How Provailen works to relieve pain?

Provailen has three main **ingredients**.

The principal ingredient is called **Reishi** and it is in the same family as the fungi called **Penicillin**.

You know, the Fungi that has saved hundreds of millions of lives. You probably have taken some form of it many times over the years. Ask yourself did it work? Answer **YES** it must have or you would not be reading this. The specific fungus is called **Reishi** and through a new special process the **strength has been increased by up to 75 times**.

This massive boost in potency is achieved using high **frequency sonic cracking technology**, along with **hydro-alcohol extraction** and is now allowing for the purest concentration possible.

Dr. William B. Stavinho from the University Of **Texas Health Science Center** published a scientific study stating (Reishi is as powerful as **5mg** of hydrocortisone the same drug often injected into arthritic joints damaged by arthritis.) **Now that is incredible . . . a natural substance that is as powerful as hydrocortisone.**

Dr. Andrew Weil stated **major positive implications** of Reishi use are shown for **anyone suffering from immune system disorders, such as Arthritis**. One of the major causes of rheumatoid arthritis is known as RASF & RSQUO. The polysaccharide peptide found in abundance in **Reishi fungi has shown to significantly reduce RASF & RSQUO**.

Two well known **doctors**, including one from the prestigious university of Texas Health Science Center, have published **scientific studies** on this **powerful** fungi. But this is just the tip of the iceberg. We could continue quoting different studies published about **Reishi** but honestly there is little point in boring you with the details of study after study.

The simple truth is Reishi has incredibly positive effects on people suffering from Arthritis.

END YOUR PAIN WITH PROVAILEN

Why should I Try Provailen?

- ◆ Think about your long term health? Ask yourself am I getting any better or am I getting worse?
- ◆ What is my risk? Are there any nasty side effects? No, there are no side effects associated with the use of Provailen.
- ◆ Ask yourself how much is my health worth? Your health will definitely be improved, no more concerns about the horrible side effects that they cause. Also what about the financial burden? No more doctor visits. No more lab tests and having to purchase expensive prescription medications.

The simple **truth** is if your **current medication** had cured your problem you would not be here on this site. **Your risk is becoming healthy and pain free.** You have most likely already used a **fungus like penicillin** and you know they work, why would you not try this fungus which has **proven to help alleviate the majority of arthritis issues?**

Your **health** is the most important thing you have in your life, now don't you think it is time that you took control of your arthritis?

It is your life, it is your health. It is time to make the decision now . **Provailen works, it is a natural product and it has no nasty side effects. Provailen has plenty of scientific proof demonstrating that it works.** The simple truth is if you don't give Provailen an opportunity you are slowly **risking your health.**

P.S. If what you have been using so far isn't working, don't you owe it to yourself to seek relief and comfort elsewhere?
