## Is the FDA going to regulate eCigarettes? [Back to top](#)

The FDA is currently working on regulations and the end result is still unknown. We feel regulations are needed in the eCigarette industry which includes no sales to minors and on e-Liquid the manufacturing process including product labels displaying ingredients and batch numbers with production dates.

## TESTIMONIALS

After reviewing e cigarettes for over a year I thought there was nothing new that would interest me about an e cigarette. Then my friend gave me the 777 E Cigs to review, at first glance it looked pretty much like a basic e cigarette. After digging into it I quickly noticed some of the differences in quality that had been designed to give the user a unique product. SNEAKYREVIEWS

I just received my 777 ecig kit in the mail and couldn't wait to try it. I'm happy to say I was impressed! I really like the manual battery and the amount of vapor I get. The flavor is one of the best so far. I'm thrilled to finally have something that works! -Belinda

I've been a smoker for over 25 years, and bought a 777 eCigs Deluxe Starter Kit. Now I enjoy smoking in my house, car and even in restaurants without offending people. My Grandchildren even noticed I don't smell like an ashtray anymore. Thank you 777 for a great product. -Tim

I haven't had a cigarette since i received my 777ecig starter kit. I am down to medium and sometimes 0. It feels so good. I love their different flavors like coffee, apple and verry berry. I really think I added 10 more years to my life. Thank you triple seven -Matt

My husband and I have both been consistent smokers for over 12 years. Neither of us really enjoyed being smokers but it had been such a part of our lives for so long we felt we would never stop. Thanks to 777 ecigs we are tobacco free! -Karen
