 2%...

Jim N., a reader from Norfolk, Virginia, has made more than **11 TIMES** more than he’d get from an annuity paying the average 1.27%...

Steve V., a reader from Laredo, Texas, has collected **about 18 TIMES** more than government bonds pay (a paltry .72%)...

And Tom R., a reader from Albuquerque, New Mexico, reported he had made **26 TIMES** more than he could through a five-year CD yielding .5%.

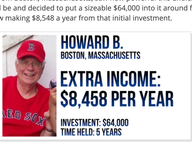
Others wrote in to tell me exactly how much they’ve been making on their own:

Subhas K., from Columbus, Ohio, said he discovered this Endless Income stream in 2011 ... and he believed in this opportunity so much he put $60,000 in it.

In the years since, he’s collected $50,000 income from that investment. Yes, $50,000 income from a $60,000 investment ... and he’s set to collect another $5,820 this year.

As you’ll see, just like Subhas, many more of my readers have pulled in thousands of dollars of extra income every year from this.

Howard B., from Boston, Massachusetts, saw how powerful this Endless Income stream could be and decided to put a sizeable $64,000 into it around five years ago. He’s now making $8,548 a year from that initial investment.



Of course the more you invest the more you stand to make. But with one simple move today, your first payout could hit your bank ac-count in as early as the next 30 days.

It’s as easy as buying a regular stock. All it takes is a few clicks of your computer’s mouse to secure your share of the $4.72 billion payout next month.

Yes, $4.72 billion.

And that’s not just next month ... that’s how much is set to be paid out every single month on average.

Kiplinger calls the Endless Income stream a great source of cash for investors that “can provide a steady stream of retirement income that will last a lifetime.”

Now, you might think that all of this income comes at the cost of overall returns ... but not when it comes to the Endless Income stream.

Data from the National Bureau of Economic Research recently showed that this investment can be safer and more lucrative than stocks, even during a recession.

Forbes says this income stream “literally prints money.” Of course, it doesn’t quite do that.

But what it does is almost even better.

Yet, controversially, 99% of Americans have probably never heard about this Endless Income stream.

Which is why I’ve put this presentation together.

Today, I’m going to reveal exactly *what* this Endless Income stream is...

Why it’s able to pay out $4.72 BILLION to investors around America every single month on average...

And *how* you can get it working for you today.

Just like my readers all across the country have told me they are already doing.

Payouts That Just Grow Bigger and Bigger

It doesn’t matter what your current level of income is, how many zeros your bank balance has or where you were educated.

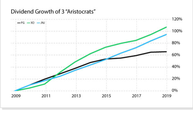
So long as you get started immediately ... as in right now, you can secure your chosen share of the $4.72 billion payout as early as next month.

For anyone at or near retirement, this is huge.

Because these investors aren’t just collecting *bigger* payouts ... their payouts can *grow* exponentially year after year.

Let me show you...

Take a look at the extraordinary dividend growth of Exxon Mobil, Johnson & Johnson and Procter & Gamble. They’re included in a group of stocks called “dividend aristocrats” because they’ve steadily raised their dividends for the last 25+ years.



I’m sure long-time shareholders are very happy with their quarterly checks. As you can see, they’ve grown steadily in the last decade.

But I’m going to add another line here.

That’s how much payouts have increased for some smart investors who have tapped into one of these Endless Income streams.

Seeing that, you can understand why I’m rushing this urgent message out to you today. I want you to be able to get in on it in time for the next payout date.

But again ... it’s important to know that these enormous payouts don’t come at the cost of regular gains. On the contrary.

This Endless Income investment beats just about any other asset class you can think of...

This has outperformed regular stocks for over half a century.

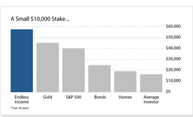
Research by Erasmus University in Rotterdam shows this investment has beaten stocks ... not for 10 years or 20 years. But for 50 years! And JPMorgan — yes *the* JPMorgan, the biggest bank in America — shows this is the single best-performing asset class you could have owned compared to 10 other investments in a recent 20-year period.

Forget gold, oil, bonds or even the S&P. This investment rules them all.

It is THE highest-returning investment between 1998 and 2017...

Take a look at this chart. It’s based on data directly from JPMorgan.

Look at how this Endless Income investment stacks up against every other mainstream investment.



Over the course of 20 years, it tripled the performance of the average investor. Tripled it!

And that was simply the annualized gain left to compound over time.

So you’ve got payouts that trounce what you find in the average stock *and* overall performance that leaves just about everything else in the dust. Without a doubt, this is the single best-performing asset class you can possibly put your money into.

And on top of that — on top of huge long-term gains and steady income — you get all of that without the massive volatility you get from the stock market, or the years of stagnation you often see in gold. Yet it trades like a regular stock.

But not only does it beat the stock market overall, it can be vastly more resilient during downturns and recessions ... by as much as 84%.

While Joe Shmoe is watching his brokerage account bounce all over the place, stressing about what to do ... you could be outside playing ball with your grandkids, knowing your Endless Income is more secure.

Amrut W. — another one of my readers — told me he likes the “consistent dividend income month over month” that the Endless Income stream can provide. Adding it “enables you to sleep well at night.”

over month" that the Endless Income stream can provide. And it "enables you to sleep well at night."

John M., an electrical engineer from Lincoln, Nebraska, recently told me he loves the "monthly dividend and low volatility" of his own Endless Income investments.

JOHN M.

Loves the "monthly dividend and low volatility" of his own Endless Income investments.

And Tom G., a former Ford factory worker wrote in to tell me he enjoyed the Endless Income stream's "steady income with low correlation with the stock market."

Income stream's "steady income with low correlation with the stock market."

No matter which way you look at it, this is a truly exceptional investment. And that's exactly why so many billionaires fill their personal portfolios with it.

Warren Buffett, Bill Gates, Ron Baron, George Soros and Ken Fisher all have holdings in the tens, or in some cases, hundreds of millions of dollars…

And at last check, President Trump himself collected payouts.

But as you've already seen, you don't need to be a billionaire to tap into this endless income stream. Everyday Americans from all walks of life are cashing in.

That's because this investment was never intended to merely help the Bill Gates and Warren Buffetts of this world … it was created to give the little guy a level playing field, and a route to financial freedom.

How do I know?

Well, my father — a former congressman and Washington insider — was working with President Eisenhower when he signed bill 86-779 … the bill that would create this Endless Income stream.

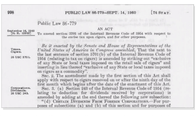
Why you are entitled to your share of this $4.72 billion per month Endless Income stream.

You probably know President Eisenhower for creating NASA and building our 41,000-mile Interstate Highway System.

But you may not know that he was also an avid campaigner for equality in all aspects of life.

Which is why one of his last acts of his presidency was opening a clear path toward financial freedom for ordinary folks all across America.

On September 14, 1960, he signed bill 86-779 into law … creating this Endless Income stream.



PUBLIC LAW 86-779-SEPT. 14, 1960 [74 Stat.

Public Law 86-779

AN ACT

To amend section 266 of the Internal Revenue Code of 1954 with respect to the excise tax upon cigars, and for other purposes.

Excise Tax, Cigars.
26 USC 4701.

Amendment.
26 USC 266.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the tenth sentence of section 266 of the Internal Revenue Code of 1954 (relating to tax on cigars) is amended by striking out "exclusive of any tax imposed by section 4701 (relating to tax on cigars)" and inserting in lieu thereof "exclusive of any State or local sales tax imposed on the sale of cigars".

SEC. 2. The amendment made by the first section of this Act shall apply with respect to cigars removed on or after the ninth day of the first calendar month beginning after the date of enactment of this Act.

SEC. 3. (a) Section 166 of the Internal Revenue Code of 1954 (relating to deduction for dividends received by corporations) is amended by adding at the end thereof the following new subsection:

"(d) ADDITIONAL DEDUCTION FOR PERSONS CONSTRUCTIVE.—For purposes of subsections (a) and (b) of this section and for purposes of

Up until that day, only the financial elite could get access to this specific class of investment.

Talk about unfair. It has produced far, far more wealth for its investors than almost anything else in the history of America. Yet it was off limits for the people who needed to grow their wealth the most!

So with the writing of bill 86-779, Eisenhower ensured anyone, anywhere in our country could now invest in it and enjoy the same massive rewards as the American elite.

But here's the kicker … Eisenhower went one step further.

He ensured that, by law, any Endless Income stream investment must pay out AT LEAST 90% of its taxable income to investors.

Which, as *Forbes* says: "Paves the way for investors in this type of investment to become millionaires."

It adds up to $4.72 billion per month on average … there for anyone, anywhere in America to start collecting.

Like my reader **Paul Z.** from Laurel, Maryland, told me he's been doing since 2013. When he saw how large and consistent the payouts from this income stream could be, he invested $169,000 into it.

PAUL Z.
LAUREL, MARYLAND

EXTRA INCOME: $21,840 PER YEAR!

INVESTMENT: $169,000
TIME HELD: SINCE 2013

Today, he's collecting an average of $21,840 per year in extra income.

And **Joan F.**, from Modesto, California, told me she is set to collect the equivalent of $11,276 a year on her $141,000 investment made this June.

JOAN F.
MODESTO, CALIFORNIA

EXTRA INCOME: $11,276

INVESTMENT: $141,000
TIME HELD: LESS THAN A YEAR

Of course, you should still never invest more than you can stand to lose. As with any investment, there are no guarantees and there's always risk. Even in this case.

But as you've seen, this Endless Income stream is one of the safest ways to grow your money. Month after month. Year after year.

If you get in today, you could enjoy your first regular payout as early as next month…

As I've shown you, some people are making eight times more income than they could through dividend-paying stocks … and 18 times more income than they could with government bonds.

In just a minute, I'll tell you about one of these income streams … and how one extra move could have turned $10,000 into over $123,000 in 11 years.

But first I want to tell you why I'm bringing this to you now.

I've dedicated my life to uncovering this kind of powerful moneymaking information.

As mentioned, my name is Ted Bauman.

I'm a world-renowned economist and bestselling author of several books on asset protection and investing.

And I'm proud to say the global organization I've been involved with for over two decades has helped 14 million people in 33 countries attain personal freedom and financial independence.

I've spent my life helping people achieve and maintain fortunes.

But my biggest accomplishment is the independent financial research firm I established with my father — a former U.S. congressman who served with every president from Dwight D. Eisenhower to Ronald Reagan.

As I mentioned earlier, my father was there when President Eisenhower created this type of investment roughly 60 years ago.

But only recently it became much, much more powerful for income-seeking investors.

That's because in 2017, President Trump signed an order giving a 20% tax break on all the income you make through the Endless Income stream.

So now you're getting a shot at higher returns, with less risk, less stress and much bigger income … with a 20% tax break as the cherry on top.

And yet, no one is talking about it. Still!

This is the exact kind of powerful moneymaking information my financial research firm is dedicated to uncovering.

We recruited a team that includes the who's who of the financial world…

Such as a Chartered Market Technician whose former fund was rated number one in its category by U.S. News & World Report. And a man whose firm was once ranked the No. 1 performing market timer … for seven years running … in the entire United States.

Members of my team have met and worked with the likes of Warren Buffett and Steve Forbes. As well as Mitt Romney, Ron Paul, Donald Trump and Bill Clinton, to name a few.

It's our mission to help Main Street investors achieve the American dream. And I'm proud to say we've more than delivered on that score…

For example, on February 13, 2020, I issued a warning that the stock market was headed for disaster.

"Stocks are looking for a way to moderate their rise," I warned. "We're entering risky territory. There is risk of correction."

One week later, look what happened:

Stock markets began to drop, eventually leading to their biggest one-day drop since the 2008 financial crisis.

Then right when things started to pick up later in March, I identified which sectors would surge. Those who took my recommendation in one of my other publications had the opportunity to make a small fortune.

Outpacing the rallying market by over a 100% at its peak...

I don't say this to brag but rather to make an important point ... no matter what is going on in the overall markets, there are always opportunities to grow your wealth.

Watching markets lurch all over the place in recent months has made that point even clearer.

Which is why I believe the Endless Income stream is something that could benefit people all over America. Now more than ever.

The one investment sector that "creates 90% of all millionaires."

By now, you're probably wondering, how the Endless Income stream actually works.

How can it keep churning out payments year in and year out ... through up and down markets?

And where exactly is that $4.72 billion per month it pays out coming from anyway?

Well, it's based in the same sector steel magnate Andrew Carnegie famously announced, saying that it "creates ninety percent of all millionaires" and "makes more money than all industrial investments combined."

The same place American entrepreneur Marshall Field called: "Not only the best way, the quickest way, the safest way, but the only way to become wealthy."

And the same place President Trump used to amass over two thirds of his entire net worth.

In fact, according to *Forbes*, it's the same market that 223 of the world's billionaires made their fortune.

It comes ... from what President Theodore Roosevelt called "the surest and safest method of becoming independent" and "the basis of wealth."

I'm talking about real estate.

But, thanks to bill 86-779, it comes with a twist. And in a minute, I'll reveal the best, most profitable "real estate" opportunity available, because it's probably not what you think. It's nothing like "traditional" real estate. It's not like buying a new house or anything like that. And it's all possible thanks to the stock market.

Now this is absolutely a more long-term strategy, so it's not for those trying to make a quick buck. The more you invest, the more you stand to make. And the sooner you get in, the higher your payouts can grow.

But before I get into those details, let me assure you that you can profit off this opportunity without the hassle of credit checks and mountains of paperwork.

And without putting a down a $50,000 deposit...

You don't have to worry about fixing any leaky faucets or replacing any roofs...

Or hounding your tenants to collect rent every month.

You get the benefits, and more importantly the *income*, of regular real estate, with none of the headaches ... and with some SIGNIFICANT advantages on top.

For example, if you want to buy into this Endless Income stream, you can do so in less than five minutes, with just a few clicks of your mouse.

You can invest any amount you want.

And if you want to, you can get out just as fast too.

You're not tied into anything, like you are when you invest in real estate the regular way.

And you don't need to hang on for years and years to start cashing in on your investment. Remember, investing in real estate in this way you could start receiving a payout as soon as next month.

Here's the secret behind the most powerful income stream America has ever seen.

So, to be clear, I'm about to show you how to get into the EXACT same investments as Bill Gates, Ron Baron, Ken Fisher and a bunch of other billionaires.

And if you act fast, you could have your first payment sitting in your account in as little as 30 days.

Make no mistake, this is your chance to secure your financial future.

Remember, the whole point of bill 86-779 was to level the playing field on this Endless Income stream.

Because, like I said, this is no ordinary real estate.

It's a special vehicle called a Real Estate Investment Trust, or REIT.

And it's as quick and easy as investing in a regular stock ... you can do it all through your regular brokerage account.

But that's not to say all REITs are created equal. Far from it.

As *Forbes* points out, the type of REITs I'm about to tell you about "have outperformed every major index." Every. Single One. Since 1972.

There are more than 1,100 REITs open to investors in the U.S. today. But some of them are poorly managed ... some of them are in dying industries ... while others are pretty good.

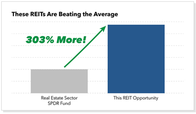
But I'm not interested in opportunities that are "pretty good."

And now, after months of research, my team and I have whittled that 1,100 down to just three. As you're about to see, these three are the crème de la crème of the Endless Income stream.

That's not to say they don't carry a risk. ALL REITs carry risk. No matter how reliable and consistent their dividends have been in the past, it is never any guarantee of what the future holds.

However, given all of my research, I'm confident these are the best and safest REITs you could possibly put your money into.

For example, one of the opportunities I'm about to detail has outperformed the Real Estate Sector SPDR Fund — which tracks an index of REITs and real estate stocks — by 303% since the start of this year! Over three times BETTER than the average. And keep in mind, based on what I showed you earlier, the "average" here already trounced the returns you could have found with stocks, bonds and gold.



And it's not because of their properties' locations, or the way they look. But because of how they make money... and how much of it they are making investors.

Unlike regular REITs, they don't rent out to members of the public, or even retailers. So even through the market downturn we saw during the pandemic, demand for their services continued to surge.

As you've seen, some of my readers are making tens of thousands of dollars through this. Like Subhas K., who's made $50,000 income, and counting, on his $60,000 Endless Income investment since 2011.

So who exactly will be paying you all this money?

The three Endless Income stream investments I'd like to share with you today rent out to, and get paid by, some of the richest companies in this country.

And 90% of that income is sent out directly to investors like you as dividends.

In fact, some of the most profitable companies in America are among their tenants...

Google, Microsoft, AT&T and Amazon are each paying them regular rent checks. And they're not the only ones...

Oracle and Zoom are, too.

Why?

Because they don't own homes or office buildings or retail space. They own something much, much better, and far more valuable.

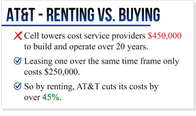
These Endless Income stream investments own the data centers, computer networks and cell towers major businesses can't live without.

Companies like Amazon, Microsoft and Google are willing to rent all this essential infrastructure from them because it works out cheaper than trying to do it themselves.

If they were to try build and maintain it all themselves their bills would be much higher.

Cell towers, for example cost service providers $450,000 to build and operate over 20 years. Leasing one over the same time frame only costs $250,000.

So by renting, AT&T cuts its costs by over 45%. It's a no-brainer for them.



And because the Endless Income streams rent out to more than just one carrier, they're making a killing.

It's a win all round. Carriers are saving money and these Endless Income streams are making piles of money ... and 90% of that windfall is sent out directly to investors like you.

Which brings me to our first Endless Income stream investment.

Endless Income Stream No. 1: Tap Into the $13.2 Trillion 5G Revolution

This first opportunity was a phenomenal investment even before the measures to tackle coronavirus kicked in.

But now it's even better…

As you may be aware, 5G technology, as Bloomberg states: "Promises to transform our lives and add trillions of dollars to the global economy every year…"

$13.2 trillion, in fact. And generate 22 million jobs.

Which is why *Forbes* calls it a "huge opportunity" for investors, which will "revolutionize America."

And why the U.S. government said that the wireless industry plans to invest an estimated $275 billion on the 5G rollout by 2022.

And guess who could be collecting a portion of that $275 billion, and profiting every time a new cell tower goes up?

You.

By investing in this Endless Income company now, you'll be positioned to collect more and more in the months and years ahead.

This one company alone is on track to provide enough cell towers to meet 80% of the projected increase in demand for the entire U.S. 5G network by 2025!

Best of all? It's the perfect way to actually profit from the massive shifts we've seen since the COVID-19 crisis. Because under current circumstances, the 5G rollout could happen faster and be even bigger than anyone anticipated.

As more and more people work from home, it's strained current networks.

For example, the pandemic triggered a significant increase in demand for video conferencing. In just a couple months, video conferencing jumped 212%, and video streaming has seen similar surge in demand.

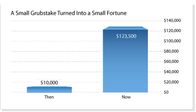
So carriers are ramping up their spending and fast tracking the 5G rollout… That money is pouring into this Endless Income investment … and could funnel right into your bank account from there.

But make no mistake, this company has been a moneymaker for investors for years now.

Since just 2014, its payouts have more than tripled… Actually they've almost quadrupled in size.

Even more than that, it isn't just about Endless Income… it's about endless rewards.

Had you invested just $10,000 in 2009, and reinvested your dividends, today you'd be sitting on over $123,000.



And as impressive as that is, it's nothing compared to what I see ahead.

As the 5G rollout continues to gather steam, this opportunity is set to climb higher and faster than ever… and your income checks right along with it.

That's why I want to rush you a special report called ***Collect Endless Income From the $13 Trillion 5G Revolution.***

It details everything you need to know about this opportunity so you can get in before the next scheduled payout, which is quickly approaching.

You'll see:

- The simple analysis that shows why I believe it's a near 100% certainty payouts from this particular Endless Income source can be sustained through any recession or downturn … making it truly the perfect investment in these volatile markets. Of course nothing in investing is ever guaranteed, but I have incredible confidence in this opportunity. You'll see why.
- How you could see your payout amount double — or more — in a decade without lifting a finger.
- How you can finally turn the tables on your mobile provider and make money when AT&T, Sprint or Verizon pay their own bills.
- Plus, a lot more.

Again, it's all detailed in this special report I'd like to send you right away called *Collect Endless Income From the $13 Trillion 5G Revolution.*

With this report in hand, you can ride the biggest tech trend in a generation and collect outsized payouts — something you can't get by investing in high growth stocks like Alphabet or Amazon.

And it's yours — free — when you accept this invitation to subscribe to my monthly newsletter *The Bauman Letter*. A subscription that member Dana Carol calls:

And Paul Hallier said:

In a minute, I'll tell you more about that. But first, I need to tell you about two more killer Endless Income stream opportunities I've got lined up for you.

Endless Income stream No. 2: Profit When Amazon, Microsoft, Google and Oracle Pay Their Rent

This next one is sort of like the road and rail networks traditional businesses rely on. But instead, this company owns the "invisible infrastructure" Big Tech companies depend on — also known as "the cloud."

And just like 5G, the cloud *is* the future of technology.

Demand for cloud services has exploded from nothing to over $100 billion per year in the last decade. It's growing even faster now and is set to reach $248 billion by 2024.

That's why this next Endless Income stream investment is perhaps the most essential company to the internet … more important than Google, Zoom or Amazon. Because this is the company they all rely on. This is the company they lease their cloud space from. This is the company you need to add to your portfolio … and quickly.

Just last year, the world's biggest, richest companies paid $508 million in rent to this Endless Income investment … and 90% of that money went out to shareholders.

Forbes confirms that this company has a "moat that would be very difficult to replicate. They are sitting right in the middle of a secular trend that has years to play out."

That could mean years of steady, growing income for you.

Ron Baron set himself up to collect an extra $2.4 million this year in side income from this stream** with a $180 million investment.

Insiders, too, are making piles of cash by claiming their share in this highly profitable pie.

Considering current dividend payouts, we can assume Officer Brandi Galvin will make about $50,000 each quarter on shares worth $13,405,539.

And Chief Financial Officer Keith Tayler will pocket just shy of $340,000 this year. He owns $24.5 million worth of stock in his own company. If that's not a vote of confidence, I don't know what is.

These insiders recognize — as I do — what an incredible opportunity this truly is.

Since this income stream was established, the payouts have only grown … they've never been cut … not a single payout skipped. Just bigger and bigger checks deposited into shareholder accounts year after year after year.

Now with one simple move, it's almost like you'll have backdoor access to the enormous rent checks paid by a who's who of Big Tech giants… Amazon, Google, Microsoft, Zoom…

The more demand there is for THEIR services, the more rent they will be forking over to this company … and eventually YOU.

Once again, I want to get all of these details into your hands as quickly as possible. So I'd like to send you a second free report called ***Collect Endless Income From the Internet's $248 Billion "Invisible Infrastructure."***

But that's still not all. Because there's yet another time-sensitive opportunity I need to tell you about.

Endless Income Stream No. 3: The Smartest Way to Play This Potential $892 Billion Online Mega Trend

As I mentioned earlier, this is not the same real estate most people could ever dream of owning — no matter how rich they are. It's better…

The market for this third opportunity isn't dependent on a booming housing market … or better-than-expected GDP numbers. It is in constant demand, no matter what's going on in the wider market or around the world.

This is a way to tap directly into e-commerce's hidden treasure… Another market that is growing by leaps and bounds:

As you can see, from 2016 to 2022, U.S. online retail sales are expected to nearly double … and it would still only account for about 15% of all retail spending, which means it's got plenty more room to run.

And thanks to this Endless Income stream investment, the more packages Amazon delivers … the more you stand to get paid.

The more people get groceries delivered to their door … the more you stand to get paid.

The more products Walmart sells … the more you stand to get paid.

The more online orders people make with Home Depot … the more you stand get paid.

Because all of these big companies are tenants of this Endless Income stream investment.

They rent warehousing, supply centers and key delivery locations from it.

I trust you see why this just may be the perfect investment for right now.

The more business they do … the more they need to spend on its services … and the more money gets passed on to investors like you in the form of massive dividends.

These companies need both big, out-of-town warehousing and strategic delivery buildings close to where people work and live.

And that's where our third Endless Income company comes in.

It's more expensive for these companies to try to buy up or build in key locations than to rent.

So they are happy to keep paying up and, in a way, providing Endless Income stream investors like you with … an endless stream of income.

I've just checked my calendar, and the next expected payout date is rapidly approaching. By my calculations this company is set to pay out $428 million very soon.

So I'll send you a third report if I hear from you right away. This one is called ***Collect Endless Income From E-Commerce's Hidden Treasure.***

If you get in now, I firmly believe you could expect double-digit gains perhaps even within the next year, as you'll see in the report.

And in just a second, I'm going to show you how you can find out everything you need to know to get in on these Endless Income stream investments … before the next scheduled payout date.

How to make money thanks to some of the richest companies in America — without working for them or owning any of their stock.

Say Sharon in Salt Lake City orders cookware from Amazon…

Kevin in Toronto searches Google for a local, reputable car mechanic…

Every time anyone on AT&T, Verizon or T-Mobile makes a call, or sends a WhatsApp…

And every time someone uses Zoom to work remotely…

These Endless Income streams could grow bigger and bigger.

I'm sure you can see how that can add up. So the sooner you get started, the better.

But if you want to get in on the next payment, I strongly suggest that you act TODAY.

Like I said, I've been doing this for a very long time, and in all those years, this is THE single best income-producing investment I have ever seen.

It's easy to see why the likes of Bill Gates, Warren Buffett and George Soros trust so much of their wealth in it.

And why this Endless Income stream is favored by the Main Street Americans you've heard about today…

Like Paul Z., Howard B. and Joan F., who each make thousands of dollars in extra income every year through it.

I'd like for you to be next. That's why I've put everything you need to join them into this special Endless Income report series.

I'd like to rush it to you for free at the end of this presentation when you purchase a subscription — risk-free — to my research service.

As you'll see in the reports, if you get in today, you could be looking at your first payout by this time next month. But timing really is everything. That's why you need to make your move now.

Here's how to do it.

Learn how to claim your share of the Endless Income stream today, and you could get your first payout by this time next month.

Within the next few minutes you could be reading your three free Endless Income reports:

Collect Endless Income From the $13 Trillion 5G Revolution.

…From the Internet's $248 Billion "Invisible Infrastructure."

…And *From E-Commerce's Hidden Treasure.*

This is by far the most valuable series of reports I've ever put out. You'll discover everything you need to know to claim your share of the $4.72 billion disbursement on the next rapidly approaching payout date.

But that's not all I want to give you today.

You see, as I mentioned earlier, I've spent my life helping people to achieve true financial independence.

Now, financial independence is a word that's thrown around a lot.

But I want you to just think about what it really means for a second.

Financial independence means having enough income to pay for your ideal lifestyle, without needing to work for anyone (including yourself) ever again. So it means different things to different people…

Maybe for you, it means playing a round of golf on a Tuesday afternoon … or any day you feel like. Perhaps you'd like to visit Paris or Rome on a whim, or just even eat out at your favorite restaurant whenever you want…

Without worrying about any of it eating into your nest egg.

In simplest terms, true financial independence means having the means to spend time with your family, to pursue your hobbies and passions and no financial stress gnawing away at the back of your mind.

Although it won't happen overnight, that's what I want to help you build toward.

And showing you how to benefit from the Endless Income stream is just the beginning…

Because I'm going to go much further than that. I want to give you full, unrestricted access to *The Bauman Letter.*

The Bauman Letter is a powerful eight-page newsletter I send out to 115,000 subscribers every month.

Through these monthly briefings I'll bring you everything you need to grow and protect your wealth and make your way toward true financial independence.

Each issue is filled with my market insights and secrets, unique ideas and opportunities to grow your wealth you simply won't hear about anywhere else.

Just like the Endless Income stream you've learned about today.

My monthly newsletter is the core of my research service. You will never find this caliber of research or expertise anywhere else.

John Salkin wrote:

And **Chris Godfrey** said:

In fact, this research alone is an incredible asset on its own — even if you never invest a cent in your life … you'd still be light-years ahead in your knowledge.

invest a cent in your life ... you'll still be light-years ahead in your knowledge.

Now, although *The Bauman Letter* is an investment research service, it's unlike anything else.

It's designed specifically for people who want to see a range of investment options ... not just risky speculative bets.

Oh, I do recommend stocks with the potential for great short-term gains. But my model investment portfolio also includes stocks with great steady growth potential, as well as dividend-paying income investments.

So you see, whatever your financial goals, whatever stage of life you're in and whatever your investment profile, *The Bauman Letter* has something for you.

You'll have complete access to my full library and discover:

• The "gateway" tech stock poised to double your money in 12 to 18 months.

• The dividend payer that provides shelter from the storm... for its customers and investors.

• How to ride the trillion-dollar manufacturing revolution to 215% potential gains in a year.

• A little-known way to score triple-digit gains over the next two years as the race to driverless cars shifts into high gear.

Because of my background as an economist and economic historian, I take a different approach to the markets. I've got my finger on the pulse of the biggest trends.

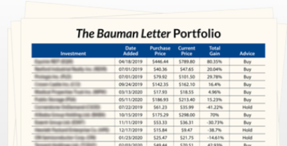
And, thanks to my years as a financial researcher, I'm able to zero in on the best ways to play those trends. Just last month, for example, we closed out two winning trades — 43% in 113 days and 63% in 14 months. These were some of the biggest gains I've closed to date!

And in the coming months I see even more opportunities on the horizon, which could set you well on the way to financial independence.

With that in mind, as a member of *The Bauman Letter*, you'll not only receive my monthly newsletter. You'll also get:

Full access to my model portfolio:

My model portfolio is designed to provide you with all you'll ever need for a chance to profit in any market condition.



Weekly email and video updates:

Each week, you'll get a short video from me, giving you updates on our current positions and the market in general.

I use these updates to keep you apprised on new opportunities we're looking into, market trends and any potential upcoming financial threats I see.

I also go over your feedback and answer any frequently asked questions our readers have submitted about *The Bauman Letter* that week.

Your own dedicated customer care hotline:

And of course, you get a dedicated Maryland-based customer service team. If you ever have questions about your subscription, simply give one of my team members a call. They will walk you through whatever you need.

Plus, daily financial insights from my team of contributors:

These short insights from select experts will open your eyes to even more unique ways to unlock greater wealth and peace of mind.

An overlooked stock opportunity, the most profitable ways to play gold, emerging markets news — you name it, we'll show you how to take advantage of it.

And of course, instant access to your three free reports in my *Collect Endless Income* series...

Which will give you everything you need to get in on the Endless Income stream you've heard about today. So you can claim your share of the $4.72 billion set to be paid out next month ... and every month after that on average ... in less than five minutes.

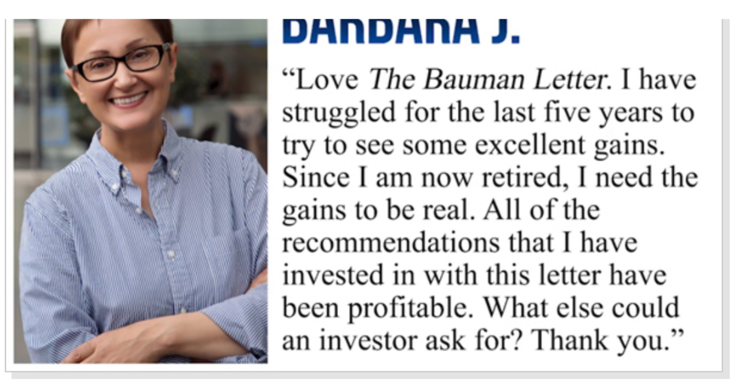
Let me help you achieve true financial independence.

As you can probably gather from all this, *The Bauman Letter* takes an incredible amount of time, effort and dedication to create.

But I believe it's well worth it. And based on the feedback I receive, my subscribers agree.

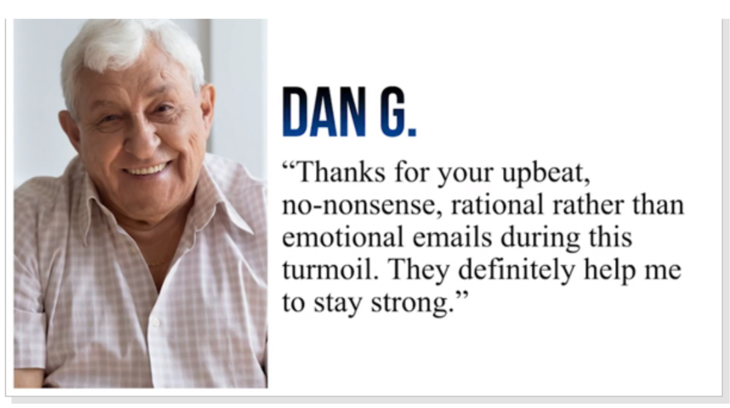
People such as:

Barbara J., who wrote:



Suzanne B., who said:

Dan G., who wrote in to say:



Rob Moore, who said:

And **Joseph D.**, who emailed:

I want to give you the same opportunities they are already enjoying by welcoming you to *The Bauman Letter* today.

A subscription usually runs at $99 per year. And for all you're getting and all the work that goes into each issue, that is incredible value.

But given what we've seen over the last few months... and the peace of mind I know *The Bauman Letter* can provide you, I want to offer you full subscription at the lowest possible price I can.

So, if you choose to join today, you can subscribe for just $47.

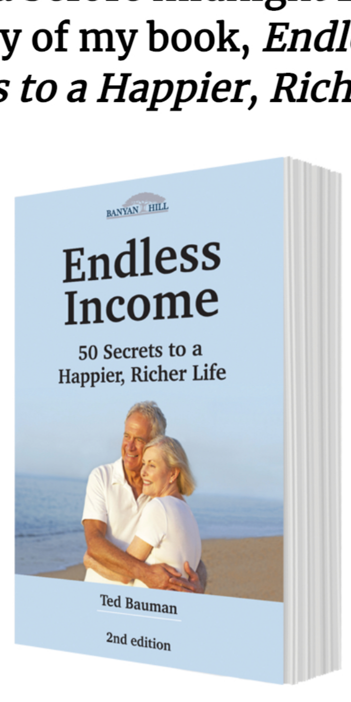
That's less than half the usual price. In fact, it works out at less than $4 per month ... about the price of a coffee from Starbucks.

And for that, you get everything you've just heard about...

- ✔ A one-year subscription to *The Bauman Letter*.
- ✔ Full access to an entire library of archives plus special reports.
- ✔ Any additional special reports I publish in the next 12 months.
- ✔ 3 FREE reports — each valued at $79 for a total value of $231 that reveal everything you need to get in on the Endless Income stream that could help you unlock true financial independence.

And on that note. I have one more special gift for you...

If I hear from you before midnight EST, I'll also send you a hard copy of my book, *Endless Income: 50 Secrets to a Happier, Richer Life.*



This is very different from the investment research reports I'd like to send you. This is a book jam-packed with 50 surprising secrets, tips and insights you can use to make sure you have the fun, independent, carefree retirement you were both promised and deserve.

You'll find everything from how to get up to $54,072 in extra Social Security benefits — for retiring eight years early — to potentially tripling the dividend yield of the S&P with a few nearly forgotten "high-class" stocks.

But I also want to go one step further.

I want you to be confident you've made the right decision. And I don't want you to have to worry if membership is the right move for you.

Which is why I'm going to give you a 12-month money-back guarantee.

That way, if you choose to join today, you have absolutely nothing to lose.

If at any time in the next 12 months you're not completely satisfied with your *Bauman Letter* membership, you can claim a full refund. No hassle. No questions asked. Even if you decide to cancel on the very last day of your subscription.

And you'll still get to keep your three free reports and your physical copy of my Endless Income book with my compliments.

But I highly doubt it will come to that.

I heard from subscriber **Simon K.** who told me:

But this isn't about Simon, or me, or the other successful investors you've heard about today.

This is about you.

This is about you taking that critical step toward true financial independence.

And you can do that by clicking the button below.

As soon as I get your OK, I'll email your special reports and we'll get you set up with your subscription.

But again, you must act quickly. The next payout date is rapidly approaching. And as I mentioned earlier, the sooner you get in the faster your payouts can grow.

I look forward to having you on board. And I look forward to hearing from you next about how *The Bauman Letter* has changed your life for the better.

I Want To See The Details!
