Groundbreaking clinical study from the University of Michigan shows:

Seniors Who Used This "Immunity Upgrade" Breakthrough Had 5X Fewer Infections

"This is critical for seniors right now…Anyone over age 50 needs to see this."
– Alan Inglis, M.D.

Hello. I'm Dr. Alan Inglis, M.D.

If you're over the age of 50…

…a **healthy immune system** is absolutely critical in these scary times…

That's why I can't wait to share this **very good news.**

Imagine if just a sprinkle of a special nutrient… a natural immunity wonder…

Could help promote a healthy, strong immune system…

How much **healthier**…

How much more **confident**…

How much **happier** would you feel?

*Then listen to this **stunner**…*

A scientific study on seniors aged 55-87 years old…

Found that after taking a clinical dose of a "missing" nutrient for one year…

They had **5X FEWER INFECTIONS** during that year compared to the seniors who only got a placebo…

And all they did was take a small dose of this **immunity nutrient** every day.

When I saw these results *my jaw practically hit the floor…*

Because I knew something that most people don't…

1 in every 3 seniors don't get enough of this critical nutrient.

That means you might not have the healthiest immune system you can.

And that's not something you want.

Not when the stakes are this high.

In fact, this nutrient is so vital for your immune system…

The Harvard University School of Public Health reports that "Even a **mild deficiency** can slow down the parts of your immune system that keep you healthy"…

Researchers from Ohio State University say this nutrient is so important because **it helps keep your immune response balanced and effective…**

And research from the University of Michigan shows that getting the right dose of this missing nutrient can help **make seniors have 5X FEWER infections**, compared to getting a placebo.

There's just no question in my mind. If you're over 50…

This Nutrient Is the #1 Most Important Breakthrough to Support a Healthy Immune System

And when you get the right amount, it's like **"upgrading"** your immune system to a higher level.

So let me ask you…

Would **you** take this nutrient to support a healthy, robust immune system?

In this day and age, it isn't just smart – **it's VITAL**.

For seniors like us, we need to make sure our immune systems are in tip-top shape…

To stay healthy, energized, and feeling our best…

Plus, **feeling secure and confident** that you'll stay healthy all year long.

Especially right now, as we're all experiencing unprecedented levels of **fear and worry** about what's going on in the world.

That's why I ***rushed*** to make this video for you today.

As I dug into the research, I found something shocking…

You see, most doctors are **getting it all wrong** when it comes to supporting our immune systems.

And many of those so called "immune support" formulas you see out there aren't just **worthless**…

But they could give you a false sense of security and leave your health **at risk**.

Most of them leave a **huge gap** in your immune health, leaving you vulnerable.

What I'm About to Tell You… 99.9% of the Population Doesn't Know

And it could mean the difference between you and your loved ones staying heathy this year…

While your friends and neighbors aren't so lucky.

Once you see what I'm about to share, you'll know why **most immune support formulas are just bunk**…

And you'll know **exactly** how to get the "immunity upgrade" nutrient…

…that has been shown to help one group of seniors have **5X fewer infections.**

But first, let me fully introduce myself.

Alan Inglis, MD
Dept. of M

My name is **Dr. Alan Inglis**, **M.D.**

I'm a board-certified physician who has studied at Cambridge University… **Harvard University**…

And even the ancient, highly respected Glasgow University in Scotland…

And I have had the privilege of running a busy medical practice in Western Massachusetts.

For the past 20 years, my mission as a doctor has been to help people just like **you** finally get the answers they need to improve their health.

You see, I make it my job to stay on the cutting-edge of new medicine…

And for two decades, I've studied, researched, and developed a protocol for my senior patients who want a stronger immune system.

And being over 67 years young myself, I know how it feels to worry about whether my immune system is strong enough…

*Or if it is going to **let me down when I need it most**.*

And that's why I always made immune support a priority with my senior patients, too.

Now, more than ever, I want to make sure folks like you know **clinically studied, researched** ways to enhance your immune system…

…that you very likely would never hear about otherwise.

So today I plan to share it all…

You see, the mainstream healthcare system would have you believe there's little you can do to strengthen your immune system…

Sure, they'll tell you to eat healthy, get some exercise, and wash your hands often…

And while there's nothing wrong with doing any of that…

The truth is…

There Are New, Clinically Studied, Better Ways to Bolster Your Immune System

And there is a specific protocol I recommend just for seniors.

Because most seniors do not get enough of the critical nutrients necessary to improve our immune function.

Our digestion just doesn't work quite as well as it used to…

Setting us up to not get enough of the nutrients we need to stay healthy.

And seniors *especially* don't get enough of the "immunity upgrade" nutrient that was shown in one clinical study to **reduce infections by 5X.**

I'll tell you exactly what it is a moment from now...

But I'm going to tell you something much bigger than that…

You see, in order to understand why my immune support protocol for seniors actually works, you first need to know what 99.9% of people don't:

There are actually 3-parts to your immune system…

And, in order for you to stay healthy…

…you need **ALL 3 parts** in tip top shape.

When all 3 parts of your immune system are fully supported…

You have **complete, all-around, head-to-toe immune health**.

Addressing all 3 parts of the immune system is the **exact strategy** I use for seniors who want to stay healthy all year long…

If you don't bolster all 3 parts, you simply won't have complete protection.

And that's what most people get wrong.

And why most immune support products out there **aren't complete.**

Because they don't address all 3 parts of your immune system.

So let's quickly cover what all 3 parts are…

And then I'll reveal the **easy way** to support all 3.

The 3 parts are:

Your **innate immunity**…

Your **adaptive immunity**…and…

Your **skin's barrier immunity.**

Or as I like to call them, your **primary immunity**, your **secondary immunity**, and your **barrier immunity**.

The first part of your immune system, your **primary immunity,** is the immune system you are born with…

It's your body's built-in first line of defense keeping you healthy.

Your **secondary immunity** is the enhanced immune system you build throughout your life…

It's what your body develops as it "learns" and "adapts" to the immune stressors we all face... and why generally, we become "immune" to specific cold and flu strains we've been exposed to.

And finally, your skin's **barrier immunity**…

Your skin is responsible for filtering out anything that doesn't belong in your body…

And while it may not seem like a part of your immune system, it actually plays a big role in keeping you healthy.

So now you know how your **primary immunity**…

…your **secondary immunity**…

…and your **barrier immunity** all work together for complete immune health…

Ok. Let me reveal now how to support your **primary immunity** with…

The "Immunity Upgrade" Nutrient That One Study Found Helped Seniors Have 5x Fewer Infections

Like I mentioned before, 1 out of every 3 seniors does not get enough of this nutrient.

And that's a huge problem, because your immune system absolutely **cannot function correctly** without enough of it.

And based on my clinical observations, it's a big part of the reason why seniors face more **immune challenges** than younger adults.

The amazing thing is, this nutrient actually works to support all 3 parts of your immune system…

…it's that powerful…

But it really shines when it comes to **boosting your primary immune response**.

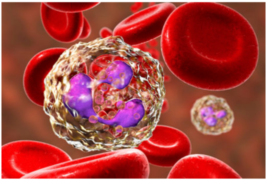
Take a look.

Your immune system is really a bunch of different types of cells that all have specific jobs to do.

You always have these cells in your body…

But when you face an immune challenge, your body kicks into high gear to produce more of the immune cells you need.

One of the most important cells of your primary immune system are called **neutrophils.**



Neutrophils are one of the most abundant immune cells in your body, making up to 70% of your entire immune system…

These important cells are one of the **“first responders”** in your body…

Showing up exactly where you need them, and recruiting other immune cells to help with the job.

You can think of them like your **body’s paramedics**…

They show up first (sometimes within just minutes!) to perform first aid and make sure you get the additional help you need.

But the thing is…

Neutrophils simply **can’t function correctly** without optimal levels of the “immunity upgrade” nutrient I’ve been telling you about.

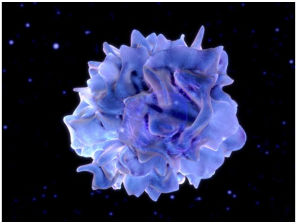
That’s why you need the right amount of it each day, to enhance and support your neutrophils.

Because **weak** neutrophils mean your immune system can’t react as quickly to immune threats.

But **healthy** neutrophils help **you** stay healthy.

But that’s not all...

This amazing nutrient also helps another part of your primary immune system – your **Natural Killer** cells, also known as NK cells.



Your NK cells have an important job to do...

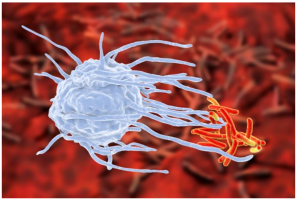
Just like how a **security guard** patrols a building…

…your NK cells constantly circulate through your body, “scanning” for things that don’t belong there, and looking for cells that are no longer healthy.

Once an NK cell spots an unhealthy cell, it does something amazing.

It puts a “hole” in the cell so that other immune molecules can enter and **kill the cell**.

Another type of primary immune cell that relies on this super nutrient is called your **macrophages.**



These cells are like the **garbage trucks** of your immune system…cruising around, engulfing and eating cells that are no longer healthy.

And just like neutrophils, your NK cells and your macrophages have to get enough of the immunity upgrade nutrient in order to function correctly.

Between your neutrophils…your NK cells…and your macrophages, you can see your primary immune system is very complex.

But the one simple thing about it is that all parts of your primary immune system need enough of this one important nutrient.

When those immune cells don't get enough of the nutrient, they **get weak and can't do their job…**

…leaving your health at risk.

In fact, let me show you how potent this senior immunity booster really is, and all the details of the groundbreaking study showing seniors had 5X fewer infections after taking this nutrient...

Researchers recently recruited 50 volunteers aged **55-87**, for a randomized, double-blind placebo-controlled trial.

That's the **gold standard** of scientific testing…

Every day, each person got a clinical dose of either the nutrient or a placebo.

Over the course of a year, they kept track of how healthy they were, taking note of any days they felt "under the weather".

If they did, they saw a nurse who evaluated whether or not they had an infection, including things like fever and the common cold.

At the end of the study, the researchers counted up the number of reported infections between the treatment group and the placebo group…

And they were amazed to see that the seniors who got the treatment had **5X fewer infections** than the poor men and women who took a placebo.

There were only 7 infections in the treatment group…but a whopping 35 in the placebo group.

Not only that, but their inflammation levels were better, too.

It's as if Their Immune Systems Were Working 5x Better After Getting the Right Dose of the Super Nutrient

Imagine what it would mean for you, if you could stay healthier all year long, just like the folks in the study?

How much better you could feel, day in and day out…

With fewer days where you don't feel up to doing the activities you love…

Like taking your morning walk around the neighborhood…

Tackling that woodworking project in the garage…

Or spending the day with your family at your grandkid's birthday party.

Imagine how much **safer and secure** you'd feel, when you go out running errands or shopping for groceries…

Not worrying so much about every surface you touch or person you stand next to in line.

And it doesn't matter whether it's spring, summer, fall or winter…

Because you would know your immune system has the support it needs to keep you healthy **all year long**.

Your neutrophils, your NK cells, your macrophages, and all the powerful cells of your primary immune system are working beautifully.

That's exactly what this amazing nutrient can do for you.

So now you're probably thinking, alright Dr. Inglis, what exactly *is* this superstar "immunity upgrade" nutrient?

It's zinc.

Zinc is the critical mineral you need to have a robust primary immune system.

And it's the mineral that 1 in 3 seniors don't get enough of.

But I'm not talking about just any zinc…

While you may have already heard about zinc before, here's what most people (even doctors!) get wrong:

You need the right form and the right clinical dose, for true immune protection.

Most zinc products out there don't have the right form, and have nowhere near the right dose.

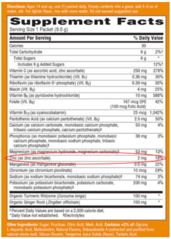
The study showing how zinc can help seniors have 5X fewer infections used a special form of zinc called **zinc gluconate.**

I can almost guarantee if you're taking a multivitamin with zinc or other zinc product right now, it doesn't contain **zinc gluconate**.

In fact, I went to my local pharmacy and picked up popular brands of immune support formulas, just to see.

And much to my dismay, I was right.

They didn't have the form of zinc used in the clinical study!



Directions: Ages 14 and up, one (1) packet daily. Empty contents into a glass, add 4-6 oz of water, stir. For lighter flavor, mix with more water. Do not exceed suggested use.

Supplement Facts

Serving Size 1 Packet (9.0 g)

NO: Milk, Egg, Fish, Crustacean Shellfish, Tree Nuts, Peanuts, Wheat, Soybeans, Artificial Colors or Flavors, Added Sugar or Preservatives

And then you need to make sure you get the right **dose**.

Most products out there contain a measly 11mg of zinc or less.

And while that's better than nothing, the true studied dose of zinc shown to help seniors get 5X fewer infections is **45mg**.

Four times more than what you usually find at the drugstore.

It's critical to get the right dose, because like I mentioned earlier, 1 in 3 seniors don't get enough zinc.

Anything less than 45mg just isn't going to cut it.

Here's the problem—

The clinically studied form - zinc gluconate - is very hard to find in most stores, and I've never seen it at the right dose.

So that's why I decided to do all the legwork for you…

And worked with my team at **BestHealth Nutritionals** to source high-quality, premium zinc gluconate…

…and make it the star ingredient of my immune support formula **ElderWell.**

ElderWell is **brand new**, and is only available directly through **BestHealth Nutritionals.**

BESTHEALTH
NUTRITIONALS

Each dose of **Elderwell** contains the clinically studied dose of **45mg of zinc gluconate**…

ELDERWELL
IMMUNE SUPPORT
+ A DIETARY SUPPLEMENT +
60 TABLETS

So that you can replenish your zinc, upgrade your immune system, and stay **healthier** all year long, just like the men and women in the clinical study.

At this point in our lives, **nothing** may be more important to our health than making sure we have a robust immune system.

And that's why I've been working on **ElderWell** for the past several months.

I Wanted to Make Sure You Have the Exact Nutrients You Need to Stay Healthy Right Now

I know how **frightening** it can be to not know whether your immune system is going to be able to protect you…

To feel on edge and worried about what each trip outside the house may bring.

But I also knew that research shows it's possible to give your immune system extra support…

So you can live your life **confident about your health,** with less worry.

When I set out to create **ElderWell**, I knew the right dose of zinc gluconate would be the star.

But thanks to my 20 years of clinical practice…

I knew there were a few other ingredients I could include that would truly make **ElderWell** the most comprehensive, triple-action immune support formula for seniors.

Because like I mentioned earlier…

You have 3 parts to your immune system…

And you must support **all 3** for complete immune protection.

Zinc is a standout for your **primary** immunity…

But there's another nutrient I uncovered that works like gangbusters for your **secondary** immunity.

That's why I made sure to include…

The ancient berry shown in modern studies to help adults recover from a cold 2X faster.

It's a small, dark purple berry called *Sambucas Nigra*, or more commonly, **Elderberry**.

In 400 BC, Hippocrates referred to the elder tree as his "medicine chest."

In fact, before the invention of modern medicine, elderberry was commonly used by herbalists and healers.

And modern research is confirming it may just be one of nature's most powerful immune boosters.

Researchers looked at *all* of the studies that have been done on Elderberry so far, and found that it's particularly effective at promoting a healthy immune response in the **upper respiratory system.**

This means Elderberry can help you **breathe easy** all year long.

But the reason I love Elderberry for my senior patients, is because **Elderberry can help you feel better, fast…**

With Studies Showing Men and Women Who Took Elderberry Recovered From a Cold 2x Faster Than Taking a Placebo

In one randomized, double-blind, placebo-controlled study, researchers recruited 312 volunteers who were about to take a long-distance international flight.

And if you've ever taken a long flight before, you know just how challenging air travel can be for your immune system!

From being in close quarters with hundreds of other passengers…to breathing in recycled air… your immune system has to work overtime to keep you healthy.

In this study, half of the volunteers were given 600mg of Elderberry extract for the 10 days leading up to their travel…

And 900mg while they were travelling, and for four days afterwards. The other half just got a placebo pill during the same timeframe.

And while both the Elderberry group and the placebo group had a similar number of people who had a cold after travelling…

The Elderberry group recovered from their cold **2X faster** than the placebo group!

That means Elderberry helped these folks get healthier, faster!

Cutting down how long they were sitting on the sidelines or confined to the couch…helping them get back to their daily routine faster.

That's not all…

Elderberry has even been shown to help folks get well during the **winter season**.

In a placebo-controlled study published in the *Journal for International Medical Research*, researchers recruited 60 men and women aged 18-54 during the cold and flu season.

At the start of the study, all of the volunteers reported having the flu. Then, researchers gave half of the study participants Elderberry syrup, and the other half got a placebo syrup.

Four times a day for the next several days, they recorded how **severe** their symptoms were.

And once again, Elderberry worked *fast*…

The men and women who got the active treatment reported feeling healthier **4 days sooner** than the men and women who got the placebo!

The men and women who were given elderberry reported the highest level of improvement in just 3-4 days…

While the placebo group didn't report a high level of improvement until days 7 or 8.

The folks who got the Elderberry syrup had **fewer aches and pains**, could **breathe better**, and even reported getting **better sleep**.

The Elderberry group also used less cold and flu medications than the placebo group.

Whether you're going on vacation or going to church, Elderberry can help support a healthy immune system.

The reason why it is so effective is pretty impressive…

In the Middle Ages, folks believed Elderberry could help ward off evil spirits…

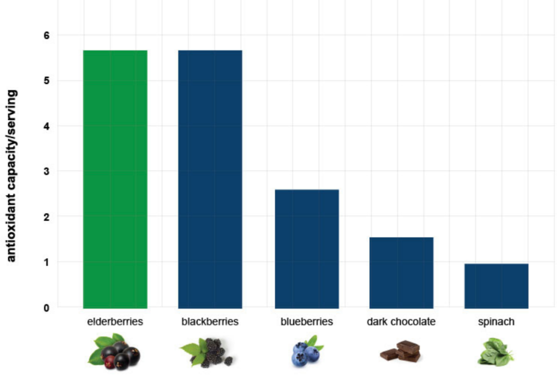
But now we know Elderberry works by "warding off" threats of a different kind…

Because it's so effective at promoting a healthy immune response to daily threats and stressors on your body.

You see, Elderberry contains special compounds called **anthocyanins**…

And the anthocyanins make Elderberries one of the strongest antioxidants ever studied…

It even rivals blackberries, which had the strongest antioxidants out of **over 1,000 foods** tested by the U.S Department of Agriculture.



The anthocyanins in Elderberry have been shown to work in two ways.

In vitro studies show the anthocyanins in elderberry can directly kill bacteria pathogens and flu viruses.

But Elderberry does more than just that…

It also helps improve your **secondary** immune function.

Remember earlier, when I said you actually have three parts to your immune system?

Zinc works on your **primary** immune response…

And Elderberry works on your **secondary** immune response.

The secondary immune system is how your body **"fine tunes"** its immune response…so you stay healthy year after year.

Elderberry has been shown in a scientific study to promote the action of specific secondary immune cells like **IL-6, IL-8 and TNF.**

TNF cells in particular, may be especially important for keeping a **healthy respiratory system**.

And may be the reason why Elderberry has been shown to help people recover from a cold 2X faster.

Researchers aren't quite sure exactly how Elderberry helps these cells…

…but they think it may be due to its high anthocyanin content, making it a strong antioxidant that helps your secondary immune cells function better.

But the Clinical Evidence Is Clear as Day: It Just Plain Works

That's why I knew it would be the perfect partner to zinc, in my **ElderWell** formula designed to help support a healthy immune system.

Remember, Zinc was shown in one study to reduce the rate of infections **by 5X**…

And **elderberry** has been shown in another study to help adults recover from a cold **2X faster**.

It just makes perfect sense.

But because I wanted to make sure **ElderWell** is the most **comprehensive immune support formula** you can take…

I made sure to include a perfect dose of the most **well-known immune-boosting vitamin**…

None other than good old **vitamin C.**

While vitamin C may not seem exciting, there's just no denying how important it is for your immune system….

And the fact is, despite vitamin C being so popular, it's actually the 4th leading **nutrient deficiency** in the U.S.

Just like zinc, seniors especially are at risk of not getting enough vitamin C.

And that's very bad news for your immune system.

Vitamin C supports both parts of your immune system that I've mentioned so far—

Your **primary** immune system…

And your **secondary** immune system.

But vitamin C has another trick up its sleeve.

This amazing little vitamin also helps maintain the third- and often overlooked- part of your immune system – **your barrier immunity.**

Most people don't think of their skin as being part of their immune system, but the truth is that the skin does more than just cover your bones and organs…

It acts like a barrier to everything outside your body.

Just like a **high fence around a castle**…

Your skin keeps things out of your body that do not belong there.

It's also a first line of defense against oxidative stress that can weaken our bodies.

Studies show that when people are given vitamin C, it accumulates in skin cells, and lowers the amount of oxidative damage happening in your skin.

And less oxidative damage means your body stays **stronger and healthier.**

Vitamin C also supports respiratory health in seniors.

A randomized, placebo-controlled study on 57 seniors with a respiratory infection, found that when they were given 200mg of vitamin C per day in combination with antibiotics, their respiratory function improved in just 2 weeks, and kept getting better after 4 weeks.

That means they could **breathe easier,** with less congestion and coughing.

The placebo group, however, started feeling better at 2 weeks, but then *got worse* by week 4.

That's why I made sure to include vitamin C in my **ElderWell** formula, to support respiratory health.

From its ability to improve all 3 parts of your immune system – including your barrier immunity – to improving respiratory function in seniors…

…any immune formula without a solid 200mg of vitamin C would be incomplete.

And that's exactly what I included in **ElderWell.**

Elderwell Is My Triple-Action Immune Support Formula That Covers All 3 Parts of Your Immune System…

And gives you my recommended daily doses of the nutrients seniors are most likely to be deficient in.

The clinically studied dose and form of **45mg of zinc gluconate**, to support your primary immune system…

300mg Elderberry fruit extract, to increase your secondary immune system…

Plus, **200mg of the essential vitamin C,** to support your barrier immunity, and **support healthy respiratory function.**

I also included 3mg of **copper**, an essential nutrient that should be taken along with zinc.

With these four ingredients alone, **Elderwell** is the most comprehensive formula I would ever recommend to my senior patients.

But I didn't stop there.

During my research, I came across an herb from the Far East that is proving itself to be the **Next Big Thing** in immune support.

That's because not only has it been shown to help keep you healthier, but it can also **help balance inflammation** in the body.

Too much inflammation is the reason why you feel tired, have a headache, or feel achy sometimes.

But in vitro studies show this incredible herb can help **promote a healthy inflammatory response** in the body…

Calming down excess inflammation.

It does this by reducing inflammatory cells called **T cells and cytokines.**

Fewer T cells and cytokines = less inflammation. And less inflammation means you feel better.

It also may have a preventative effect, as well.

A study on 107 college students found that taking just 25mg per day helped reduce the rate of the common cold by 2X, compared to taking a placebo after two months.

So what is this herb?

It's called ***Andrographis paniculata.***

It looks like a common weed you might find in the woods…

But it holds unrivaled power to balance inflammation in the body, and keep you healthy.

I sourced a special, branded form of *Andrographis* that concentrates the active ingredient...

And included the perfect 25mg dose in my **ElderWell** formula…

The same dose clinically shown to help young adults have 2X fewer colds…

Making Elderwell the Most Complete Immune Formula I've Ever Seen

Including…

Zinc gluconate, the immunity upgrade nutrient shown to support your primary immune system…

Elderberry fruit extract, to increase your secondary immune system…

Vitamin C, to support your barrier immunity, and **support healthy respiratory function…**

A small dose of **copper**, to go along with **zinc**…

And ***andrographis paniculata*** extract, to help balance inflammation in your body and help keep you healthy.

Sure, you could grab a generic immune formula off the pharmacy shelf…

But I can practically guarantee it won't contain the right doses or forms of zinc, elderberry, or vitamin C…

And *Andrographis* is so new, you'll never find it at the pharmacy.

So anything you find at your pharmacy might leave your immune system **vulnerable.**

Plus, you're taking a gamble with the quality of the products you find there.

Here at **BestHealth Nutritionals**, we only work with a network of manufacturers that have third party certification for meeting or exceeding **FDA's good manufacturing requirements**.

Every ingredient in **ElderWell** is tested for identity and purity before it goes into production…

And every batch is tested to ensure it's **pure**, **potent**, and contains **exactly** what it says it does.

Plus, our quality team **hand inspects** bottles from each batch and reviews all test results before we accept the shipments to our temperature-controlled warehouse.

That means you can rest easy knowing you're getting a product that is **premium quality**.

That's how we do business, and I wouldn't have it any other way.

In a minute, you'll see a button appear below this presentation that will take you to our secure reservation page.

All you need to do is fill out your information, and we'll get to work packaging your shipment and getting it sent straight to your doorstep.

When your package arrives, I want you to take it into your kitchen and open your first bottle of **ElderWell.**

Take the small capsules with some water or the drink of your choice.

Right away, the ingredients will go to work…

Improving your primary and secondary immune systems…

Your barrier immunity…

And balancing inflammation in your body.

After a few weeks go by, you start to notice some changes...

You wake up feeling fresh and energized…strong…

Stretching your arms above your head, you feel a deep, soothing pull in your muscles, getting warmed up to start your day.

Walking into your kitchen, you smell fresh, strong coffee brewing, and you begin to make some plans for your day.

Maybe you'll start with doing some work in your yard, getting new seeds planted or weeds pulled…

Feeling and smelling the earth and the warm sun on your back.

Then you'll call up a friend to meet for lunch at your favorite spot.

Why not?

You Feel Healthy…Confident…Like Your Immune System Is Armed and Ready to Protect You

You opt for a fresh salad with grilled chicken, or maybe a zesty crab cake, broiled to perfection.

After lunch, you think about how good it feels to get out of the house and be out and about…

To spend time reminiscing, chatting, and laughing with your friend…

Enjoying life.

You swing by the grocery store to pick up a few ingredients for dinner, planning something extra special for your spouse.

Then give your son or daughter a call, to see if they want to bring the grandkids over this weekend.

You can't wait to see them, you can practically feel their little bodies in your arms when you give them each a big hug.

Maybe you'll bake some warm, chocolate chip cookies with them.

It's the good life.

You're not worried about a darn thing.

That's exactly how it can feel when your immune system is firing on all cylinders.

You just feel…good. Heathy and energized.

Ready to take on each day, no matter what comes your way.

That's what **ElderWell** can do for you.

Whether it's being in close quarters during the winter…

Or getting together for a big family reunion in the summer…

With **ElderWell,** you'll have triple-action immune support to keep you healthy all year long.

Plus, you have an unlimited satisfaction guarantee when you try **ElderWell** today.

100%
GUARANTEED

That means you can try **ElderWell** for as long as you like –

Two weeks, two months, two years, or longer…

And if you aren't 100% satisfied for any reason, you can send back any unopened bottles for a **full refund**.

That's right. You don't even need to give us a reason.

You can get a **full, 100% refund** at any time.

That's because I'm so confident that you're going to be healthier than ever, when you take **ElderWell.**

Each ingredient was carefully selected due to its unparalleled clinical research…

Targeting the exact nutrients seniors need for full-spectrum immune support.

Zinc, the immunity upgrade nutrient to support your primary immune system and shown in a study to help seniors have 5X fewer infections.

Elderberry extract to enhance your secondary immune system and shown in a study to help folks recover from a cold 2X faster…

Vitamin C to reduce the oxidative stress that can wear you down, support healthy respiratory function, and increase your barrier immunity…

Plus, ***andrographis*** to balance inflammation in your body, and help keep you healthy all year long…

I guarantee **ElderWell** contains exactly what you need to stay healthy this season...

Or you can get your money back.

But do note: **ElderWell** is brand new and is only available directly through **BestHealth Nutritionals**.

We have a limited supply and I expect that we'll sell out quickly, like we have in the past.

If you're seeing this page, it means we should have some stock left, but I guarantee it won't last long.

So go ahead and click the button below now to be taken to our secure order page where you can reserve your risk-free supply of **ElderWell…**

…and give your immune system the stronger support it needs.

Don't wait. Click the button below to secure your supply now while we still have stock.

For BestHealth Nutritionals, I'm Dr. Alan Inglis, M.D. Thank you for spending this time with me today.

Yes! I want to try ElderWell today RISK-FREE.
