Doctor's New P.R.I.M.E. Protocol Helps Men Return to Their Sexual Peak

WARNING: Guided effects of the protocol compared to include men reporting harder erections, a stronger libido, ...Plus erections growing dramatically thicker!

Interviewer: "When senior men use this doctor's new P.R.I.M.E. Protocol Formula, they all receive this warning ...

'Be prepared for when you begin using the P.R.I.M.E. formula to return your body to the sexual peak.'

"Because when your erections become harder, they have to be **thicker** for you and your spouse.

"In fact, you'll soon hear from one man whose **erection got so much bigger in just 10 days. His wife warned him to be careful when they have sex!**

"Plus, you'll hear about one man who said his sex life was **"on fire"** after using the protocol reported on improvement in their sex life after just 15 short days.

"This shocking protocol doesn't require any changes to your diet. Yet it's powerful enough to **turn on** a dormant **hunger, libido, rock-hard** erections in just 2 minutes, after using it for 30 days.

"But that's just the beginning. Because this protocol helps biologically improve the entire male body. Each part of the protocol has been scientifically studied, with men reporting they help to:

"Improve muscle strength...

"Improve concentration and focus...

"Improve energy 77%...

"Lose weight...

"Enlarge lung muscles by almost a full inch...

"Boost the male sexual hormone testosterone levels on amazing 475%...

"Rev up libido...

"Achieve an erection in just 5 minutes...

"And even thickens and lengthens erections.

"And best of all, improvements in sexual function were shown to start in as little as **10 days**.

"This protocol's scientific properties may sound too good to be true. But, as you'llsoon see, the way it works is **astonishingly healthy**.

"The protocol was developed by Dr. Richard Gerhauser, a Medical Doctor who's been practicing medicine for over 3 decades.

"His breakthrough is now known as the P.R.I.M.E. Protocol. It's his premier formula to help men age in the best ways they can look & feel prime. Here's Dr. Gerhauser to explain how it works:

Dr. Gerhauser: "There are only 3 differences ... I repeat, only 3 major differences between a strong, virile 25-year-old man and an old, weak, 75-year-old man...

"1. Your hormone levels...

"2. How strong your blood flow is...

"And ... 3. The chemistry in your brain.

"Those 3 factors control your muscle strength, your energy, how your libido feel, your erections and even how your brain thinks and acts and your mood.

"Heat means if you're a man over the age of 25, and you want to feel younger, have more ambitious and more sexual hormones, your blood flow, your libido and your brain chemistry. And now we can. That's exactly what the Protocol does.

Interviewer: "Dr. Gerhauser's mesaage to men who want to use P.R.I.M.E. is simple. Be careful ... because you might be shocked at how fast you see results.

Dr. Gerhauser: "As a practicing physician, I cut men down to carefully consider if the ready for this. I'm a Medical Doctor, I'm a father, I'm a husband. I want my patients to live healthy, safe, nagging pain-free,medicated-pills-free, energy ... and a low sex drive.

That any change - like springing to life with a **harder, larger erection...**

Feeling more energy...

Seeing your **muscles growing bigger and stronger...**

Feeling your **libido improve...**

Can be intimidating.

Not every man can handle this – both the power and the attention you could receive - and theirs no shame in admitting that going back to your sexual peak isn't for you...

But if you do with this, I get ... let's see if you can still keep up with me...

And I was saying, satisfying a women isn't easy.

After all, when you get older, you can begin to lose your energy, your strength, your sex drive, and your erections might not be as strong as they once were.

But thanks to Dr. Gerhauser's P.R.I.M.E. Protocol, that's not how aging works anymore...

When you take advantage of the 3 phases, it's now possible to feel and look like a younger man sexual prime ... and continue to satisfy your wife right after night.

Now, before we get to the science and show you how to do it, you must understand P.R.I.M.E. doesn't merely help enhance your drive or give a little boost. It helps you to:

It can help make your entire body feel younger

Because P.R.I.M.E. helps automatically program your body to feel like you're back to when your libido burned so white hot, you couldn't wait to get your lady to the bedroom.

When your energy and confidence were high...

When you could drink some beer, enjoy a few shots of grain, **grab your girlfriend as she giggled with delight**, kiss her over your shoulder, carry her to your bedroom, and show her the night of her life...

Remember when you felt that way. **Do you could this forever?**

According to some, once you reach a certain age, that feeling ... and that fun... is just a distant memory. A painful fantasy you think you'll never get to enjoy...

But that's just nonsense.

Thanks to a scientific breakthrough, we can finally target the 3 specific factors that make an old men feel young and virile again.

This breakthrough has been perfected into 3 phases... Phase 1 improves hormones. Phase 2 increases blood flow. Phase 3 helps optimize brain chemistry.

When all 3 phases are complete, your body, your sexual performance, and your sex drive may never be the same

The best part is, you don't need to change how you live your life. This doesn't require any complicated procedures.

All 3 phases of P.R.I.M.E. have been integrated into a simple, easy-to-take formula.

Imagine this...

You make a simple change to your routine. It's not a new diet, or anything stressful or complicated.

You don't expect any sudden changes... but in time you feel more sexual. The nagging pain you felt in your joints ... gone. Your energy is **gone**. Instead, you feel **confident**. Like you've got a little more swagger in your step.

But that's just the beginning...

As the weeks go by, you start feeling amazing changes inside...

More energy. You feel good for no particular reason.

Then you start getting that **familiar stirring towards your libido**. And then... you realize your erections are harder than before.

Very soon, your libido starts to rev up again... that's exactly what you and your spouse have on dearly missed ...

Soon, you could realize your erections aren't just harder ... but **bigger**. You almost can't believe your eyes ... and neither can your spouse.

Because a study on men who just joined the part of this secret sauce that enactions become a full inch bigger in just 10 days. Yes, 10 days. Amazing.

You may even notice you're getting stronger and more relaxing sleep. You can't tell if it's because your sex life has improved and you need more recovery, or if your body is going through a bigger upgrade than you realized.

Then you could realize your **penis** feel smoother and more comfortable when you move. Even when you don't have to wear a leather ring, or stretching your penis at night, or using an oil or cream of any kind.

You're not gaining weight like you did before, and you may even notice your belly start to shrink...

One morning, you look in the mirror after your workout and do a double-take...

"Me was?" you say out loud...

Because you could notice your biceps are bigger. Your body is growing new, lean muscle mass.

You can't deny it. You feel and look **years younger again**.

It's almost eerie... but wonderfully true. "Goodness gracious," you think. "...how in the world **possible?**"

Ill show you right now. It may sound hard to believe. Just a few years ago, this **wasn't possible**. But thanks to Dr. Gerhauser's P.R.I.M.E. breakthrough, it is absolutely real and incredible to see.

Ill show you all 3 phases and how to activate them.

I'll also show you a special *surprise* health benefit of this Protocol that's almost beyond belief

First, here's how Dr. Gerhauser was able to create this breakthrough protocol.

As you heard before, he's 47 years old and has been practicing medicine for over 3 decades.

He's also board-certified and holds 2 Master's Degrees.

But as we probably will, he's far from your ordinary doctor...

And he's definitely far from your ordinary senior man approaching his 7th decade!

Even though he can collect Social Security...

He could walk out the door right now and keep up with the three athletic sons or a deep mountain trek.

The fact is, Dr. Gerhauser feels the he's the healthiest he's ever been.

In fact, Dr. Gerhauser's years practicing medicine at the famous **Canyon Ranch Medical Center**.

Celebrities and multi-millionaires flew to see him from all over the world **to receive secret hormonal the average person doesn't know is possible.**

He pioneered the science of optimizing hormones to help restore a man's youthful health.

In fact, Dr. Gerhauser's ability to naturally raise testosterone in men over the age of 50 was one of his most jealously-guarded secrets.

His breakthrough came when he discovered men already have all the proper hormones to have the sex drive and performance of a younger man.

They can even have the blood flow and erection strength of a younger man.

It all comes down to biologically unleashing this **pent-up power**.

As you're about to see, that's how P.R.I.M.E. was created. It's made of 3 phases that fit like a puzzle to your sexual peak. It helps activate what is already sealing dormant in your body.

For many years, Dr. Gerhauser has run his own lung research medical practice. All this time, he's been quietly testing and perfecting his system.

Now, he's ready to bring this breakthrough to men who can benefit it.

Let's dive into exactly what the P.R.I.M.E. Protocol is and how you can use it to help take your body back to sexual prime.

As you know, P.R.I.M.E. works in 3 phases.

The first phase helps *improve* your sexual hormones

The second phase enhances your blood flow. The third phase helps optimize brain chemistry.

The first step in P.R.I.M.E. stands for Peak Hormones ... and that's Phase 1.

P.R.I.M.E. improves several of your hormones but the most important is your **testosterone**.

You might have heard of testosterone before. Basically, it's **the King Kong of hormones**.

When you hit puberty, your testosterone levels explode.

You grow stronger, more muscular, get a deeper voice, and your sex drive ignites. When you wake a gigantic erection pop. This **testosterone** was how you got to enjoy constant energy and a body that felt invincible.

You could see what you want, drink what you want, have great sex with your girlfriend... Sleep like a rock and be the next day. Without gaining weight or worrying about how you'll look in a tight shirt.

Here's what the new science has uncovered. One reason you could enjoy all this **not because your age was a specific number**...

But because your hormones were in a specific balance.

This powerful hormone helped your body to stay fit, strong, and excited for sex... no matter what.

But as I'm sure you'll tell, those days seem to be long gone.

Today's average man testosterone levels fall 75 per cent. When they may not sound like much...

But it adds up. Just like a young, 18-athlete can win "only" a pound or two of body fat per year... but end up fatter and overweight by middle age.

By the time you're 75 years old, your testosterone could be much lower than when you enjoyed your sexual peak. Then, feeling like you're "old" has gone could be "on" can't just a dart circle...

It's your biological reality.

When your testosterone levels decrease, you could also feel like you have less energy, less muscle strength, and a slower, weaker, more sluggish version of your self.

And worse, your libido and sex drive could also fall.

Your bulging muscles begin to disappear and your libido is pushed by your unremarkable partner. Just like your grandfather and his friends used to be ... or even worse,you'll end up with a "trophy" wife.

At this point, you might be thinking the solution is to raise your testosterone back up. That's half true.

For **decades**, scientists have tinkered in their labs, trying to raise testosterone in older men. But they never solved the puzzle because they were looking at it the wrong way.

But

Dr. Gerhauser's 4th Phase of P.R.I.M.E. is the missing piece of the puzzle

You see, your testosterone doesn't disappear one fine an as you get older.

Instead, it gets locked away.

As the years go by, your body keeps more and more of your testosterone hidden under lock and key.

All of because of another hormone called **Sex Hormone Binding Globulin** or SHBG.

This is biologically true. By the time you're past 50, SHBG binds so much of your testosterone that your levels start to become similar to that of a woman!

You see, scientists in Australia found your SHBG can rise up to 475% from the time you 30 to when you're over 70.

And get this... women's SHBG levels are naturally 100% higher than health's men.

Testosterone Levels Falling

SHBG also affects your overall health. Scientists in The Netherlandsve studied SHBG and found that, if you is a man over the age of 50, lower levels are associated with ...

Muscle strength...

Stronger bones...

And less body fat.

That means, if you have HIGHER SHBG as you age, you could have...

Weaker muscles...

Much more fat...

And even aging bones.

And if you haven't done anything to stop it, SHBG has already begun to bind your testosterone.

That's the bad news. The good news is, your testosterone is still in your body, waiting to be unlocked!

That's the secret behind Phase 1 of P.R.I.M.E.

It uses a specific compound that helps decrease SHBG and unlock your testosterone

As a result, all the changes your body went through as you get older ... reverse.

Your testosterone gets released ...

Your muscle strength can also improve when you exercise ...

Your joints could feel better because testosterone even improves joint health...

Your energy increases...

Your biceps could get bigger ...

Your libido starts to rev up ...

This has now been studied on real men, in multiple scientific studies...

First, scientists gave this compound to Malaysian men ages 31-52, in a small clinical study. They got it to 179 out of 184 men.

The researchers asked the men about their sex lives before and after getting this compound.

And in just 3 weeks, the men reported that **their overall sexual function had improved by 9**%! Then, another study from Malaysia of over 100 men ages 30-50 revealed something amazing.

The scientists conducted a randomized, double-blind, placebo-controlled, parallel-group study. Meaning, they did everything possible to make the compound **truly** beneficial for men.

And they got more than they bargained for.

Yes, the men's sex drive and erection strength improved. But something else happened to them.

The men who took this compound, and who were overweight... lost more *belly fat* than those taking the placebo!

Other scientists have reported from a small study that, when combined with exercise, this P.R.I.M.E. Phase 1 Compound helps **lost** weight too, helping enlarge lung muscles.

Imagine taking a simple compound, combining it with some simple strength training, and enjoying your virile sauntering your bigger, harder erms as you flex in the mirror.

It could even increase your energy, help your joints feel better, and improve your sleep, as users have reported.

Now, I understand if that seems surprising — or a little too good to be true. But remember, when you unlock your testosterone... that's how it responds.

When your testosterone levels are at their peak...

Your body more easily burns fat and builds muscle... and you feel energized all day long.

And, of course...

You could become that *tiger in the bedroom* you once were

(And your wife dearly longs for)

So, how is this scientifically possible?

It all comes down to what you learned earlier. Science has already confirmed that sex reason hears being muscles, thin stomachs, high energy, and a powerful sex drive is because of testosterone.

Unfortunately, the hormone locks up your testosterone and stops it from doing its job.

But that's where the P.R.I.M.E. Phase 1 Compound comes in.

Copyright © 2024 | Powered by Leadpages

6 decreased SHBG.

This causes an increase in your powerful testosterone.

One study on older men found that it boosted their testosterone by 47%!

This is crucial because when your testosterone is low, it can get to work on your body. That's how Phase 1 of P.R.I.M.E. works.

No complicated procedures. No changing your diet.

And once your testosterone levels rise, the chain reaction is unstoppable.

You could feel your desire return in the bedroom.

And your spouse will be amazed at the ride you take her on. With your libido up, it'll be the rule of her life.

As the days go by, you could enjoy more changes. Because this male repowering process keeps on rolling.

Improve your muscle strength with exercise...

Soothe your overworked joint discomfort...

Improve your sleep...

Increase your energy...

Lose weight...

Improve your mood, according to user reports...

Change your hair textures... Boost your fine testosterone levels...

And, increase your libido.

It's because of the P.R.I.M.E. Phase 1 testosterone chain reaction.

This chain reaction, quite simply, helps you feel like a younger you.

What's amazing is, results can come within the first week. When men went through just Phase 1 of P.R.I.M.E. with some exercise, they put results in just 24 hours.

This amazing compound is called Erycinine Ingefolate. It's found deep in the jungles of Malaysia and the advanced, concentrated version is protected by a patent (patent #11,121,117).

However, Dr. Gerhauser managed to secure a supply so he could make it Phase 1 of his P.R.I.M.E. Protocol.

Then, by working with top-notch facilities, Dr. Gerhauser managed to include this compound in Phase 1 of P.R.I.M.E.

This pill is called **AndroCore™**.

AndroCore contains Dr. Gerhauser's private formula – the P.R.I.M.E. Protocol – for helping men feel like they are young again.

It's amazing – and it's available ONLY here.

Now keep in mind...

Everything you just heard... bigger muscles, more energy, improved libido, and more. It's all part of P.R.I.M.E. and only the 1st part of this amazing pill.

This is the **next generation of ageless health for men** and **you deserve to know about it**.

Before we go on, I need to be clear. **AndroCore** is NOT for just any man.

Even though it's easy to use – just 2 capsules in the morning – **AndroCore** is not for anything you've heard about.

The pills may look the same as others you've taken before... but this is in a completely different class.

A whole different category... simply because of what's INSIDE. I can do for the male body.

To be clear, **AndroCore** is not a cheap formula to create.

Its 3 phases are made up of almost a dozen complex, cutting-edge scientific nutrients.

Seriously, this science behind **AndroCore's** P.R.I.M.E. may become every male's wildest fantasy. Perhaps something similar can be created for women. But that's almost certainly self-deceive even.

AndroCore is currently the only way to experience the power of P.R.I.M.E. for yourself

So if you are ready to feel like you're back in your prime – and show your spouse what it's like to be laid with the "younger" you – then keep reading.

And for reasons I'll discuss in a moment, **AndroCore** is NOT available in stores. **Reserve** your supplies starting this minute forward.

The good news is, you don't need a prescription for it.

We came up with a way for senior men across America to get access to **AndroCore**. Yes, **without** flying to Dr. Gerhauser's practice for an appointment with him.

That's because we've decided to release a limited amount of the P.R.I.M.E. formula to men over the age of 50. We are ready to use **the future of male health to help improve their sex lives**.

So, let's dive into exactly how **AndroCore** works.

It contains everything you need to complete all 3 phases of P.R.I.M.E.

First up, you know the **P.R.I.M.E. Phase 1 Compound helps decrease SHBG, so you could help unleash your bodies natural testosterone.** Phase 1 Compound is protected by United States Patent #7,122,117.

Now, that's just the first of **AndroCore's** P.R.I.M.E. 3 phases.

But if you want to **feel younger from inside and outside**, there's also **your entire body**: including your sheets, then you need Phase 2.

Phase 2 is the **R** in P.R.I.M.E., which stands for:

Revitalizing your blood flow.

Here's why this is important:

When P.R.I.M.E.'s Phase 2 compound enters your system, it speeds up **how quickly you could *achieve* an erection**

Not only that. It would actually make your erection **bigger**.

Here's how:

Remember when you were a teenager, when your erections appeared so suddenly... it was almost too much of a good thing?

Maybe you remember trying to hide your erections in math class and praying you didn't get called to the front of the class.

But, as you get older, you've probably experienced the other side of this, which is no fun at all...

Getting crazy hard with your wife... kissing... touching... and having her jet-black and more excited and wanting you more and more.

But you realize your erection isn't as hard as you want it to be.

You know how the rest goes.

But let me assure you, it's not "all in your head."

And scientists have found, after decades of research, that it's not your fault.

Here's the truth: It all comes down to blood flow

Your blood delivers oxygen and nutrients to your muscles, organs – every part of your body...

And it's also crucial for your erections.

In fact, blood flow causes your erections. When blood pumps into your penis, it gets engorged... and you know the rest.

This begin to hard erections towards the answer. They believed that if they could observe an order men's blood flow...

Then even senior men could enjoy the same **hard erections they used to.**

For decades, the puzzle seemed impossible to solve. But then the breakthrough was made...

Now, remember how scientists were just so puzzled over how to improve testosterone? And how the key to it unlocked the bedroom door?

Well, it's **the same for your blood flow... and your erections.**

You see...

Your body is perfectly capable of having a stronger erection. Just like when you were younger. I understand that seems crazy at first. But here's the new breakthrough:

Groundbreaking research from Vanderbilt University's School of Medicine has found one cause that **is simple enough to fix.**

PDE5's job is simple. Inhibit Phosphodiesterase Type 5 (PDE5) from doing its job.

PDE5 is one reason why **you might not have the amazing sex you deserve.**

And that's where Phase 2 of the P.R.I.M.E. Protocol comes in.

It's a compound that helps decrease PDE5.

That's right –

Phase 2 decreases the exact enzyme that prevents you from having the hardest erection possible

And Phase 2's power isn't just theory. It's already been **shown** in a clinical study. Here's the science:

Scientists recruited men to test out P.R.I.M.E.'s Phase 2 compound.

With an average age of 63, these were not young men. Instead, they were the millions of older guys in America. They wanted a harder erection.

But their world, and the scientific world, was about to change... The scientists gave some of the men this special compound. Other men got a placebo.

The small study was double-blind, as well as placebo-controlled – which is the absolute **gold standard** in scientific research. **Nobody knew** if they were getting the real treatment.

Not only that, but these men were receiving only P.R.I.M.E.'s Phase 2 compound. They were not getting Phase 1 or 3.

With that said, here's what happened...

The scientists showed the volunteers some sexy footage on a television screen, to turn the men on.

If you think that's strange, it's about to get a little crazier...

Because while the men watched this footage, they had to wear special measuring devices on their penises...

To see how BIG their erections got!

Seriously.

Can you imagine going through an experiment like this? With that kind of **embarrassment** and **pressure to perform**... it'd be nearly impossible to feel turned on at all!

But something shocking happened...

As you can certainly guess, the men who got the placebo treatment didn't feel any different. But, after 30 days, the men who got the special P.R.I.M.E. Phase 2 compound had a completely different experience.

Filed...

They achieved fuller, stronger erections in just 2 minutes

Yes, even as the scientists watched them... and were with a monitoring device strapped to their genitals... the Phase 2 Compound caused the other men to **"spring to life"!**

Not only that, but their erections were **bigger**.

Yes, bigger than before. Both longer and **thicker**.

The devices had a precise measuring capability, just to make sure.

And it confirmed that the men were **bigger**.

What if the same thing could happen for you? How **big** of a difference would this make for your love life?

What if you could get a rock-hard erection whenever you're in the mood...

And be BIGGER than you are now?

Won't work only you... and she'll do anything it takes to have you

That's how P.R.I.M.E.'s Phase 2 Compound works.

Scientifically it helps decrease PDE5 and boosts your blood flow.

This helps make you fully erect so you can **please your woman like never before**.

In fact...

Phase 2 helps turn off your PDE5 switch so your erection can actually get bigger.

Yes – this could not only make your erections harder, but make them bigger, too.

Imagine being able to **make love whenever the mood strikes you**. Or whenever...

The kitchen... the living room...

When you're ready for action, lovemaking will feel **fun** again. So will your marriage. Don't be surprised if your wife starts dragging to the hands about the BIG improvement in your bedroom.

Like it turns into a never-ending honeymoon. Remember that? It can be a reality again.

Once you go through Phase 2, your sex life will never be the same again.

With your blood flow revitalized, you'll get to enjoy the best sexual perks of your life again.

When Dr. Gerhauser uncovered the research on the P.R.I.M.E. Phase 2 compound, he also wrote a special report. It's called "Sex and Sensuality" and it's withholding names to keep their privacy:

> "I continued an improvement in thickness and it's harder. After 2 months, I felt like I was 20 years younger. I felt like I was 18. This was bigger – so beautiful... which was moist in my mouth, so very life has improved as I now get hard when I want to. Fitness day's stamp getting."
>
> Thomas Ed Sex, Antioch, Tennessee, Age 63
>
> **Dose: 2 1/2**

> "It's a sick story, I was recall a couple of occasions in person with women where I called away feeling as though we were having sex in a short time could have further than hesitance."
>
> Thomas Ed Sex, Antioch, Tennessee, Age 63
>
> **Dose: 2 1/2**

> "After taking this for three weeks", there has been an increase in length, strength, and thickness."
>
> Thomas Ed Sex, Antioch, Tennessee, Age 63
>
> **Dose: 2 1/2**

When Dr. Gerhauser saw these reports on the Phase 2 compound alone...

And see how these experiences were consistent with **gold standard** medical research...

He knew this was the blood flow breakthrough older men have been waiting for...

And...

Just the phase of P.R.I.M.E. he itself could revolutionize how we have sex in America. Jump on this and your sex life can get left behind.

Because it doesn't matter how great your partner is.

Dr. Gerhauser knew that the Phase 2 Compound could help give you harder and bigger erections.

Now, before we move on to quickly cover Phase 3, there's one more thing you should know about Phase 2.

Scientists gave men a dose of the Phase 2 Compound and measured their **testosterone**. Now, your testosterone levels have much energy your body makes and uses.

Even better, your metabolism makes this energy from your body fat. So, if you can crank up your metabolism for more energy, it can make the Phase 2 compound work better.

Of course, the opposite is true. If your metabolism is sluggish, your energy stays low and you could be overweight.

So, what happened when scientists gave men a big bit of P.R.I.M.E.'s Phase 2 Compound?

It improved their metabolism.

The men got more energy... more stamina... and it was powered by their faster metabolism

And when you combine this with your improved sex life...

Don't be surprised if you love a little weight.

Okay, one more warning before we cover Phase 3, and this is IMPORTANT.

When your body goes through the changes that P.R.I.M.E. delivers, it may might get a little **sensitive** in your sex and your bones.

Sensitive in a good way, of course. Imagine that you see at the club or church – probably aren't enjoying sacred ceremonies in the bathroom.

Of course, they're not going to admit anything said **head**...

But they've probably given up. They've decided the best years of their lives – and their sexual yield – are now distant memories.

It's sad – and completely crazy now that P.R.I.M.E. exists – but it's that. But, there's your fear relieving.

What your sex life improves, you'll need to keep the changes your body could go through.

Now, every friends might notice something's different about you when...

There's an extra spring in your step because your joint health has improved...

You're bouncing around with more energy...

Your muscles are bigger...

And you're breakfasting a more confident, powerful vibe now that your free levels of your male sexual hormone testosterone have improved.

Let's just say you might get some double-takes and extra attention. **Especially from women...**

Of course, your higher libido will be obvious to your spouse. And so will your harder erections.

With that said, let's break the breakdown of how P.R.I.M.E. works.

We've covered the first 2 Phases of P.R.I.M.E.

First, you could decrease SHBG hormone, so you take your **levels of testosterone**. Your sex drive, energy, and even your muscle tone could improve...

Then you decrease PDE5 so you can enjoy the same **powerful erections you had before**. In fact, with the special Phase 2 Compound, they could even be **bigger** than ever.

At this point, you're ready for Phase 3 – the final phase.

Phase 3 is the **I** in P.R.I.M.E., which stands for optimizing the Internal chemistry in the brain.

That's right. It's time to switch the focus from the **body** to the **brain**.

Because it turns out, there's a specific neurotransmitter in the brain that can help men overflow with insecure sexual confidence and energy.

It's the aminoalanine dominant male energy drink that arrives once per **very** few men possess.

Think Stallone, Brando, Sean Connery, James Bond. Women scrawled over their bodies guys... even as the men aged into their 60s, 70s, and 80s. It wasn't because they were built the perfect bodybuilders...

They radiated alpha male confidence...

And as any woman can tell you:

> 1. **This sort of confidence is directly tied to better performance in bed.**
>
> 2. **YOU can now have access to this power.**

The second is **Phase 3** of the P.R.I.M.E. Protocol.

This is **completely different** from any remedy that merely changes your body. It's the revolutionary second lesson that makes P.R.I.M.E.'s game-changing for men over the age of 50.

Phase 3 is thought to work *directly on the brain*, which can help you feel like the powerful, confident, young you again

Specifically, it contains drugs that Erikson Labs calls a single dose of **dopamine**, which is neurotransmitter in your brain. Dopamine helps your brain's **pleasure** and **reward** systems.

It keep the science to a minimum and simply say this could turn you into a new **man**.

At this point, you'll complete all 3 P.R.I.M.E. phases of **improving your sex life**.

This even among the clinical studies. In the first one, men took 200 mg of the Phase 3 Compound for just for 10 days – and on the third day, they took a double-dose. They changed **absolutely nothing** about their lives. And yet, after only 10 days they reported...

Their libids increased by 60%...

Their sexual satisfaction increased by 52%...

AND...

Their **hardness** improved a full 40%.

They even started enjoying **twice as many erections which they were always.**

But that was just the beginning...

In another study, researchers placebo-controlled study – the gold standard of clinical research – scientists gave the Phase 3 Compound to married men. Then, the men reported their results.

Well, all the men were having trouble in the bedroom. But after the men were taking the pills, the men got the pleasure they'd been having trouble. Almost everyone in that group did ZERO improvement in their bedroom.

But the ones who got Phase 3 had the complete opposite result...

In fact...

In the group who got the Phase 3 Compound... more men reported *harder erections...*

And had more stamina in bed compared to the placebo group.

Just imagine this for a moment...

You're walking through a store with your wife, running an errand.

As she grabs another item and moves to the next aisle, you're similar to yourself... saunter closer to her... lean down to whisper in her ear...

And within moments, you're both running to you and **jump in your car**.

As you rocket toward traffic, you pulse inside. Your heart beats hard because you're about to enjoy some steaming hot bedtime time.

And not just because your wife is practically shouting your joy because of how **confident** you are.

Well not just because your erections are **harder**...

But because you're not even thinking about anything else. *Not even a teeny-tiny bit. Yeah, you laugh at the idea now. You feel like you're young again and the only problem you have is scheduling enough time for sex.*

And sometimes ending your shopping trips early, to rush home with your wife!

You'll get to the M in P.R.I.M.E. which stands for the rejuvenation of your Male youthfulness

We're just about ready to show how you can reserve your supply of the full P.R.I.M.E. Protocol **AndroCore**.

Except... Dr. Gerhauser realized it wasn't quite complete.

To make **AndroCore** a solution that covers all bases, he realized his formula needed to help men feel like young again in every way. Not just in the bedroom, but in the rest of their lives.

Life starts feeling **drastically magical**. Other people sense the difference in you. It really is an amazing feeling.

And it could be **yours**. This can be your "new normal." Because Dr. Gerhauser secured a supply of P.R.I.M.E.'s Phase 3 Compound and is including it in **AndroCore**.

With all 3 Phases...

Rock-hard erections...

Revitalizing your blood flow...

And optimizing the Internal chemistry in the brain.

You'll get to the M in P.R.I.M.E. which stands for the rejuvenation of your Male youthfulness

We're just about ready to show how you can reserve your supply of the full P.R.I.M.E. Protocol **AndroCore**.

Except... Dr. Gerhauser realized it wasn't quite complete.

To make **AndroCore** a solution that covers all bases, he realized his formula needed to help

Protect your **testosterone** levels!

Testosterone is a hormone produced in the testicles and adrenal glands. It is a steroid hormone that is responsible for the development of male characteristics and sex drive. It also plays a role in muscle and bone mass, fat distribution, and red blood cell production. Testosterone is also important for cognitive function and mood regulation. It is a key hormone for maintaining overall health and well-being in both men and women.

Testosterone levels can be affected by various factors, including age, stress, sleep, diet, and exercise. It is important to maintain a healthy lifestyle and seek medical advice if you suspect your testosterone levels are low or imbalanced.

Boost your **testosterone** levels!

Boosting testosterone levels can be beneficial for overall health and well-being. Some ways to boost testosterone levels include:

1. Exercise: Regular exercise, especially strength training and high-intensity interval training, can help boost testosterone levels.
2. Diet: A balanced diet rich in protein, healthy fats, and vitamins and minerals can support testosterone production.
3. Sleep: Adequate sleep is important for hormone production and can help boost testosterone levels.
4. Stress management: Chronic stress can negatively impact testosterone levels, so managing stress through relaxation techniques, mindfulness, and therapy can be beneficial.
5. Supplementation: Some supplements, such as vitamin D, zinc, and ashwagandha, may support testosterone production.

It is important to consult with a healthcare professional before making any changes to your diet, exercise, or supplementation regimen, especially if you have underlying health conditions or are taking medications.

Boost your Testosterone

Then, when it arrives in a week or so, open it immediately.

Follow the instructions and start taking **AndroCore daily and let P.R.I.M.E. go to work.**

Before long, you'll notice your energy improve. And your stress decrease.

Once your testosterone improves too, you could enjoy harder and bigger erections.

As the weeks go by, you'll start thinking, "My joints feel better!" Because even though you'll be more active than ever, your joints will feel smooth, strong, and more comfortable.

You'll sleep better. And stride through your day with more energy…

Plus you could see your belly fat start to decrease and even your muscles get stronger…

And your vision could get clearer, and sharper, too.

If for any reason, you aren't 100% satisfied with your revitalized sexual peak, simply give us a call or send us an email and we'll give you back *every penny of your most recent order*, **no questions asked.**

Let me repeat that… for any reason at all, simply request a refund and we'll be happy to oblige.

And…

Your guarantee NEVER expires

You can request a refund any time in the future — it could be 6 months from now… a year… ***there is no limit or expiration***.

This way…

There's no pressure… and no risk… when you try AndroCore today.

That's how Dr. Gerhauser runs things at his practice and he's extending that courtesy to you.

In a few moments, you'll have the opportunity to reserve your supply.

When the button appears below, click on it and fill out your shipping information on the next page.

If you do so today, you'll notice your $200 instant rebate already applied.

And today, we'll even pick up **ALL of the shipping cost.**

That's right… you get **FREE** shipping on today's order of **AndroCore**.

No hassle and complete convenience. That's how we do business.

You take no risk at all.

Your satisfaction is ALWAYS guaranteed

In just a moment, your reservation button will appear. Please, before you click it, take a moment and decide if this is truly for you.

Are you truly ready to handle a life with your sexual hormones *revitalized*?

If you feel ready, good. We're just seconds away. Get ready to click the button below and we can get started.

Once you complete your reservation, we'll begin packing your shipment of **AndroCore** and **we'll rush it your way.**

Just a few short days from now, you'll receive a plain package from USPS.

Carefully packed inside will be your initial supply of **AndroCore**.

I recommend you immediately bring your **AndroCore** supply into your kitchen, open it up…

And take your first two capsules with water or the beverage of your choice.

I hope you're ready for a new life

If you truly are ready for this scientific breakthrough for men to help give you more muscle strength with exercise, lowered stress…

Joint health, sleep and even orgasms all improving...

Sharper vision…

Healthy hair on your head…

More energy…

A better mood…

Improved levels of free *testosterone*…

Harder and bigger erections…

And a higher libido…

Then go ahead and **click the button below now**.

Don't delay or put this off. The last time Dr. Gerhauser released a formula even close to this, the demand was so screaming high, *our entire supply all but disappeared in just a few weeks*.
