The major advantage of the **Electronic Cigarette** over the traditional tobacco cigarette is the elimination of combustion process.

Research on nicotine and its exact affect on depression is in its early stages, however the signs at present are that it can aid the symptoms, which will give hope to millions around the world who suffer from depression and the misery it can cause.

Nicotine is not that dangerous when it is not burning. The fact is, nicotine is just one of

4,000 chemicals consumed in cigarette smoking and it is some of these that are the killers not Nicotine.

Nicotine is actually a naturally occurring compound in nature and it is not only found in tobacco leaf, but is part of the food chain with trace elements in many vegetables, such as potatoes, green pepper, tomatoes and even some teas, but it suffers from a bad reputation due to its association with tobacco.

Recent medical research shows that nicotine could help with a number of illnesses apart from

depression including: **Schizophrenia, Alzheimer's disease, Parkinson's disease and obesity** just to name a few. Among traditional nicotine delivery systems available on the market today, the new EPUFFER PVD (Portable Vaporizing Device) also known as electronic cigarette, is a great alternative for those who wants to cut-down on tobacco product intake.

EPUFFER has been featured on many television and radio networks including The Doctor's TV show where it was rated as one of the top health trends of 2009. In March of 2010, it was re-evaluated and recommended as a quit smoking device that may help smokers more easily abstain from smoking as it provides both physical and psychological satisfaction without Tar, Carbon Monoxide, or other cancer-causing chemicals.

MAGNUM REV2

Top Health Trend of the year!

Cartomizer + Battery Two-Piece design

Begin your Smoke-Free Life!

ePuffer EAZE MAGNUM REV-2 Award Winning Electronic Cigarette

The new EPUFFER MAGNUM REV-2 electronic cigarette is a second generation high tech non-flammable product developed to provide smokers with a clean alternative to smoking. The patented two-piece (Disposable Atomized Cartridge + Battery) design allows smokers to always enjoy the same quality taste over a long period of time as each cartridge has a built-in atomizer. It looks, feels and tastes like a real cigarette.

When air flows through the device, it is detected by a microprocessor. This microprocessor then activates an atomized cartridge which injects tiny droplets of the liquid into the flowing air. This produces a vapor mist which is inhaled by the user. The addition of propylene glycol to the liquid makes the mist better resemble normal cigarette smoke. The microprocessor also activates an orange glowing light at the tip to simulate real smoking experience.

EPUFFER MAGNUM REV-2 STARTER Kit Content

- ✓ One High Capacity REV-2 Lithium Rechargeable Battery (Ø= 9mm, length: 77mm)
- ✓ One Mini REV-2 Lithium Rechargeable Battery (Ø= 9mm, length: 60mm)
- ✓ Two Premium REV-2 Tobacco Flavor Atomized Nicotine Cartridges
- ✓ Universal AC Battery Charger 110/240V
- ✓ Power Line Cable
- ✓ Instruction Manual

Bonus:

- ✓ 5 Spare Atomized Cartridges (Equals 4-5 Packs of Cigarettes)
- ✓ 10% Discount Coupon Code for spares and accessories
- ✓ Elegant black velour Travel Pouch

Save Big!

Benefits and Advantages

ePUFFER E-Cigarette produces vapor that looks and feels like real smoke. It is truly smoke free alternative to smoking. The electric-cigarettes allows smokers to enjoy the same pleasure as smoking traditional cigarettes by imitating the whole process of smoking.

What is ePUFFER Electronic Cigarette?

ePuffer performs similarly to traditional smoking. It looks, feels and tastes like a cigarette or cigar, and delivers all the pleasures of smoking, without all the problems. The secret to what makes the E-Cigarette better than traditional smoking is what is inside this revolutionary new product.

The non-flammable Electronic Vaporizer is driven by modern microelectronic technology, a small rechargeable battery and a unique, self replaceable cartridge containing water, propylene glycol, nicotine, a scent that emulates a tobacco flavor and a membrane to suspend the ingredients. When using the Electronic Cigarettes, the act of inhaling or smoking it produces the tactile and craving satisfactions traditional smokers seek, and triggers a vaporizing process that releases a simulated smoke that is **actually a vapor mist that harmlessly evaporates** into the air within a few seconds.

Why choose ePuffer instead of the traditional tobacco cigarettes?

- Smoke it anytime, anywhere; not banned.No Flame, No Ash.
- Costs less than tobacco smoking. With rechargeable batteries.
- Tastes like tobacco
- Virtually odorless; no lingering smell in clothes, home and car.
- Replicates behavioral and physical pleasures of smoking.
- Satisfies nicotine cravings.
- Easy to use (doesn't require matches, lighters or ignition).
- Won't stain your teeth and damage your skin.
- No more embarrassment or guilt.
- Not offensive to others.

What makes the new EPUFFER MAGNUM REV-2 different from other electronic cigarettes?

The EPUFFER Electronic Cigarette looks and feels like a real tobacco cigarette, making it comfortable and easy to use by any smoker. It comes in two parts - the first is a rechargeable lithium Inteli battery with a built-in micro computer and the other is a disposable atomized cartridge. Inside the cartridge you will find the nicotine pad and atomizing mechanism. Once the disposable cartridge is finished, all you need to do, is simply unscrew the used cartridge and screw on the fresh one. No cleaning or maintenance is required. A main advantage of this device is the atomizer is never reused, so you don't have to worry about problems including nicotine build-up, clogging and residue. Smoker will draw in a Vapor that looks virtually the same as a smoke from real tobacco cigarette.

What's in regular tobacco cigarette?

Second-Hand smoking is also very dangerous

More than 10,000 non-smokers will die this year due to tobacco use -- over 1000 lung cancer deaths and at least 3000 deaths from coronary heart disease will be caused by second-hand smoke.

Tar coats your lungs like it does the roads. A 20-a-day smoker breathes in a mug full of tar every year. Tar damages the hairs that clean the lungs and it inflames the air sacs. Mucus builds up and this results in the smokers' cough. Eventually it causes bronchitis and emphysema. It also yellows the teeth, hands and skin.

Carbon Monoxide robs your brain, heart and muscles of oxygen. Carbon monoxide combines with nicotine to thicken the blood. This can cause heart attacks and strokes, blood clots in the limbs and amputation. 3 out of 4 deaths from heart attacks in men are due to smoking.

Poison

- Acetone
- Acetic Acid
- Ammonia
- Arsenic
- Benzene
- Cadmium

Common uses

- Nail Varnish Remover
- Vinegar
- Cleaning agents
- Ant poison
- Petrol Fumes
- Batteries / Smelling Salts

- Car Charger
- Instruction Manual

- Universal AC2USB Adapter 110/240V
- Micro USB Charging Cable
- USB Charger

SNAPS RECHARGEABLE PCC E-PACK FEATURES

- New SNAPS Magnetic Charging socket (drop and charge)
- High Rate Discharge Internal Battery - 540mAh
- Extended Lifespan, 420 charge cycles
- Holds: 1 Assembled E-Cigarette (92mm), Spare Battery and Cartomizer

SNAPS RECHARGEABLE BATTERY E-PACK EDITION (E55M)

- New SNAPS Magnetic Activation and Screwless Design
- High Rate Discharge - 120mAh
- Extended Lifespan, 400 charge cycles

SNAPS ATOMIZED CARTRIDGE

- New SNAPS Magnetic Screwless Design
- Increased cartridge capacity by 20% - 1 cartridge equals approx. 400 puffs.
- Direct air-intake for smoother draw and silent operation
- Fresh atomizer in each cartridge
- Available Nicotine densities: 1.2mg, 0.6mg and 0mg

The Science Bit

When air flows through the device it is detected by a tiny microprocessor. This activates the atomizer which dispenses miniscule droplets of liquid into the air flow. A secret combination of propylene or vegetable glycerine is added to increase the resemblance to real smoke. This quickly evaporates into a vapor and smokers inhale the most life like alternative to cigarette smoke on the market.

Why This is Needed

Alternative ways to give up smoking or to choose a smoke-free lifestyle are of course effective however smokers tend to return to cigarettes as they miss the habit of smoking along with the nicotine. The brain associates inhaling smoke with the calming and stress relieving properties of nicotine and so when the smoking experience is taken away, smokers must retrain their brain and make significant changes to their lifestyle in order to maximise willpower.

These changes include being active after meals, taking up a hobby that uses the hands or meditation techniques, many also find that they replace this hand to mouth habit with food, which in turn causes the weight increase many new non-smokers complain of.

Why EPUFFER is the Best on the Market

EPUFFER doesn't claim to be the solution for those looking to cut down or give up smoking but it does deliver everything a smoker needs to choose a smoke-free lifestyle. For instance, it delivers varying strengths of nicotine to enable users to wean off gradually while mirroring a cigarette without delivering toxic tar and chemicals to the lungs.

The EPUFFER don't smell so there is no longer a lingering odour on clothes. With the elimination of smoke and tar, premature aging decreases, and skin becomes clearer. Gums are healthier and teeth can return to a natural white not stained by smoke from a real cigarette.

As new EPUFFER SNAPS MAGNUM REV-3 is so easier to "snap" together there is no stress, as taking one out of the E-PACK PCC takes less than dispensing a real cigarette and so nicotine cravings can be combatted in seconds.
