jeunessereservesvg Mr Tan from Penang, Malaysia was a Stage 4 Terminal Prostrate Cancer patient. The doctor from LohGuanLye Center in Penang, Malaysia said at his age of 77 years old, he was too weak to undergo radiation or chemotherapy. His case was serious and he had only 6 months to live. His reading in February 2008 showed a marker of 55.04. His daughter Alice Tan in Brisbane, Australia ordered RESERVE™ online for him and he consumed 4 sachets a day. In 3 months, the markers dropped drastically.

1 year later, there was no more cause for concern, as the markers dropped to 3.47.

Mr Tan now reduces his RESERVE™
