Jeff Brown, Editor, Strategic Alliances of Hack Investor uncovers:

"Mysterious Nasdaq 'glitch' detects massive stock moves weeks in advance"

Here's how you could turn a few calculated moves into a windfall... and potentially enjoy the retirement of your dreams

INSIDE: Full 2021 watchlist of top stocks set to jump 2x, 5x, or even 8x or more...

WRITTEN Hi, my name is Chris Hurt.

And welcome to the **Outlier Investments Summit** with Jeff Brown.

Jeff, good to see you.

JEFF Great to be here, Chris.

JEFF I'm known you for a while.

And it's an understatement to say...

You're an outlier in the tech world.

You've been called one of the smartest men in Silicon Valley and America's #1 tech investor...

You picked the top performing TECH stock on the S&P 500 in 2011, 2016, 2019, and 2020 based on returns...

You recommended Nvidia at $25.15 two years ago as much as 1,139%...

And Bitcoin at $240 for an incredible 8X gain...

But today... and these are your words, Jeff, you're going to make the most surprising announcement of your 30-year long career.

You claim everyday folks could turn a few calculated moves into a small fortune...

Thanks to a mysterious stock market anomaly that you've discovered...

JEFF That's right, Chris. What I'm about to share is truly revolutionary.

This is the best chance for regular investors to grow their retirement portfolios...

If what I'm seeing holds true...

That means you could turn every $10k into $100k... $190,000... or perhaps even $222,000.

Record-breaking results are possible for many people.

Obviously I can't promise you this outcome... But that's the kind of potential upside we're looking at. Truly transformative.

And what's more impressive is... thanks to this market anomaly... you could do this in a very short time...

I'm so convinced...

I'm even going to give you a list with the names and ticker symbols of the top stocks as you can see take advantage of this opportunity — for free.

JEFF It sounds like a very big deal. Can you give us more details about this opportunity?

JEFF Chris, I've been deeply involved with cutting-edge tech for three decades.

My readers have had the chance to see future trends clearly... and profit long before everyone else caught on.

The problem is...

At every turn, the rabbit has been tilted against regular folks. That's why I've tried so hard to help others have the chance to level the playing field.

And I think I've finally found a way.

But now... I'm finally going to do it in the best place you'd ever suspect, Chris — on Wall Street.

JEFF Are you saying you're moving away from tech?

JEFF Oh the contrary, I'm focused on tech now more than ever before.

But here's my point...

One of the biggest, most profitable advantages enjoyed by hedge funds... billionaires... and insiders... *is about to crumble.*

Because what I'm going to introduce today...

Is going to turn Wall Street upside down.

JEFF It frees something the news isn't telling us — yet again?

JEFF They media isn't telling us a lot of things, Chris.

I'm sick and tired of hearing about another stock skyrocketing after hours — for no apparent reason.

And then watching it hit the headlines on CNBC, Yahoo Finance, or The Wall Street Journal — when most of the profits are already off the table.

JEFF I've seen this all the time!

And I've guess who's collecting those 10x, 20x, 30x gains?

JEFF Rich man!

JEFF Right, not you... not anyone outside of Wall Street.

That's why most people typically dismiss these big moves as "outliers". Something flies out of nowhere.

JEFF Lottery winner... is there a way for me to know about these spikes before they hit the mainstream? Probably just wishful thinking.

JEFF For most people, you're right. It's nothing but wishful thinking. Because Wall Street has a HUGE edge.

But guess what? Sometimes, it turns out you CAN beat them at their own game... by detecting these massive stock outlines weeks in advance. And I'll show you how...

JEFF But, Jeff... I've got to ask you... how can a regular investor like me compete with Wall Street in my brokerage account? Unless I have access to insider info, there's no way for me to get ahead of the game.

JEFF Chris, let me stop you there...

In most cases, you can't.

Most of the time, you're NOT going to out-muscle Goldman Sachs...

You're NOT going to outspend JP Morgan.

But like I said, there is ONE way for you to get ahead of the game. And I'll prove it to you...

Because I figured out a way to outsmart the Wall Street elites at their own game.

I've found a way to give my readers a HUGE edge. Not just in tech...

But across all sectors. Retail, energy, financials, real estate, utilities, health, tech, and more...

Across all stocks, from large-cap to small...

And today, you're going to find out...

JEFF But I still can't quite see it... how could someone like me, a regular guy from Florida, have access to something a JP Morgan hedge fund doesn't? That sounds like a stretch.

JEFF It does sound almost impossible, doesn't it?

Here's the thing...

There's an obscure phenomenon in the markets...

An anomaly that appears on the Nasdaq and Dow and NYSE under certain situations...

And in those rare moments...

It's possible to detect massive stock moves weeks before they happen.

I call it a stock market "glitch".

JEFF Like the glitch in the matrix?

JEFF Kind of. Exactly! Because to the rich and powerful on Wall Street, it's an unwanted "bug" in system.

It can cost them millions... even billions of dollars over time.

But for regular investors, it's a goldmine.

If you understand how it works... and you're able to spot it... you can prospect the exact trains and ticker symbols of stocks BEFORE they go up...

Which can result in gains beyond your wildest dreams.

And I'm not talking about 5, 10, or 20% spikes...

This "glitch" detects MASSIVE windfalls.

I'm talking about place gains of over 1,000%...

If you take nothing else from this talk today...

I want you to remember what I'm about to share with you.

Because it could help give you a life-changing... massive edge.

But look, to say Wall Street has an unfair advantage would be an understatement.

Let me show you an example...

Take a look at Novavax.

The "glitch" appears on April 14, 2020. And a few weeks later, the stock starts to move up... for a peak return of 89%.

But remember, most people can't detect it...

Most people only see this opportunity when Novavax is already in the headlines everywhere.

And look at what happens when you — like most people — invest in Novavax only after you have the good news:

Your stake goes up only 76% (not a great return... but look at this)

Almost a 900% gain versus only a 76% gain. Which one would you rather have, Chris?

JEFF I'd much rather have the 900% gain, of course.

JEFF Exactly!

And look at the money...

In the first instance you could turn every $10k into $90,000...

Chris, that's almost $100k in 6 months.

But if you picked, just like everyone else, your $10k could only grow into $17,073.

JEFF That's amazing. To see just a few short weeks can make such a big difference.

JEFF Unfortunately right. Unfortunately that's how most Americans invest... when it's too late.

JEFF But Jeff, I still don't understand what I'm looking at exactly. What is this "glitch"? I never heard about this before...

JEFF This is the Wall Street "secret" I'm talking about, Chris. Why they've been keeping away from you, me... from everybody.

And here's what's most boggling...

Every single day, about $238 billion changes hands on the stock market.

$238 BILLION A DAY.

JEFF Wow. that's a lot of money...

JEFF It is. Now, forget what you've been conditioned to believe...

And think about this for a moment...

Do you watch hockey, Chris?

JEFF I do watch a game here and there...

JEFF Wayne Gretzky, one of the greatest outlier athletes of all time used to say, "You have to skate to where the puck is going, not where it has been"

Now...

Imagine if you knew where all that money — $238 BILLION A DAY — was going to go next?

What's more, imagine if you knew which stocks, down to the names and ticker symbols, all that money was going to flood into... days and even weeks in advance?

JEFF Jeff, no offense. But that's a little hard to believe. What you're describing sounds like having a crystal ball.

JEFF Chris, I know it. I know you would be skeptical...

I don't pay team anything after all this time and they've never let me down yet.

But seriously, this is truly possible. And that's why I'm here, for my big announcement...

You have no idea how much bigger your gains could have been... if you knew about this phenomenon earlier. At least 3x bigger.

Let me show you another example. The Trade Desk.

The "glitch" pops up on May 18, 2017. And a few weeks later, the stock starts to move...

Over the months...

...it soared more than 1,760%!

And Chris, I'm willing to bet you never ever heard about it.

JEFF Not a word.

That's why I stop into the story about the glitch, Chris this run.

Gains from the glitch — 1,760%.

Gains for regular folks — 0%.

Again, that's a 10 to 1 difference, Chris. Can you believe it? Now do the math...

JEFF Arranging. Time really is money...

JEFF time is literally money here. a $100,000 difference...

And take a look at SolarEdge:

After the glitch, the stock went on to gain a whopping 2,125%!

They had no way of knowing this stock was about to make a huge leap — until it was all over the news... way, way later.

And look at the difference.

Gains from the glitch — 2,125% — gains for everyone else — 8%.

This is an unfair advantage, Chris.

You're $204,331 short — just because nobody has ever told you about this stock market "glitch."

Do you think it's fair? Does this look fair to you, Chris? Because I certainly don't think that's fair.

JEFF I'm very frustrated right now, Jeff. Because this is absolutely not fair, you're right...

But I can't change it, I mean... this is how it's always been — up versus them.

Copyright © 2021 Hack Investor Summit, LLC

Chris, I can't stop by to show you how to turn the tables — right now — once and for all.

Chris Oh, SeK I'm ready.

Chris The trick is, Chris, that in order to start banking profits from this market anyway, from this "glitch"...

First of all, you need a specialized system.

But, in order to build this specialized system...you have to have specialized knowledge.

In other words, you have to be part of the Wall Street machine. SeK, AND, be smart enough to figure all of this out.

SeK Wait! I'm not the guy to learn security trading on Wall Street of these years!

Did you go underpower to blow the tip off what the Big Boys are doing?

Chris Ha, I almost did, Chris...

But as it turns out, I didn't have to!

There's one guy in the entire world...one guy, who fits this profile.

His name is Jason Bleiner.

And Chris, if you think I gave you an technology seat to you meet him.

He's a Wall Street legend...a regular humble guy...a colleague and a friend.

And he figured out how this obscure "glitch" works years ago...

In fact, he's built a stock-picking system around this "glitch". Chris, to my knowledge, it's the only one of a kind.

I looked at the backtested data and let me tell you...

Jason's system can literally detect stocks — these stocks with massive gain potential — in any market condition.

Chris Is any market?

Chris That's right. For this reason, I invited Jason to join us today. I want him to reveal everything...and I mean everything...about this stock market anomaly.

This is how everyday investors could have turned every $10k into $100k... or $196,000... or even $222,500 or more... in a matter of months.

Chris Are you saying this market anomaly could help our viewers turn a few small losses into a small fortune?

Chris Exactly! And to prove it to you...

Jason's agreed to give everyone watching up right now his full list of top stocks... all potential outliers — for free...

Because like I said, he I had it with Wall Street and the Financial elites...

Right now, it's time for regular folks to turn the tables and start winning.

Chris Well said, SeK. Let's do it!

Everybody, let's welcome Jason Bleiner on the show.

Chris Thank you for joining us, Jason. We're so glad to have you here with us.

Chris Thank you Chris, and thank you SeK for inviting me.

Chris I need to tell you something about Jason. I know he doesn't like to brag...

But listen to this:

I was able to pick the #1 stock on the S&P 500 four out of the last five years based on his system.

Jason I know you've been crushing it, SeK...

SeK But when I looked back at the data...Jason's system could have uncovered them 20 years ago!

In fact, his system would have uncovered some of the world's most successful investors...

Like Warren Buffett, Carl Icahn, and the world's most successful hedge fund manager, Ray Dalio... by more than 50 to 1!

Chris 50 to 1?!

And there's what makes me a bit envious, Chris.

Unlike me, Jason doesn't fly to these companies to meet with the management...

He hasn't spent decades building an "insider" Rolodex to Silicon Valley's inner circle like I have.

In fact, he confessed to me he doesn't even use what these companies do.

But he's able to find winning stocks weeks, even months before anyone else...

And in EVERY sector: technology, retail, energy, financials, real estate...commodities, you name it.

Chris Oh, SeK I'm ready to hear all about this Jason. let's cut to the chase. What exactly is this "glitch" this market anomaly SeK keeps talking about?

Jason It's a wonder I never heard about it before!

SeK Yes. SeK mentioned this a lot based on my research and I'm a Wall Street nerdy-nerdy.

I was shocked to learn about it.

I never really wanted to work on Wall Street in the first place...

Chris Well you hooked me, Jason. When I first met you, you looked like a Wall Street

Jason No, I mean, you've got to look the part. Sometimes, you have to look a certain way to fit in on the Street. You have to play the game.

But I wasn't born into banking royalty. I grew up in a single-mom household struggling through the seventies.

And I accidentally found my way onto Wall Street when I was down to my last $0.00 and I asked a friend for a job.

If not, I don't know where I'd be today. I'd probably still be a bitter professional musician, strumming a guitar in some dive bar somewhere.

But thanks to a friendship, it changed my life.

And quite frankly, I discovered...

Wall Street doesn't like people like you...

Or the people watching this presentation.

Sure, they LOVE your money!

But the last thing they care about is making you wealthy.

And the last thing they want to do is share how they mind their own money in stocks about to go up.

Chris Like this everybody?

Chris Right. This was right after 9/11...

Times have been hard back then. I was working on Wall Street, on a trading desk at Cantor Fitzgerald. And I had many friends and colleagues...

But life moves on...and by pure accident, I discovered this glitch, this anomaly.

And the way it happened was:

My clients were all big bank traders and hedge fund managers.

I was moving millions of dollars for them. I think they talking about massive amounts of money for a single trade.

Sums as high as $10 million...$20 million, and even $ billion per trade.

Chris One billion dollar per trade? That's...mind-boggling...

Chris Yeah, I'm sure you were a lifestyle for me and my family I never dreamed possible.

It's very easy to take charge your investment portfolio when you know about this glitch...especially with small stocks.

And I'll show you how you can do it too, starting with my free list of stocks.

Chris Ok, that makes me feel a little bit better...

But I wonder...if this is so good, why don't I know about it already? Why isn't this glitch in the mainstream media?

Chris Kind of it's the only

Let's suppose you manage $10 billion of hedge fund money.

You get 2% a year for simply seeking, so every day...

That's $200 million!

What do you do with that? You take a big big glass corner office... with a big tropical fish aquarium and fancy art to impress your clients. You hire the smartest analysts...make them work 24 hours a day...

And they're calling CEOs...they're risk management calls...they're asset/liability swaps, charts...digging through forensic accounting...

They're doing all these crazy things...that most people simply can't do.

This is how Big Boys on Wall Street get their edge over anyone. You, me, anyone.

And, if they have a good year, they get 20% of the profits.

So, do you think they're going to tell you, me, or even their buddies...what they're investing in...until they want to be a billionaire?

Chris No, they don't.

They're not going to announce what they're buying on CNBC or in the Wall Street Journal...until they're all in positions. Ready for the payout. That's their game.

They make their news headlines when they can profit from them.

So, how did you, Jason, learn about this?

Jason Well, I was the guy who sat at the desk and invested this money for the big shots.

I made about a billion bucks for them, before I actually started it...

So, I know how to see it to outsmart the bigwigs on Wall Street and their cronies from home runs.

Chris Ok, now I really want to know what's behind this.

Jason It's all thanks to a special government regulation which this "glitch" exploits.

Unfortunately, you can't be able to find out about it by looking at the stock market charts, or reading quarterly reports...or listening to CNBC...

But I used to to find TWO stocks that were perfectly poised to release good news.

For example, take a look at the chart of a company I'm sure you'll recognize — **Nvidia**

Jason Now ahead, my readers were able to make hundreds gains on Nvidia. In fact, I first popped up on my radar in 2015, and I was able to recommend it in 2016.

SeK SeK had great timing. I detected the glitch around the same time, in February 2015.

And as you can see, the chart follows the pattern you should recognize by now.

First, the glitch...

"Intel, Nvidia expand autonomous driving collaboration" — CarNewsChina

"IBM, Nvidia Help U.S. Leapfrog China in Supercomputer" — Reuters

"Nvidia's Jensen Xavier AI chip boosts $10,000 worth of power" — CarNewsChina

"Nvidia aims to woo business players with new software" — Reuters

"Three You Soon Nvidia's Cash Balance?" — Seeking Alpha

"NVIDIA and Bosch team up on self-driving car AI supercomputer" — Total Geek

"Nvidia halts Smart copper hometry lax cross ground" — TechRadar

"The Best Bet U.S. Companies of 2016—and Into They Get The Way" — The Motley Fool

Then, the headlines roll in. And...

The stock shoots up to a peak 2,502% gain.

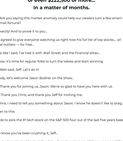
Chris Same pattern.

Jason Exactly the same. Here's another one, BongCentral:

Again, my system detects the glitch...then, big headlines appear...and boom, massive gains, up to 1,424%.

Jason So I made a lot of Payouts...

Same pattern. Glitch... readiness... gains of over 1,000%.

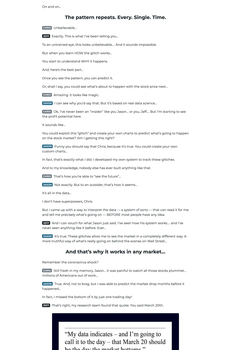


Jason Here's another one: Mercado,Libre, Inc.

It went on to gain 1,353% after the glitch. But it only jumped 487% after the major readines.

And Coupa Software — following the glitch, its stock jumped 912%

But this gains after the major headlines! Only 61%...



Go and do...

The pattern repeats. Every. Single. Time.

Mike: Unbelievable...

Bill: Exactly. This is what I've been telling you...

To an uninitiated eye, this looks unbelievable... And it sounds impossible.

But when you learn HOW this works...

You start to understand WHY it happens.

And here's the best part...

Once you see the pattern, you can predict it.

Or, what I say you could see what to happen with the stock price next...

Mike: Amazing. It looks like magic.

Bill: I can see why you'd say that. But it's based on real data science.

Ok, I've never been an "insider" like you, Jason... or you, Jeff... But I'm starting to see the craft potential here.

It sounds like...

You could exploit this "glitch" and create your own charts to predict what's going to happen to the stock market before it happens, right?

Mike: Pretty much that's what I do. Because I'm a trader. You could create your own system, too.

In fact, that's exactly what I did. I developed my own system to track these glitches.

And to my knowledge, nobody else has ever built anything like that.

Mike: That's how you're able to "see the future"...

Bill: Not exactly. But in an outsider, that's how it seems...

It's all in the data...

I don't have superpowers, Chris.

But I came up with a way to interpret the data — a system of sorts — that can read it for me and tell me exactly what's going on — BEFORE most people have a clue.

Bill: Both can vouch for what Jason just said. I've seen how his system works... and I've seen anything like it before. Ever.

Mike: It's true. These glitches allow me to see the market in a completely different way. A more truthful way of what's really going on behind the scenes of the market.

And that's why it works in any market...

Remember the coronavirus shock?

Bill: Yeah to my memory, Jason. It was painful to watch all those stocks plummet... millions of Americans out of work...

Mike: True. And, not to brag, but I was able to predict the market drop months before it happened.

In fact, I missed the bottom of it by just one day!

Bill: That's right, my research team found that quote. You said March 20th.

The actual coronavirus bottom was one trading day later. Since then, the market is way up.

Mike: No way!

Bill: As the funny thing is, just a few days before the crash, my system signaled the glitch on these systems...

And while everyone was panicking... people who followed my advice, could have made a nice 50% return...

As well as a nice 8% profit on Facebook and ETSRN gains on TWO.

Mike: And that's just the most recent dip example. Jason correctly predicted four more months dips in the past three years.

The drop in January 2018... the bottom of December 2018... and the market sell offs in May and August 2019.

He team found those quotes, too. Take a look.

Mike: And have you ever blown a stock idea on those up...when everything's falling down?

Bill: Think back to the Fitz example, to Nookular...

The glitch popped up — during the pandemic...

And, Chris, do you remember what happened to the stock next?

Mike: The stock exploded.

Bill: Exactly! It went up almost 1200% in a few short months...

But let's go back further. To 2006...

Now, to be fair, in 2006 my system didn't exist yet — I was still working on Wall Street.

I was tracking this glitch in my head and taking notes in my notebook. Because even then, it kept popping up regularly... following the same pattern...

So I ran my system through a thorough back test.

You won't believe the results. Check this out...

Or about the same time Lehman Brothers was filing for bankruptcy...

The glitch pops up on Google.

Now look at the chart and tell me what you see.

Mike: The stock more than doubled just a few months after the glitch... A jumped 131%...

Bill: Right. And that's exactly my point...

This glitch exists in any market condition. Because it has to...

Here's another one. Netflix. Yes, back a few months after the glitch, the stock jumps 327%.

Mike: Incredible... If you knew about this glitch, you could have more than quadrupled your money.

Bill: Exactly. And you could have made even more on Apple...

Right after the glitch, its stock spiked 607%!

Mike: Know what the old John Guest? Stock mach do you want to see, this would have turned a big one the short-term bull just as well.

Bill: Well, you're right. This works in any market. So let's go back even further, to 2000.

Now, during the dot-com crash, more than $1 trillion was wiped out from the stock market.

But Nvidia almost doubled in less than a year.

Here's Chris. And, predictably, his stock jumps 79% after the glitch...

Or CACI International. Same pattern. The glitch... and soon after, the stock more than doubles.

Mike: And Chris, I really have to point out one thing. This is important. Even if these are two bad examples... it doesn't really matter.

All it matters is that it proves the glitch pops up in any market condition. And it brings good news. Because...

It's based on how Wall Street actually works.

Bill: I can definitely see it now. It's easy to make gains during the bull markets. But others you have trades digit gains like that in any market... You can't argue with that.

So now I'm wondering...

Why does it work no matter what?

Mike: It's really simple. The reason it works in any market is because the glitch is based on a scientific law.

Bill: What do you mean?

Mike: Well, to put it simply...

The scientific law behind this "glitch" makes the stock potentially move in one direction only.

Bill: Not sure I quite understand...

Let me ask you this...

What's the only thing Wall Street HAS to do, always, no matter what?

Mike: I think I can answer for everyone. Their goal #1 is to make money — Main Street be damned.

Bill: Ha, ha. Jeff, I agree with you 100%. But in order to make money, Wall Street MUST move.

Come hell or high water, Wall Street must invest. Period.

Now here's the thing, and this is key...

The big boys on Wall Street are only going to invest in the stocks with the best news about to come out.

Mike: How are they able to know that? How is Wall Street able to know which stocks have the goods news coming? Are we talking about insider trading?

Bill: No, Chris. The reason Wall Street is able to invest in the stocks with the good news coming out... is the same reason my system is able to identify the glitch...

It's all based on the simple law of supply and demand.

Mike: Can you be more specific?

Bill: You only need to know one thing...

Every time you buy into your brokerage account... or you look at the Bloomberg charts, or watch CNBC...

Remember, that data is the DEMAND of the supply and demand.

Meaning, Big Money floods into a stock — the stock shoots up. But...

You're only able to see which stocks are winners or losers... AFTER they've gone up or down.

So you're always behind...

It's backward.

Mike: You're right, this is so backwards. I'm surprised I never thought about it this way.

Bill: I keep telling you Chris...

We've been conditioned to believe all the complicated stuff about how the stock market works...

When in reality, what's really going on is the law of supply and demand.

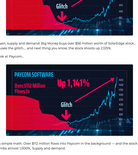
Mike: Exactly. Follow the money.

You just have to know the exact moment it happens. And I do.

Let me show you something Chris. And I think this will blow your mind.

Bill: I'm ready...

Mike: This is the same Nookular chart you saw earlier. Only now, I overlay my own chart — with my own data tracking the "glitch" you have seen...



Mike: Wow, it's like looking through X-ray glasses. Where did that from?

Bill: Over $15 million flooded into Nookular before the same Franklin Resources, Goldman Sachs Group, Bank of America, and more... they all piled in... together they bought over 50 million shares.

You never saw it in your regular stock charts...

It wasn't even reported publicly until weeks later...

But it's big money flow that caused the glitch to appear...

My system detected this movement soon after it started. And signaled the glitch.

That's how I knew Nookular was about to take a ride. I wasn't guessing. I knew it for a fact. It's a simple law of supply and demand... and I saw it in my charts.

Now, I'm not saying Jason Bodner and I could position himself at the very start... watching a $500M market cap company turn into a $10 billion market cap company.

Mike: Here's the truth, Chris...

But markets don't matter. Bear markets don't matter. FB ratios, technical analysis, algorithms trading... what the company does... none of that matters...

When billions flood into a company worth millions... guess what happens?

Mike: The stock goes up.

Bill: Its stock MUST go up.

Mike: Sounds like simple math. Supply and demand...

Bill: Right. Big money — the stock goes up. It must go up.

Take a look at The Trade Desk, with my chart being...

Again, this is simple math. Over $240 million worth of TTD shares were bought behind the scenes, right before the glitch appeared.

Renaissance Technologies, Goldman Sachs Group, Millennium Management, to name a few... they all bought in... literally turning a $2 billion company into a $44 billion company.

Here's SolarWinds...

Again, supply and demand. Big money buys over $1b million worth of SolarEdge shares, causes the glitch... and that thing you know, the stock shoots up 2,125%.

Look at Paycom...

Or Square. Over $250 million flows into Paycom in the background — and the stock climbs almost 1200%. Supply and demand.

Or how about this one. Square...

Big money gobbles up more than $250 million worth of shares... causes the glitch... and that thing you know, the stock shoots up 631%.

Mike: Amazing. And demand Chris, it happens every Single Time.

Bill: I'm having the education of my lifetime right now. It's happening in real time — so I'm trying to keep up. Look at the stock market in a completely new way.

Mike: I know exactly what you mean, Chris. Because the same thing happened to me. I wasn't too relatable what was going on there on the trading desk.

I could see these big money moves with my own eyes — MONTHS before the general public.

Bill: Impressive. I mean, it long before the general public...

Mike: It's incredible how much is going on behind the scenes on Wall Street... Everything is designed to keep you in your place, always a spectator... and never a participant.

Bill: True. But I could tell what's going to happen with these stocks...

Money because I was handling massive, massive orders from big institutional clients and billion-dollar hedge funds.

And here's one thing you need to realize, Chris...

There's a key difference between simple manipulation big stocks and when you and I buy stock.

When you want to buy stock, Chris, what do you do? You open your brokerage accounts, you log in, and move on with your day. Right?

© 2020 Bodner Research, LLC. All Rights Reserved.

Sean What's about it. I buy 10, 50 or 100 shares and move on. Takes me 2 or 3 months.

Chris But when, say, Warren Buffett buys stock, he takes a position in a company...

to house holders and millions of shares.

And here's the thing. He doesn't buy all of that in one go. What he does is he buys these shares over several days...

Sean So they don't drive the price up too much?

Sean Exactly, because these big institutions want to keep buying cheap as long as possible.

They have a window of maybe 5 days to do it.

They don't want to buy it quick, until they're ready to tell you about it so they can profit from their positions.

Thus you and I, and Jeff, and most people... we have no clue what's going on... until it's too late.

After a while, all of this activity starts lifting the stock higher and higher...

Until everybody is suddenly...

Chris The rest of supply and demand...

Sean It's simple math.

Don't chase headlines. Get in before they are made!

Now, here comes the most exciting part...

As you know, these big institutions are required by law to disclose their investments. And they do it every quarter by filing a form called 13F.

Sean But can I tell ya what I'm sittin' in front of?

Chris You can! Chris. But it's a waste of time, and I'll tell you why...

This is how Wall Street keeps the financial press hungry for what's happening.

They compare changes in their quarterly filings, and then write about it.

But it all happens months... MONTHS... after the fact. When the stock is already way up, and it's too late to ride it for any meaningful profit...

But if then, now some guy, uptown, Sean, can detect these big money moves in advance!! You must be looking at something completely different than the 13F filings...

Sean You've correct.

These massive orders I've handled throughout my career on Wall Street... they taught me how to recognize these giant trades in real time.

Because they leave clues...

And if you're experienced and watch carefully...

You can detect the early signals when these big institutions begin their buying...

You can spot them virtually within hours

That leaves you enough time... at least a 10-day window... to position yourself before the stock starts to move up.

Sean So that's why you're in the trade before anyone else. Even before the fastest trading algorithms.

Chris Bingo. Because even the fastest algos can't trade when there's no data to trade on.

We want to trade BEFORE those headlines hit the newswire...

And created a proprietary system to track these trades... virtually within moments they happen.

That's also the reason why I keep calling these Big Money trades a "glitch".

Because to me, they do represent...

The "glitch" in the Wall Street Matrix

They're "invisible" to almost everyone.

If you aren't sure to find out what the Big Boys are doing... you have to go and search these SEC filings yourself... or wait for the big headlines on CNBC.

But my proprietary system is able to track these massive stock moves almost instantly...

And so far, with all the back tests and my live trades...

My system uncovered over 11000 opportunities that could have doubled your money in less than...

Sean WOW.

Sean Over 11,000?!

Sean Yes. Take a look...

And this is just a small sample...

While I can't guarantee everyone could make the same gains...

We've identified more than 900 trading opportunities that could have theoretically made you 10x to 1x in one year...

Think about this.

If you had invested $10,000 in just the top 5 you could be sitting on over $21 million today.

Sean Jeff, Sean, I must confess... I wasn't sure what to expect when we started this conversation. Right now, I'm thinking, how do I get my hands on this thing?!

"NOW!"

I don't know about our viewers, but I for one, am dying to get started!

Because I don't want to ask for months to see which stocks I'm missing out on, and risk losing out on the gains I want to get in positions now!

Which reminds me...

Everyone watching right now, get ready and go find a pen and a piece of paper...

Because in just a moment, we're going to share the list of stocks Sean's system has signaled.

And I'm sorry to ask, guide they could even going up fast, in a matter of days.

Chris That's because we have today, Chris. There's just too much profit potential at stake here...

And we discovered, Sean, our researchers let me you were authorized to make transactions of over $ Million...

Sean That's true... I mean a billion isn't what I used to but if you have an edge, on Wall Street, and it's making you money — you tend to press your bet. Why would you not back if you know you had the advantage?

And to me, the greatest advantage you can have is...

It's simply knowing where the big money is going.

It would be hard to screw up if you just did this one thing

And this, I need to tell you... Sean's team providing this service is a small group of private clients. We "stalk's what's all Wall Street. Combined, they manage many billions in assets.

Sean Hey, Jeff — I know this may sound cheesy. But I'm the lucky one. I'm the one who found its way onto Wall Street. There are a lot of other folks out there who could have done just as well as me. But they wound up behind a desk somewhere else. Or working 3 jobs to take care of the kids, like my single mother.

But what motivates me to share this information is giving regular folks a leg up.

I'd rather help them in some way. If I can pay it forward... thanks to better feeling in the world.

To be honest, I'm at a point in my life where money doesn't mean as much as I used to.

I'd rather show someone how to make their first million than help another rich millionaire make another million.

Chris I'm beginning to see why Jeff Brown pounded the table and demanded to put this event together...

Chris Chris, this is a real game changer for everyone who's got any kind of money in the markets.

Because finally, there's a chance for regular people to...

Start beating financial elites at their own game

Sean And we've only scratched the surface. Every single day, I scan 12,000 stocks...

Chris Really? You do all that?

Sean Well, my system does. It scans 5,000 stocks out of terms of thousands that trade on the market.

Chris What are you looking for?

Sean What I'm looking for are the signs of Big Money flows. Where is it moving next? What stocks are being dropped up by Buffett, Icahns and Ackmans out there?

My system is able to detect these moves within 24 hours before they happen.

Then, based on some additional proprietary criteria... I pinpoint 20 stocks each week...

And Chris, these stocks are the best of the best...

Of course, nothing in the market is certain. But I believe they could at become multi-bagers...

Potential gains of 1,000% or more...

Because you're able to get in position so early.

Chris This is the big advantage the ultimate edge Sean can bring to our viewers.

His system is able to detect the winning stocks, even potential 10-baggers, 20-baggers, all the outliers, a very single winner, within hours after the cash injection happens.

While everyone else — and that includes the machines and algorithms — has to wait weeks, or months, before they can see the trade in the market.

Sean Sure, not every one of these stocks makes massive gains like you see in the textbooks.

But when a big sales happens, the idea is to be right there in position. From the start. Before everyone else.

And it's not by accident...

Sean Know what I've seen so far... I can definitely say nothing you do is by accident!

Which brings us to today's...

Big announcement

Jeff, I'm sure everyone watching up right now is dying to hear what you've got.

Chris This is a revolution for everyone who wants to achieve financial freedom...

And doing it without worrying about what's happening in the markets...

But I want our viewers to understand how this works.

Chris That's right. You've never endured anyone before. At least not that I'm aware of...

Now he's right. I didn't. Because I've never found anyone I truly trust with the work they put in for their readers.

Chris That's right. After all, there's a reason some people keep calling you America's #1 stock trader.

Chris Why not let me ask you a question...

I know you're investing in the stock market yourself. So tell me how much time do you spend researching all these companies... before you decide to invest in a particular stock?

Sean To be honest, I can spend days, weeks or months glued to my computer screen... And I still have no clue what I'm supposed to do.

In fact, I missed out on so many opportunities because I couldn't make any sense of it all.

Chris Precisely. But you're not alone. Most people face similar difficulties.

And it's not your fault. Chris.

I've been in this business, first as a tech executive, and later as a tech investor. For over three decades now.

I've been flying around the globe, more than 3 million miles. I've been having meetings in Washington, Silicon Valley, Wall Street, Europe and Asia. Learning... just to get in the room negotiations and back-breakthroughs firsthand.

But I have to do it. Chris.

Because if I want to bring the very best insights to my, now more than one million readers,

I must have boots on the ground — must meet with these companies, I must go through these financials, audit them meticulously... to see what they're all about.

Well, as it turns out, it's humanly impossible for me to be everywhere at the same time.

Because there's only one of me! Can you believe it? [laughs]

Chris There's only one of you, Jeff. It's time you do something about it, ha ha.

Chris That's where my big announcement comes in.

I've promised my readers great tech investments. And that's what I deliver. Every single time.

But today, I'm going to give my readers the...

The opportunity to lock in unbelievable gains in every sector.

I'll explain how in a moment...

Chris What you just said, Jeff, is really important. And I want our viewers to understand...

I'm just a normal dude who lucked out into his seat...

I stumbled on something amazing. And I emerged from the belly of the beast, after years of dealing with chaos that never ends.

And I want to bring what I discovered, this amazing system, to as many regular Americans as I can. Because this is how you can actually win at the Wall Street game.

These are the ropes to the kingdom, Chris.

It's virtually impossible for a mere mortal to beat the markets. But I've built the system that can do it.

Sean And at the red pill, Chris.

Sean's system can track big money moves within virtually moments of them happening.

That's why he would have been able to find the stock 20 years ago of Jeff.

And it's why we've seen gains as high as 89%... 176%... 2,33%... or more... in a few short months.

Look, I'm a tech guy. I know a breakthrough when I see one...

So, Chris, trust me when I say, this stuff is unbelievable.

There's no way you can create a system like that... one that scans the markets, scans 5,000 stocks every single day... scans all of the dark pools for these trades...

Without having multiple millions of dollars to spend on something like this.

As an angel investor... I get pitched crazy ideas all the time...

Everyone can have a great idea once in a while. But do you know how many people actually do something about it?

Sean I don't know... but I guess not many. ?

Sean Exactly. Not many. But Jeff's system... it's one of a kind. I keep repeating myself but I'm focused it's truly.

The moment I met Jeff, Sean and learned his story... and after I saw what he's created... I immediately decided to do something I've never done before.

And Chris, here it is. The moment you've been waiting for...

I invited Sean to join my Bloomsbury Research team. And I'm pleased to announce that he accepted my invitation.

One of Sean's newsletters has one of the best winning streaks I've seen — as high as 90%.

That's why I'm thrilled we landed him here at Bloomsbury.

So I'm officially announcing we're launching a new research service called...

"Outlier Investor"

This is exclusive to everyone watching so right now. I've never done this before.

But if our viewers today choose to join, they will be able to benefit from the same system the Wall Street elites are paying Sean thousands of dollars for.

Sean Congratulations! Welcome to Bloomsbury family, Sean. This is really great news!

Chris & Chris, I couldn't be more grateful to have Sean become part of Bloomsbury Research.

Like I said, I can't be anywhere at once.

But that's where Sean comes in. I'll keep delivering the best tech investments to my readers. But now, Sean will cover the opportunities and find winners in every sector.

That's why we created **Outlier Investor** to give hard-working folks a chance at turning the tables on Wall Street.

To my knowledge, this is one of the few systems that allow you to track where the Wall Street insiders are — before they disclose it to the rest of the world.

Chris, I challenge you to show me a better way to grow your wealth... starting EXACTLY what the Big Boys are doing themselves. Without the long waits... and not what they're telling you what you should do. ?

Chris Honestly, can't think of a better investment strategy than this, Jeff. No. Bugging exactly what the Big Money is buying...

Chris That's right. And look at the gains you could have seen this way:

The contact in 2020, it worked ten years ago. It worked during bull markets and bear markets...

In fact, using my system — and if you did nothing else — you could have made multiple three-digit gains just by following Big Money buying...

You could have made as much as 86%, 35%... and 33%...

So I have no doubt it will work in 2021, too. But I don't ask you to take my word for it...

I want our viewers to see it for themselves. That's why I'm going to give you my list of top stocks I'm looking at right now... all potential outliers.

Are you ready?

Sean I am. Sean. I'm ready.

Sean Can I ask our team to put the ticker symbols on the screen. ? I think our viewers can see them scrolling right now...

Sean Thank you, Jeff. And I'm going to give our viewers to watch this list closely...

My system is signaling Big Money activity behind these stocks:

And I believe it's just a matter of time before they start to go up...

List of Top Stocks

VICI
EAF
TSCO
LX
SONY

Now, I'm not asking you to take my word for it. So you're free to just enter these names down, and do nothing about it.

All I'm asking is to keep an eye on the headlines for the next few weeks... and then see what happens.

Sean And you're giving these stocks away for free?

Sean Yes, because I want to prove to you that this system works for a fact. And the best proof is evidence. Chris.

And speaking of evidence...

Chris, we just saw a long list of potential outliers. But I want one step further.

Sean, I want you to share with our viewers the single best trade you've made in your career.

Sean Well, I'm not sure I can. I've made so many. I've been a position in a company...

Sean Yes, I'm sure I can do that. Let me share with you the trade that changed my life.

Sean Thank you, Jeff. I'm so grateful to have this opportunity to share this with our viewers.

Sean Thank you, Chris. It's been a pleasure to be here with you.

Chris Sean, I'm so grateful to have you here at Bloomsbury Research.

Chris Thank you, Sean. Thank you, Jeff. Now, I'm sure you have questions. Let's get to them.

Don't chase headlines. Get in before they are made!

Now, here comes the most exciting part...

As you know, these big institutions are required by law to disclose their investments. And they do it every quarter by filing a form called 13F.

Sean But can I tell ya what I'm sittin' in front of?

Chris You can! Chris. But it's a waste of time, and I'll tell you why...

This is how Wall Street keeps the financial press hungry for what's happening.

My system is signaling Big Money activity behind these stocks:

And I believe it's just a matter of time before they start to go up...

List of Top Stocks

VICI
EAF
TSCO
LX
SONY

Now, I'm not asking you to take my word for it. So you're free to just enter these names down, and do nothing about it.

All I'm asking is to keep an eye on the headlines for the next few weeks... and then see what happens.

Sean And you're giving these stocks away for free?

Sean Yes, because I want to prove to you that this system works for a fact. And the best proof is evidence. Chris.

And speaking of evidence...

Chris, we just saw a long list of potential outliers. But I want one step further.

Sean, I want you to share with our viewers the single best trade you've made in your career.

Sean Well, I'm not sure I can. I've made so many. I've been a position in a company...

Sean Yes, I'm sure I can do that. Let me share with you the trade that changed my life.

Sean Thank you, Jeff. I'm so grateful to have this opportunity to share this with our viewers.

Sean Thank you, Chris. It's been a pleasure to be here with you.

Chris Sean, I'm so grateful to have you here at Bloomsbury Research.

Chris Thank you, Sean. Thank you, Jeff. Now, I'm sure you have questions. Let's get to them.

Jason, I can't wait to find out more about those five stocks...

Chris: We need to be careful here, Chris. These are small cap stocks, thinly traded...

So we don't want all of our viewers to move the market and by our hand...

That's why I decided to reserve these five names for members only...

Because there will be a pop up to price you should not chase.

But you need to realize, my system is signaling massive Big Money activity behind these five...

That's why I believe it's just a matter of time before these stocks start climbing up steeply.

And the reason I picked these 5 small caps... is because they have a much bigger potential to become 10, 20, or 30-baggers.

My estimation is you have about 10 days or less to get in and position yourselves... for the chance to watch your gains multiply.

Of course, I can't predict the future...

But I know for a fact, each of these 5 stocks have the potential to make 5... 7... or even 10-times your money.

But you must act quickly.

Chris: Good point, Jason. And I'd urge everyone watching us right now...

Watch for the subscription button when it appears... It should pop up shortly...

Make sure you don't miss your chance to sign up and find out about these 5 high-growth stocks.

Chris: I can tell you from firsthand experience, Chris.

Stock rallies happen swiftly!

When Big Money starts flooding these companies, you have only a short window of days to get in...

For a chance to reap maximum profits.

But the window gets smaller and smaller the longer you wait.

For this reason, I've created two special reports.

The first one is called **Outlier Investments: Five Explosive Stocks Set to Soar up to 1,000% or More This Year**, where I reveal the names and ticker symbols of these five high-growth stocks.

And the second report, called **The Outlier Investor Manifesto: How to Beat Wall Street on Their Own Game**, starts I go into the nuts and bolts of how Wall Street really works. And why it's finally possible for everyday folks to start investing just like these elites - thanks to my system.

Chris: And I must remind you... You'll get both these reports for free when you join **Outlier Investor** today.

In fact, you'll get them within minutes after you sign up. So you can get in position as soon as possible... perhaps within minutes from now...

Chris: Look, there's no guarantee in life. But armed with this information, you could potentially turn every $10k into $80,000, $186,000, $222,500... or more...

Because you can get in position so early.

And in just a few short months you could be looking at a small fortune.

Our end goal turn these tiny investments into substantial gains over time.

Chris: Everyone watching us right now...

You're invited to join Jason's elite research service, **Outlier Investor**, built around this one-of-a-kind proprietary stock-picking system he just shared with us...

Exclusive charter price for a limited time only...

Am I right, Jeff?

Jeff: That's right.

But like I said, my mission at Brownstone Research is to help regular investors learn how to think like the elites. The best way to do it is to invest in the exact same stocks of the Big Money is buying.

But don't worry...

I know Jason won't ask you to pay $10k a year... and you won't have to pay $2k a year... and not even $1k a year for his service.

Chris: The charter price is less than $1k a year? This already sounds like a bargain to me...

Jeff: But hold off, Chris... I'm not finished yet...

I just showed you how easy it is to make gains of up to 334%... 515%... 985%... or more, in a short period.

But there's a way to supercharge these gains even more, and you can do it in a matter of days.

Chris: Wow, incredible. And I thought this was already as good as it gets. I'm listening!

Jeff: Like I said, I worked for Carlos Fitzgerald. I ran derivatives for one of the largest financial firms in the world for over a decade. My team and I made Carlos plenty of money.

But here's the thing. Our clients could never have done as well as they did without options.

As a matter of fact, I was in charge of options trading for Carlos Fitzgerald's North American operations.

Chris: Did you just mention options?

Jeff: I know, I know... most people when they hear the word "options" they freak out. Because they're conditioned to believe they are risky...

Which, they can be – if used incorrectly.

But options have the potential to make massive gains...

Especially when you can get in before a stock becomes front page news.

For example, if you had bought certain options on TTD, you could have made an additional 3,207% gain on top of your 800% from stock.

A certain option play on SEDG could have handed you another 1,331%... as well as a nice 515% gain from stock...

And if you had bought certain options on PRFC, you could have packed 2,170% gains on top of 334% gains from regular stock... all in a fraction of the time.

And right now, there are two option plays I expect to grow as substantial gains...

Chris: Can you tell us more details about these two option trades?

Jeff: Unfortunately, I can't... because if you've ever dealt with options, you know how important timing is.

Right now, I'm waiting for the buy signal on these two — so I don't want to tip our hand...

But I expect to send these out to our members in the next couple of days.

I can't promise you, though, that I can pick a trade sent to members of my one of my other services just recently, for a similar option setup that I see happening right now... And if they followed my advice, they could have booked 67% gains in 4 days. And that's precisely because we timed it right.

Again, timing is crucial, so you need to act fast.

Once these gains start coming... If you're in, you're in. But if you're out...

Well, you're going to be left on the sidelines again.

That's why I want to send you another special report for free, to everyone who joins **Outlier Investor**

It's called **Outlier Fortunes: How to Turbocharge Your Profits with Options**

Inside you'll get everything you need to know about options: how to trade them, what to watch out for, so you have the best chance to see maximum returns.

These three specials reports, together... they're the playbook the Big Boys on Wall Street use to make money.

You won't find this kind of information anywhere else.

And I can say it with certainty because I was doing it MYSELF.

Chris: Allow me to interrupt... anyone would be foolish NOT to pay $1k just to get these three reports. This information alone is worth way more than just $5,000.

Chris: Ok, folks. You've heard what Jeff just said...

I couldn't agree more. This is the best deal I've seen in a long, long time.

And because you made the time to be here today, Jason and Jeff reserved a seat for you at **Outlier Investor**.

The subscription button just appeared below, so click on it as soon as you can...

This is a new service, exclusive to Brownstone Research. And you're one of the first to hear about it.

And you're also one of the first to get access to a private membership website, exclusive to **Outlier Investor** subscribers, with access to all the articles, the model portfolio and a full backing of special research information we don't have time to get into today...

Now, considering the amount of knowledge and work it took to create it, this service isn't cheap.

A one-year membership to **Outlier Investor** is $4,000. But here's the thing... you won't have to pay $4,000. You won't even have to pay $2,000.

Jason and Jeff have arranged for you a special charter price, as a thank you for taking them up on this offer.

In short, when you join **Outlier Investor** today, the price for your one-year membership will be cleared down to $2,000.

And it's a fraction of what all the elite Wall Street fund managers are paying Jason right now — for the same type of advice.

Chris: Amy, since this is a new service we're just launching under Brownstone Research...

I'm willing to do one more thing...

When you join **Outlier Investor** today, I will grant you one extra year of membership FOR FREE. I'll essentially pay for it from my own pocket. That's how strongly I believe in what Jason is doing here.

Chris: Wow, that's incredibly generous of you, Jeff!

So, folks, you all heard what Jeff said there... anyone would be foolish NOT to pay $1k just to get these three reports. This information alone is worth way more than just $5,000.

Chris: Ok, folks. You've heard what Jeff just said...

Remember, Jason's the one who's been doing this for a long time.

And because you made the time to be here today, Jason and Jeff reserved a seat for you at **Outlier Investor**.

Chris: Ok, Jason, I'm ready to hand it back to you.

Tell us what happens next.

Jeff: Chris, allow me to interrupt... anyone would be foolish NOT to pay $1k just to get these three reports. This information alone is worth way more than just $5,000.

Chris: Ok, folks. You've heard what Jeff just said...
