Great News from Maryland!

From Colleen

My 12 year-old daughter Eliza has always had a very laborious, uneven way of speaking. As a result, it takes her a very long time to express herself verbally. As she enters adolescence, her speech issues are exacerbating her social challenges, as her peers rarely have the patience to wait for her to complete a full sentence, let alone carry on a conversation. It also holds her back at school as she has excellent ideas but can't "get them out" in time to participate fully in classroom discussions.

Late last spring Eliza & I had a brief consultation with a highly regarded nutritionist who recommended we try [Speak](#). To be honest, I was skeptical, but as we slowly increased the dose, I could no longer deny what I was seeing - she was having a much easier time getting the words out, she could say more and

more words without having to stop to take a breath, and she was generally becoming more talkative & interactive. Early this fall, I overheard her have a 20-minute conversation with a peer. I was absolutely amazed - that had never happened in her whole life!

I absolutely love what [Speak](#) is doing for Eliza - when I hear her talk at a regular speed and fluency, my heart practically sings. It has been almost miraculous - I doubt I would have believed the difference it has made if I hadn't seen it for myself.
