Is This The *Sexual Stimulant* Seniors Have Been Waiting For?

Special research shows a small "sex drug" can dramatically improve sexual function in men and women. Revitalize is 10 times stronger, more energized body. Discover this breakthrough here... and be careful when you see it.

Hello, I'm Dr. Kevin Gianforcaro. I have a potentially **embarrassing question** to ask you...

You need to make sure you're in a private place where other people can't **overhear**...

... especially not your spouse.

Okay, here goes...

"How's your sex life?"

Now, be honest.

Do you get aroused just by thinking about making love to your spouse? Does your body physically respond or can?

When you have sex, does it end with you and your partner heaped together, panting with breathless satisfaction?

... or do your nights end up **frustrating... disappointing...**

Do you wish that down about your performance?

I understand completely if you don't want to "go there" but as a Doctor, I assure you...

Your sex life is intimately connected with how fast – or how slow – you age. You'll see why in a moment...

And... I've got great news.

There's a special hormone breakthrough. It's now possible to...

... and I'm not talking about having great sex! It guarantee or anything you've tried before.

This is completely different...

The science shows the breakthrough works both as **a female sexual stimulant...**

...and a male sexual stimulant, too!

That's right, it works for BOTH genders.

In fact, small studies are showing women enjoyed...

75% better sexual performance...

77% more intense orgasms...

... and men enjoyed 61% higher free testosterone and a 91% higher libido in 30 days...

... and this is just the beginning. As you're about to see, the benefits could happen all over your body and even in your brain.

Imagine sinking into your living room, where your wife sits reading a book...

She has NO IDEA what's about to happen... and how great she's going to feel...

But as you take her and gently lead her off the couch and into the bedroom, you see her start to smile...

... because she already senses her man is going to satisfy her like no one else could.

Sounds pretty good, right?

But what if you're a woman? Don't worry...

This breakthrough is a blessing for BOTH genders

Women are just as into exploring the heart's inner caves as men are. Only, you were confined... curious... and never fully uninhibited you could get...

You shut up to your husband and DEMAND he join you in the bedroom... and you show him exactly what you want him to do... so you both enjoy the ecstasy you've waited years for.

Again, it's all possible because this stimulating secret works for both men and women.

So, let's dive into exactly what it is and how you can use it.

It's a **special hormone breakthrough...**

Now, hormones are chemicals that signal your body to do things. Remember when you were a teenager and it felt like hormones took complete control of your body?

That's because... biologically... that's exactly what hormones do. They even control your brain. And not just when you're in junior high school... but **your whole life**.

Hormones trigger three sets of events in your body.

They command the body to burn fat and build stronger muscles...

... and they even enhance the brain's ability to think sharper.

Unfortunately, you've probably felt those desires – and your performance in the bedroom – start to **lessen** as you've gotten older. It just seems like that's "part of life."

But scientifically speaking, the difference comes down to a specific hormone balance in your body.

When your hormones are balanced a certain way, you can't stop thinking about sex.

When they're balanced a different way, you feel tired and worn out. You feel **old**.

Even your memory and joint health could get affected. That's why your sex life is connected with how fast you age.

So, let's dive into exactly what this hormone breakthrough is...

Remember, this hormone breakthrough works just as well for getting a **woman's sex drive** and performance, as it does for a man's.

When your testosterone your hormone right...

It could also strengthen memory, increase energy, and improve joint health

Built a husband and his wife can take advantage of this naughty hormone sector and enjoy breathtaking sexual experiences.

More often...

With **more satisfaction**...

Without any trace of a doctor's office...

... and on top of that, they could improve their memory, energy, and joints!

That's how this hormone breakthrough works.

It began with the discovery of a scientist named Dr. Bulsewicz.

He was the director of the Blue Ridge Institute for Biochemistry, and even a **genius** in his field.

Dr. Bulsewicz also lived to be 97 years old – not bad for someone born in 1900!

He discovered a powerful hormone... and it wasn't testosterone (or estrogen, for that matter).

Instead, this "Super Hormone" actually creates testosterone and estrogen.

That's right – it's **the essential building block** for testosterone and estrogen.

As a result, this super hormone could partially control your sex drive and performance. Maybe even your overall health.

Unfortunately, needs of this hormone left you yet other.

But thanks to Dr. Bulsewicz's discovery...

Scientists have figured out how to properly balance this super hormone.

As I said before, the benefits go way beyond sex.

Think about how tired you are right now. How about aching joints? Do you have occasional trouble sleeping? Or concentrating?

If you're thinking about any of these problems right now, then this message is perfect for you.

You see, this Super Hormone is unique because it's a building block for your mind and body like a beast, only the Super Hormone actually makes you feel younger.

As I said before, my name is **Dr. Kevin Gianforcaro**.

I've been practicing medicine for over 20 years, and served as a top doctor at one of the leading bariatric clinics in the United States.

I've spent my career helping seniors like you reclaim their health and overcome obstacles.

But I was hoping my own wife battle thyroid cancer that changed my life forever.

Unfortunately, she passed away. But I learned a lot from her battle of knowledge... I was able to the same quality of care I gave to my own patients.

So yes, I've seen the full spectrum of health – from athletes to 85-year-olds just trying to keep up with their grandkids.

That's why I'm delivering you this message.

Now, let's dive into exactly what this **hormone is**.

As you already learned, it's not testosterone. It's not estrogen either.

It's called DHEA.

Some scientists are now calling DHEA "The Mother Of All Hormones"

For your body to make testosterone... it needs DHEA.

For your body to make estrogen... it needs DHEA.

Unfortunately, as you get older... your DHEA levels go down.

In fact, by the time you're 75, your DHEA could have dropped by as much as 80%.

It's even worse for women. After going through menopause, a woman's ability to make DHEA plays WAY down. Gone for practical.

These graphs show that, once a woman reaches a fifty-year 55, her DHEA is just a fraction of what it used to be. And... unless she does anything about it... the levels stay low forever.

So, it's no wonder your other hormone decline as well. Imagine trying to bake a cake... or some cookies or a pie... but you have only a teaspoon of flour.

That's exactly what happens to your body's hormones when you hit 50... 60... 70... and beyond.

Here's the good news. Dr. Bulsewicz did more than just discover DHEA. He found it could be restored in both sexes.

So, naturally, he was excited to conduct another study to see what would happen if a man or woman took DHEA.

They gave women a supply of DHEA in a randomized, double-blind, placebo-controlled study – the gold standard of scientific research...

... and of my, did the women swap sexy tales.

The lucky women who got the DHEA reported...

More energy...

More alertness...

More productivity...

And... more desire for **sex and more sex!**

Of course, these results made sense when the scientists found the women's DHEA levels had increased 239%.

They went from 0.09 to 2.17... an increase that's **1,700%!**

Yes, 1,670!

The great part is, men got to have fun, too. DHEA is fantastic for a man's performance and for him to get fully hard "down there."

Now, to be clear, DHEA isn't just a "sex pill."

Another small DHEA study on postmenopausal women found that VOL shoulders improved. Their triglycerides improved a full 20%, and their insulin sensitivity improved 30%!

It's amazing. And...

It's all because DHEA is a Super Hormone for your body, literally providing the building blocks for your powerful sex hormones

Keep in mind, you're probably not going to get your DHEA levels checked by your doctor. It's completely ignored.

If you want to keep your DHEA levels high in your Golden Years... you need to take it yourself...

... but that's not all you should take. If you truly want to feel young and perform like a youngster in the bed...

You see, my team and I discovered something else, in our research...

In small studies, men are using a simple compound to help...

Improve muscle strength...

Help jumps feel better...

Increase energy 72%...

Raise libido a staggering 91%... starting in 21 days.

It's all because of a compound called Eurycoma longifolia. It comes from deep in the jungles of Malaysia.

...and those results came after 30 days. But the improvements kept coming...

Short-term memory improved up to 50% in 90 days!

Imagine being one of the lucky study participants...

Taking 4394-96 a little capsule and discovering you don't need a paper and pen to remember a long-winded conversation you just had to do.

When you want to remember something, it just comes to you...

...and it's not just your mind. Your body starts getting stronger. Which is perfect, because you could be getting more opportunities to show off how you look and feel when you're between the sheets together.

... because research shows 4394-96 lowered cortisol almost 28%.

Research shows even the **feelings** of stress went away.

Plus...

Feelings like worry and sadness, and losing sleep, faded away by 72%

That's why my team and I made sure to include a full dose of 4394-96 in my **Revitalone** formula... and I know it was complete.

More alertness...

More productivity...
