TESTIMONIAL... Three years ago I started having reactions everyday like this if I did not take a antihistamine. This photo was taken after I was removed from a flight by paramedics. My face would swell up so bad I couldn't see and my lips felt like they were going to pop. I couldn't breath and would get hives all over my body. I spent thousands on lab work and doctor visits to figure out the cause. Two months ago my buddy was talking about Kyani on Facebook I read into it without even talking to him I was interested. I eventually called him and said I was in just needed to get the money together.

I did! After taking Kyani for a week I stopped taking my antihistamine to see if it was helping.

What happened next still is hard to believe myself...I literally have not taken one antihistamine since and two months have passed without one reaction!

Kyani has changed my life completely thank you! — at  DFW Airport - Dallas, TX.
