## Product Description

### Pure Cocoa Butter

As one of the nation's larger suppliers of Cocoa Butter and other natural raw ingredients, we currently offer 2 different versions of wholesale cocoa butter below. Both versions are available in larger quantities by calling the home office for a custom quote. We currently have a number of larger customers that order in truckload quantities and we can facilitate orders of any size. We typically stock over 50,000 lbs. of each version on the floor for prompt shipment.

Our Pure Primed Pressed Natural Cocoa Butter (Kosher food grade)...Natural Cocoa Butter is extracted from the cocoa bean, refined for purity and left un-deodorized. Because of the lack of deodorization, bulk natural cocoa butter has a pale yellowish or slight brown color and has the typical chocolate odor normally associated with cocoa butter. This version has a fantastic chocolate aroma making it the cocoa butter of choice for any customer that can appreciate the

natural chocolate aroma.

Our Natural Deodorized Cocoa Butter (Kosher food grade)...Our Natural Deodorized Cocoa Butter is extracted from the cocoa bean, refined, deodorized and left in its natural color. This version is higher in natural anti-oxidants than the white refined because it does not go through the bleaching process. Because of the deodorization, it does not have the strong natural odor that natural cocoa butter is known for. This is great for soap making and personal care products where odor is an issue.

## Wholesale Bulk Cocoa Butter

Also known as Theobroma oil, cocoa butter is a pale yellow vegetable fat that is derived from the cocoa bean. The process is quite interesting. The beans are first fermented, then roasted and finally separated from their shells. After that process, about 54-58% of the remaining product is pure cocoa butter. Chocolate liquor is then pressed to separate the butter from the cocoa solids. After this process the butter is usually deodorized to remove some of the strong taste which is often undesirable.

As a manufacturer the facts are simple, we have some of the best wholesale prices on pure cocoa butter and [essential oils wholesale](#) anywhere in the USA which makes us your place to buy. [Where to buy peppermint oil](#) and thousands of other great products.

**So what are the benefits of cocoa butter?** Well, for starter's it is the primary ingredient in the commercial production of both white and milk chocolate and we all know how important chocolate is to our lives. In fact, chocolate production pretty much dominates the consumption of cocoa butter and really drives the price on this tasty commodity.

**Terms of Use Important!** Customers should purchase products from Bulk Apothecary with the clear understanding that all products must be used at the customers own discretion and only after referencing Material Safety Data Sheets (MSDS) and all other relevant technical information specific to the product. Bulk Apothecary sells all of its Nature's Oil brand and Bulk Apothecary Brand products for manufacturing use. Consequently all of these products may or may not be labeled for retail consumer use. This includes nutritional facts labels where applicable.

Furthermore all information found on Bulk Apothecary's website is obtained from current and reliable sources but Bulk Apothecary makes no representation as to its comprehensiveness or accuracy.

As far as other uses, you may find it interesting that wholesale cocoa butter is used widely in Pharmaceuticals. Today many companies exploit cocoa butter's interesting physical properties. We all remember the M&M commercials talking about how they melt in your mouth, not in your hand. This is because bulk cocoa butter is solid at room temperature and melts at body temperature. Because of this unique melting point it is considered a perfect base for medicinal suppositories that need to be in solid form until inserted into the body. Probably not something you would like to associate with your favorite tasty treats but now you know.

Bulk Cocoa butter is also one of the most stable fats known to man. When you couple that with its high antioxidant properties, it is great at preventing rancidity of all sorts

of products. This makes it a great addition to any product with a high oil content. When you add all that to the fact that cocoa butter has amazing emollient properties and a very pleasant fragrance, it is no wonder that it has become popular in soaps and personal care products. These properties also make pure bulk cocoa butter a popular ingredient in stretch mark creams. In fact today, most stretch mark creams on the market contain large quantities of this amazing ingredient and many larger companies use it as their main marketing push. Take Palmer's Cocoa Butter Products. Their entire product line is designed and marketed around the benefits of this simple butter.

If you like our wholesale cocoa butter, please don't forget to check out all of our aromatherapy essential oils, bulk [food grade citric acid](#), wholesale [soap making](#) supplies and our melt and pour soap bases. We carry a fantastic selection and our prices are almost unheard of.

### Absolutely a wonderful product! ★★★★★

by Unknown – 30th Apr 2014

The smell alone is enough to make me purchase this product over and over again. I l love the bucket it comes in...totally reusable!

### Hard to use ★★★★★

by Unknown – 13th Mar 2014

It came fast! The cocoa butter was fine, but hard to get out of the plastic container. When I was a kid, we bought cocoa butter bars for sunbathing. They were hard, and perfectly white, like these, chocolate fragrance, but they were in candy bar wrappers. Then

### wonderful ★★★★★

by Bethany – 10th Aug 2013

Smelled heavenly---best price on the internet---fresh--loved the packaging.

### Feeding my Skin with Cocoa

by W. Tiller – 10th Aug 2013

I absolutely love this product. It's just what I was looking for. The price was incredible. Buying 16 ounces at store prices would be over \$32 per pound. I'm soo glad I found your website. And the product quality is superb.

by Susan – 6th Aug 2013

Nice cocoa butter. I use it in lotion melts and soap.

by Erin – 29th Jul 2013

I love the cocoa butter; it came in a 1lb container, and I will say that it was really tough to get it out of the container. I think I will warm the container up with warm water the next time I use it.

by Your Name – 24th Jul 2013

Love this product!

by super10s – 10th Jul 2013

I thought that the raw undeodorized cocoa butter would be best for a more intense cocoa flavor for use in foods. This raw flavor also contains the more dominant aromas of the associated non-roasted vegetable material in the pressing. The flavor that we associate

**can't get enough! ★★★★★**

by Maya – 9th Jul 2013

I bough this in the 1lb jar along with white refined Shea butter. I made a belly butter for my daughter to use while she's pregnant after seeing that commercial cocoa butter products have so much other stuff in them and very little cocoa butter.

I am now making more for friends and

**Yummy :) ★★★★★**

by Cyndi – 26th Jun 2013

I love the feel of this cocoa butter. It's so creamy and smooth & the smell...well, I wish I could eat it!
