Geneva Rajpute works long hours on her feet, and has suffered from inflammation and pain in her hands and feet for over 10 years. She says, "Imagine my delight, after three days of consuming the Triangle of Health, when I noticed the inflammation and pain were nearly gone!" It made her a true believer in the product and she feels her life was given back to her. She now loves telling others of her new-found wellness and helping them to experience the same life-altering experience.

Geneva also recently reached the rank of Sapphire and earned her new Dream Car!
