

lifeonthenet7 on Can An Alkaline Lifestyle Help Gout?

By clicking the link below you can download and/or listen to her recorded testimonial. Or you can read the transcription at the end of this article:

products and program is all about.

The Concept behind the SevenPoint2 Products and Program is that the **body will heal itself** as long as we give it the proper tools and stop putting road blocks in its way.

"In May 2013, actually on Mother's Day, I had a seizure. And from that seizure I was diagnosed with lung cancer, and they found a brain tumour. Within seven days of that diagnosis, I'd actually lost one third of my lung and had cancer cut out of my lymph nodes. This was all without any signs or symptoms, so it came as a complete surprise.

So when I got out of hospital, I was told to go on barley grass and wheat grass. I found out that barley powder is alkaline, and that would allow the wheat grass to get in and attack cancer cells. So I was on that for a while, and my good friend in New Zealand went searching and found Seven Point 2. So she rang me up, and said "I've found an answer for your problem". So I went and I looked at the products, looked at what they did, immediately joined up, and got the recovery tablets – for pain specifically, and I got the green caps because in the greens I noticed that they had barley and wheat powder.

So I didn't look any further than that, but took the recovery; which absolutely got me to the point where I was pain free. I've had a knee operation, I couldn't walk very far; I was suffering in my shoulder where I'd had the operation, so I couldn't even lie on my side in the bed. And so I found that when I took the recovery and I was taking the greens, the pain went; I actually was walking without pain, I could walk faster than my husband; and I could change back to my side of the bed because my shoulder no longer hurt.

So I found that in taking the greens and the recovery, I actually got great results. Not only that, I was supposed to go on chemo and I decided not to, because there's a minuscule chance if I went on chemo, and I didn't, to the return of the cancer. So I decided that I'd stick with what I was doing; and in the twelve months since that I had the CT scan, there's no evidence of any cancer – so instead of having a scan every six months, I don't have to have one for another twelve.

What I'm working on now is — I'm on the whole Health Made Simple program – love the products. And I'm working on shrinking my tumour; so when I have my MRI in January, I actually will have a look to see the

difference between that MRI and the last one I had. So in actual fact, I haven't had any seizures, at the moment I am cancer clear, and I'm working on my tumour. What I've found is that I have lots and lots of energy, I have no pain, I'm able to run up and down stairs, and love the product. I think it's the greatest thing I've found since I don't know what. So that's my story." – Jean B, W.A.
