9 Common Senior Pills Now Linked to Alzheimer's Disease?

WARNING: Over 60? Memory getting worse? Watch this now.

Hello. I'm **Dr. Allan Spreen, MD.**

And if you're over the age of 60 and concerned about even mild memory loss, **I have an urgent warning…**

Right now, all over America, doctors are diagnosing seniors with **severe dementia**…

And it could be because of **9 common prescription pills for seniors**…

…that may now be **linked to Alzheimer's-like symptoms**.

And if you take any prescription medications at all – and you feel like your memory isn't as sharp as it once was…

…you need to see the list of the **9 memory-robbing drugs** immediately.

This "drug dementia" could affect more than 1,429,000 American seniors this year alone.

The problem is urgent… and it's already spreading across America…

It's **already happened** to Catherine K., 87, from Mitchell, South Dakota, who was kind enough to share her story online…

When Catherine started asking about people who had passed away 40 years ago…

Her doctor told her devastated family: "I'm sorry. Catherine has Alzheimer's disease."

"It's time to put her in a nursing home."

The exact same thing happened to Betty W., a retired school teacher from Lake Charles, Louisiana.

When her family noticed she was losing her temper easily, they took her to see her doctor.

She told him she was feeling confused and that "it feels like Niagara Falls in my head"…

Her doctor diagnosed her with Alzheimer's disease…

And you know Alzheimer's disease is virtually a death sentence.

But here's the most sinister part of this…

Neither Catherine nor Betty actually had Alzheimer's disease.

In both these stories, **their doctors made terrible errors**.

And it's happening all over the country to seniors right now.

You see, **9 common prescription medications for seniors** – you very likely popped at least one of these pills this morning –

Have now been shown to **exactly MIMIC the symptoms of Alzheimer's disease**.

I'm talking about severe memory loss… confusion… irritability…

For seniors taking one of these **9 common pills**, their spouse, children, AND doctor might think they have Alzheimer's.

And unless they go off the pills – *which never happens* – **no one would ever suspect they may not have Alzheimer's.**

Remember, the only way doctors know for sure someone actually had Alzheimer's is to do an autopsy…

So seniors could be losing their memories… and their minds… for no reason at all.

Do NOT let this happen to you or a loved one.

If you're worried about your memory slipping…

If you are laughing off those "senior moments" more often than you used to…

And if you don't feel as mentally sharp as you did a few years ago...

…read this full presentation.

It could help you **RESTORE your fading memory** and bring back the brain you had decades ago…

I'm going to show you how common pills you are likely taking every single day…

Have now been positively linked to what I call "Type II" Alzheimer's Disease.

I'm also going to show you why **YOUR** doctor may not know about this memory killer. (It's not his fault – I'll explain in a moment.)

And I also want to tell you about a new way to help restore your memory…

And help "roll back" the age of your memory and brain.

This is **backed by science** and it does NOT involve any prescription drugs.

No, it's much more powerful than that.

And I'll tell you all about it in a moment…

But first let me show you why your memory may be fading…

There's a **memory loss epidemic happening in America right now** *and no one is talking about it*.

Both Catherine and Betty had severe memory loss and mental decline brought on, *not by dementia…*

But, instead, linked to the COMMON prescription drugs they were taking.

The devastating symptoms mimic Alzheimer's so closely that their doctors **misdiagnosed** them.

In fact, I call it **"Type II"** Alzheimer's because, like Type II diabetes, it's not a "natural" disease…

"Type II" Alzheimer's is actually memory loss caused by common drugs you could be taking right now.

That's why I'm also calling it "Drug Dementia".

When Catherine and Betty stopped taking the drugs, their memories returned.

There are actually **9 common prescriptions** in total that are now linked to "Type II" Alzheimer's.

And if you don't know them, you need to immediately…

Catherine's daughter said "And to think that this wonderful lady would have been locked up in a nursing home, drooling, unable to think -- because of dumb doctors and bad medicine. That is Hell."

Luckily, Catherine was able to get off the drugs that were causing her Alzheimer's-like symptoms…

And, because you're watching this now, I'm going to make sure you get this important information **now**.

You see, I work for the world-renowned **Health Sciences Institute**.

We're a private **health research organization** that is committed to revealing the dangers of our "modern medical system"…

And protecting real Americans like you – **especially those of us over the age of 60.**

That's why I've put together vital information about the 9 drugs that are linked to "Type II Alzheimer's"…

And put it all in a free report for you and your family called: **The Insider's Book of Secrets**.

And we've published this new book, at our own cost, so we can provide **a free copy to every American** who takes advantage of this special opportunity…

On page 35 of your free copy of The Insider's Book of Secrets, **I show you the 9 common senior drugs that are linked to misdiagnoses of Alzheimer's disease or dementia**…

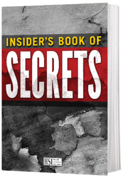
Make no mistake: If you're taking one of these drugs right now, **you need this information**…

In your free report, I'll show you exactly how to identify these drugs – so you can see if you or your spouse is taking one...

I'll show you the **science behind all of this**…

And, if you are taking one of these memory stealing pills…

I'll also tell you everything about how to help **restore a fading memory**.



In a moment, I'll show you how you can request **your own free copy** of this life-saving report – ***The Insider's Book of Secrets*** – mailed straight to your door at our expense.

You're going to be so glad you found this video today.

Because I have even more important news for you.

The scary truth is, even if you don't take one of the 9 "memory erasing" drugs, *you could still get Alzheimer's disease or dementia.*

After all, they're now an epidemic for seniors in our country.

And **losing your memory and your mind** is probably the most terrifying thing anyone over the age of 60 worries about…

That's why, on page 17 of your **free** copy of The Insider's Book of Secrets, I also reveal:

My tips to help FIGHT Alzheimer's and dementia – with the power to roll back your brain's "clock".

I'm talking about **restoring the power of the mind**…

And **EASING the fear of having to worry about Alzheimer's or dementia**.

Friend, this secret is a **game-changer** for you, your spouse, and your friends.

And the only place to get it is on page 17 of your Insider's Book of Secrets.

If you're asking: *How did this one get buried?*

Well, the truth might be a little hard to stomach…

But what I'm about to show you is **essential for defending against losing your memory as you age**.

I'll explain everything now… but let me start by telling you a little more about myself.

My name, again, is **Dr. Allan Spreen, MD**.

I'm Chief Medical Advisor for **The Health Sciences Institute**, a private membership organization just outside Washington D.C.

We're a patriotic group of doctors, scientists, and folks just like you.

We've uncovered a lot of dirt over the 21 years we've been around… *but NOTHING this huge.*

I might even be putting myself at risk to publish this report today — but it's my duty, both as a doctor and a **proud American** who loves his country.

I've actually been tracking this story for years…

And even I didn't want to believe that this kind of thing could actually happen in America.

But the proof is right in front of us…

Some of the most common prescription drugs that are linked to severe memory loss.

They can cause innocent, healthy seniors to be **misdiagnosed with Alzheimer's disease**…

Did you know the FDA receives more than 2 million consumer complaints about prescription drugs every single year!?

And seniors are at the most risk.

More than 31,000 seniors will die this year from complications related to their *legally* prescribed medications.

Not to mention how many end up in nursing homes – their minds shot, unable to recognize their own families…

All from common drugs prescribed by their doctors?

But what can you do?

Your well-meaning doctor prescribes them for high blood pressure, cholesterol, diabetes, whatever it is.

Which is why you need to know about the very real remedies and treatments for the diseases that plague us… Alzheimer's disease, arthritis, MS, heart disease… even cancer.

And, today, we're exposing everything and **revealing every disease-fighting secret so Big Pharma loses**… and you win.

Like…

- **A cancer treatment that could beat chemotherapy?** Starts killing cancer cells in vitro in just hours… *You won't believe this one… Page 1*
- **The easy secret to fighting Alzheimer's and dementia memory loss** with the power to roll back your brain's "clock". How did this one get buried? The truth comes out today… Page 17
- **The only solution that helps ease arthritis pain and REJUVENATE arthritic joints**. Are you ready for a brand-new outlook on life? Page 11
- **Want deep, restful, healing sleep night after night?** You'll be amazed by this new sleep wonder… Page 23
- **There's a deadly symptom of heart failure that your doctor may not know!** This is MUST-READ information about fatal heart attacks… Plus, there's a simple solution for protecting your heart now, if you know where to look. Page 29

You see, there are TRUE cures if you know where to look.

In fact, in many countries around the world… these therapies are PRESCRIBED by doctors.

And reports are flowing in that they're working for grateful patients with cancer, heart disease, Alzheimer's and more.

But why not here… in the greatest country in the world?

Well, it interferes with Big Pharma's money machine.

You see, these are all **NATURAL** disease treatments… discovered by top scientists right here on God's green earth.

And you can't patent a plant extract or an herbal disease treatment. And if you can't patent something, you can't sell it for big profits.

So why would Big Pharma even waste their time?

It makes WAY more sense for them to try to replicate the cure with something artificial that will become their next cash cow.

But, finally, that ends TODAY.

I'll show you every detail on natural treatments you need to know about…

And you'll also hear from "hopeless" people who have had their lives changed forever, you'll see the results from rock-solid scientific studies…

That's correct – we have arranged to send you everything you need to know about these 5 astonishing disease remedies…

And we also want to **make sure** you have access to all there is to know about the 9 drugs that can cause "Type II Alzheimer's"…

So we've printed up everything you need in the free report we call,

The Insider's Book of Secrets.

And we're ready to mail it right to your door. Today.

We feel it's our duty as Americans and patriots. And it's the ONLY way to stop Big Pharma.

But, a fair warning, the information I'm about to share is so explosive… and Big Pharma is SO powerful…

They can wipe all traces of this video from the internet **at any moment**.

This could be your only opportunity to watch this video uncensored, and in full.

I'll give you full details in a moment on how you can claim your **FREE** report.

But let me tell you exactly what you're getting. We're jumping right in with #5 – and it's an absolute shocker.

For the first time ever, there's been a BIG step forward in the fight against cancer.

It's NO match for this natural discovery.

It's all thanks to this breakthrough that comes from one of the strangest places on earth… a rare type of *sour honey!*?

Keep watching and I'll explain…

Cancer. Just the word alone will make anyone's heart drop in fear. Maybe you have a loved one going through treatment right now and you know exactly how devastating the disease can be…

Maybe you've even worried about it yourself… wondering how a diagnosis would impact your own life… your family, friends, even pets…

It's a completely rational fear, considering the fact it's estimated that there are 14 MILLION Americans living with some form of cancer right now…

…and 1.6 MILLION new cases expected to be added by the end of this year alone.

But, instead, we're all told the same thing:

"Chemotherapy, radiation and surgery are the only way."

But I don't make a single red cent off ANY cure…

So **I can't wait** to share this exciting news with you today…

In the heart of the Brazilian jungle, a tiny, remote area exists where special bees create one of the rarest substances on earth…

It's a type of "sour honey" that has remained untouched for thousands of years.

Until it was recently tested in a lab and delivered these near-miraculous results:

- Within 24 hours, Sour Honey was shown in vitro to demolish breast cancer cells on the spot – **killing 13%** of the cells in just the first day alone!
- And in a separate study, looking at human-like tumors on mice, tumor growth was halted a **full 50%** with Sour Honey.
- And on two different aggressive types of prostate cancer cells, Sour Honey was shown in vitro to boost the speed in killing the cells, **destroying up to 75% of the cancer cells** in the study!

How does it work so fast—and so effectively?

Well, unlike chemo drugs that work through "mass extinction"… attacking every cell in your body and destroying the good with the bad…

This rare Sour Honey works on a whole other level…

First, it teams up with your body's own natural chemistry to selectively target "grow" signals that cancer cells put out as they multiply and spread.

Next it marks all of those nasty little cells (kind of like a label maker) – letting the body know that they are bad news.

Then it swoops into action on the "marked cells," destroying masses of cancer cells and only cancer cells.

So your normal, healthy cells stay untouched and continue to thrive.

But that's not all… the thing that makes Sour Honey so one-of-a-kind, is that it has a dual-mechanism for killing cancer cells.

Meaning, in addition to eliminating cancer cells directly, it's even been shown in studies to drive cancer cells to kill THEMSELVES.

I'll save you the boring science lecture and tell you everything you need to know next.

Remember that "grow" signal I mentioned earlier?

In the medical world, it's called PAK1 (or Protein Activated Kinase)—and **more than 70%** of cancers rely on it to invade and spread through your body.

So Sour Honey's dual-action job is truly what makes it special… it fights cancer cells directly, but it ALSO cuts off cancer at the source.

Specifically, when cancer cells are signaling your body, forcing it to "make more cancer"…

Sour Honey jams up their signal codes, and the tumors have no choice but to self-destruct.

There are even over 299 lab studies on Sour Honey and cancer – with remarkable results!

Yes, study after study shows… FINALLY. We have a natural, safe way to help us fight cancer.

But Sour Honey isn't just some lab experiment either…

In fact, the lucky folks who have already discovered it are reporting near-miraculous results...

Like this case study report from Dr. Osamu Mizukami and his patient Bill G.

Bill was a 49-year-old man suffering from stage III stomach cancer… and desperate to live long enough see his only daughter graduate from college.

He had a surgery scheduled to remove the deadly tumors in his stomach, but—terrified of going under the knife—he agreed to meet with Dr. Mizukami and try one last treatment.

Dr. Mizukami immediately put Bill on the Sour Honey protocol, then sent him home.

When Bill went back to meet with his surgeon a few months later – they were BOTH shocked to find this miracle…

Every single cancer cell had disappeared... GONE.

There was no trace of cancer left in his body.

Of course Bill's surgeon immediately canceled the procedure... and Bill NEVER had to reschedule.

That was 7 long years ago, and he is *still* healthy today – all thanks to the Sour Honey that saved his life.

This kind of result is so rare in the world of cancer treatment…

But there are some other success stories as well…

I recently sat down with Dr. Mark Kaylor, who uses Sour Honey on almost all of his cancer patients, to talk about how they've responded to treatment.

"I've treated a lot of late-stage cancer patients, people whose lives were on the line. I've never had a patient decline when I added [Sour Honey] to their treatment. My patients continue to do well."

Did you know that in countries around the world—like Japan—Sour Honey is openly given as a PRESCRIPTION by doctors to fight cancer?

Meanwhile, here in the U.S., doctors who practice natural medicine have to tiptoe around the FDA to tell their patients what Sour Honey can really do to heal them—even though it's 100% legal.

But as I mentioned earlier, Sour Honey is extremely rare—and even harder to find.

Drug companies have already acknowledged that Sour Honey will be the future of mainstream cancer treatment, but after trying to create an artificial version for 20 years… they've all but given up.

There's simply nothing else in the world like the real thing.

That's why it's so important you know the FULL details on Sour Honey…

Let me be clear…

Everything is revealed on page 1 of your full report… ***The Insider's Book of Secrets.***

And, as an American citizen, you are eligible to receive one free copy right now… when you take advantage of this special offer from the Health Sciences Institute.

Just keep watching and I'll tell you how to claim it next, because the information ***The Insider's Book of Secrets*** contains could be your only lifeline if you ever face a deadly diagnosis.

In your copy of ***The Insider's Book of Secrets*** you'll finally have full access to information about the biggest cures and insights I can offer.

For the first time, I'll pull back the curtain on new treatments for dementia, arthritis, cancer and so much more…

This 65-page report is completely uncensored.

And if you leave this video at any point, this information might not be here if you ever decide you want it later.

And you'd miss cure #4 in our countdown… the unlikely nutrient that has been shown to help turn back the brain's clock…

…giving Alzheimer's patients their lives back, and new hope for how we treat the disease in the future.

What would you say if I told you that there's a unique salad ingredient that can be *supercharged* to help fight Alzheimer's?

…bringing back long and short term memories, the ability to do everyday tasks…

and more!

It's nothing short of a **miracle**.

You see, Alzheimer's is our fastest growing disease – with over 5.4 million Americans suffering at this very minute, and an additional victim being taken every minute of the day.

By year 2050, it's expected to claim someone new **every 33 seconds**.

Worse yet, according to the Alzheimer's Association, 1 in 3 seniors will DIE with the disease.

At this rate… Alzheimer's is considered out of control. It's an absolute EPIDEMIC.

But with that many people in need of help…

Does Big Pharma have any interest in CURING the disease? NO WAY.

With sales around $5 billion now, and a forecast to DOUBLE that number to $10.4 billion by 2021…

It's clear Big Pharma isn't interested in the cure. Only the cash.

Luckily, there's a better way.

Because that unique "salad" nutrient I mentioned earlier is changing lives – and you can get every detail on it today.

It all started when scientists noticed something curious… they found that the same powerful nutrient naturally produced in our brains is also found in a salad ingredient.

And this natural nutrient is vital to making sure our brain cells function as they should.

Called "PDS," it acts like **armor for your brain**. In fact, it's the #1 protector of the membranes that surround the delicate nerve cells in your brain.

While there's much that's still to be understood about Alzheimer's disease and how it chooses its victims, one thing is for certain:

The root of all Alzheimer's, dementia and memory-related diseases comes directly from those nerve cells deteriorating…

So if you can build the membrane back up and protect it, the nerve cells can regain their capability and the brain thrives… **healthy as can be**.

But, luckily, the solution is so simple. And it's as safe as eating a salad…

(Only you won't have to choke down a single vegetable to make this reversal technique to work for you.)

When scientists realized that PDS *also* exists elsewhere in nature (in mega-amounts!), they extracted it and put it through a series of tests on senior volunteers.

Researchers noted that the changes were *so* dramatic, **it was like rolling back their brains' clocks 12 full years.**

Here's what happened in the first clinical study…

149 senior patients suffering from a wide range of memory problems were divided into two groups.

The first was given 300 mg of PDS once per day for 12 weeks…

The other? A phony placebo "treatment" to make them think they were doing the same protocol.

But the proof was in the PDS group, and what happened next will blow your mind…

By the end of those 12 weeks, **only** the group taking the REAL thing found that their memory had **significantly improved**… with the *most* improvement shown in their ability to remember names and faces.

How their families must have cried the happiest tears, when they returned home and recognized their husbands, wives, children and grandchildren once again…

Do you have a loved one suffering from the ravages of Alzheimer's Disease?

What would it mean to you to give them their life back —and to have all of them back?

To watch the light return to their eyes as they remember you once again?

But PDS doesn't just stop with the gift of remembering names and faces… it was even able to pull patients out of the depths of dementia – keeping their minds crystal clear *even* after they stopped taking it.

That's right!

In a second group of senior patients suffering from dementia…

Researchers saw *drastic* memory improvement (especially in their word recall) using the same PDS Protocol in just 12 weeks.

But when the researchers followed up with the patients in their homes a full 3 months after the study ended, they were shocked to find that their brain improvements were still as strong as the day they left the lab!

So even though the patients hadn't continued doing the PDS Protocol on their own, their minds were just as sharp and they were able to remember words just as easily as 3 months before.

I want to stop for a second and point something out that's very important… the fact that they no longer had to take it, but still saw the same results…

Could this mean that dementia has finally been cured?

I can't wait to show you how to put PDS to work for you… again, it is something your body already creates naturally.

And all the details are waiting for you on page 17 in your free copy of ***The Insider's Book of Secrets.***

Show your copy to your own doctor, and I'm positive he'll be impressed by the articles inside. (He might even start using some of them himself!)

You'll be amazed by everything this book contains.

I can't wait to send you your free copy to get started… but, before I do, you MUST hear about amazing cure #3 on our countdown…

If I offered you a piece of candy… one with a powerful ingredient that was shown to help ease your arthritis pain in just 7 days… would you take it?

Or would you think that it sounds too good to be true?

Before you decide for yourself… here's what Big Pharma has been keeping under wraps…

Did you know that there are currently over 301 drugs on the market to treat arthritis pain?!

Maybe you even take one or two of them yourself (like Celebrex, prednisone, or meloxicam), because if you're suffering from severe pain – you know there's nothing worse than seeing how it can rob you of all the joys in life…

Or that creeping feeling when you realize that pain now is a permanent part of your life… and what if it gets worse?

Or when it gets too bad to manage, how will you go on?

Big Pharma knows this feeling SO well, they prey on helpless people living in constant pain… while pushing pure poison down their throats.

Every day, painkillers take enough lives to fill out a football team roster…

And, worst of all, these are honest folks with prescriptions, taking them AS directed. No junkies or abusers here…

So why doesn't the FDA let the American public know how dangerous these pills are? It's simple really… pain pills are the darlings of the prescription world.

And they're how Big Pharma can afford to fill their closets with Italian leather loafers…

In 2010, the Centers for Disease Control estimated that enough prescriptions were being written for painkillers to medicate EVERY SINGLE AMERICAN ADULT around the clock for an entire month.

And Consumer Reports found that 300% more prescriptions are being doled out today, when compared to a decade ago.

Studies have shown that when dealing with chronic pain, like Arthritis, Fibromyalgia or Multiple Sclerosis, painkillers offer ZERO relief in the battle long-term.

Why? Because—by design—their only purpose is to help with short-term pain (like if you had a tooth pulled or a broken bone).

They don't go to the root source of your pain to *cure* what's causing it… instead they only mask the symptoms.

With so many people dependent on them, it's no wonder Big Pharma wants us to keep using them forever.

They would be **furious** to lose all of that cash.

In fact, they'll probably have to put their mega-yachts up for sale when word of THIS gets around…

A TRUE arthritis solution exists…

Finally, there's a remedy that addresses the underlying cause of your pain.

This wonder substance is called EG-M, and it naturally contains mega-amounts of collagen, plus more than a dozen amino acids, essential proteins, and healing minerals…

…all things that your body craves to be healthy and pain-free.

So when researchers were able to extract EG-M and put it to the test in the lab, they were blown away to see their patients' pain EASED starting in as little as 7 days.

And by the end of the short study, every single person in the group reported an average:

- 72.5% decrease in overall pain
- 75.9% reduction in range-of-motion related pain
- And even a 43.7% increase in flexibility

And, again, this was all starting in just 7 days!

Now, EG-M checked the box of being able to relieve wide-spread pain while working FAST.

But could it do the same for something more targeted? Like… arthritic knees and hips?

So, in the next study, 44 patients with severe arthritis in their knees and hips were given 500 mg once a day for 8 weeks.

And even though the study was supposed to last 8 weeks, patients reported to the researchers on day 10 that they were already seeing dramatic improvements…

And on day 60, they reported feeling a full 35% better for pain, and 29% less stiffness.

The way EG-M works is genius – because the second you start using it, it goes to work.

First it helps **ease pain and stiffness quickly**… to get you back to doing all the things in life you love most.

All the while working to help **rejuvenate joint tissues** —the foundation for happy joints, and a pain-free you.

So you can look forward to a brighter future, without pain and worry.

But can pain pills do all that? NOPE. Not even close…

That's what makes EG-M so superior.

And I've saved the best part for last… I promised you every detail, and that's what you'll get in your free copy of ***The Insider's Book of Secrets.***

You see, EG-M is NOT a diet, drink or even an intense protocol. In fact, it's a special ingredient that's now available in chewy type of candy with a delicious cherry flavor.

Eat a piece of candy a day with this powerful EG-M ingredient and say so long to pain for good!? Yes, it could really be that easy…

But, a fair warning, ***The Insider's Book of Secrets*** contains information on the ONLY source of EG-M I trust…

I found that the internet is crawling with imposters claiming to have the same type and amount of EG-M in various products, but they're all as fake as a $3 bill.

Don't waste your time or your money… just say "YES!" to claim your free ***Insider's Book of Secrets*** guide in the next few minutes.

Inside you'll get details on:

- Page 1 – The Sour Honey secret that can kill cancer cells two ways: exterminating them on contact AND forcing them to self-destruct
- Page 17 – The amazing PDS for fighting Alzheimer's and Dementia, for a razor-sharp memory
- Page 11 – The only way to get the joint-rejuvenating EG-M in a delicious "arthritis candy."
- And so much more…

In fact, I've only scratched the surface of every incredible solution found in The Insider's Book of Secrets.

The drug companies are going to be livid when news of the #2 cure gets out… because it's a problem that affects over 50 million American adults right this second.

Deep, restful sleep is crucial for the human body to function normally, but—sadly—most of us also consider it a luxury.

Whether it's falling asleep, staying asleep, or just feeling like we GOT some good rest… why is it so hard to do?

Well, it turns out that "bad sleep" is actually hard-wired into us as we age.

It has to do with the amount of REM sleep (that's the deepest kind) that we get tons of as children… but drops off more and more as we get older.

The older we get, the harder it is to sleep through the night. And that even goes for the healthiest human beings on the planet.

So if you're a senior, you could be doing all the right things… watching your caffeine before bed, making sure you're staying active, and your bedroom is distraction-free … and your body STILL won't let you sleep!

No wonder we're desperate to get some good sleep… because we physically CAN'T.

With so many Americans practically begging for sleep—you can bet Big Pharma is salivating over the idea of that payday… with seniors being their **prime target**.

Unfortunately, Big Pharma is also conveniently leaving out the fact that their "harmless" little sleep pills do the most damage to folks over the age of 60.

There's overwhelming proof that if you're over the age of 60 and have taken a sleeping pill in the last year, chances are you could…

- Suffer from confusion or memory loss
- Fall and break a hip
- And even end up in the hospital unexpectedly

In fact, emergency room visits have DOUBLED in the last 5 years due to sleeping pills.

But if even if you're lucky enough to avoid the hospital, a broken bone, or memory problems… there's one even bigger risk that Big Pharma is covering up… Death.

A 2014 study recently found that—across the board—sleeping pills increase your risk of early death 200%. **200%!**

And even folks who took an occasional pill weren't immune…

In fact, people who took less than 1.5 pills per month were 350% more likely to face death before their time.

Why am I telling you all this? Because you deserve the truth—and the information to protect yourself.

That's why I'm also so excited to show you the details on this natural sleep trick that can help give you the good night's sleep you deserve—the safe way.

That deep restful REM sleep I mentioned earlier?

Well, scientists have found a way to trick your body into creating more of it… by calming the chemical receptors in your brain that control how you feel, think and react.

Think of it as a "light dimmer"… it doesn't completely turn off those signals, it just takes them out of overdrive to put you in a super relaxed state. And the result?

No more insomnia… or anxiety keeping you awake at random hours… just peaceful sleep, and the feeling of true rejuvenation the next morning when you open your eyes.

And best of all… it's completely natural.

Surprisingly enough, this trick is actually over 3,000 years old—and is even PRESCRIBED by doctors in countries around the world.

It's not meditation (or some new-agey mumbo jumbo), a calming essential oil or even a presciption pill you take before bed…

Nope, it's actually a simple sleep formula made of all-natural ingredients. You have to see all the details to believe it.

Because it just puts your body into a calmer, NOT a sleepy or "zombified" state, you can enjoy the brain benefits around the clock.

And because every ingredient is non-habit forming, you can feel good knowing that you can use it as often as you need it—without fear of addiction.

Or feel free to use it once, even if you just need it to get you through an especially tough time.

Listen to the story of 60-year-old Denise C. who recently went through this hellish nightmare…

*"It was an unbearable year. Both of my parents died, and then my daughter had a stillborn child. I was filled with despair. I couldn't eat, I couldn't sleep. Then one day at church, a friend gave me [the sleep cocktail recipe] to try. And things started to get better. I was still very sad, but I didn't feel like I needed to walk around with a bag on my head. I slept better, ate better. I got through everything I needed to get through. I'm a nurse, and I wouldn't have hesitated to take an antidepressant if I needed it, but **this really worked**."*

No one should have to go through this kind of horror, but just imagine having the solution on-hand and ready for a friend or loved one in their time of need?

Just like Denise's church friend, you could be that same blessing to someone else.

Just open to page 23 in your free copy of ***The Insider's Book of Secrets…*** to learn the full sleep formula recipe, and all the scientific studies that show how well it can work.

With thousands of raving new fans turning to this easy trick for a boost at night, you can see why Big Pharma is now terrified at the thought of giving up their precious payday (with over $58.1 billion in sales per year).

How sad for them… how will they come up with the cash to pay for their beachfront mansions then?

So they want to make sure you NEVER hear about this natural sleep solution, or try it out for yourself.

But as soon as you RSVP for your gift and say “YES! I’m ready” they’ll be powerless to stop you.

But if you wait, leave this video and decide you need to think about the decision to completely restore your health, your copy could be gone.

And you’ll know that the Big Pharma executives have won.

So while it’s still available right now…

We’re just moments away from revealing the #1 secret treatment AND giving you full access to your complimentary copy of ***The Insider’s Book of Secrets.***

And I’ve saved the most important for last.

I’m about to reveal a hidden symptom that HALF of all seniors have—but don’t know it—that could send them straight into a fatal heart attack…

Forget everything you’ve heard about heart attacks and how to avoid them… here’s the story no-one is talking about.

And here’s the scariest part… even if you’re the healthiest person you know… eating all the right foods, exercising daily, keeping your blood pressure and cholesterol in check…

You could still be a PRIME TARGET for this lethal disease.

And by the time you start to actually feel the symptoms—unfortunately you’re already too late.

But luckily there is one way to check to see if you have this terrifying disease—only Big Pharma doesn’t want you to hear a thing about it.

Why? You guessed it… COLD. HARD. CASH.

It makes sense for them… they have hundreds of drugs to “treat” all of those heart health issues.

And those hundreds of drugs are shilled to the tune of $64.4 BILLION, in fact.

Except every single one doesn’t do jack for one of the potential causes of fatal heart attacks…

What is it? To put it simply… scientists aren’t exactly sure why this happens to some and not others, but it has to do with the way your body processes calcium.

For the people that process calcium normally, it goes straight to the places where your body needs it: to strengthen your bones and keep them healthy.

But for people that **don’t** process it normally, that same calcium is **robbed from your bones** and ends up in the wrong place (like the blood vessels and heart) where it’s bad news.

This can happen for years (even decades) without you knowing or feeling a thing.

All the while, this calcium depositing is gradually building up in your body’s organs and arteries where it doesn’t belong… **slowly turning your insides into stone.**

But don’t panic if you’re worried this might be you. Luckily, you have all the details available to you now…

#1 -- There’s a quick test you can learn about that can help reveal the symptoms.

#2 – AND there’s also a natural way to help **fight** any stone-hardening damage it’s already done.

Start reading the information on page 29 of ***The Insider’s Book of Secrets immediately***…

It could give you everything you need for many many more healthy years with your loved ones.

Everything you need to know about the test and Stone-Fighter Technique start on page 29 of ***The Insider’s Book of Secrets***.

This is the ONLY place you will hear about the lethal stone symptom – and don’t expect the media or even your own doctor to bring it up. (Sadly, they may still be in the dark too…)

Can you imagine having the peace of mind knowing what’s really happening in your body behind the scenes…

Surely that would be worth spending the few seconds it takes to RSVP for your free book, right?

I can’t wait for you to claim your copy today—look for the instructions and don’t miss your chance… because it’s coming up soon.

The Insider’s Book of Secrets is a must-have resource you simply can’t be without… it’s the only book the world-over that contains not one—but **5 REAL science-backed remedies** for the most feared diseases to mankind.

Our motto? “We only publish the cures we’d want our own parents to use.”

These rare cures and treatments are simply unlike anything else in the world, because they’re natural.

- **Cure #4 – The Amazing PDS.** On page 17 you’ll discover the easy secret to fighting Alzheimer’s and Dementia with the power to roll back your brain’s “clock”.

OK… ready to get started?

I can't wait for you to join HSI and discover your own path to total health… but before you go, I have ONE last surprise in store for you… and this might the best one yet.

Because today, if you RSVP in the next 20 minutes, I'd like add an EXTRA "thank you" bonus gift into your welcome package (valued at $59)… FREE.

You see, I want to make sure you have every weapon in your arsenal ready.

But—the truth is—there's one mistake that many unfortunate folks make… which puts them on Big Pharma's list as Target #1.

And if you make it, there's a 100% chance you'll be in their sights too… only, this time, there's no escaping them.

That mistake? It's two words that are enough to strike fear into the hearts of everyone over the age of 50…

Nursing Home.

Let me ask you… How many people do you know have lived happy, full lives in a home?

Sadly, the answer for most of us is none.

Sometimes it's an accident that puts them there… a broken hip that robs them of their independence.

And sometimes it's more gradual… like fuzzy memories that lead to widespread mental decline over time.

Either way, **it's a terrible way to live**. And, once inside, no one ever seems to get better. Only worse…

Friend, I realize this is unpleasant to think about – but it's important we talk about it now.

That's why I created the first-ever, surefire guide to maintaining lifelong independence AND help avoid a nursing home.

I sifted through all 20 years of HSI research to assemble only our best secrets for a long, healthy life into one comprehensive guide. It's called: ***The Independent Patriot's Guide to Staying In YOUR Home (Not Theirs…)***

THE INDEPENDENT PATRIOT'S
GUIDE
to
Staying in YOUR Home
(Not Theirs…)
HSI

It doesn't matter if you are a picture of perfect health OR struggling with many symptoms of aging… this guide is for YOU.

Anyone can use these secrets to maintain their freedom, and even feel younger well into their 90s and beyond.

And, best of all, these are simple tips you can easily start doing tomorrow… No weird diets, complicated protocols or "lifestyle overhauls" here!

I know you're eager to RSVP see them for yourself, so here are just a few of my favorites:

- **The "Spark of Life" secret that recharges your body at the cellular level** (yes, I mean EVERY cell), rushing in the good nutrients your body craves—and kicking the bad stuff out. Call it a "detox" if you want, but if you're looking for an *immediate* total body health makeover, throw away your multivitamin, and try THIS on page 5 instead.
- **Forget everything you thought you knew about sarcopenia…** "experts" are still chalking it up to a "normal sign of aging," but it's now being classified as a *hidden epidemic* that saps muscle strength, and makes seniors more frail by the second. Not only that, it's increasing falls, bone fractures, limiting movement, and even leading to early *death*. Luckily, there's an amino acid miracle that can fight all the damage of sarcopenia -- and even help build and preserve your muscles. If you're ready to stay "lumberjack strong" well into your 90s, the secret on page 15 is for YOU.
- **The 1 secret all 100-somethings have in common**… they simply have more of THIS antioxidant floating around in their body. Now, researchers have found the PERFECT copycat that mimics its power… and studies are even showing that it can help battle Parkinson's, Fibromyalgia, Lupus, and more. Is this the one pill that will make hundreds of pharma drugs obsolete? Turn to page 29 to see why…

And that's just the start.

There is SO much more waiting for you inside ***The Independent Patriot's Guide to Staying In YOUR Home (Not Theirs…)***

And I can't wait for you to discover these cover-to-cover miracles when you RSVP and say "YES!" in the next 20 minutes.

Remember, there is NO cost for this invaluable resource today. It's the third welcome gift in your new HSI Member package… and it's 100% free with our compliments.

Ok, so just to quickly recap everything you'll be getting today as part of your HSI membership:
