

**MyPillow** ✓

April 4, 2013 · 🌐

Dear MyPillow,

I'm 55, had been diagnosed with arthritis in my neck and suffered with pain for over two years. Sleeping was nearly impossible some nights. I had almost immediately relief after using MyPillow the first night - I am now to the point where I have NO pain during the day! It seriously has changed my quality of life. My husband had surprised me by ordering it, and now we've told many people about it - we just bought 6 more; 2 for our summer home and the others for our kids. Now, I'm just hoping it continues to work for a long time and never goes out of business...I will never buy another pillow again! Thank you so much
