My Vemma Story:	I was given VEMMA by my son Dr Phil. He knows that I have a few problems.(Arthritis, high cholesterol, and thyroid). I started taking Vemma in August and all of my blood work has been greatly improved. I am feeling more energetic and I think I even look better for a 61 year old. This stuff is good tasting and so easy to take every day. I am so lucky and blessed to have been introduced VEMMA. If I can help others by telling them about this product , I will be glad to do it.
