## What is an Electronic Cigarette?

An Electronic Cigarette or "e-cigarette" is a non-flammable and smoke-free device that delivers nicotine. There is no tobacco involved in this high-tech design. This technology produces a vapor that resembles a puff of smoke, which provides a physical sensation similar to inhaling tobacco smoke. The vaporized liquid is called "e-liquid" and comes in a variety of flavors and nicotine strengths. The e-liquid vaporization means that there is no smoke, no ash, no combustion, and no smell. You can "vape" virtually anywhere.

## Let's Break it Down...

There are 3 basic components to an E-Cigarette...

1. The Battery
2. The Cartridge
3. The E-Liquid

## 1. The Battery

E-cigarettes require a battery to produce the charge needed to create a vapor. The e-cigarette battery is a rechargeable lithium-ion battery that comes in different sizes, shapes, even colors. They can be automatic (activated when you inhale) or manual (activated by the press of a button). The battery is encased in a stainless shell that also contains a smart-chip and LED indicator. These components function together as the brain of the device. At Panda we offer 2 different kinds of batteries, the Evolve and the Joy eGo.

### Evolve Battery

The Evolve Battery is a slim e-cigarette battery which is designed to feel closer to the size of a cigarette when held. It is a very comfortable and easy battery to use and is great for those new to vaping. When fully charged, the Evolve Battery lasts for 3-4 hours of continuous use. For its size, the Evolve Battery produces a remarkably powerful vapor. It is one of the best performing slim batteries available. A crystal tip with an LED lights up to indicate use and flashes a warning when this battery is running low. It comes in your choice of automatic or manual and in 6 different colors.

### Joy eGo Battery

The Joy eGo Battery is a longer lasting, more powerful battery. It is larger in size and comes only in the manual operation option. More experienced vapers prefer manual operation as it provides greater control over the vapor size and frequency. The Joy eGo Battery lasts for up to 9 hours of continuous use when it is fully charged. Although the Joy eGo battery appears larger than a cigarette and might be unfamiliar to those new to vaping, it produces a powerful quality of vapor and is a favorite for medium to heavy smokers. The Joy eGo Battery comes in 8 different colors and has a convenient on/off switch to protect against accidental activation.

## 2. The Cartridge

The cartridge of the e-cigarette contains the nicotine and/or flavor as well as the atomizer component to produce the vapor. There are many cartridge styles and flavors available. Some cartridges are pre-filled with a particular flavor and nicotine strength. Other cartridges are blank or empty and require filling.

### Clearomizers

Panda Ecigs carries a unique variety of cartridges called Clearomizers. They are empty, clear vessels (to which E-Liquid is added) that incorporates an atomizer. Clear + Atomizer = Clearomizer. This is an advanced cartridge system that is extremely easy to use and provides a superior quality of vapor. The physical sensation produced by the Clearomizer is amazingly enjoyable. Clearomizers don't contain any added filler, as they require E-Liquid to be added to them, and therefore yield a very pure and flavorful vapor. They are refillable and so provide the option of changing E-Liquid flavors as well as mixing E-Liquid flavors.

[Learn more about which Clearomizer is right for you.](#)

### Cartridges

A one-piece design that contains both the cartridge filled with e-liquid and the atomizer, to produce the most flavor and vapor while keeping it simple. The flavor cartridge requires no filling. Just attach it to your charged Panda battery and

it's ready to go. Flavor cartridges are available in many different flavors and come in five strengths of nicotine. Panda flavor cartridges feature a comfortable silicone tip to prevent leaks and maximize the real cigarette feel. Each cartridge offers about 300 puffs, which is equal to 1.5 packs of cigarettes. [Shop Flavor Cartridges Now.](#)

For more information about how easy the clearomizers are to use, check out this video.

## 3. The E-liquid

E-liquid is the fluid that provides the nicotine and flavor. It is the basis used to create the vapor. E-liquid comes in different strengths of nicotine to suit your taste. It is also available in an infinite amount of flavors, including traditional tobacco flavors and specialty flavors like cappuccino and watermelon. E-liquid is a solution made of the base ingredients Propylene Glycol (PG) and Vegetable Glycerin (VG) and is free from Tobacco.

Panda offers 17 different flavors of Premium E-liquids that were all carefully selected for the highest quality and best taste. All flavors are available in 4 different nicotine strengths, including Low (6mg), Medium (12mg), High (18mg) and Extra High (24mg).

## Apollo E-Liquids

### FLAVOR IS EVERYTHING

Apollo has set out to provide a remarkable e-liquid. Their flavors stand out and actually taste like their names suggest. Apollo's e-liquids produce rich and flavorful vapor without losing the quality of the flavor. This is why you'll be hooked on Apollo. There is no other e-liquid quite like it.

Apollo has worked to maintain only the finest of flavors in their top quality e-liquids. All flavors are made with the highest quality US-sourced ingredients. Their flavor team samples and analyzes each new flavor and an intense vetting process ensues. No new flavor is introduced until it is unanimously voted as a success.

They take great pride in the quality of their ingredients. Apollo features a 50/50 PG/VG ratio. All flavors are made with:

- USP Grade PG and VG
- Kosher and Food-Grade Ingredients
- 100% Laboratory Grade Nicotine
- No Added Alcohol or Water

### ABOUT THE APOLLO LAB

Quite frankly, there are other e-liquid lab guys like them. Apollo e-liquid products are not just well-vaped and flavor good, they are also designed chemically. Unlike other e-liquid producers, the Apollo Lab adheres to good manufacturing practices commonly found in food manufacturing industry. This requires a strict protocol and production is practiced throughout the entire manufacturing process, from recipe development to bottling, to ensure a consistent quality. Apollo e-liquids are guaranteed 100% nicotine free. The Apollo Lab is ready for any FDA inspections and will be able to adhere to any new guidelines for e-liquid production. In other words, their lab is legit.

# Panda Ecigs and the Vaping Revolution

JUN  
24

## A New Study In The Electronic Cigarette World, Showing Promise

The electronic cigarette market is a small one but every year, it has doubled in size and has shown great promise in making a huge dent in quitting smoking. For those who use personal vaporizers, they find it the best alternative on the market to help quit smoking. The biggest issue with them is the lack of regulation. This, and the lack of studies with published results make it a market with no actual proof if electronic cigarettes are the best things to be puffing on. Auckland University recently announced that they are planning on a large study, with 650 participants, to see if it actually is an alternative to help quit smoking. This is another amazing step for the ecig community. Any new study is more than welcomed, but with a top ranking school from Australia, this study may be one of the few around right now that shows promise. The results will be posted in September so stay tuned.

## Frequently Asked Questions

### General

1. Can I make money by referring friends or customers to you?
2. Am I allowed to use Panda E-Cigarettes?
3. How does the Panda E-Cigarette work?
4. Does the Panda E-Cigarette produce harmful smoke?
5. Can I really smoke my Panda E-Cigarette anywhere?
6. What flavors are available with Panda E-Cigarettes?
7. What should I know about nicotine?

### My Account

1. How do I create a Panda account?
2. How do I edit/change my account information?
3. How do I get or reset my password?
4. How do I get a copy of my receipt/invoice?

### Ordering

1. Who can purchase Panda E-Cigarettes?
2. Is your web site secure for credit card processing?
3. Do I have to pay sales tax?
4. How do I change quantities or cancel an item in my order?
5. How do I buy/redeem a gift certificate?
6. How do I use a coupon?

### Shipping

1. What countries do you ship to?
2. Is shipping free?
3. What are the shipping methods for Panda E-Cigarettes?
4. How long does it take to receive my order?
5. How do I know my order has been shipped?
6. How do I track my order?
7. What should I do if my order never arrived?
8. What should I do if an item is missing from my shipment?

## 9. When will my backorder arrive?

### Product

1. How long can the Panda battery be used after it is fully charged?
2. When should I recharge a battery?
3. How long does it take to recharge a battery?
4. How much nicotine is in each cartridge?
5. What are the ingredients in Panda E-liquids?
6. What if I'm having trouble with my clearomizer?

## General

### Can I make money by referring friends or customers to you?

[top]

We have a brilliant new referral program that let's you earn 20% cash on your friends first order. If you have Facebook, click here to get started. If you do not have Facebook click here.

### Am I allowed to use Panda E-Cigarettes?

[top]

You must be over the legal smoking age of 18 to buy or use Panda E-Cigarettes. They are not intended for use by women who are pregnant or breast-feeding, or persons with or at risk for heart disease, high blood pressure, diabetes, or taking medication for depression or asthma. Panda is not a smoking-cessation device and does not treat, diagnose, or cure any disease, physical ailment or condition. Please consult your doctor before use.

### How does the Panda E-Cigarette work?

[top]

The Panda E-Cigarette consists of a rechargeable battery and a clearomizer, which is a type of cartridge that has an integrated atomizer. The clearomizer is to be filled with e-liquid, a substance containing water, propylene glycol, nicotine and flavoring that emulates tobacco cigarettes. When you inhale through the mouthpiece, the microchip in the e-cigarette will detect the airflow and activate the atomizer which heats up the fluid in the cartridge and releases a vapor. We also have manual batteries that can be activated by pressing a button to provide more control over the vapor.

**Warning:** The liquid that is vaporized by electronic cigarettes is mainly composed of propylene glycol to produce vapor, a chemical that is used in many applications, from toothpaste to vitamins. However, some users may be allergic to propylene glycol. If you experience any rare allergic reactions such as a severely sore throat or difficulty breathing, please stop use it immediately and contact your doctor.

### Does the Panda E-Cigarette produce harmful smoke?

[top]

Regular tobacco cigarettes produce more than 4,000 harmful chemicals, including numerous carcinogens, when they are burned and inhaled. **The Panda E-Cigarette does not involve any burning process and produces only a vapor.**

### Can I really smoke my Panda E-Cigarette anywhere?

[top]

Panda E-Cigarette is not a traditional tobacco cigarette and does not burn tobacco and produce thousands of harmful chemicals, so it can be smoked in most areas where normal smoking bans are enforced like bars, restaurants, **and offices. You can smoke Panda E-Cigarettes at home without worrying about harmful second-hand smoke affecting your children, pets, and other family members.**

### What flavors are available with Panda E-Cigarettes?

[top]

Panda has many flavors of E-liquid including Tobacco, Menthol, Coffee, Cherry and Vanilla, etc. There are 4 levels of nicotine strength: Low (6mg), Medium (12mg), High (18mg), and Extra High (24mg). With the refillable clearomizer cartridges, you can choose any number of e-liquid flavors to try. You can even mix them!

### What should I know about nicotine?

[top]

Nicotine is an alkaloid found in the nightshade family of plants, including tobacco leaves, eggplant and tomato. Nicotine itself is both a stimulant and a relaxant. Nicotine is considered habit forming and addictive. For more detailed info about nicotine, please consult with your doctor or read official publications. You can also find good info about nicotine on Wikipedia.

## My Account

### How do I create a Panda account?

[top]

Click the "Register" link, located at the top right of our homepage. On the "New Customers" section, simply follow the instructions and prompts to complete setting up your account. Your information is NEVER sold to any other company and is kept completely private. With a Panda account you can move through checkout faster, save multiple shipping addresses, access your order history and participate in our rewards program where you can earn credit and prizes.
