I have multiple sclerosis for 13 years. Over these years I have many attacks causing me to be paralysed, wheelchair-bound, blind on one eye & multiple disabilities. In May 2011, I went for chemo treatment to stabilise my condition. After the treatment, I was weak & frail.

During that time I was introduced to Jeunesse Global, I wasn't expecting much, thinking that it was just another product. Surprisingly, I started to have more energy, get stronger & recover faster!

My walking and bladder control are back to normal & damaged brain tissues have fully recovered. I decided to share the products & opportunity to everyone.

Today Jeunesse have given me & my dad back our health, my wife & mum became prettier & younger and also passive income into my bank account everyday.

Thank You Jeunesse Global!!! - Alvin Phua

A 75-year-old senior citizen in Taiwan (see pics below) was suffering from Parkinson's disease

Before taking Reserve, he needed two helpers to hold him in order to walk properly. His energy levels were very low, as shown in his tired eyes.

After consuming Reserve on a daily basis for two months, he can walk up to the stage without any assistance & share his own testimonial on the benefits of Reserve.

Today he can walk and jog without any assistance after a six-month period of consuming Reserve.

Parkinson Disease* Testimonial:

A 75-year-old senior citizen in Taiwan (below) was suffering from Parkinson disease.

Before taking Reserve™, he needed two helpers to hold him in order to walk properly. His energy levels were very low, as shown in his tired eyes.

After consuming Reserve™ on a daily basis for two months, he can walk up to the stage without any assistance & share his own testimonial on the benefits of Reserve™.

Look at his eyes and facial expressions now.

Isn't it amazing?

Today, he can walk, jog without any assistance after a period of six months of consumption of Reserve.

The following video shows how this senior citizen was able to move about after consuming Reserve:

The Battle Against Cancer

For those who are interested in searching for cancer cures or the means to prevent it, this article will be a good find

Resveratrol starves cancer cells by inhibiting the action of a key protein that feeds them. The protein, called nuclear factor- κ B (NF- κ B), is found in the nucleus of all cells and activates genes responsible for cell survival. Research demonstrated that cancer cells treated with resveratrol died because they became sensitive to a compound called Tumor Necrosis Factor alpha (TNF α). Resveratrol initiated a reaction in the NF- κ B molecule that caused the cancer cells essentially to self-destruct in a process called apoptosis.

Resveratrol:

- Can deeply penetrate the center of a cell's nucleus, allowing the DNA to repair free radical damage that might otherwise contribute to cancerous growth
- Has anti-inflammatory properties that help prevent certain enzymes from forming that trigger tumor development
- Helps cut down cell reproduction and reduce the

number of cell divisions that could contribute to the progression of cancer cell growth

Dr William Li, President and Medical Director of the Angiogenesis Foundation, shared that we can eat to starve cancer. Cancer is just 5-10% attributable to genes, while the remaining is Environment and mainly due to our diet. Resveratrol in red grapes and red wine inhibits angiogenesis by up to 60%! And that is precisely what we should be having in our daily diet.

Take a listen to Dr William Li's talk in the video below

Dr William Li on Cancer Prevention ...  

Doctors of Western medicine working in hospitals will by and large prescribe radiation or chemotherapy for cancer

treatment. However, it is a fact that conventional cancer treatments only shrink the tumors but is not guaranteed to make the cancer go away all the time. Doctors in Tan Tock Seng, Singapore now administer Resveratrol to patients who have underwent chemotherapy to enhance effectiveness of chemotherapy and as an alternative treatment to improve recovery of cancer patients.

Besides preventing cancer, Resveratrol aids cancer therapies by acting as a:

- **Chemo- sensitizer:** a substance that can help you overcome resistance to chemotherapy drugs
- **Radiation- sensitizer:** making cancer cells more susceptible to radiation treatment

In what way does Jeunesse Reserve help in cancer prevention?

And one may ask where can Resveratrol be obtained from? As a matter of fact, Jeunesse RESERVE is a ready-to-drink fruit blend that contains an ample amount of Resveratrol.
