LUMINESCE™

Dr Nathan: "I've seen improvements in patients with rosacea, burns, acne as the cytokines interact with your cells & reduces inflammation. That's how we're made! Stem cells from the fat are able to become muscle, bone, cartilage, stimulate hair growth. That's where we are today with Luminesce." Stop dwell in self pity. Take action: try the Serum for 2 months. You deserve better. No more clinic queues, harmful drugs hurting your liver, anxiety you miss prescriptions.

RESERVE™

Gangrene testimonial:

What is Gangrene?

It happens when a body part loses its blood supply. This may happen from an injury, infection or other causes.

The picture (above) shows how a Diabetes patient

Someone from Jeunesse recommended her to try the fruit blend (Amazing product created by Jeunesse Global).

It was so painful that she called her doctor and

After listening to her explanation, her doctor told her she just need to come back for re-examination

appointment on her Gangrene finger nine days later.

She felt no more pain on the 2nd day of drinking the "RESERVE"™ fruits and vegetables blend.

She decided to stop waiting for another few more days for the next appointment.

He told her she DO NOT NEED to amputate her finger anymore.

Parkinson Testimonial:

What is Parkinson disease?

It is a degenerative disorder of the central nervous system. The motor symptoms of Parkinson's disease result from the death of dopamine-generating cells in the substantia nigra, a region of the mid-brain; the cause of this cell death is unknown. Early in the course of the disease, the most obvious symptoms are movement-related; these include shaking, rigidity, slowness of movement and difficulty with walking and gait. Later, cognitive and behavioural problems may arise, with dementia commonly occurring in the advanced stages of the disease. Other symptoms include sensory, sleep and emotional problems. PD is more common in the elderly, with most cases occurring after the age of 50.

A 75 year-old senior citizen in Taiwan (above) was suffering from Parkinson disease. Before taking Reserve, he needed to have two assistants to hold him in order to walk properly. His energy levels were very low, as can be seen from his tired looking eyes.

He began consuming Resveratrol on a daily basis for two months. Today, he can walk up to the stage without any assistance and share his own testimonial on the benefits of Resveratrol. Look at his eyes and facial expressions now..Isn't it amazing?

Eczema Testimonial:

Cancer Testimonials:

Celine was suffering from ovarian cancer 12 years ago at her tender age 17. She went through many rounds of Chemotherapy and recovered since then. During the time, she lost all her hair, eyebrows hair, she felt nauseous and had no appetite during each treatment. But she will soon see herself start put on weight (10kg) after completed each cycle of chemotherapy treatment.

Unfortunately, 12 years later during June 2014, she was again diagnosing with a re-lap of ovarian cancer 2nd stage (CA125). Her doctor told her she need go through 12 cycles of Chemotherapy every 3 weeks this time. Through her close friend recommendation, she starts taking 4 sachets of Reserve fruit blend daily since June. Before that, she shows it to her hospital doctor the "Reserve" for approval before her intake, Her Cancer doctor told her is safe to go ahead taking "Reserve" after he sent it to Singapore lab for further testing and checking.

Her experience with "Reserve" is, although now the Chemotherapy dosage given is 2 times stronger than she took 12 years ago, but, by taking "Reserve" daily during the treatment, now she felt more energize and sleep well during each treatment as compare to her bad treatment experience she has suffered 12 years ago. Now she also applies Jeunesse Luminesce cellular rejuvenation Serum onto her head to prevent hair loss, and it work!

She also has the energy and courage by coming to our live event to share about her current experience.

In fact Celine looks like a healthy person before she give surprise to all her audience on her energy level and her courage to share her latest experience as a chemotherapy patient.

After the session, she told us she still felt nauseous (The intention to vomit feeling) half way through during our presentation before she go on stage for sharing. Immediate she consume a package of Reserve and the nauseous feeling gone almost immediately.

Red Wine Ingredient Resveratrol Stops Breast Cancer Growth, Study Suggests

ScienceDaily (Sep. 29, 2011) — A new research report appearing in the October 2011 issue of The FASEB Journal shows that resveratrol, the "healthy" ingredient in red wine, stops breast cancer cells from growing by blocking the growth effects of estrogen. This discovery, made by a team of American and Italian scientists, suggests for the first time that resveratrol is able to counteract the malignant progression since it inhibits the proliferation of hormone resistant breast cancer cells. This has important implications for the treatment of women with breast cancer whose tumors eventually develop resistance to hormonal therapy.
