In An Amazing Study... Spice Herb Helped Activate Men's "Erection Chemical"...

IN THIS PRESENTATION: Scientists uncover exactly what you need for a rock-hard erection, even if you're over 50. Small studies on man-revealed how they reported hardness increasing almost 40%, stamina 54%, and sexual satisfaction 100%.

Hi, I'm Elizabeth, and what I'm holding in my hands right now, could make you hard as a rock...

...and I'm going to share it with you.

I understand I'm being a little forward right now. It might be embarrassing to have a conversation like this with a total stranger.

So, you can't be "Mean" before this video is over.

...and never discover what I'm holding.

It's an item that's probably sitting in your kitchen now & slowly stirred that, in just 3 hours, it helped release a powerful chemical in participants bodies...

...that helps you to have hard, long-lasting erections.

The kind of erections that women crave

...and that **are absolutely need for you to truly satisfy us in the bedroom**.

Like I said, this herb has been is sitting in the pantry of almost every right now and I'm going to show you what it is. But there not an...

...but, I'm going to share with the secret men used in a small scientific study to help increase their **hardness** & sexual skills.

Stamina 54%...

...and sexual satisfaction 100%.

ALL of these results were reported by men in a real scientific study.

Hit able to share this with you today, because of a recently recovered medical expert Dr. Ram Inglis, MD.

Dr. Inglis is part of an elite group of physicians to achieve **Diplomate status** in the American Board of Anti-Aging.

He's studied everything from cardiology at the world-famous Mayo Clinic, to alternative medicine, and is one of the oldest universities in Europe.

He's also been involved in the preparation of doctors as a clinical instructor at the University of Massachusetts.

For ten decades, patients from across America have trekked to Dr. Inglis' renowned clinic in Western Massachusetts to get **hard as a rock** & **last longer in bed**.

Along the way, Dr. Inglis has developed hundreds of breakthrough protocols to help seniors live healthier lives. But his most exciting protocol for men, is one he's about to discover today.

Like how some men increased **hardness** almost 40%...

Stamina 54%...

Sexual satisfaction 100%...

And even how some men in a small study used a certain solution and reported more comfortable penis...

Improved stamina...

More energy...

A better mood...

...and drove up their libido.

Dr. Inglis is also interested in helping fat or bulldozer up your bicep muscles, additional science shows this herb could help with that too...

Now, I want to make one thing very clear...

ALL of these results come straight from scientific studies on REAL men.

This isn't hype, exaggeration, or wishful thinking

These are measured, real results from real just like you.

And it all starts with activating the "erection chemical" in just 3 hours - just like what was shown in a small study. Dr. Inglis and his team at Massachusetts Universities Like I said before, it seems so it is Bad that could be hiding in your kitchen.

So, let's dive into exactly what this scientific breakthrough is, right now.

Imagine these 2 things for a moment:

You're naked in bed with your wife. Things have gotten very hot...

...and you can feel that she's ready for you. But there's a problem.

You don't feel as turned on **down there as you used to**...

You feel panic set in...

Should you make an excuse and cut things short?

Maybe fly to Rome yourself into the moon?

Is your wife going to put up with this disappointment?

Okay, enough of that. Let's consider scenario #2.

Same bed. Same wife. But this time, you're starting to go **like a** teenager who's been apart from his girlfriend for a month...

...and after a long, **long** night of pleasure, you both hold each other in your arms, glistening from sweat.

Now, what makes the difference between these 2 scenarios?

Dr. Inglis discovered the answer in a study at the Harvard University Hospital, Albert Einstein College of Medicine and Massachusetts Universities. It's related to a certain chemical:

...that plays an important role in a man's ability to have an **iron-hard erection**.

It's like the erection "ON Switch"

When this chemical gets activated... **and it does**...

A full, thick erection is unstoppable.

Remember what it was like when you were 18? This switch flipped ON during the day so much, it was almost a little **annoying**.

That's how powerful this chemical is.

Now, this is very important:

According to research investigated by Dr. Inglis, this chemical is NOT in the environment. It's not in a pill. You can't buy it for any price and your doctor can't give it to you.

Well, the solution is a bit tricky.

The first step is to really re-activate this chemical, and **make it work again**...

...and that's where the **food that's hiding in your kitchen right now** comes in...

It helps activate this powerful chemical... and in a study it was shown to work in just 3 hours.

Dr. Inglis and his team at Massachusetts University found that it helped men get **harder and stronger** in just 3 hours.

Okay, so what is this chemical?

It's nitric oxide.

Perhaps you've heard of nitric oxide before...

...especially from 3 American scientists won the prestigious Nobel Prize for its discovery.

To date, over 130,000 research studies have been performed on nitric oxide.

It works by literally *opening up the floodgates for your erection*

Nitric oxide gives the "Go" signal to your **lower** blood flow...

...and when your blood flow increases... you can imagine the rest.

Imagine you must properly boost your nitric oxide. When you do, you can enjoy breathless pleasure...

...but when you don't properly boost nitric oxide, you could be disappointed.

You might have tried other products that promised to enhance your bedroom performance, and claimed they could raise your nitric oxide.

Here's the problem:

You need a **special key** to activate your nitric oxide...

...and it's not the kind of key you hold in your hands. Instead, it's a key that's hidden in your **genes**.

...and scientists discovered exactly what this certain enzyme is.

They found that **food** helps activate nitric oxide. This recipe is called "nitric oxide synthase" or NOS, for short.

Okay, let's pull all the brighter pieces together: you want to discover how to enjoy rock-hard erections even if you're in your Golden Years... and how it starts with eating this certain food.

The key to rock-hard erections is activating nitric oxide

...and the key is activating nitric oxide in the enzyme called NOS...

...and guess what this key is in activating NOS?

It's eating this certain food, because it contains the NOS-activating nutrient.

That's right. And specifically, the nutrient inside starts the erection chain reaction.

And once you get this chain reaction going... the ride gets more and more with

That's because arrival research from Johns Hopkins shows when nitric oxide gets released... **it triggers a cascade of other powerful nitric oxide molecules**... which means more blood flow...

...which used to deliver a stronger, long-lasting erection.

...and the answer is hidden in this particular food.

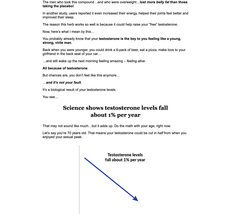
When researchers tested this food on volunteers, their nitric oxide levels increased 250% in just 1 hours. By day 4, a series of 30-70% men and women, going from an average of 7.7 to an average of 9.75.

Now, this food... their nitric oxide levels were **a staggering 910% higher**, going from 2.7 all the way to 27.6.

This wasn't temporary, either. As long as they kept getting the nutrient every day, they maintained their **potent levels** for a whole week, the entire study lasted.

So, what is the nutrient that helps activate NOS and starts this nitric oxide chain reaction?

Here's the photo of again:



It's garlic... which is rich in a nutrient called allicin.

Many before you start cracking up while cloves of garlic and eating them by the spoonful, there is a little bad news...

1. The research showing garlic, which contains allicin, helped increase NOS enzyme... used a dose of 2 grams per day.

2. Almost everyone hated the cooking garlic, like when you put extra into a recipe or on a pizza. Many reported the smelling problem.

Now, with these kind of nitric oxide-raising results, I understand perfectly if you're still willing to chew on 2 grams of garlic per day, and plunging your spouse doesn't mind how you smell...

...but the great news is, **you don't need to do this**.

Dr. Inglis and his team found a way to get the same **powerful benefits of garlic**, without eating clove on each meal or even smelling like it.

Instead, they found a stronger, long-lasting version, distilled to the form with the active ingredient that, in study, received an nitric oxide boost 250% and 910% in just 3 hours.

...and Dr. Inglis made this extract the star ingredient in his breakthrough formula **Powermax™** - the best solution I've ever seen for men who want to perform better in the bedroom.

And it's **only available directly through the organization. Beware** of other sites that claim to be Powermax, they're quickly selling

But there's one thing. You see...

Powermax is much more than a nitric oxide-booster

You see, from Dr. Inglis' 20+ year experience helping men, he knows something else you need... to truly **last** and **last** and **last** increasing your nitric oxide.

Yes, nitric oxide is fantastic for your erections...

...but there's another ingredient that's critical to your **sexual vitality**... and have a body that could **last** for **days**, and **younger**.

You need something more.

Now, let me tell you a secret about...

Soothing joint pain from overexerted joints...

Improving stamina...

Increasing energy...

Improving mood...

Enlarging lungs muscles...

...and driving up libido...

If you're interested in any of that, another ingredient is needed. The exciting news is, every herbal you just heard...

...were results reported by REAL men in scientific studies.

They're studies on a different ingredient...

...and it's another **major** factor you need for a **powerful erection and an absolutely wild sex life**... and it's called **Tribulus Terrestris** herb.

Let me explain:

It's a certain herb found deep in the forests of Malaysia.

The locals have lived this herb up great power for generations sexual and... modern science is showing **this** herb is the real deal.

In a clinical study on 50 men aged 31-50, they were given this herb for 21 days...

...and when they were quizzed, they admitted **they were much more satisfied with their sex life.**

The men confirmed this compound *improved their libido*

Then, scientists conducted a randomized, double-blind, placebo-controlled, parallel group study. They did everything they could to show this **herb** was **method** for men...

...and they got more than they bargained for.

Not, the men's sex drive went up and their erections strengthened. But something else happened to them...

They felt as if they'd conquered... and who were overweight... **had more belly fat than those who weren't.**

In another study, users reported it even increased their energy, helped their joints feel better and improved their sleep.

The reason this herb works so well is because it could help raise your "free" testosterone.

Now, here's what I mean by this...

You probably already know that your **testosterone is the key to you feeling like a young, strong, virile man**.

Back when you were younger, you could drink a 6-pack of beer, eat a pizza, make love to your wife twice, and still be up and ready for work.

...and still wake up the next morning feeling amazing — feeling alive.

All because of testosterone.

But chances are, you don't feel like this anymore.

...and it's not your fault.

It's a biological result of your testosterone levels.

You see...

Science shows testosterone levels fall about 1% per year

That may not sound like much... but it adds up. Do the math with your age, right now.

Let's say you're 70 years old. That means your testosterone could be a full 50% lower than you enjoyed at your peak.

It gets worse...

Keep in you to have some testosterone, it's often "bound" by another hormone. Basically, it's like your remaining testosterone gets handcuffed and locked away.

It doesn't help you anymore.

Only the leftovers helps boost your levels of FREE testosterone. This means it does more than your testosterone levels.

It helps increase the amount of testosterone your body can actually use, so it could build your muscles stronger... stamp on your sex drive... and help you perform in the bedroom.

In fact, this herb is so powerful, in the study I mentioned before, up to 91% of the men who used it reported improved libido.

Isn't what the science shows. Even heard of a male powerful is solution getting results like that? Remember... **Powermax is different**...

...and we've introduced a FULL DOSE of this herb - which is called Tribulus - in our formula.

Actually, we've done even better...

So, new scientists also been combining this potent Tribulus herb with a powerful antioxidant. It's an ingredient, the scientists used in vitro research to discover for DRAG antioxidant rating is 1,000 times more powerful than even vitamins or vitamin E.

See for yourself

And guess what?

This powerful combination was like sending rocket fuel to sexual performance into overdrive...

Using a grading scale, the men reported their erections were 39% harder...

...and their bedroom stamina by increased by 54%.

Overall, their sexual satisfaction increased by an amazing 100%.

All I can say is...

Be careful when you use this combination

Because, after sandbagging the distributors, Dr Inglis decided to include this combination in his formula.

So, if you think this is too much for you, now is the time to say, "No" to this...

But, if you're a "Yes" or even a "Maybe", you need to know...

Powermax is finally ready.

With **Powermax**, you could get back your game in the bedroom...

Take a moment and imagine how your wife is going to look at you... and how your friends and family's go to her... when you surprise her with your newfound hardness and stamina...

...and imagine how much more effectively your women is going to be... how much better she's going to treat you... and how much she's going to make you feel like a real alpha male!

And if you're a woman... get ready for your man to be doing life to get very hot!

Because, let's face it, beautiful women crave a man who's enough to be sophisticated... who's strong enough to be a real man... who's hard as a rock.

Don't be surprised if you start getting more dates than you can schedule.

This could be your future, as long as you have Powermax

Here's the complete breakdown of the groundbreaking sexual enhancer for men:

You get 2000 mg per a full 2000 mg of Garlic-NOSEO Powder (with 5.0 mg of allicin and 200 mg of allicin) which helped men up nitric oxide levels in just 3 hours in one study...

This formula also includes 200 mg of patented Tribulus at called LJ1008...

...the **testosterone booster** that was shown in a study to help men's libido increase 91%...

...and 100mg of **Polyphenol** extract...

...which, when combined with Tribulus at, was shown in a small scientific study to help increase sexual satisfaction 100% and improve stamina and energy 54%.

Dr. Inglis worked with his team of Best Health Nutritionists to combine this complete formula into a single, convenient tablet.

Now, with **Powermax's** combined sexual enhancement formula...

Your body will have what it needs to enjoy breathtaking nights of *pleasure over and over again*
