## Memory Issues

### Testimonials:

**Memory regained:** "I had a Gran Mal seizure on June 13, 2013. Due to the severity of the seizure my memory was damaged severely. I could barely remember doing things, or not doing things for months. I stumbled over words almost constantly. My neurologist told me it would take at least a year for improvement. I started on the children's version of the mangosteen and mineral products on a regular basis the end of June within weeks there was a tremendous change, I could remember most things that I did, and most of the time know if I didn't do something. As of today, January 23, 2014 my memory is pretty much back to where it was before the seizure. The only other thing I changed was adding fish oil on the advice of a friend. But the mangosteen mineral product was what really did the trick."
