Polycystic Kidney Disease

Testimonials:

Brian: "I was diagnosed 15 years ago with Polycystic Kidney Disease after many tests to try and find out why my blood pressure was so high. I would pass out. When the doctor found out what was going on we started a process of elimination, trying to find a medication to control my blood pressure without so many side effects. We finally came up with 2 that somewhat helped but they had side effects. For the past 15 years my blood pressure has been about 155 over 100. That was really high but it was the best we could do. I was introduced to the mangosteen and minerals product and after 3 months on the product I made an appointment with my doctor to get a check-up. He and I were amazed at the drop in my blood pressure in just 3 months with just taking the product. My blood pressure now is averaging around 115 over 70 and I feel so much better."

-Brian, North Carolina
