For the past 7 years I suddenly was diagnosed with acute renal disease and had to have surgery in February of 2015. I have suffered from back pains, insomnia, liver disease and I have under active thyroid due to my autoimmune disease. Yeah not many people knew all this. Reason for it is I was scared to share because of criticism I thought I would get like "your so young" and everything you did in the past has caught up to you". I honestly faced the realization that maybe i was gonna have to prepare myself and my kids that I maybe would be put on dialysis or I wasn't gonna have long.

5 days into the product I stopped taking my thyroid pills, my energy is back to when I was 18, I don't have backpains and for the first time I sleep 5-7 hours a night. I've been blessed to have been introduced to such a great product and instead of going back to Texas every month for drs visits I can comfortably say that I will no longer be under the watch of any doctors. Rather I'll be on the other end of the stick, sharing my testimony and helping those in my health/financial situations finally see that thru Gods Grace there is a product out there that IS GOING TO CHANGE 1 MILLION LIVES BY 2018! And most important my kids will have a dad to raise them.
