Rheumatoid Arthritis

Testimonials:

Nancy: I have had Rheumatoid Arthritis for 10 years and though I have always tried to fight this disease naturally, after a bad flare up a couple years ago, which damaged both knees significantly and put me onto a cane. I was about to give in and go on the Methotrexate that my Dr. had been insistent on my taking.

About that time, a friend told me that her sister had relief from her RA pain by using the mangosteen and minerals product so I decided to try just one more thing before giving in. I began taking 2 oz of the mangosteen and minerals a day in April 2010. I noticed my hair and nails growing thicker, but it was not taking away the severe pain and inflammation in my knees and other joints. By this point I had purchased a lift chair as I could no longer get up off my couch and had gotten a prescription for a walker because my cane wasn't helping enough.

I was in so much pain and had no more quality of life. I was sleeping 10 hours or more every night, and during the day I either sat at my computer or on my lift chair. I could no longer cook or clean my house, and was eating cereal, sandwiches or ordering take out for my meals. I was about to give up on it when my friend told me to increase my dose to 4 oz a day, which I did in Jan 2011, and that is when I began to notice changes. After 3 weeks I began dreaming, which was exciting to me because I also suffered from sleep apnea which prevented me from getting into a deep REM sleep, keeping me in a constant tired state.

I was having nights that I did not wake until morning which hadn't happened in many years. I woke up refreshed after only 8 hours, started having a lot more energy, and stopped falling asleep everywhere like an old woman (I'm 50). It took a couple more weeks and I began experiencing a lot of relief of the pain and inflammation in my knees.

The pain level was about as low as I had previously experienced during the summer when I had a steroid shot injected into each knee. However, the relief from those shots only lasted about 4 weeks, but this relief has sustained now for about 2 months.....plus I didn't have to endure a needle!! I just drink this great tasting liquid...2oz in the morning and 2oz later in the day. I have also had a decrease in pain in all of my joints and have been feeling wonderful!!!

The mangosteen and minerals product has given me my life back and I am confident that as time goes on I will just continue to get better.

Nancy - Cedar Hill, TX

Annette: "I was diagnosed with RA in late 2008. Every joint painful and tender, I couldn't close my hands to make a fist, they cut my rings off! I'm a nurse and working became increasingly difficult, so I was looking at disability when a client introduced me to the vitamin, mineral and mangosteen product. I said yes because it was liquid, absorbable and not wasted. I didn't expect to see a change in the RA. But within 8 weeks my knuckles were smaller and I could make a fist and I was feeling so much better. I began weaning off those horrid medications. Off the methotrexate, plaquinil, Enbril, steroids and ibuprophen 800! I'll gladly be on this product the rest of my life!"

Margaret: "I was diagnosed in 2011 with RA, it became progressively worse. In early 2013 it was difficult to walk. I began taking numerous medications for relief including methotrexate, Flexeril, Vidodin/Norco, Motrin 800 mg, meloxicam, and Arava. In April 2013 my C Reactive Protein level (CRP which measures inflammation) was 60. On September 19, 2013 my CRP level was at 83. I began taking the Mangosteen and Minerals in September and on October 7, 2013 my CRP level was 15! On January 3, 2014 my CRP level was 6! I am no longer on ANY medication, prescription or over the counter, for the first time and I can walk without limping and go down stairs normally! My hair had been falling out from all the meds and it is now growing back! Inflammation is the common thread in all disease processes including heart disease. We need to share this with everyone we know!"

Update: "I have been taking the Mangosteen and Minerals for a while now. My last labs from February 2014 revealed my CRP levels to be 2.2 which is within the normal range of 0-3!!! My rheumatologist is speechless. She had been trying to get me to take Humira which I refused. I'm grateful and my passion is to share this great news with everyone I am so excited about my results!"

- Margaret
