MRSA

Testimonials:

B. Watson: "I would like to share a truly LIFE CHANGING and LIFE SAVING story about the benefits of mangosteen and minerals. My Brother, who is 65 years old, was recently diagnosed with MRSA. As you know MRSA is the "SUPER BUG" that we have created by the ongoing use of antibiotics. The bug was and is so strong that it becomes resistant to Vancomycin and Daptomycin antibiotics. My brother has been on antibiotics since December 2010, following a surgery, where he contracted the MRSA. In February of 2011 I went to visit him in the hospital at which time he was completely lethargic. He did not recognize our mother, and sometimes confused me for a nurse.

He had lost 50 pounds in one month's time. He was not eating or drinking and slept most of the day. He had not walked or moved from his bed since February 2011. He also has blot clots from the bottom of his liver to the backs of his knees, which have turned to solid scar tissue. At the time of his surgery, they put in a IVC filter to stop the possibility of blood clots from traveling to his lungs or brain and killing him. However, the filter was the main source of infection.

In his weak condition removal of the filter would result in his death, so they tried another high powered antibiotic called Linezolid and Tigecycline to see if these would help. If those didn't, they told us that was the last resort that they knew of, and we would have to make some decisions. The problem was if he stayed on that for any length of time, it would also kill him because it depletes the platelets in your blood and causes brain damage.

They kept doing blood draws and testing him every four days to see if the medications they were giving him were working; every time they would come back positive for MRSA. So basically we were told to choose which method of death we wanted for our brother. My other brother and I decided to call a doctor named Dr. Edwards to ask him what to do. He promptly told us to put him on a large dose of minerals and mangosteen for the next few days and keep in touch with his progress.

Well, let me tell you, we gave him this product and the VERY NEXT day, he was awake all day, more alert than he had been in 2 months, his eyes were brighter, and we could carry on a conversation with him. Needless to say we were thrilled. When his physician returned in four days he was AMAZED with the turn around. Of course, he said he thought the drugs they were giving him had finally started to kick in, and family support also helped.

REALLY? After being on the drugs for 106 days with consistent positive test results, four days of minerals and mangosteen, and our very first NEGITIVE BLOOD result, we knew what it was. I am happy to report that as of April 2011, we have never received another positive test result. My brother is walking, eating like a horse, and is in a rehab with the prognosis, heading for home at the end of May.

How in the world you can ever give enough thanks for this product and all the SPECIAL people who helped us out, I will truly never know. This has truly been a blessing in ALL our lives. THANKS SO MUCH!!!"

B. Watson
