## S&A Pro Trader

◀ Back to Products

*Pro Trader* is the most sophisticated trading research service S&A has ever produced.

The unique strategy behind this service is the way *S&A Pro Trader* editor Jeff Clark trades his own money, almost every day the markets are open.

Here's what Jeff said about it: "If you'd like to learn how I was able to retire when I was 42 years old, you need to learn this strategy."

In short, the most powerful thing about Jeff's *S&A Pro Trader* strategy is that it can allow you to make money no matter what a stock does – whether it goes up, down, or just stays the same.

It's a sophisticated options secret, used by the best institutional traders in the world – and it's not about taking huge risks for big returns. Rather, it's for those traders who want to control their risk and increase their probability of success.

Just ask Nancy Hill, one of Jeff's subscribers who's been making *S&A Pro Trader*-style plays in her portfolio for the past two years: "To date, I have averaged about 60% annually. I would have to say I am pretty happy and retirement is looking much more comfortable."

*S&A Pro Trader* is certainly not for everyone. But if you're interested to learn what the richest and most successful traders in the world do with their money – and you have at least \$25,000 in a margin account – this is the trading service for you.
