Unbelievable! How **Mongolian “Mountain Milk”** Discovery Was Shown In A Study To Give, On Average:

Perfect 120/75 Blood Pressure

In Just 28 Days

In the next 34 seconds, I’m going to show you a **shocking breakthrough** in blood pressure health…

That’s been scientifically shown to help promote a stunning 120/75 blood pressure…

In just 28 days…

So you can quickly maintain **healthy** blood pressure.

If you’re ready to finally **stop thinking about how** to keep your blood pressure healthy…

Or thinking about your next doctor’s visit and that annoying blood pressure cuff…

And if you’re ready to finally **keep a healthy blood pressure reading** with no extra effort…

You’re going to love the simple, scientifically-studied technique I’m about to show you.

Imagine…

Waking up tomorrow with better blood pressure than you have right now...

And it’s even better the day after that.

In fact, each day it keeps getting better…

Until your doctor tells you that **you don't need to think about it anymore**.

That’s what this breakthrough can do for you...no matter how long you’ve been trying to keep your blood pressure healthy, or how many other things you’ve tried.

That’s because this blood pressure solution works in a brand new way, different than anything else your doctor has told you about…

And **works better** than any natural solution currently on the market that I’ve seen...

In fact, another human study on 12 participants found that it caused a staggering **21-point improvement** in central blood pressure in just 9 weeks.

This breakthrough has been the subject of 30 clinical studies on blood pressure

The best part is, in some of the studies, participants were asked not to change their lifestyle.

Could you imagine just maintaining the healthy lifestyle you currently have…

And adding this new solution that takes just 15 seconds a day to help keep your blood pressure within the healthy range.

So if you’re tired of trying things that don’t work…

Tired of the nagging from your spouse and family members to watch what you eat and go to the gym…

And if you want to stun your doctor at your next appointment with relaxed, healthy blood pressure, then please pay close attention.

What I'm about to show you is going to change everything.

I'll explain the surprising way this new blood pressure secret was discovered…

How it works to help improve blood pressure…

And the stunning research showing it can deliver an excellent **120/75 reading**.

Plus, you'll see all the scientific evidence showing how it works.

But first, please allow me to introduce myself.

My name is Rebecca Walker and I'm the Research Manager at **Gold Leaf Nutritionals**, a leading American nutraceuticals firm.

Our premium solutions have helped thousands of Americans fight the symptoms of aging and regain their youthful health.

As Research Manager, I spend my days reading scientific papers and uncovering medical breakthroughs that can improve the lives of American seniors.

So when I uncovered this new health marvel, I knew we had found something **huge.**

If you're trying to keep your blood pressure healthy, you're not alone. Millions of Americans are in the same boat.

And frankly, there's been nothing out there that works well to improve it.

Until now.

This breakthrough can help improve blood pressure starting in just 28 days...

...and has been shown in one study to give an amazing 21 mmHg point improvement after nine weeks.

But what exactly IS it?

And how could it help you maintain **healthy blood pressure**?

Well, what this discovery is, is kind of surprising…and it's likely the reason your doctor hasn't told you about it yet...

It all started thousands of miles from here and quite a few years back…

...when a man named Mishima had some business that took him to the most remote and treacherous villages in Mongolia.

Despite the rough terrain and harsh elements, he couldn't help but notice the villagers appeared to be in **extremely** good health.

When he asked the locals how they stayed so healthy, they handed him a cup filled with a milky substance...

And motioned for him to drink. He took a sip, followed by more until he had drained the cup.

Before, he was overtired and weak from travel…but after drinking this "milk" each day...

He felt refreshed and abuzz with a surge of new energy.

Mishima asked what he had just drank, and the villagers told him it was their **Sacred Mongolian Mountain Milk**.

"Everyone drinks one cup each day," they explained, "It gives us strength and energy, and keeps us healthy"

As the days passed, Mishima continued to drink the mountain milk each morning, and he noticed how every day he was feeling better, **stronger and healthier**.

He continued to observe the people of the village and see that everyone appeared to be in good health and no one seemed weak or feeble.

After returning home, Mishima shared the drink with people he knew, and soon he hired scientists to study the milk to figure out *exactly* how it was able to improve people's health so dramatically.

They discovered it held the astonishing ability to help improve blood pressure levels.

That's because this drink is no ordinary cow's milk.

The sacred Mongolian mountain milk is made by allowing milk to *ferment* with a specific strain of bacteria, until it becomes a tangy, yogurt-like drink.

After much research, scientists found that the health-improving power in the milk came from **2 very special elements in the milk -- called "peptides"...**

...that are unlocked during the fermentation process.

Specifically, these peptides are called **VPP and IPP lactotripeptides**.

Or, **VI Peptides**, for short.

And I believe these two VI Peptides are the most powerful natural blood pressure improving substances I've ever seen

I know that's a bold statement.

But VI Peptides have been the subject of over 30 clinical trials…

And I'll tell you about a handful where it's been **shown** to help improve blood pressure.

In just a moment I'll tell you exactly where you can get them…

But first let me share some of the amazing **scientific evidence** with you.

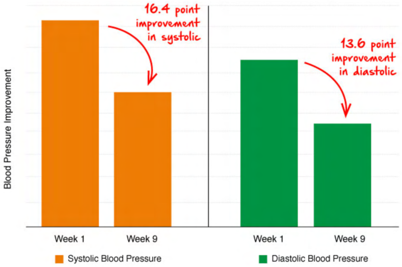
Starting with the study that shows how this solution could finally be the trick to keeping your blood pressure healthy.

In 2009, researchers gave a group of 12 volunteers, who wanted to improve their blood pressure, the special VI Peptides for 9 weeks.

There was no placebo group, so the researchers measured the participants blood pressure at the start of the study and again after 9 weeks...

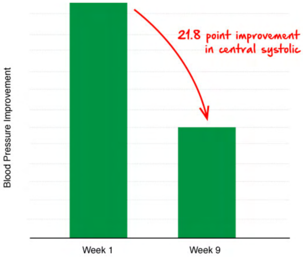
At the end of the study, the participants had a staggering **16.4 mmHg point improvement** in systolic blood pressure (the top number)...

And a **13.6 mmHg point improvement** in diastolic blood pressure (the bottom number).



And that's not all.

What's even more impressive, is that the volunteers had **a whopping 21.8 mmHg point improvement** in their central systolic blood pressure!



Now, maybe you've never heard of central blood pressure, or your doctor has never checked it before…

But new research is showing the central blood pressure is a **more accurate** way to check how healthy your blood pressure is.

A lot of top doctors are now using it because...

...it can **better predict** the health of your heart, kidneys and brain.

And to be clear, in all my years of research, I have never seen a blood pressure improvement this big… before now…

So you know you're going to get the **biggest benefit** in the **most important** markers of your blood pressure health.

What if you could have results just like the lucky folks in that study?

An amazing **16.4 point improvement** in systolic blood pressure…

A **13.6 point improvement** in diastolic…

And a huge **21.8 point improvement** in central blood pressure.

What were your most recent blood pressure numbers?

Now, what would *your* numbers be if you could improve your readings by that much?

How much **healthier** would you be?

How much **better** would you feel every day?

And how much **happier** would your family be knowing that your blood pressure is right where it should be…and that it's going to stay there?

Are you beginning to see why this is such a **huge** breakthrough in blood pressure health?

And that's not all.

These special milk peptides don't just cause a *temporary* improvement in your blood pressure numbers…

They're shown to work around-the-clock to help keep your numbers healthy all day and night!

In a 2011 non-placebo controlled study conducted in Japan, researchers gave 12 participants VI peptides, and monitored their blood pressure for 24 hours…

And they found that this amazing nutrient gave **24-hour support**!

That means the folks who got the special peptides had better blood pressure for the **entire day and night**!

And that's critical because some scientists say that nighttime blood pressure is even **more important** than daytime blood pressure.

But with advanced VI Peptides, you can rest easy because your blood pressure could stay **nice and healthy** 24 hours a day, just like the people in the study.

Now, I can't list every study or we'd be here all day, because this breakthrough has been the subject of an amazing **30 clinical trials**...

But I do want to tell you about one more study, because when I saw this one, I knew it meant we were onto something BIG.

In this study, researchers gave 42 participants a large dose of VI Peptides in a glass of regular milk, and proceeded to measure their blood pressure every 45 minutes.

And much to the researchers' amazement, VI Peptides had improved their blood pressure in just 8 hours!

This wasn't weeks and weeks after taking the peptides every day…

No, the blood pressure improvements happened on the **very first day**.

Imagine if you had been one of those lucky study participants…

VI Peptides could go to work immediately to improve your blood pressure.

No more taking a pill day in and day out for months and waiting to see if it works…

With VI Peptides, you could see better numbers **the same day** you try them.

And the benefits will just keep getting better day after day.

So now you've seen how these amazing peptides cause **improvements** in systolic, diastolic, and central blood pressure…

How they work **around the clock** to keep your blood pressure healthy…

And how it could start to work the **very first day** you take them.

That's why doctors around the world are finally recommending their patients take VI Peptides to help keep their blood pressure healthy.

With results in real people just like you, I'm sure you can see why I believe this is the **biggest blood pressure breakthrough in history**.

Now you might be wondering exactly how they work...and how you can try them for *yourself*.

VI Peptides are effective at improving blood pressure because they naturally help lower ACE enzymes

You may have heard about ACE enzymes before in regards to blood pressure…

Because ACE is an enzyme that causes your blood vessels to become more narrow, making your blood pressure higher.

But when the ACE enzyme is lowered, blood vessels can naturally widen for blood to flow more freely.

Just like when you unkink your garden hose and the pressure decreases…

When you take the right amount of VI Peptides, your arteries and veins can relax and stay open...

So your blood flows more easily around your body…and it's easier on your heart.

That's how, by helping lower ACE enzymes, VI peptides **improve your blood pressure**…

And they do it quickly…*it could even start to work the same day.*

And remember, VI peptides have been the subject of 30 human studies, and have been shown to cause an amazing 21 point improvement in central blood pressure!

Simply put, VI Peptides are one of the **most effective and well-researched** natural solutions for healthy blood pressure control…

There's just nothing out there that compares

So if you feel like you've tried everything to keep your blood pressure healthy…

But it's still not as healthy as you want it to be…

And your spouse keeps nagging you to eat less salt and exercise more…

You can now *finally* rest easy, and get better blood pressure with VI Peptides.

But there is one small catch.

You see, you can't get these peptides from milk at the grocery store, or from yogurt.

Remember the Mongolian Mountain Milk?

You can only get VI Peptides from milk fermented with a *special* type of probiotic.

The probiotic is what "unlocks" the peptides from the milk, and makes them available for your body to absorb.

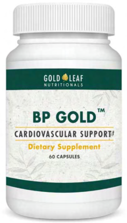
Plus, you need to get the **right dose** in order to have the type of improvements seen in many of the clinical studies.

And, if fermented milk sounds unpleasant, no need to worry. The peptides extracted from the fermentation process have no taste or smell.

I know how important perfect blood pressure is to you. And to your family and loved ones.

That's why we arranged to get a small supply of these special VI Peptides for a select group of Americans…

While they're still available, we've included the exact, clinically studied dose of VI Peptides in a revolutionary blood pressure formula called **BP Gold™**.



Thanks to the perfect dose of the VI Peptides from fermented milk, BP Gold is an unprecedented innovation in blood pressure health…

...different than anything you may have heard of or tried before.

So you can finally stop thinking about keeping your numbers healthy and get back to enjoying life.

I mentioned that the VI Peptides are made in a special way, so we have a limited supply of **BP Gold**.

But through this presentation, you can now get direct access to **BP Gold** with the exact, clinically-studied dose of VI Peptides shown to promote nearly perfect 120/75 blood pressure.

But that's not all.

When we created **BP Gold** we wanted to make sure it was a complete blood pressure *and* blood flow solution, so your entire cardiovascular system is supported.

That's why we knew we had to address one of the other main factors that could affect your blood pressure:

Low nitric oxide.

Nitric oxide is a molecule your body produces that serves a lot of functions…

But one of its main functions is **relaxing your blood vessels**, making it easier for your heart to pump blood throughout your body.

As you age, however, your body begins to produce less and less nitric oxide…

And by the time you're 70, you produce **75% less** nitric oxide than when you were 20!

That's why it's *so common* to have to try harder to maintain healthy blood pressure as you get older.

So as the years go by, it's critical that you raise your nitric oxide levels if you want to keep your blood pressure healthy.

Luckily, we've found the answer to that, too.

It's called resveratrol

You may have heard about resveratrol and how it's the secret in wine that makes it so heart-healthy…

And the reason why the French have **better heart health** than us Americans.

That's because experimental studies have shown that resveratrol can help **boost nitric oxide levels** in your body, which can improve your blood pressure.

It can also help decrease the *stiffness* of your arteries, which is caused by bits of calcium in your arteries.

As the years go by, calcium could get stuck in your arteries, making them stiffer and more narrow...

But resveratrol is able to go in and actually help reduce this stiffening and increase the flexibility of healthy arteries.

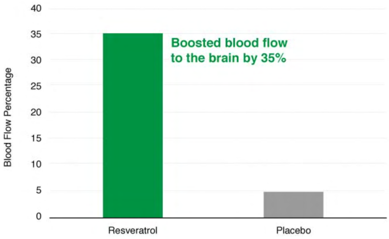
And when your arteries are more flexible and blood flow is boosted, your blood pressure will be healthier.

But that's not all resveratrol does.

It's also been shown to help improve your brain power!

In a placebo-controlled study in adults up to age 80, researchers found that resveratrol boosted blood flow to the brain **by 35% compared to placebo**...

And it improved the participants' performance on tests that measure focus and attention!



The most stunning part is that resveratrol works fast...bringing the blood flow boost and cognitive benefits beginning in **just over 1 hour**!

That means when you take resveratrol, you could have a **boost in blood flow throughout your entire body**, including your brain…

And your brain can work faster, better and clearer!

There’s also another nice side effect to better blood flow I can’t help but mention…

Because it stands to reason that better blood flow *everywhere* can give you a **BIG boost in the bedroom** (*if you know what I mean*)!

When blood is flowing freely throughout your *entire* cardiovascular system, you’ll see benefits body-wide…

From your brain, to your heart, to all organs of your body.

But there is one little problem with resveratrol...

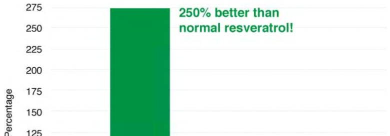
And it's that you would have to drink a lot of wine (like the French) to get enough to see the benefit…

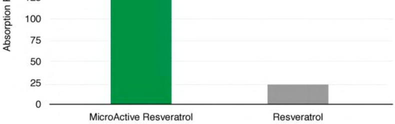
And regular resveratrol supplements are *extremely* hard for your body to use.

They have very low bioavailability, meaning most of what you take is rapidly metabolized and passed through your digestive system without doing you any good...

So you can see why regular resveratrol supplements are practically *worthless*.

But after months of research, we found a form of resveratrol that’s absorbed 250% better than normal resveratrol…





This was shown in a small study on two volunteers, conducted by the researchers behind this premium resveratrol…

They found it also stayed in the bloodstream longer, for sustained release **up to 9 full hours**…

It's called **MicroActive® Resveratrol**.

It uses special **micronization technology** to enhance absorption…

Combined with a high-tech encapsulation process to allow for a **sustained release**.

It overcomes all of the flaws of regular resveratrol, so you get the biggest benefit without having to worry that you're just ending up with expensive urine.

Proprietary research from the scientists behind MicroActive Resveratrol, show that it is the only resveratrol that is absorbed 250% better, to improve your heart health.

So you get even **more** nitric oxide boost, better blood flow and more flexibility in your arteries.

So we made sure to secure a supply to include in BP Gold

So, in every dose of **BP Gold**…

You get the most clinically-researched VI Peptides for fast blood pressure support…

And the revolutionary MicroActive Resveratrol for better blood flow…

All in one convenient capsule.

With **BP Gold,** you can stop thinking about your blood pressure and heart health...

And get back to doing *more important* things in life.

Like spending time with your children and grandchildren…

Having friends over for a dinner party…

Or planning a bucket-list trip with your spouse.

BP Gold is the only formula with the premium VI peptides which have been shown in a study to deliver a 21 mmHg point improvement in central blood pressure…

Combined with resveratrol to help improve the flexibility of your arteries…

Enhance body-wide blood flow…

And can even give a boost in brain-power!

With **BP Gold**, you could feel confident and secure in the health of your heart and circulation.

It’s formulated with only the healthiest, most clinically-researched ingredients

So you know you’ll get the exact blood pressure support you’re looking for.

But we didn’t stop with just VI peptides and MicroActive Resveratrol…

No. Like I said before, we wanted to make sure **BP Gold** is the most complete formula for blood pressure and heart health available.

So we also made sure to include a potent dose of **pomegranate**, and a full 100 mg dose of **magnesium**…

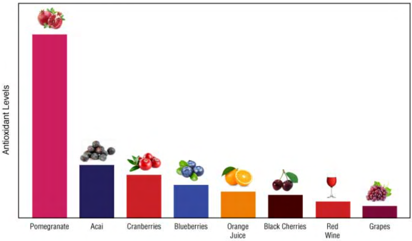
These are 2 of the most overlooked nutrients for your heart health and blood pressure.

You may have seen commercials promoting pomegranate juice for heart health…

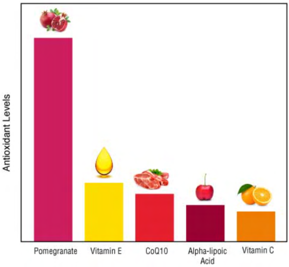
And there’s a very good reason for that.

That’s because pomegranate is one of the most **heart-healthy and antioxidant-packed** fruits out there…

It’s antioxidant power is **more potent** than red wine, grapes, blueberries, black cherries, acai, cranberry, and orange juice!



Pomegranate also beats out other antioxidant super stars like vitamin C, vitamin E, CoQ10, and alpha-lipoic acid.



If you’ve never heard of antioxidants, they are molecules that help protect our bodies against the wear and tear of aging, and the harmful free radicals in our environment.

The antioxidants in pomegranate are especially effective at helping protect the delicate cells that line your **blood vessels**.

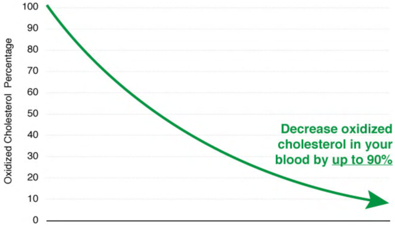
It’s like they go in and put up a solid wall of defense against any harmful elements that can affect your blood vessel wall

It’s critical to keep these cells healthy because they are what make your blood vessels *relax*, allowing blood to move freely.

Pomegranate also keeps the **cholesterol** in your blood healthy...

Protecting it from becoming *oxidized* (this is how cholesterol could become an issue for you).

In fact, a study found that long-term use of pomegranate can improve oxidized cholesterol in the blood by **up to 90%!**



And the world-famous **Cleveland Clinic** reports that pomegranate can help support arteries by reducing the accumulation of fats and cholesterol on blood vessel walls.

Pomegranate can also help **boost your nitric oxide levels**, further adding to your blood pressure support arsenal.

That's why we included a full 210 mg dose of pomegranate extract in **BP Gold**.

And we made sure that it's standardized to contain a minimum of 84 mg of the **most beneficial compounds** found in pomegranate, that give it the most antioxidant activity.

This is **important** if you want to get the most benefits from pomegranate…

To keep the cells of your arteries protected against free radicals, and your cholesterol healthy.

Finally, a blood pressure formula wouldn't be complete without **magnesium**.

Magnesium is a vital mineral that performs **over 300 functions** in your body…

Including helping to prevent bits of calcium from getting stuck in your arteries…

Supporting healthy cholesterol levels…

And promoting proper blood pressure levels.

In fact, without enough magnesium, you may never be able to maintain healthy blood pressure

It's that important.

However, magnesium deficiency is a HUGE problem in the U.S.

With **almost half** of adults not getting enough.

That's because most people don't eat enough foods that are rich in magnesium (like whole wheat, spinach and quinoa)...

And even those foods don't contain the amount of magnesium they used to, because our soils have been depleted from over-farming.

So it's absolutely critical to take extra magnesium as you get older…

And why we included a full 100 mg dose of high-quality magnesium in BP Gold.

So let's recap. In every capsule of **BP Gold** you get:

- ✓ **The "magic milk" VI peptides**, with over 30 clinical studies showing their power to help improve blood pressure …
- ✓ **MicroActive Resveratrol**, for a nitric oxide boost, improved flexibility of your arteries, better blood flow, and enhanced cognitive performance...
- ✓ Plus, the antioxidant powerhouse **Pomegranate**, for protection of the cells in your blood vessels, and healthy cholesterol...
- ✓ And the must-have **Magnesium** to help reverse your deficiency and provide extra blood pressure support.

BP Gold contains the most advanced, clinically researched ingredients to help improve your blood pressure, blood flow, and overall heart health.

It's a complete, full-strength formula to cover all of your heart-health needs, so you **don't need anything else**.

With the VI peptides in **BP Gold,** you get **24-hour support**, so you can feel confident day and night that your blood pressure is locked in exactly where it should be.

And let me be clear...

While you don't need to throw away your salt shaker or start a vigorous exercise plan…

We all know a little exercise and a healthy diet is important.

Then, all you need to do is just take your daily dose of **BP Gold**, and keep up with the healthy diet and exercise plan you already have, and you'll be set.

You'll be ready to amaze your doctor no matter if your next routine checkup is next *week* or next *year*.

Won't it feel good to finally impress your doctor with a **healthier** blood pressure reading?

That's what **BP Gold** can do for you.

I know you've probably tried a lot of different things to keep your blood pressure healthy...

And maybe some worked for a little while but then wore off…

Or maybe the side effects were so unbearable you couldn't stand to take it anymore.

But with **BP Gold**, you don't have to worry.

BP Gold is truly the most advanced blood pressure-improving formula we've ever created

And the benefits will only **get better** the longer you take it.

Plus, you don't have to worry about unwanted side effects, because none of the studies on any of the ingredients reported any harmful effects.

And **BP Gold** is made right here in the United States, in a GMP-certified facility.

Every lot is tested to ensure it's pure, potent, and contains only what it's supposed to.

So you can trust in **BP Gold** for your blood pressure and heart health.

And it's why we back **BP Gold** with our 100% Satisfaction Guarantee.

Here's how it works...

If you try **BP Gold** and your blood pressure isn't the healthiest it's been in years…

If you don't see an **improvement** in your systolic reading…

An improvement in your diastolic…

Or an improvement in your central blood pressure...

If you don't feel **completely secure** in your blood flow and heart health…

And if you aren’t feeling relaxed and healthier each day as your whole-body blood flow improves…

Or if you aren’t 100% satisfied for any reason…

Then you should DEMAND 100% of your money back.

And we’ll be happy to oblige -- no questions asked.

That's right.

If you’re unsatisfied for **any reason at all**…heck, even if you don't like the color of the pills…

...simply return any unopened bottles and get a full refund .

And our 100% satisfaction guarantee never expires

GOLD LEAF NUTRITIONALS
BP GOLD™
CARDIOVASCULAR SUPPORT
Dietary Supplement
60 CAPSULES
SATISFACTION
100%
GUARANTEED

You can get your money back at any point, whether it's been a month, a year, two years or longer.

That’s how confident we are that **BP Gold** can work for you.

You have absolutely nothing to lose when you try **BP Gold** today.

So here’s what to do next.

In a moment, you’ll see an **Add to Cart** button below.

When you click on it, you’ll be taken to our secure reservation page.

Simply select the number of bottles that you’d like to start with.

You can begin with a one bottle order, but if you want to save the most money, I’d recommend getting a 3 or 6 bottle supply.

BP Gold starts going to work the very first day, but the studies suggest the best results come after at least two months…

And you’ll want to keep taking it to continue to see the best results.

Now, if you tried to buy all of these ingredients individually, it could be unaffordable.

But through the special link below, you can get **BP Gold** for just $59 per bottle.

I think that price is a steal for the quality of the ingredients included in every **BP Gold** dose.

And, after all, can you put a price on your heart health?

But it gets better. If you stock up and save on a 3 or 6 month supply, you can claim up to **$55 in instant savings**.

I’m not sure how long we’ll be able to offer these low prices, so be sure to lock in your order today.

Simply fill out your information on the reservation page and we’ll immediately get your supply of **BP Gold** packaged and shipped off to your doorstep.

When the package arrives simply take your first dose with some water.

The peptides will go to work, helping to improve your blood pressure…

While providing 24 hour **round-the-clock** blood pressure support.

The MicroActive Resveratrol will be absorbed **250% better** than regular resveratrol…

...and will begin boosting your nitric oxide levels for better blood flow and enhanced flexibility of your arteries…

Then the pomegranate goes to work to help **protect** your delicate blood vessel cells from oxidative damage with its superior antioxidant ability...

And magnesium works to help keep blood pressure **perfect**...

So that by the next time you go to your doctor for a checkup, he'll be **amazed** at your blood pressure readings…

And you'll be able to forget you ever thought about your blood pressure in the first place!

I have one final piece of good news for you today.

We never want you to go a day without **BP Gold** keeping your blood pressure in check…

So through this presentation you get complimentary access to our **Priority Pass** refill program.

This FREE service ensures you never have to worry about calling in to order a refill of **BP Gold**...

We'll conveniently send you a new refill right when you need it -- so you don't miss a dose.

Plus, with Priority Pass you lock in all the savings you secure today (so you never have to worry about the cost increasing)...

And best of all you'll get **FREE shipping**! Saving you over $83 per year.

Priority Pass is a completely free and convenient service to you.

You can always call or email to cancel or change the frequency of your refills.

It's flexible and controlled by you.

So now it's time.

You can continue how you've been going, trying hard to keep your blood pressure under control…

And facing the worry about your next check-up…or how healthy your heart is...

Or you can get BP Gold and keep perfect blood pressure *for years to come*

And remember, you take absolutely no risk with our 100% Satisfaction Guarantee.

Simply try **BP Gold** and **be amazed** with your blood pressure, or get your money back.

So click the Add to Cart button below now to secure your supply, and I'll see you on the other side.

For Gold Leaf Nutritionals, I'm Rebecca Walker.

Click below to get your supply of **BP Gold** now.
