

Jeannie Akana Santiago

March 25, 2014

When I met Henry Young , heavy machine operator, his Diabetes sugar levels were up to 300+ daily with a HemoglobinA1C at 10.5. He got started on the Kyani triangle pack with NitroXtreme and in 40 days his sugar levels went to 120-150. His next HgA1C went down to 7.5. Me, being an RN, expect his sugars to raise again before it leved out, but nope, his next test showed HgA1C at 6.5. No one can dispute lab results. And now Henry is experienting more with Kyani.
