jeunessereservesg Reserve customer recovered from Heart Arteries Block. He was scheduled for a heart bypass surgery because 2 of his heart arteries were blocked. One month before the surgery, he started taking Reserve. When the doctor did a check before the surgery, one of the heart arteries was 100% cleared and the other was 70% cleared. Hence he does not need to go for surgery. #jeunessereserve #jeunessesingapore
