ABOUT US

480,000 people in the US die each year of smoking-related illness, nearly 6 million worldwide. Henley's mission is to help traditional tobacco smokers transition to a less harmful alternative and, ultimately, to live happier and healthier lives.

To this end, Henley designs, develops and markets premium electronic cigarettes and other vaping products. The company has made a name for itself, perhaps most notably, by opening the first **vape shop and vaping lounge** in New York City, The Henley Vaporium. The company is in the process of expanding its flagship operation, opening more retail stores, expanding its e-commerce offerings and developing new and ground-breaking products.

Henley sells best-in-class products across all vaping categories, including cig-alikes, **ego batteries and ego kits, tanks and clearomizers, e-liquids, Mods, rebuildable atomizers**, accessories and more. Henley carries a wide variety of premium brands, including its own. Henley brands include e-liquid favorite, Henley Vape, limited edition Mods (e.g. "FBT"), and top-rated Henley eGos & starter kits.

To learn more about Henley, please feel free to explore the site, visit us in person at one of our **vape stores** or simply contact us via email at support@thehenley.com.

WELCOME TO HENLEY & JOIN THE E CIG CONVERSATION!

HELLO LOYAL FRIENDS....

Hi! I am Talia Eisenberg, co-founder and head creatrix at Henley. We welcome you to our new website. Our goal at Henley is to get you excited about our variety of ecig products and the brand we are creating.

My story is pretty simple, I am 27 years old and live in NYC. I am a former smoker myself who used ecigs to quit and I wanted to help smokers find a healthier alternative to have the freedom to go anywhere and enjoy life to the fullest. I started running faster, biking harder and breathing easier with ecigs and I wanted this for others too. A few years back the Henley team and I decided to start our own ecig company to help spread the message.

Ecigs are a great way to get your nicotine fix without feeling bad from all of the tar and carcinogens that slow you down. I really got into the whole variety of flavors and vapor thing, and I loved that I could smoke these in bars, airports and even subways... I have always liked anything that is futuristic and game changing so I spent hours and hours testing new products in our lab and trying new products on friends who loved what we were creating.

It was cool to see the use of our ecigs reducing the amount of traditional cigarettes people were smoking and helping them to quit completely. By eliminating the tar and over 3,000 carcinogens traditional cigarettes have, we seem to have found a healthier way to break the cycle of cigarette addiction plus we never have to smell like cigarette smoke ever again.

That's the story of how Henley was born. We now have 3 products including 2 rechargeables (economy and deluxe kit) and one disposable ecig product. We offer 10+ flavors and 3 mg strengths (high, medium and low) to choose from.

We believe that Henley helps our customers to experience life more fully while having a good time – and that's what we are all about; enjoying life's moments whether they are at the office or at the beach...

Check out what we will be doing this summer including parties in NYC and LA, music festivals, collaborations with artists, blog posts with featured Henley smokers, contests and much more...
