MyPillow,

I purchased one of your firm pillows earlier this week and have results I did not expect.

For several years I have been taking medication to help me sleep because my back and hips would hurt so bad it would wake me up and I would then have to stay up.

I am now sleeping till the alarm goes off and I am getting a full night sleep and actually feeling refreshed in the morning.

I don't know if others have the same result, but I am.

Thank you so much for your product. One of the main reasons we bought your product was its American made.

Sincerely,

Robert S., Texas
