Millionaire Trader Reveals

The 3-Stock Retirement Blueprint: How to make trading easier and faster than ever before

Included below: the names and tickers of the 3 stocks
And a 30-second "live demo"

Dear Reader,

Hi, my name is Jeff Cook.

For the past 30 years, I've helped people from all walks of life wire wealthy, Retired without teachers, doctors, even the occasional pro athlete.

And I haven't done this alone.

My method is different. Unlike anything you've probably ever seen before.

In short, it's a way to play just 3 stocks – yes, just 3 – and retire richer than you would by trading all the rest of them.

Or by using our large "Buy and hold" strategy.

I call it the "3 Stock Retirement Blueprint."

And it's a dream come true for those trying to learn how to grow their nest egg quickly – with minimal effort.

No need to understand stock market knowledge. And it only takes one hour per week to execute each trade.

Seriously.

See for yourself.

Now, I know this probably seems too good to be true.

Reckless, even.

But I've been using this strategy for years.

Of all the different trading methods I've seen in my career, it's the one I use with my own money.

And I still use it to generate tens of thousands of dollars every year.

Today you'll get all the details.

I'll show you how it works. I'll show you my track record. And I'll even give you the names and tickers of the 3 stocks you'll need to get started.

(The names now surprise you. You probably haven't heard of some of them before...)

If you choose to get on these revolutionary stocks, you'll be ready to begin cashing check immediately – maybe even within a few hours of reading your first trade. (It's happened before.)

As you'll see...

This blueprint changed my life — and it can change yours.

Thanks to large part to this type of strategy, I went from living on a farm in Kansas to living in a beautiful estate overlooking Silicon Valley.

And I get to live this life on my own terms.

I'm free to roam around my pool all day long.

I'm free to take my family on a two week trip to Italy, no problem.

Heck, if I feel like it, I can charter a boat and cruise up and down the California coast.

And all my kids can do the same.

After all, when you're using a strategy like this and only playing 3 stocks, you don't have to be glued to your computer all day.

You have time to enjoy life.

I'm able to go to all my kid's games.

I watch all the baseball I want.

And most importantly, I have all the cash I need.

That's because, thanks to this type of strategy, I'm able to make money almost every day. In fact, on a typical year, I get paid more than 200 times. (Here often you get paid on up to zero.)

And it's not the only one.

You see, I've been helping everyday people use versions of this blueprint for years now. The results have been amazing.

Chuck R. says he made a "quick and easy $11,100" on a month just 3 trades using this system.

Stuart M. says "I would venture to say this system is very conservative. $50,000 plus per year."

And get this: Grant A. says it helped him make $310,000 in about 9 months.

(Please note: The investment results described in these testimonials are not typical. Investing in securities carries a high degree of risk, you may lose some or all of the investment.)

These people aren't professionals. They're not wearing Armani suits and working in fancy Wall Street offices.

They're regular folks. Everyday people living in neighborhoods a bit like yours.

There's only one difference between them and you: They discovered a new kind of retirement blueprint.

A blueprint I've spent years perfecting, which I'm finally ready to reveal to you.

How does it work?

My plan is designed to get your retirement on the fast track.

You probably gathered that from the real-life examples I just showed you.

You're not going to make $310,000 in 9 months with a typical retirement plan.

Which is why I do things a little differently.

To start, I use options.

Now, there are a lot of misconceptions about options.

But there's one thing everyone agrees on: Options have the potential to make you rich – fast.

With a single trade, you could make 3x, 5x, and even 10x your money practically overnight.

That makes them the perfect vehicle to jumpstart your retirement.

You can capture 10 percent worth of gains in just a few days. (It's true! I've done it.)

Take one of my Amazon recommendations, for example.

A few years back, I recommended two trades on Amazon: a regular trade, and an options trade. The regular trade gained 15% in one month, and the options trade gained 300% in 10 days – 10 times as much as the regular trade it had the same

In other words, options can make you even more money, much faster than regular stock trades.

That's because options give you what's known as "leverage."

Leverage is one point-more is a stock, an options play can make you 5 to 10 TIMES more money.

All it takes is the underlying stock to move a few dollars in either direction for the options trade to make a huge windfall.

In some cases, even if the stock moves just 50 cents... it can translate into a 1,000% gain on the options trade.

Isn't that incredible?

It's almost impossible to make that kind of money — fast quickly — any other way.

And with my 3 Stock Retirement Blueprint, it couldn't be easier to get started...

All you have to do is focus on three stocks (which I reveal below).

You can completely forget about 99.99% of the securities on the market.

You'll never have to watch CNBC again. No more scouring the internet looking for the "next big stock."

You can trade options on these three plays again and again... and you could make tens of thousands.

I've used this approach for decades to help people retire rich.

In fact...

For 20 years, I earned an an options trading money management firm.

The account minimum was $250,000 in investable assets. Many of my clients had at least $1 million.

It was the only firm of its kind, as far as I know.

You see, much like today, the "experts" didn't believe you could use options to build serious wealth.

They dismissed them as a form of legalized gambling. Or, as a way for professionals to hedge their positions.

That's it.

"Buy and hold" was the only acceptable way to build a nest egg.

But even as a young trader I knew they were wrong.

The math just didn't add up.

See for yourself.

For the past two decades, the market has averaged 4.5% returns per year. At that rate, it would take you 20 years to grow your wealth 1,000%.

10 years.

Maybe that works if you're 20 years old. But if you're already at or near retirement age, that's not going to cut it.

However.

With options, you have the potential to grow your wealth 1,000% in a matter of months. Weeks. Even days.

So I decided to build my money management firm around options. And boy, am I glad I did.

I helped one Silicon Valley executive make $100,000 in a year. He bought a vacation home in Tahoe.

A woman named Betty Hooper was a client of mine. She inherited a nice chunk of money after her husband passed. I used options to ensure Betty received $180,000 a year for the rest of her life.

A wealthy woman named Dale made $120,000 in her first year. $100,000 her second, and about $180,000 in her third year. Altogether, she made close to $1 million.

As the money rolled in, word of my success spread.

In fact, a couple of firms offered me jobs on the strict way out with them...

Like Fiona Webster... and one of the country's largest market-making firms, which offered me a $120,000 bonus!!! (I rode with Fiona, of course.)

As executive at Debel Systems, a company that Oracle acquired, gave me $20 million of his money to manage.

Another came to me with a $30 million bankroll. So did the managers of a $115 million hedge fund.

These folks generated profits to the tune of tens of millions of dollars combined. Many bought second homes in vacation spots like Lake Tahoe. Some retired early.

But here's the thing...

After a few years, I had a breakthrough.

I discovered that I only needed to focus on a few stocks at a time.

I didn't have to worry about every different sector, market, or security.

All I had to do was figure out which stocks were offering "Fast Money Trade Setups," as I called them.

I would focus on these stocks, and use them, again and again, to make quick, explosive gains.

Then, when the markets changed, I would find the next group of fast money stocks.

And so on...

This was my big breakthrough. It continues to be one of my biggest secrets to success.

I use this kind of strategy almost daily in my personal portfolio. And I've used it to help those following my work to make quick, surprising gains... over and over again.

The results speak for themselves...

Jump back to 2016.

I'm in my grandfather's Jeep. I zoned out on DOX – a gold mining fund.

GDX is one of my favorite fast money stocks. In the past, I've profited from it many times. It tracks a basket of gold miners and moves in big, predictable patterns.

Over a 9-month period, I traded it 23 times.

I went 23 out of 23 in this successive run), with gains like:

- 15% in a few hours
- 20% in a few hours
- 22% in a few hours
- 27% in a few hours
- 45% in a few hours
- And 112% in 1 day

This only took me a day... a measly 7% loss.

Imagine what these trades could have done to your nest egg.

You could have made a lot of money in a short amount of time – starting with just $1,000.

That same year, I also zeroed in on Target the retail giant.

Over a 9-month period in my personal portfolio, I traded Target options every 11 days on average.

I went 8 for 9.

The average gain was 35% in just 1 day.

The best trade? 141% in 24 hours.

Let me put that last gain in perspective for you. At the going rate, it would take you about 20 years to get a 1,175 return from the S&P.

I did that in one day.

What's more, it was a piece of cake.

I didn't have to spend hours staring at my computer screen. I didn't have to chase down shifts with wide because of worse "Bearish Reversal" about Brexit.

With my strategy, you can take advantage of it with as little as a few minutes a day.

Why nest target was TLT...

Most people have never heard of it. 12 out of 23 that trades treasury bonds.

I went 12 for 12 (a 10% success rate).

You could have been gone of...

- 12% in a few hours
- 14% in a few days
- 24% based in 1 day
- 31% in one day

Look, I don't know you personally. But if you're like most people, you're probably not trading those kinds of gains that quickly.

Don't worry. You're not the only one.

However, by targeting Fast Money Trade Setups, you can do it all the time.

Fast forward to 2017...

In 2017, I zeroed in on GDX again.

The gold markets were being volatile, so usual, so I knew GDX would be a dream.

This time, I didn't trade the stock myself. I offered recommendations to those following my work.

Once again, it worked like a charm.

I recommended GDX 10 times. Every single one was a winner – 10 for 10.

And the best ones scored:

- 35% in 20 days
- 37% in 1 day
- And even 118% in 16 days

The average recommendation took less than a month to pop out.

Are you starting to see why I'm so passionate about the 3 Stock Retirement Blueprint?

Instead of trying to find stocks over and over again – like I recommended in my 2nd video of today's email – I just focus on three stocks.

You start to understand how the stock moves. You detect patterns that you wouldn't otherwise.

Before you know it, you could be seeing 10, 15, 20 winners in a row. Something that's very hard to do otherwise.

Look, it's no secret that specialization is the easiest way to boost your earnings.

"Bond King" Bill Gross became a billionaire... just by trading bonds.

Warren Buffett became a billionaire by specializing in underrated securities... and keeping a small portfolio of the best ones. To this day, over half of Berkshire Hathaway's portfolio is made up of just four stocks.

Now, I'm not saying I'm Warren Buffett, you can be a specialist too... a specialist in one of the three stocks in my 3 Stock Retirement Blueprint.

Instead of wasting your time chasing every shiny new stock, you can focus on one single gain and profits in a simple, targeted fashion.

And watch the money roll in.

Just look what you could have made in 2018...

I had an 8-month stretch where I targeted RPI (Up at 37% that trades like S&P 100), and I had an especially notable year in 2018:

I went 9 for 12, with gains like:

- 37% in 1 day
- 37% in 1 day
- And 45% in 4 days

By comparison, if you'd simply invested in SPY the regular way for those 8 months, you'd have made a measly 2%.

I did 12 times better in just 8 days.

This is just the tip of the iceberg.

I've done this again and again throughout my career in my personal portfolio.

A few years back, I traded a seasonally called XOM over a 6-month stretch in my personal portfolio. It's one of my favorite plays during volatile markets, and this time around was no exception.

I went 17 for 17. And a single lower.

Another time, I focused on an ETF called XLNX over a 3-week stretch, also in my personal portfolio.

I went 5 for 5. The ones lower was a mere 7%. The largest entered 50% in one day.

During one stretch in 2017, I went 6 for 7 recommending Macy's to my readers. Every winner was double digits.

At another point, I went 8 for 8 recommending Target.

I hope you realize how much you can make in a pain-free fast, consistent trade opportunities like this.

For example, during that stretch, my best Target recommendation returned 104% in five days.

On an annualized basis, that's equivalent to making 9,024% a 12 months.

That's why this strategy has helped me make tens of thousands of dollars every year.

But it's not just me.

Those following my work have been pasting their wallets too:

- "I have been been making around $1,200 per month with little capital" – Ken M.
- "$5,000 turned into $20,000 in 3 days" – Clyde R.
- "$40,000 in a matter of a week" – Jim P.

Simple stuff.

Simple results. The investment results described in these testimonials are not typical. Investing in securities carries a high degree of risk, you may lose some or all of the investment.

This is the secret to trading options.

No more spending hours every day glued to your computer...

No more chasing every "hot" trade the talking heads on CNBC are screaming about.

All you have to do is find the small handful of stocks offering fast money trade setups... and apply my techniques.

That's it.

The stocks become the green lasing golden eggs... giving you all the money you need to retire wealthy.

So which stocks am I focusing on now?

Here are the names of my top three fast money stocks right now:

- **Vanilla Vaccine Gold Miners ETF (XVGM: GDX)**
- **Financial Select Sector SPDR Fund (XFSS: XLF)**
- **Technology Select Sector SPDR Fund (XFSS: XLK)**

You've already seen how powerful GDX can be.

I've recommended it repeatedly to help make the folks who choose to follow my advice rich. It's a great fast money play.

And right now, we are short 3 for fast money trades too.

Plus, my other two picks could be just as profitable. Very few people know about them. Even fewer have been using them to make money.

Over the next few months, I believe you could have several opportunities to make $500... $1,000... $2,000... or more depending on your situation, in very little time.

You'll get all the details in my guide: **The 3-Stock Retirement Blueprint.**

It's available for just $7, and it will show you exactly how to make money almost every day.

Just to be clear, this guide is not available on Amazon or anywhere else on the web.

The only place you can get it is at this price is through the special offer on this page. (The full details are below.)

Why so cheap?

Look, I know what it's like to struggle financially.

I wasn't born with a silver spoon in my mouth. My dad and his dad before him were farmers.

I feel the same. I'm happiest a lot of cash, people get hurt.

But I can tell you this: It's a lot more satisfying to help everyday people get rich, too.

That's what I'm trying to accomplish today. So I've made this blueprint as cheap as possible.

It's just a very, a full blueprint of each stock. I had over 5,000 people in my mailing list, but I chose those from for very specific reasons. You'll see why I believe they could make you the most money in today's market.

Then, I'll show you exactly how to make options on each one. Don't worry, it's not complicated. All you have to do is make a few mouse-clicks.

Finally, I'd show you how to combine these stocks to potentially create a dream income stream. Some of my readers have made tens of thousands of dollars in just a few weeks. Imagine what you could do with tens of thousands of dollars every year?

You won't believe how easy it is. The hard part is finding the stock, which I've already done for you.

I'll show you how to use them together for the chance to maximize your potential gains.

Remember... I know that 24 hours of trading can be perfect for today's stock, you could be sitting on more than twice your money. (It's happened before.)

Of course, exactly how much profit you make will be up to you. It will depend on your individual circumstances and how much you choose to risk

"I profited a net total of $12,338.17 in 14 days."
– Moe A.

"Made over $26,000 in two weeks with little risk."
– David B.

And get this: Ronny A. tells me he made $360,000 *"from one trade alone."*

(Please note: The investment results described in these testimonials are not typical; investing in securities carries a high degree of risk; you may lose some or all of the investment.)

Can you imagine making that much from one trade?

I don't know Ronny personally, but I can tell you this: He may never have to work another day in his life.

Just remember: You only have to put a small portion of your money in these plays.

$1,000… even just a few hundred dollars… is enough to get started.

You'll get a full breakdown in my guide, ***The 3-Stock Retirement Blueprint***.

But that's just the start...

This guide is jam-packed with all kinds of bonus material, including:

- **The trading secrets I've refused to share with Wall Street**

  I've had more than a dozen investment banks and financial firms, including Merrill Lynch, contact me about my trading strategies. After hearing about a few of my larger wins, they wanted to find out how I was making more money than their best guys.

  In late October 2008, during one of my hot streaks, CNBC heard of the money my readers were making and wanted to get me to talk about my secrets on live TV.

  I turned them all down. However, in this guide, I'll tell you exactly how I spot a fast money trade setup… and how you can do it too.

- **The secret behind making 1,280% in two days**

  Following the S&P 500, it could take you over 50 years to grow your wealth over 1,000%. I've done it multiple times… in as little as two days. I'll show you how.

- **How to profit from a market crash**

  When you learn how to start trading like I do, you won't fear market crashes anymore. You'll look forward to them. During the 2008 market crash, I had one of my best years. I'll explain how I did it, and show you the best strategies to use such as:

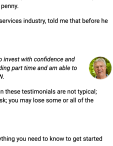
  - **The four days a year when you can make the most money as a trader**
  - **Why you shouldn't invest money you can't afford to lose — and how to manage the inherent risks that come with options.**
  - **What to do if you're forced to buy the underlying security (There's a way to spin this into a potential big gain. I'll show you how.)**
  - **And much more…**

It's all yours as a part of this special offer.

Plus, I'm also including something else you'll really like…

My video training series.

One of my specialties is teaching.



I was hired by a California university to teach options trading and securities pricing to MBA students. I eventually became dean of the business school — the youngest dean in the school's history by about 20 years.

On top of that, when I ran my options trading firm I trained over 1,000 people to become licensed stock brokers. A number of them wound up at firms like Merrill Lynch or Paine Webber.

Now, some of these folks paid thousands of dollars to hear my instruction.

But today… through the 4-part video series my team and I created… you can get the same kind of education for free.

Between the research, production, and manpower costs, it set us back about $100,000 to put this training together. But it was worth every penny.

One of my readers, an executive in the financial services industry, told me that before he found me, he'd traded with "limited success."

But he went on to say:

"Your training has given me the foundation to invest with confidence and humility… Over the past year I have been trading part time and am able to generate over six figures in income." – Jim W.

(Please note: The investment results described in these testimonials are not typical; investing in securities carries a high degree of risk; you may lose some or all of the investment.)

I have many more stories just like Jim's.

In these training videos, I walk you through everything you need to know to get started trading options the right way…

- How to make money in bull AND bear markets
- How to manage risk — without eliminating your gain potential
- Why options can be much better — and safer — than penny stocks

And a whole lot more…

Just keep one thing in mind: Options can be very, very easy.

You can get up to speed in a matter of minutes. And if you have a brokerage account already, it's very easy to get approved. In most cases, you just have to fill out a one-page form.

But I'm not done yet…

I have one more thing I think you'll really like. Something I've never done before...

I know what I'm telling you is probably new.

If you're like most people, you've been told that options are hard…

That you're not cut out for them…

That you should leave them to the "experts," and be content to follow the market.

Nothing could be further from the truth.

You CAN do this… and I want to prove it to you.

To that end, I'm launching a brand-new, monthly research service.

It's called: ***Jeff Clark Trader***.

In each issue, I show you how to use my 3-Stock Retirement Blueprint to get your retirement on the fast track.

Every month, I'll give you my latest trading ideas, along with my full analysis.

And as needed, I'll send you updates on the trade recommendations throughout the month.

The aim is to help you learn how to get maximum profits out of my top 3 stock picks. I'll focus on them for the next few months. And then, once their fast money window closes, I'll jump to 3 new ones.

We'll do this again and again, month after month… for the next year.

Obviously, past performance doesn't guarantee future returns. And obviously, there's no such thing as a risk-free investment. That includes my strategy.

But if history is any guide, you could make tens of thousands of dollars every year.

I've built my personal portfolio around this kind of targeted approach. It's my favorite way to trade. And it's by far the safest, easiest way to grow your wealth quickly.

Now, you're among the first to receive an invitation to join this research service.

But those who've followed my other research services in the past have been thrilled they did.

In fact, just based on what my subscribers have told me in emails, I've helped them make over $4.9 million combined.

Like Fred, who "closed out over $165,000 in profits [in a year]."

And Edward, who made "net gain: $192,252 [in a year]."

I'm sure that if I were able to get a full accounting from every subscriber I've had, the combined profits would be in the tens of millions.

Which is why people have happily paid thousands to gain access to my insights and strategies.

However…

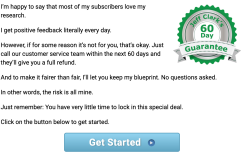
I've arranged for you to pay a small fraction of that.

If you act today, you can get a one-year subscription for just $18.

Add in the $1 cost of my blueprint — which is not available anywhere as a standalone guide — and we're talking $19 total.

That's it.

Here's a recap of everything you'll get right now...



One full year of *Jeff Clark Trader*. *(Value: $199)*

As a new subscriber, you'll receive your first set of fast money trade recommendations immediately. They're ready to go. As soon as you join, they'll be sent to your inbox.

Then, around the third Thursday of the month, you'll receive my next series of trade plays.

Keep in mind, I'm looking for the fastest, lowest-risk trade opportunities I can find.

These don't always happen according to a schedule. So the recommendations may not always come that exact day. They may come a day or two before or after.

But either way, each recommendation will give you the chance at a quick windfall.

Special Report: The 3-Stock Retirement Blueprint. (Value: $99)

4-Part Video Training Series. (Value: $599)

This is a total value of nearly $900.

All yours for just $19.

There's Only One Catch...

This deal will not be available at this low price for long.

You see, this is an introductory "doorbuster" price.

The only reason we're offering it is because we're just launching this service. It's important to me, personally, to help as many folks as I can — right out of the gate.

Very soon, the price will be much higher. (One of my research services retails for $5,000.)

So, if you want to lock in this incredible deal, I need to hear from you right away.

Of course, you're 100% protected by…

My 60-Day Moneyback Guarantee

I'm happy to say that most of my subscribers love my research.

I get positive feedback literally every day.

However, if for some reason it's not for you, that's okay. Just call our customer service team within the next 60 days and they'll give you a full refund.

And to make it fairer than fair, I'll let you keep my blueprint. No questions asked.

In other words, the risk is all mine.

Just remember: You have very little time to lock in this special deal.

Click on the button below to get started.

Get Started

You'll be taken to a secure order form, and within minutes, you'll have my first recommendations in your inbox.

Sincerely,

Jeff Clark
