Testimonials:

Daniel L.: "It all started 6 years ago when my wife and I got married. We were told by friends and family to take out life insurance. While going through that process, I thought maybe I would be denied because I had 2-3 kidney stones a year and IBS (irritable bowel syndrome).

Much to my surprise I was denied, but not because the above mentioned. My Triglycerides (related to unhealthy cholesterol) were too high. At the time I had about a 6-8 level of Triglycerides. A normal range; low risk is 1.7 and above normal 1.7-2.25, needless to say I was in the extreme risk area. Over the next 5 years I went through a battery of different meal planning and doctor prescribed medication. About a year ago, after being on all these meds for some time and even mixing in some physical activity, my count was now at 9. Talk about a surprise!

Finally my family doctor sent me to a specialist to get specialized/intensified drugs to force it down, again 3 months later, I was now at a level of 11. At this high level count I was at significant risk for pancreatitis. It was still very hard to believe my life was at such risk since I physically didn't see or feel anything. It was at this time that some good friends introduced me to the mangosteen and minerals product, which in short provided me with all my daily nutrients, vitamins, 65 major and minor trace minerals, antioxidants, and over 140 different natural healing components from the mangosteen superfruit.

I really wanted to put the mangosteen and minerals product to the test. For 3 months I took 2 ounces of the mangosteen and minerals product in the morning, afternoon and evening. **During these 3 months I did not observe any strict meal planning, take any prescribe medications or even work out that much.** When the 3 months was up, I got my blood tested again. I was now down from a level of 11 to 5. Not only was my level significantly lower, but I was also no longer suffering from IBS and kidney stones (neither of which doctors could figure out nor remedy).

Fast forward 6 months and not only am I still no longer suffering from the IBS and kidney stones, but my Triglycerides are now in a safe level and I just signed off on a 20 year 1 MILLION dollar life insurance plan. I will never stop taking the mangosteen and minerals product because of all the added health benefits it gives. Thank you and may anyone who reads this seriously consider taking it for issues they may be suffering from, or want to prevent them from happening. "

Daniel L.
