

Always on top

Read 9:27 PM

My dad had stage 3b lung cancer. He went through radiation and chemo. They cut out one lung. He try to walk every day and he gets out of breath easy. So he goes lay down and take him a hour or to nap in the day. I made him my guinea pig LOL. I asked him tonight how has he been doing. He told me he's been getting up [at 5:45](#) every morning and not taking naps in the middle of the day anymore and working outside in his Garden and in his yard all day long. My mom said he is kind of driving her crazy because he has always moving and wanting to do something. That is why I have to go to Houston at the end of this month to Indiana son for his check up. Oh by the way his blood sugar actually went down to 112!
