Aime Nunez is 20 years old and has an incredible story to tell. She came from a family who was very supportive but not always able to keep up financially. She remembers that growing up, there was never a month that all of the bills in the house were fully paid. She never knew if she would have the money for the next semester's tuition payments. She joined Kyani to help alleviate the financial strain and now she has earned her very own Dream Car! Her entire family has also joined Kyani and she is happy to report that all they no longer have outstanding bills to pay. Their health has also benefitted greatly from using the Kyani products. She says she would never have imagined three months ago that she would have come this far or that she would have such an outstanding team.
