D E F P O T E C
TO HERE!
L E F O D P C T

This is a visual representation of the study results.

This is, of course, just an example. But…

Wouldn't it be amazing if you could see more clearly?

What if you could see *the whole world* with **sharper vision**?

Where you didn't even have to think about getting stronger reading glasses every year…

Be able to read your favorite book without straining…

Keep driving with confidence to read all the road signs… And never think about your vision slowing you down.

If you think that's just a fantasy…

Or that blurry vision is just a part of getting older…

…and you'll always need to get **thicker** and **thicker** reading glasses…

…and squint and strain to see…

I've got good news for you.

Recently, a cutting-edge vision research laboratory made a discovery. The lab is called the ARC Centre of Excellence in Vision Science.

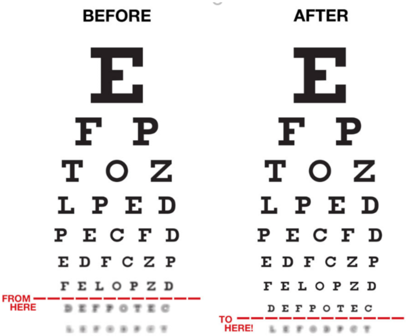
It's located in Italy and thanks to what it's found, you could now have stronger, sharper, younger vision!

It's true. You don't have to settle for blurry vision, or squinting every time you want to read the newspaper… see a menu, or even just use your phone.

Because this solution doesn't just help improve your eye health…

In a small study, it helped men and women read 2 more lines on an eye chart

Take a look:



This is a visual representation of the study results.

The first image shows the average vision score of participants before they started the trial. They had an average score of 20/26.

The second image shows how much they improved after 3 months—going to an average, near-perfect vision score of 20/22!

Look at the difference again: ***Really*** look at it… Because this is the scientific result of what this breakthrough delivered for 29 real men and women over the age of 55.

The ARC Centre found it's true.

And even though their headquarters are in Italy, you don't need to fly across the ocean for their secret.

It's now available in the comfort of your own home.

That's right, you don't even need to visit your eye doctor…

This secret is very easy and takes less than 17 seconds to do. When you use it, your vision could *improve*…

You'll schedule your next eye exam and *smile to yourself*…

Because *you know what's going to happen next*…

You ease into the optometrist's chair, rest your head in front of the goggles, and look at the familiar eye test.

But this time… you could read **more clearly than before.**

You read most of the chart with zero hesitation… and your doctor pauses before saying, "Uh, wow, that was great!"

A few minutes later, you're walking out of the exam room. And your smile's even ***bigger***… because your vision is getting *better*.

"Actually, doc, my eyes are getting ***younger***," you might say to yourself. But that's your little secret.

All because of the amazing breakthrough that was shown in one study to help seniors read 2 extra lines on an eye test.

Again, all shown by science.

Now, I understand if you're thinking, "No way. That can't be true."

After all, you've been *told* blurry vision is just a part of getting older…

You've been told it's normal to need thicker and thicker reading glasses year after year…

And that there's no way to maintain sharp vision as you age.

My friend… that may have been true in the past. But it's not true any longer.

This vision-supporting breakthrough discovered by researchers in Italy…

Is so powerful, experimental research suggests this spice actually helps protect and support eye cells, to help keep vision sharp and crystal-clear.

This was shown when researchers found it improved study participants' vision by 2 lines on an eye chart.

I'll show you exactly how it works in a minute. But first…

Imagine being able to take a fun road trip and easily read every sign more clearly…

Or relaxing at home and reading the newspaper without straining, because your sight is improved.

It's now possible.

And the secret isn't some silly eye exercise. It's not some scary procedure.

As you'll soon discover, experimental research shows this works by targeting the specific cells in the eyes that "make vision happen."

And in 34 seconds, I'll reveal exactly what the secret is – and how to use it for yourself.

First, let me introduce myself.

My name is Dr. Alan Inglis, M.D.

I'm a board-certified physician who has studied at Cambridge University… Harvard… and even the ancient, highly respected Glasgow University in Scotland…

And I have had the privilege of running a busy practice at my clinic in Western Massachusetts.

For the past 20 years my goal has been to help people just like you, who were failed by mainstream medicine… finally get the answers they need that could help improve their health.

You see, I make it my job to stay on the cutting-edge of medicine. And it's how I was able to study this vision-sharpening breakthrough…

…even though this research was done in Europe.

That's why hardly anyone knows about it. Not even doctors here in the U.S.

But I'm ready to share this pioneering research from doctors in Italy.

When you take advantage of their groundbreaking work…

You could finally have the secret to helping improve your vision

Here's the backstory:

Just a few years ago, these Italian scientists journeyed into the mountains of L'Aquila, in Italy's Abruzzi countryside…

…searching for the solution for your tired eyes.

It is…

Are you ready for this?

A *spice*.

Not just any spice. It does come from a special plant, but it's not the kind of spice you're used to cooking with.

Instead, it's something called *Red Gold* spice.

The scientists were interested in Red Gold for a specific reason.

They knew about its **legendary powers**…

In fact, cultures throughout history prized this spice more than **gold**.

Hundreds of years ago, when pirates hunted for ships to pillage, they often completely *ignored* the vessels loaded with real, 24 karat gold…

…because they wanted this spice instead.

Which is how it got the name *Red Gold*.

In fact, demand for this Red Gold spice once started a **war**.

In the 14th century, a Greek ship carrying almost half a million dollars' worth of Red Gold was stolen by a group of European nobles. This triggered a war between nations.

All because of its health-enhancing power…

But… hundreds of years later… scientists in the West still hadn't caught on. It wasn't their fault – Red Gold is a rare spice.

But the tides finally began to turn when these scientists decided to see if Red Gold could improve *vision*.

In one in vitro experiment, scientists collected some Red Gold and tested it. They wanted to see how this spice affected eye cells.

They began with an experiment… and had zero clue of the shocking breakthrough they'd make.

In fact, without knowing it… these researchers were about to see how…

Red Gold helps make eye cells healthier

The scientists put some bovine eye cells into 2 different petri dishes.

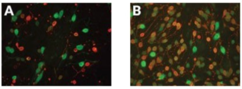
Then, they mixed this Red Gold spice into just 1 of the petri dishes.

After that, they placed the two dishes under a harsh light. The light shined straight down onto the eye cells.

The light blasted the dishes for a **full 24 hours**.

What happened?

See the difference for yourself:



These are microscopic photos of the eye cells in the two different dishes.

The first photograph, A, shows how the light impacted the cells. You can see how few and sparse they are.

Which goes to show the importance of keeping your eyes healthy and protected.

The good news is… there now could be a way to help *protect* your eye cells. Take a look at the photo of the "B" dish…

It got *hit with the exact same amount of light*. Yet all the eye cells remained healthy.

The only difference? The scientists had applied Red Gold spice.

It was clear this amazing spice can help keep eye cells healthy.

In a different study of 27 men and women, scientists tested this spice on real people.

They recruited volunteers who were up to 85 years old – all with early age-related macular degeneration.

The scientists gave all the volunteers an eye test and took careful note of how well they could see.

Then, for 90 days… the volunteers took this Red Gold spice.

Just 1 tiny, daily dose of Red Gold spice.

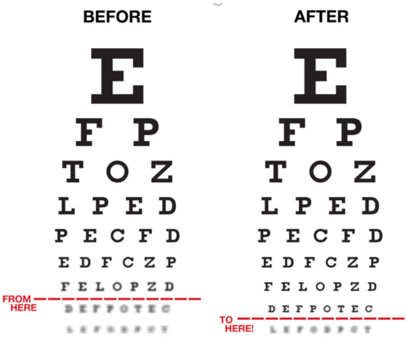
When the 90 days were up, the volunteers took the *exact same* eye test again…

And something happened.

Because not only did the volunteers' vision improve…

The volunteers who started with poor vision were able to read ***two more lines*** on the eye test.

Here's exactly what that looks like:



This is a visual representation of the study results.

If you still can't imagine how this is possible, think back to the laboratory test on eye cells.

You saw how just a sprinkle of Red Gold helps keep eye cells **healthy**.

That's exactly what happened to these men and women. Even though they were up to 85 years old, their eyes remained healthy.

But… maybe this was a fluke? Or just temporary?

The scientists wanted to find out. So, they kept giving the volunteers Red Gold for almost another **year**.

And kept giving them eye tests every three months… and…

…the volunteers *kept their better vision!*

In fact… on average… the participants ended the study with an **amazing 20/22 vision score**!

Let me repeat that…

These seniors had near-perfect 20/22 vision!

They could read **2 more lines on a real, verified eye test**.

And their vision *remained healthy* even a year later. They got one year older and their eyes *stayed healthy*.

Imagine if this happened for you…

Waking up one day with better vision…

And keeping it sharp and clear for a year… or *longer*…

Enjoying life without straining and squinting to read fine print, or make out road signs.

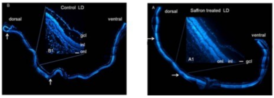
Animal studies suggest Red Gold works by helping rejuvenate little cells in the eyes called photoreceptors.

These little cells allow you to see.

Fun fact: You have roughly 120,000,000 of these cells... per eye!

And when you take Red Gold spice, it targets these cells to help revitalize them.

Since a picture's worth 1,000 words, I'll just show you what happens:



These are photographs of the inside of an albino rat's eye. You're seeing an **inside look** at how Red Gold biologically helps support healthy vision.

Notice the bends and creases in the left photo? Almost like the eye is sagging and deflating?

But notice the second photograph… and how smooth and healthy the eye looks by comparison.

The second photo shows what happens when the rats were given Red Gold.

In one case, the eye appears withered and shrunken… and in the other case, with Red Gold, the eye appears healthier.

Scientists did another study, to measure how **fast** Red Gold spice is absorbed in the body.

They decided to test two volunteers with blurry vision, who had been taking Red Gold spice for over a year…

…and three other volunteers with healthy eyesight, who had been taking Red Gold spice for a couple of weeks.

Just 2 hours after they took their daily dose, the scientists took urine samples from everyone.

While the scientists could find traces of the Red Gold spice in the blood and urine of the **clear-sighted** volunteers, showing they excreted it…

…they often didn't find *even a trace* of Red Gold spice in the urine or blood of volunteers with vision problems.

Why?

The scientists suggested it was because they had already absorbed the Red Gold.

That means… in just two short hours, the scientists thought the Red Gold spice could have been on its way to supporting healthier vision.

Okay, so where can you get your hands on Red Gold? As I mentioned before, it's a *rare spice*.

However, there's still a way to find it in the United States.

Because my team and I have worked directly with the company in Italy that's tested this special, rare Red Gold spice…

…and made it the star ingredient in my vision-improving formula called **OcuSelect™**.

BESTHEALTH
NUTRITIONALS
OCUSELECT
A DIETARY SUPPLEMENT
30 CAPSULES

It's my premium formula specifically designed to support aging eyes and help improve vision in men and women over 55

It contains the very same dose of premium-quality Red Gold that's been shown to help improve vision so effectively, that study participants could read 2 more lines on an eye test.

I'm making this formula **available directly to American seniors** who read this presentation today.

But **you must use the real kind of Red Gold** – or you won't be getting the right stuff.

Make no mistake, **OcuSelect** has the same dose of premium Red Gold spice shown to help sharpen vision enough for **men and women to read 2 more lines on an eye test**…

With no eye exercises… no medical procedures.

Just one little, natural Red Gold spice pill.

And it's now in this **OcuSelect** formula. It's the best solution I've ever seen for anyone who wants to maintain healthy eyes and support sharper vision.

Please understand **OcuSelect** is available directly through this presentation. Beware of imposters selling unauthorized or inferior quality formulas without Red Gold.

And there's more…

OcuSelect does more than help sharpen your vision.

In fact, as you'll soon see, it covers **every** part of vision health.

You see… I developed **OcuSelect** to be a **complete vision-supporting solution**.

Red Gold is the **best** nutrient for helping improve your vision… but there's more you need if you want the most effective and comprehensive formula for younger eyes.

You need to cover all **5 parts of healthy vision**.

They're *all* necessary for healthy eyesight like you had when you were younger.

And you'll see how **OcuSelect** addresses each one of them to help improve vision:

Number 1 is sharper overall vision. It goes without saying that sharp vision is vital for driving with confidence, enjoying the hobbies you love and continuing living your life to the fullest.

That's why this formula features Red Gold as the star ingredient, which has been shown to make vision sharper.

Number 2 is eye moisture… It may not seem that important, but the fact is that dry eyes can lead to the redness and burning that could make your vision **worse**.

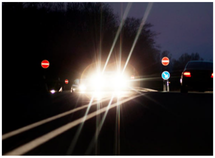
But with the right amount of moisture in your eyes, you can have more comfortable eyesight.

Number 3 is near sight… Near sight is what allows you to keep reading your favorite book… breezing through the morning newspaper and crossword puzzle… and not straining to read the words.

CLASSIFIEDS

Number 4 is glare recovery… think of the last time you walked down the sidewalk at night, about to drive home from a dinner with your spouse.

Then, just before you got into your car, a vehicle on the road practically *blinded you with its headlights*.



How quickly the spots in your vision fade away after seeing a bright light is called glare recovery… and it needs to be fast.

Then there's number 5.

Well, number 5 is interesting because it's something your doctor very likely has **NEVER mentioned to you about your eyes**.

It's actually possible he **hasn't even HEARD about this yet**.

It's not his fault… *almost **nobody** has.*

And yet, number 5 is your key to literally having younger eyes.

This isn't hype… it's actual science.

It’s your key to stronger eyes… and sight that can clear up wonderfully.

I’ll show you exactly what it is in a moment…

Now that you know all 5 parts of healthy vision, let’s quickly cover them all.

Our **OcuSelect** research team found solutions for *every single one*…

Okay, we’ve already covered part one. So now let’s cover part two… **eye moisture**:

There’s an interesting berry that has historically been used to improve night vision… but new research shows actually can help relieve dry eyes.

How is this possible?

The story behind this solution is almost beyond belief.

Imagine it’s 1943, in the middle of the night… and you’re the pilot of a Spitfire fighter plane.

As you scream past the buildings of London, you bear down on your enemy…

A Nazi Luftwaffe night fighter.

You’re locked in a vicious dogfight and you have just one chance to defeat the enemy fighter before he drops any bombs on innocent men and women in your home city.

It’s life or death – failure is not an option.

Fortunately, you’ve got a secret.

A ***vision-improving*** breakthrough that one of the veteran pilots slipped your way. You’ve been using it faithfully ever since…

…which is why, even in the inky blackness of the night, you easily put the Nazi fighter into your

…which is why, even in the inky blackness of the night, you easily put the Nazi fighter into your sights…

…FIRE…

…and shout with joy when you see it light up and explode into smithereens.

Amazing story, right? Except it's more real than you think…

Because rumor has it, the British Royal Air Force *possessed a vision-supporting breakthrough*. It helped them *see like eagles* during deadly nighttime fights in the sky.

It's a certain type of fruit that the British use to make jelly. And while this "jelly" ingredient isn't as popular here in the States…

Just like Red Gold spice… this vision-ingredient is completely natural and easy to use.

It's called bilberry extract.

The Rare "Jelly" Ingredient That Can Help Your Eyes

But what's the truth behind the legend?

I'll tell you in just a moment. But first, let me ask you…

Do your eyes not feel as moist as they used to be?

Do your eyes ever feel dry and scratchy, or look red and irritated?

There's a reason you might be experiencing this more than you did when you were younger.

It's because your eyes produce fewer tears when you get older.

Now, tears aren't just for crying! They're actually a vital process for keeping your eyes "wet" and healthy.

Without enough tear-production, your eyes can feel dry.

But that's where bilberry comes in.

Because scientists found in a small study that **bilberry can improve tear production after 4 weeks and help "wet" and moisturize dry eyes**.

You could have comfortable, healthy eyes

All you need to do is get your hands on some bilberries. However, they aren't like apples or blackberries. They aren't found as easily in North America so you can't just pick them from a backyard garden.

But here's the good news…

My team managed to get their hands on a supply and added it to **OcuSelect**.

That's right – this breakthrough formula contains **both** Red Gold and bilberry.

You'll get the premium-quality Red Gold that's been shown to help men and women in a small study read 2 more lines on an eye test…

…and the same kind of bilberry shown to help keep eyes moist and healthy.

Next, let's quickly cover parts #3 and #4 of healthy vision: Near-sight and glare recovery.

Then I'll show you how to get the *best deal* on **OcuSelect** so you can enjoy healthy vision.

I developed this breakthrough vision health formula with only one goal in mind…

To give YOU the confidence, excitement, and peace of mind of knowing that **you can trust your eyes and see more clearly**.

So, to make sure you know that **OcuSelect** is, finally, **the answer to help support your vision**…

I also included an ingredient in **OcuSelect** that helps **improve your near sight vision**.

So you can enjoy a book or a newspaper more clearly…

Here's how it works.

Marigold flowers contain a nutrient called *lutein*.

And recently, scientists gave lutein to volunteers as part of a double-blind, placebo-controlled study.

When the study began, everyone had age-related macular degeneration.

The ones who took the placebo stayed that way. In fact, their vision got *worse*. Which can happen to your eyes as you age.

But the volunteers who took just 10 mg of lutein had a completely different experience.

First, their “near visual acuity” improved.

This is the scientists’ fancy way of saying the volunteers saw an improvement in how they could see close-up objects like a newspaper more clearly.

Imagine your near sight vision improving…

You could read the tiniest type on a newspaper or magazine *without* **squinting** or **holding the pages farther away**…

Not only that, but the eye test results for the study subjects who took lutein improved *by a full line* after 12 months…Think about *that* for a moment…

Earlier, you learned Red Gold helped men and women read an additional 2 lines on an eye test.

Well, lutein *all on its own* helps improve near sight vision, and allowed study participants to read an extra line on the eye chart.

That’s why I made sure to include lutein in my **OcuSelect** formula. We’re using the **exact** same kind and the **exact** same amount.

So, with **OcuSelect** you get **both** powerful nutrients working *simultaneously*.

Imagine taking the Red Gold spice that helps **protect your eye cells**.

Then you take a bilberry extract shown to help keep eyes moist and healthy…

…and add this lutein for **improved near sight vision**.

With everything working at once, your eyesight may never be the same.

You could start to marvel at how you can spot beautiful birds nesting in your backyard trees…

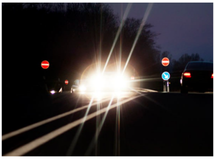
Read street signs that used to be too distant for you…

And after you get home you can curl up with your favorite book, without reaching for your reading glasses.

You’ll enjoy all this **because your eyes are healthy**.

But that’s not all…

You also need to **consider glare recovery**.



This is the process in which the eyes recover after seeing a bright light.

When you were young, you probably didn’t have to think about it.

Today might be a different story… but the next part of the **OcuSelect** formula could help.

It’s because of scientists from the Vision Science Laboratory at the University of Georgia.

After conducting a small study, they found that a certain ingredient **combination** helps *improve visual performance in glare after 6 months.*

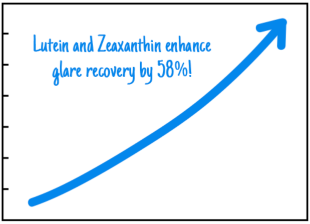
The first ingredient in this combo is lutein, which you already learned about. The other ingredient is called *zeaxanthin*.

The scientists gave this combo to volunteers ages 17 to 41… and then *shined a very bright light* into the volunteers' eyes.

Then, the scientists kept *cranking up* the light until the volunteers couldn't see anymore!

They saw something amazing…

The volunteers taking the combo of lutein and zeaxanthin could handle *58% more intense glaring light*.



GLARE RECOVERY

Of course, that's why I made sure to include the *combination* of lutein and zeaxanthin in **OcuSelect**.

Together, they can help **improve your eyes' glare recovery**… so you can continue to drive at night with *confidence.*

Let's review…

With Red Gold spice – also known as *saffron* – that's been shown in a small study to help participants **see 2 more lines on an eye test after 3 months**…

Bilberry for relief from dry eyes…

Lutein for **improved near sight vision…** so you can enjoy the newspaper without straining…

CLASSIFIEDS
BUSINESS
REAL ESTATE
CAREERS

And zeaxanthin for **improved glare recovery…**

OcuSelect truly has everything you could need to improve your vision.

But if you want vision like when you were younger, there's one final thing you NEED to know.

And this last one is a shocker…

You see, the scientists also uncovered *something else* about zeaxanthin and lutein.

Inside your eyes is a protective layer called the *macular pigment*.

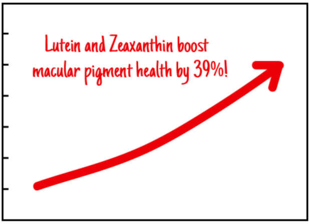
When you're young, your macular pigment is **thick** and **dense**, because it helps filter out harmful light. But as you get older, your macular pigment could *decrease*.

Now, when the scientists did their studies on lutein and zeaxanthin… they noticed something interesting…

They measured the volunteers' macular pigment…

And they found when the volunteers took the combination of lutein and zeaxanthin…

…their macular pigment density increased **by 39%.**



MACULAR PIGMENT HEALTH

This is amazing, because macular pigment is absolutely critical for healthy vision.

And as you just learned… in a small study, the combination of lutein and zeaxanthin increased subjects' macular pigment density by 39%.

This is real science. You could have vision like when you were younger... Because you'll support your ***eyes*** with healthy macular pigment.

Better vision could be yours

However, sometimes getting lutein and zeaxanthin isn't so easy. They're found only in small amounts of certain kinds of foods.

To revitalize your macular pigment, you'd have to eat more than a day's worth of oranges and eggs.

But here's the good news. I am including *both 10 mg of lutein* and 2 mg of zeaxanthin in **OcuSelect** – completing the formula.

And like all my BestHealth Nutritionals formulas, **OcuSelect** is created in a certified facility right here in the United States. And it's also non-GMO.

OcuSelect is absolutely top-notch, with the perfect levels of ingredients to help support your vision…

When you reserve a supply today, **you're getting everything you need for healthy vision**.

The **Red Gold spice** that helps improve vision, so subjects in a small study could read 2 more full lines on an eye test…

The **bilberry extract** that helps keep eyes moist and healthy…

The **lutein** that helps improve near sight vision, making it easier to read newspapers and books without straining…

And the **zeaxanthin**. In a study when combined with lutein, it helped improve glare recovery 58%... and improved macular pigment density 39% after just 6 months...

You could have vision like when you were younger…

Even if you're enjoying your golden years.

With Red Gold, bilberry, lutein and zeaxanthin…

Your eyes will be healthy.

When your own supply arrives in a few days, I highly recommend you begin taking **OcuSelect** immediately.

That way…

The ingredients can start going to work.

When you take **OcuSelect**, start your timer…

Because every moment that ticks by, could be one moment closer to **healthy vision**.

You'll have all the nutrients you need for healthy

vision like when you were younger…

Ok, I have just one more thing to share with you...

In this presentation, you've learned about the scientific breakthrough that could help make clearer vision happen.

You've learned how a rare Red Gold spice helps improve vision, so that study subjects could read 2 more lines on an eye test.

You've discovered how this spice works because it helps keep **photoreceptors** healthy.

You've learned how a special bilberry extract can help keep eyes moist and healthy…

You've also learned lutein lets you enjoy newspapers, books, and magazines easier by helping to improve near sight vision.

…and how when you combine lutein with zeaxanthin, this **combination can improve visual performance in glare**…

With **OcuSelect**, you're getting both lutein and Red Gold…

Plus, the zeaxanthin and bilberry.

With all these ingredients combined, you're getting what you need for ***healthy vision***.

Imagine what life could be like with better vision…

You could spot your car keys from across the room, grab them, and stride out the door for a fun, scenic drive…

You'll kick back and watch the news without reading glasses or squinting to read the captions…

If you want, you'll even be able to surprise your spouse when you read all the specials at your favorite restaurant…

Plus, you'll have no worries driving home afterwards. Even if it's the dead of night and even if the road's crowded with glaring headlights.

Confident. Independent.

Imagine scheduling your next eye exam. You'll be able to march straight into your eye doc's office…

Tell them to **show you the exact same eye chart from your last appointment**.

Then, as you sit down in front of the screen, smile to yourself…

…and confidently call out the letters.

Once you're done, turn to look at your doc's face…

…so you can enjoy how his *jaw has dropped in amazement*.

As you'll soon discover, it's all because your vision is, quite simply, better.

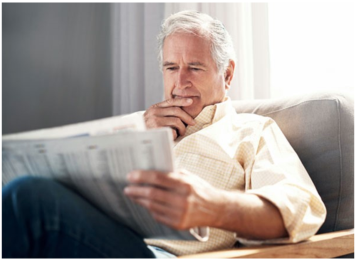
All because of **OcuSelect**…

And now you have a chance to reserve your own supply of our **OcuSelect** formula today!

Start taking **OcuSelect** as soon as you receive it.

Your vision could improve…

Everything from scanning the newspaper to reading street signs to watching TV could be easier – you won't even have to think about it.



Because HEALTHY EYESIGHT is here to stay.

There's no question in my mind, **OcuSelect** is the eyesight breakthrough you've been waiting for.

But you don't have to take our word for it.

I am so confident this formula could help your eyes, I want you to try **OcuSelect** with **ZERO** risk.

BESTHEALTH NUTRITIONALS
OCUSELECT
A DIETARY SUPPLEMENT
30 CAPSULES
ANY REASON
MONEY-BACK GUARANTEE
ANY TIME!

Truly.

You have a lifetime 100% money back guarantee when you try **OcuSelect** today.

Here's how it works:

Reserve your supply of **OcuSelect** today.

Then, when your supply arrives in a week or so, open your first bottle immediately.

Follow the instructions and take **OcuSelect** with a glass of water or beverage of your choice.

Continue to take **OcuSelect** for a few weeks.

But if, for any reason, you aren't 100% satisfied with **OcuSelect**, simply give us a call and we'll give you back every penny of your most recent order, no questions asked.

Let me repeat that… for any reason at all, **simply request a refund and we'll be happy to oblige**.

And your guarantee NEVER expires.

You can request a refund any time in the future – it could be six months from now… a year… or even more!

We want to make sure you're satisfied with this solution.

This way, there's no pressure… **and no risk**… when you try **OcuSelect** today.

So let's do this: When you see the button below this presentation, click on it and fill out your shipping information on the next page.

Once you do, we'll begin packing your shipment of **OcuSelect** and then we'll rush it your way.

Just a few short days from now, you'll receive a discreet package from USPS.

Carefully packed inside will be your initial supply of **OcuSelect**.

Start taking it… and the special nutrient combination inside **OcuSelect** could help nourish your vision, just like you've been waiting for.

But that's just the beginning…

As the days go by, you could notice your overall vision improving…

Your eyes will feel moist and healthy…

In fact, very soon, you could experience improved vision. It's when you realize *it's really true… you **do** have healthy eyesight.*

You'll realize, "OcuSelect helped improve my vision!"

All thanks to this formula… and YOU choosing to help your health.

At that point, you might wonder what will happen if you stop taking **OcuSelect**… and that's an important question.

After all, science from a study **showed subjects maintained their healthy vision for over 1 year**… as long as they kept taking the Red Gold.

So, today, through this offer, you have access to our Auto Delivery Service.

That means, whenever you're about to run out of **OcuSelect**, we'll ship you a fresh supply and simply bill the credit card you use today.

Not only that, you lock in today's price. And we'll even pick up the shipping cost.

That's right… you get **FREE** shipping on today's order and all future Auto Delivery orders.

Of course, you can cancel or change this service at any time just by calling our friendly team.

No hassle and complete convenience. That's how we do business.

And, of course, you take no risk at all.

Your 100% satisfaction is ALWAYS guaranteed

Your eyes will have a *constant* supply of every nourishing ingredient in **OcuSelect**.

The Red Gold spice that helps men and women **see 2 more lines on an eye test after just 3 months**…

Bilberry for **relief from dry eyes…**
