TRADING EXPERTS TEN SECRETS AND ANSWER VERNE WHITE...

SUPER OPTIONS

The Secret to the BIGGEST, FASTEST-MOVING PLAYS on the Market

Each with the Potential to Hand You 400% or More in a Matter of Days or Weeks

"Shows no actual trade results. Illustrates the potential that exists in options trading."
— Jim Cramer, TV Host

"In one month, I turned $2,000 into $12,000 by following Verne's advice."
— Chris R.

"Turned $900 into $6,000 in a few weeks with your calls."
— Mike C., Retired Engineer

Hi, I'm Tom Sunkle, Americ's #1 Pattern Trader.

And today, I'm going to show you a few tricks to make money in bad times.

It's a simple strategy a select group of ordinary Americans have been using over the course of the last three months to make some **GREAT, FAST MONEY.**

It's unlike anything you've ever seen before.

Quite frankly, I've never seen anything quite like it in my entire life...

And I've created some of the most successful moneymaking systems ever developed. So the potential here is just HUGE, much bigger than you can imagine.

Now, I'm not talking about a little 10% or 20% gain here and there. I'm talking about a good deal, some of the best trades on the planet. Hot, home-run trades.

So if you'd like the chance to dramatically boost the size of your account in a matter of weeks—instead of months or years...

This new trading strategy is something you DO NOT WANT TO MISS. He calls it **Super Options...**

And people have just been going crazy over it.

Andrew, great to see you, buddy. Thanks for hopping on today.

AR:

Hey, Tom! Great to see you again! Thanks for having me on. There's no point I'd rather be right now because everybody sees how simple this is.

And that's much money they can make with **Super Options...**

They are never going to stop making this way.

Tom:

No doubt, AR.

Because, folks, an IRA is about to blow you...

If you're able to take a small amount of extra money that you have laying around...

Say $500 or $1,000 a trade...

And use it to target a 100%, 200%, maybe even a 400% windfall or more in a matter of days trading Super Options.

You have the potential to really jump up a LOT of quick cash. That's what makes today's webinar so special. It's a rare, rare, rare opportunity.

Because AR has times like **Super Options** trade recommendations been as good as ready to go for you...

And I can assure you, you're going to want to see those trades.

Because the way AR shows people how they could turn a small account into a large account is pure genius.

AR:

Over the last three months, my followers have seen the chance to grow 540% richer trading Super Options.

So I want everybody just get in on this today and set themselves up for the chance to make some serious money.

Because they trade for pennies on the dollar.

Tom:

So Super Options are perfect for someone who has extra cash and wants to put it to work.

AR:

I mean, it's just math.

If you buy a 50-cent Super Option for a penny or just 50 cents, that's a fast double. Better yet, if you buy a 10-cent option for a penny, that's a 10-bagger.

And I can review the chart with Super Options of the time.

That's why Super Options are so much better than stocks.

You can go for bigger gains much faster with less money at risk.

For you to TRIPLE your money on a stock like Apple, it would have to jump by almost $300.

Tom:

And actually with Apple, it's almost impossible.

And I know you want to share right into this so you can show everybody the HUGE money they could potentially make trading Super Options.

But if you don't mind...

I'd like to take a quick moment here and embarrass you a little bit... and throw a BIG CONGRATULATIONS over your way.

Because a year ago, you were up in Philly in front of a HUGE crowd at the **Franklin Mint Life Institute** and you introduced the **HIRO Effect.**

It's been a **TRANSCENDENT SUCCESS.** Isn't it?

Because with your help, a whole lot of people are making a whole lot MORE money now.

AR:

They are, Tom.

And I'm glad you bring it up because the **HIRO Effect** is something I'm really proud of. Because with my **S.E.A.N. trading system** and the benefit of the analysis, people from coast to coast have set themselves up for the chance to make thousands of dollars or more each and every week.

Almost like clockwork.

Now, I know that's sound crazy to some people...

But I have over 1,000 documented stories that prove **S.E.A.N.** actually **WORKS.**

Like the one from Chris Reed, who parlayed his way to trade 400% in three days turning a little over $1,000 into $9,948 in extra cash.

> "400% in 3 DAYS... I turned $1,900 into $9,748."
>
> › Chris R.

Or Mike C., helped him grow her account from $2,000 to $24,500 in a day and a half.

> "My account grew from $12,000 to $24,500 in a DAY and a HALF!"
>
> › Mille C.

Gary Anderson took my recommendation on Delta Pizza and banked a 423% gain in one DAY.

> "423% gain in 1 day."
>
> › Gary A.

Even Mike C., who started with $6,889 and boosted his account to $15,489 just a day later.

> "Turned $6,889 into $15,489 one day later."
>
> › Mike C.

AR helped of S.E.A.N. and the research it provides to help me find new trades.

So yeah... I'm really pumped to share it with even more people.

Tom:

OK, so we know **S.E.A.N.** is pretty phenomenal.

But **Super Options** really is a whole new ship to trade... isn't it?

AR:

It is, Tom.

It's an entirely new module in S.E.A.N.

It uses the same trade code and data...

But it's proprietarmost is consistently from the hottest movers in the market.

I call it the **Super Options** trader.

It's sort of like **S.E.A.N.** on steroids.

Only this time, it targets Super Options trades.

And after about a year of better trading, I'm ready to release it to a much larger audience... for the very first time.

Because this results been amazing... even better than I expected.

Tom:

Yeah, AR... I've seen your track record with this.

And over the course of the last three months, there's only one way to describe it...

OH FUNK.

The people lucky enough to be a part of that group must just be raking it in.

AR:

No doubt, Tom.

But that's why I love these Super Options.

They can blow away the returns you can make just trading the stocks.

I mean, seriously, as I'm about to prove... it's not even close.

Tom:

No, it's not.

And I know is going to be... A. MAT Not now, NOT EVER!

Because what most people don't understand about options is each contract controls 100 shares, not just one.

So every a small move in the underlying stock can throw off HUGE OPTIOUS in the options.

Which means you can be surprised when there was moves of 100%, 200%, 300%, or more in the underlying stock.

It happens literally every single day.

AR:

I know, right?

I mean you've written about Tesla's recent 30 just trading stocks. Or turned $20,000 into $9 million in a few years.

I'm probably not willing to a option.

Tom:

And I'd bet AR is throw a fit for Home Depot.

But people are catching on to options, aren't they, AR?

In July, the trading volume for options topped stocks for the first time ever.

So in other words, the options market is **NOW LARGER** than the market for the shares themselves.

AR:

And for good reason... there's no comparison.

So I'm thrilled to have trade big money on stocks these days. They average, what... 8% a year at best?

Sure, that can add up over 30 or 40 years... if the markets don't crash. But I want to be run now.

And when I'm 70.

So it's no wonder the volume on the options market is up 45% over last year.

That's where all the action is.

A massive number of people are making a TON OF MONEY trading them.

With the **Super Options** trader doing all the heavy lifting, trading options has never been easier.

We're buying simple calls and puts. That's it.

It's SAFER EASY. Even if you've never made a trade in your life.

Tom:

No doubt, AR.

And if you haven't been trading options, you've been missing out BIG TIME. Especially Super Options.

Because over the last three months, AR has been crushing it. I mean, take a look at ALL THAT GREEN.

Delta Pizza (NASDAQ: DPZ)	423%
Tesla (NASDAQ: TSLA)	300%
Apple (NASDAQ: AAPL)	300%
Tesla (NASDAQ: TSLA)	300%
Tesla (NASDAQ: TSLA)	300%
Tesla (NASDAQ: TSLA

And with enough volume so you don't have to worry about getting trapped in something where there's no exit strategy.

Each stock is plenty liquid.

The difference is, we're the only game in town.

The alpha of the companies I'm following with the **Super Options Trader** are structured in a very distinct way.

That's what gives them the potential to make you very rich... VERY FAST when you play the options.

Yoni:

And believe me... for those of you watching this webinar... if you've never heard of this before...

IT'S NOT your FAULT.

I'm never seen anyone trade options like this until Andrew showed me before we came on the air.

Although stocks are required to be in stocks the stocks are required to share in their annual reports... 90% of Fortune 500 stocks do have options. So the stuff I'm about to show you... the stuff I'm about to share prices to move so fast.

It's not as you start you've ever seen.

You've probably never heard Jim Cramer, Warren Buffett, or Carl Icahn mention it either...

Yet I have no doubt they know exactly how powerful it can be. It's called the **Fast**.

Tom:

You're talking about the number of shares available to trade in any given day.

Jeff:

Absolutely.

It's the "**D**" in the **supply-and-demand equation** that determines the price of every single thing used in the world.

You name it strawberries... Beanie Babies... the baseball cards I traded when I was a kid... gold... silver... and in the about to show you... **EVERY STOCK**.

Tom:

And when it comes to the Fast...

The numbers are all over the place, aren't they, Jeff?

Some companies have billions of shares of supply in the float... while others are structured to have just a few billion.

So that supply is really tiny.

And when people want to buy them, there's not much to go around.

Jeff:

Exactly, Tom.

It's Economics 101.

Here, I'll show you...

You know what this is, right?

Well, last year, Apple sold over 180 million. And they're pretty expensive, right?

Now, imagine what would happen next year if Apple sales decided to only release 20 million of these things into the market.

And demand remained the same - 180 million iPhones.

What do you think would happen to the price of those iPhones?

Tom:

Heck, Jeff...

You've seen those lines outside Apple stores when a new model is released.

If Apple only released 20 million iPhones instead of the demand was 180 million... people would go bananas, and the price of each iPhone would skyrocket.

Jeff:

That's what happens to companies with less than 20 million shares in the float. Their stocks can go through the ROOF.

And the OPTIONS go WILLDITIC.

Tom:

Like the Fiesta you've been crushing lately... 300% in one day...

277% in one day...

500% in two days 24 hours... 400% in one day.

Jeff:

Yeah, Tom that's why I focus my energy on companies with fewer than 25 million shares available to trade each day.

And believe me...

I tested, backtested, and stress tested everything - you name a test, and I probably ran it.

The gains I got last time were

Check out what happened to Eventbrite in August of last year. It's a $900 million company... give or take.

They sell tickets to conferences, concerts, and other live events. Now, imagine if Eventbrite distributed tickets to a small concert... and there were only 20 seats available.

Now, let's say it's Ariel Dayan and the Rolling Stones.

What do you think is going to happen to the price of those tickets?

Tom:

Are you kidding me? Mick and the Stones?

At a private concert?

Those tickets would be virtually priceless.

Jeff:

Well, Tom, something similar happened with Eventbrite's stock price. Because at the time, only 5.5 million shares were available to trade.

That means Eventbrite's float was super tiny.

Institutions and traders had locked up 78% of the available shares.

Tom:

So any variant, folks! - even a small one! - could cause a stampede to enough so that Street with inventory grabbing any shares they could - at higher and higher prices.

Jeff:

Bingo. Exactly what happened when shares of Eventbrite went crazy and jumped 10.8% in 10 days.

Crazy, right? And guess what happened when we looked back at the profit potential of the best-performing option?

It jumped 5,000% in three days.

That's the power of Super Options.

EVENTBRITE SUPER OPTIONS

Same thing with a $270 million company called Fiesta Restaurant Group. It had 20 million shares available to trade.

So there wasn't much to go around when the company made a run-up. Sixteen days later... the price of Fiesta's stock...

Meanwhile, the Super Options jumped 600%.

Or 10 times better than the stock.

FIESTA RESTAURANT GROUP SUPER OPTIONS

Or this gem, an announced on Rockefeller Financial, a $299 million company with 20 million shares available.

Their stock jumped 94.3% in four days... while the Super Options went up 282%.

PENNYMAC SUPER OPTIONS

These are exactly the kinds of stocks that the **Super Options Trader** is looking for.

Tom:

Now, Jeff... on the face of it, these are some pretty small companies.

And I can understand how their shares can easily explode in value compared to, say, a company like Apple that has over 17 billion shares available to trade each day...

And usually only moves 1% or 2% each day.

It is very easier for a smaller firm, with a smaller number of shares outstanding, to show outstanding gains.

That's what the Super Options Trader isn't just randomly hunting for these opportunities, is it?

Jeff:

No, Tom. It's looking for stocks that have a significant set of milestones. The first is daily trading volume. Specifically, the number of shares traded.

That means these stocks themselves are liquid.

So you can easily get in and out of the option positions.

Tom:

Remember that, folks.

Believe me, the last thing you want is to get stuck in a position because nobody is buying or selling.

Jeff:

That's for sure, Bill. We're always looking at plays with a lot of option gains so. And we're always targeting companies that are clearly growing.

Earnings per share must have jumped at least 25% year over year... at minimum. So I know that we're targeting good companies... not a bunch of bum apples.

Finally, their relative strength index needs to be between 30 and 70.

Tom:

And those trades have been paying off big time in the last three months. With a 68% average gain...

And they've paid out enough to increase the entire value of your account by 540%.

Jeff:

That's right! Start with a $10,000 account and put $1,000 into each trade - your account could have grown to $68,000.

A $20,000 account up to $136,000.

And a $50,000 account up to $340,000. Now, of course, no strategy is perfect.

Super Options will carry risk. It's towering after all. So you should always keep your trades diversified and never risk more than you can lose.

Not every trade is going to make you double- and triple-digit gains. With the markets bouncing around this year, our trades are running about breakeven.

Tom:

And, Kit, you've told me the **Super Options Trader** confirms every signal as it occurs.

Jeff:

It does, Tom.

It works using an obscure trading technique that was published in Japan over 100 years ago and was almost lost to Western civilization.

It's called the Ichimoku cloud.

Tom:

That's a big part of your story, isn't it?

Jeff:

It is. I mean, you know my story. Tom.

I do, and quite frankly... it is one for the record books. Amazing, really.

You tried and failed...

Got back up and tried again.

Then you turned $20,000 into $5 million in only two years.

All because you found the Ichimoku cloud in some dusty, old Japanese trading book that was published 100 years ago.

Which, by the way...

You discovered while you were teaching English to kids at a Buddhist monastery in Thailand of all places.

Jeff:

I admit it sounds kind of crazy.

But it turned out to be the biggest breakthrough of my career. Much larger than anything I ever did at the CBOE.

Because ever since I started using the Ichimoku cloud, I've never been short on cash.

It's the best way I've seen to project where a stock could go BEFORE it happens. It's not a crystal ball. It just works that way.

It works using the formula you see here:

THE ICHIMOKU CLOUD

Conversion Line (tenkan sen)	(9 Hi + 9 Lo) / 2
Base Line (kijun sen)	(26 Hi + 26 Lo) / 2
Leading Span A (senkou span A)	(C1 + Base Line) / 2
Leading Span B (senkou span B)	(52 Hi + 52 Lo) / 2
Lagging Span (chikou span)	Close price 26 periods in the past

Tom:

Now, Jeff, let me stop you right there. Because that's some PhD-level math.

People trading Super Options don't need to crunch those numbers, do they?

Jeff:

No, Tom.

The **Super Options Trader** automatically crunches all those numbers in real time, so they don't have to.

And it's so simple to use...

If you see a green cloud - the stock is likely headed up. That means its bullish.

THE ICHIMOKU CLOUD

If you see a red cloud, that means the stock is likely headed down, so it's bearish.

THE ICHIMOKU CLOUD

So it doesn't matter what the markets are doing.

The **Super Options Trader** can always help you find a low-risk trade target.

And the cash really has the potential to pile up fast with these companies.

Simply because of the way they are structured... with so few shares available to trade each day.

Jeff:

A sure done, Tom.

As you've seen from the examples, this is a VERY FAST way to make money.

The people using the **Super Options** research are already putting down some serious gains.

Take my Bravo Stock Scan recommendation. Everybody knows Shake Shack.

Tom:

Yeah, their burgers are awesome.

Jeff:

But what people don't know, Tom, is investors and institutions have locked up the 90% of the available shares.

So the amount of shares available to trade is ridiculously small for the amount of volume it trades.

When the stock began to move, buyers went crazy over it. Sending shares up 21.9% in just 33 days.

Which wasn't bad...

But honestly... it was nothing compared to what you could've made on the Super Options I recommended.

Because they jumped 25% over the same period.

Enough to turn every $1,000 invested into $3,500...

Or almost 10 times what you would've made on the stock.

SHAKE SHACK

And guess what?

The Super Options were only heading for 10 bill... not over 100 like the shares themselves.

So they were **SUPER CHEAP**.

So cheap, you've probably could've made that trade.

Same story with the CYM recommendation. You could've closed a week later. So shares jumped 50% in 26 days because there were too few shares to trade.

As for the Super Options, they were almost three times better than the stock... rising 157% over just 26 days.

And those options only cost pennies on the dollar at just 70 cents each.

CYM

Then there's the NUTX trade I recommended.

Where the Super Options went from 30 cents to $1.20. Taking down a 271% gain in a single day.

Meanwhile, the stock only jumped 15.3%.

Enough to turn every $1,000 invested into $3,710.

NUTX

So yeah, Tom... the potential with these Super Options is just HUGE.

So HUGE that today I'm opening it up to everybody for the first time ever.

Tom:

Now, Jeff, I'm pat to tell you...

I really LIKE what you're doing here, Jeff. Because as someone who loves options, trading this way is the best of the best.

It's Super Options on super cheap.

Most of these trade for pennies on the dollar. So you can get rich in a LOT of these trades for under $1,000.

Kit, do you around a Super Options trade has the potential to go absolutely WILLDITIC because the supply of shares is so tiny.

And finally - and this is the BIG ONE...

Kit's With Super Options, I can actually hope to make my money OR MORE in just a few days or weeks.

I mean, what are you something that only costs 20 cents. It doesn't take a very big move for you to go from a stack of $100 gain.

Just another 20 or 40 cents... which in the options world happens all the time.

Jeff:

You know it, Tom... I know it... everybody who trades options knows it. Big moves like this happen all the time.

Like the XSS trade I recently recommended.

XSS SUPER OPTIONS

Participants were able to get in at just 30 cents and, before the trading day was over, sell for 36 cents...

Banking a quick 100% gain.

That NEVER happens with stocks.

At least, I can't say that I've ever seen it.

And I've been doing this for almost two decades.

Tom:

And just as you know, folks...

A LOT of Kit's bang traders have stepped forward with their Super Options stories... way more than you've ever felt on this broadcast.

Jeff:

They have, Tom.

Jake Bleecker wanted to tell me he made $10,000 in six weeks trading Super Options, growing his account from $25,000 to $40,800.

"Grew my account from $25,000 to $40,800 in 6 weeks trading SUPER OPTIONS."

> Jake B.

Jessica Lane turned $710 into a quick $3,295 banking a 364% gain in one day.

"I turned $710 into $3,295. A 364% gain in ONE DAY!"

> Jessica L.

While Ben Bender turned $518 into $2,660 in one day with a 413% gain.

> "Turned **$518** into **$2,660 in one day** with a **413% gain.**"
>
> › Ben B.

And that Shake Shack recommendation I told you about?

Kristy Kelley booked a $10,000 profit on it in less than a month with just a starting stake of $3,690.

> "**Booked a $10,000 profit** on SHAK in less than a month with a starting stake of just **$3690.**"
>
> › Kristy K.

Tom:

Folks, these are REAL people... placing REAL trades... and making REAL money right now...

Trading AK's Super Options.

AK:

And I couldn't possibly be prouder of them.

There are so many stories like these that I can't remember them all. That's why I've decided to take this to the next level.

I'm making my ***Super Options*** research service available to everyone right now...

I want to show as many people as possible how they could pile up more cash than they ever thought was possible.

Because with ***Super Options***, the sky is the limit.

Tom:

It really is, AK. Like I said. I'm sold.

I mean, take a look at all of that green.

SUPER OPTION	GAINS	WEIGHT	HOLD PERIOD
TSN August 7, 2020 $66.50 Call	188.8%	Closed	1 Day
HUYA August 7, 2020 $30 Call	271.4%	50% Remaining	1 Day
HUYA August 7, 2020 $26 Call	271.42%	Closed	1 Day
IBM August 10, 2020 $145.50 Call	140.25%	Closed	2 Days
FDX August 14, 2020 $150.50 Call	220.35%	Closed	2 Days
PLUS September 18, 2020 $20 Call	42.9%	50% Remaining	1 Day
DWSN August 20, 2020 $40 Call	55.1%	50% Remaining	1 Day
DWSN August 20, 2020 $41 Call	108.96%	Closed	1 Day
PLUS September 18, 2020 $20 Call	100.00%	Closed	3 Days
KBA September 4, 2020 $22 Call	100.00%	Closed	Later Same Day
TPR September 18, 2020 $38 Call	200.25%	Closed	1 Day
IBM September 25, 2020 $141 Call	28.25%	50%	Later Same Day
IBM September 25, 2020 $146 Call	80.96%	Closed	1 Day
DDOG September 2, 2020 $100 Call	82.00%	50%	1 Day
DDOG September 2, 2020 $110 Call	191.00%	Closed	1 Day

- 188% on TSN in one day...
- 271% in one day on HUYA...
- 81% on Comcast in a day...
- This DDOG trade where subscribers were able to book 75% in a day...
- KSS for 100% in less than one day...
- 96% in $FIX in three days...
- And the trade after that where you banked 410% in one day.

The way those numbers have added up in the last three months... 11 for 16 trades...

An average gain of 68% across all the trades, winners and losers... and the value of your entire account going up 546%...

That's great stuff, AK.

AK:

Thanks, Tom.

And like I said...

It's SUPER SIMPLE to do. Here's how it works...

Each week, I'll send you up to three ***Super Options*** trade targets.

Or about 12 each month.

From there, if you like what you see, all you need to do is just follow the simple instructions I'll send out...

Where I'll show you step by step how to set up each trade recommendation to...

- ***Automatically*** go live when every condition is met...
- ***Automatically*** cash you out when the time is right, and...
- ***Automatically*** deposit any winnings into your account.

Placing each trade takes just a few minutes and a couple clicks of your mouse. That's it.

So it's about 15 minutes a week. Tops.

Because the last thing I want is for anyone to be stuck staring at a computer all day - because who's got time for that?

Then once your trade hits the target I recommend and closes out to the upside, I'll immediately send you a Net Worth Boosted Alert.

I'll even send you a note if a trade moves against us... so you'll never have to go it alone.

You'll always know when to buy, sell, or hold.

What could possibly be easier than that?

Tom:

You know the answer, AK... NOT MUCH.

AK:

I mean, seriously.

All you need is a cell phone or a laptop. And who doesn't have that?

All it takes is three easy steps:

- You receive a new ***Super Options*** trade recommendation.
- You follow my step-by-step instructions.
- You get the chance to walk away with a pocket full of money.

You can go big or you can go small depending on the setup.

How much you put in is always up to you. You can even choose not to play at all.

Whatever you are comfortable with.

Tom:

What if someone out there is new to options trading? Can anyone make these trades?

AK:

Absolutely, Tom.

In fact, these ***Super Options*** trades are the simplest ones I recommend.

And I give EVERYBODY **EVERYTHING** they could possibly need to do this...

Including my ***Super Options*** videos where I show people...

- How to copy and paste your ***Super Options*** trade recommendation straight from your email into your brokerage account.
- How to test the ***Super Options*** trade WITHOUT risking a single dime.
- When to sell for the biggest gains after your ***Super Options*** trade spikes.
- The best strategy for using Super Options inside your IRA.
- And the right amount to consider investing into every trade based on your portfolio size and so much more.

So they can hit the ground running.

Tom:

You've really pulled out all the stops for this. But there's more, isn't there, AK?

AK:

Yes, because I'm going to do two more things for everybody today.

One: Immediately send three new recommendations the ***Super Options*** **Tracker** just helped me uncover.

Each one with the potential to hand you 100%... 200%... 300%... or more in a matter of days or weeks.

And two: Activate the HUGE discount all new members are entitled to.

When you subscribe to ***Super Options*** today, you'll be a **Founding Member**.

And as a Founding Member, you'll be entitled to over **60% OFF** today!

I know. It's somewhat ridiculous given how much value you're going to get. But as I said earlier, I want EVERYONE to be able to do this.

So much so... I'm making a personal guarantee on the results going forward. Over the course of the next year, I promise at least 30 of my ***Super Options*** recommendations will hit triple-digit gains or higher.

If not, then just contact my team, and we'll refund every single penny of your subscription.

NO QUESTIONS ASKED.

Tom:

So, Andrew...

You've shown us how Super Options trade for pennies on the dollar... and why they are perfect for someone who has extra cash to invest.

You've shown us how the ***Super Options*** **Tracker** spots moves in real time...

So you can leverage the biggest... fastest-moving... most explosive stocks on the planet.

You've shown us more huge gainers than I can even begin to count... and your track record over the last three months is absolutely remarkable.

We've heard all of these great stories from people you've shared your work with. And you're guarantee on this is off the charts.

I mean, you're promising people 30 100% or more winners over the next 12 months. Or you'll refund their ENTIRE subscription.

So I'm sure a lot of people can't wait to get started with this.

Is there anything else you want people to know before we sign off here?

AK:

I just want people to know that if things aren't going great... and they haven't really gotten what they want out of life...

They shouldn't get down on themselves.

It's not their fault.

I went from working in a cubicle to making over $200,000 a month trading options.

And I can teach anybody how to do what I do.

That's what I want people to walk away with today.

The idea that anything is possible when you trade the way I do.

Tom:

And, folks, as Andrew just showed you...

You don't need to be a millionaire to do this.

Even a $1,000 investment, as we've seen, can pay big. So what are you waiting for?

All the details can be found by clicking the link below... you won't believe the price on this until you see it for yourself.

Or if you have any questions about the service and how it will work for you, I encourage you to contact our reliable customer service team at 855-539-6600 or 443-353-4770 (for international calls) and mention Priority Code: WSOPX200.

I'm Tom Gentile, America's #1 Pattern Trader. And remember...

Living the life you deserve starts with a single, small step. I just hope you'll take it.
