### An Amazing Story of Recovery from Crippling Pain

We are hearing great feedback around the world for the SevenPoint2 Health Made Simple Program and Products... People who are not just losing weight and getting healthy, but truly changing their lives.

This brave young woman suffered a horrible trauma and was looking at a solution of prescribed pain killers that could have caused her further damage and possibly ended her career as a Fitness Professional.

“From the top last year I started studying to be a personal trainer as being active is something I enjoy! I always looked for the best natural products for my body but everything that came about I found faults with so I just waited and I asked the universe to guide me. Then on January 12<sup>th</sup> at 3.05 am I had a man armed with a knife enter my home, threaten me and steal my handbag. So that week we moved out and in that process I fell very ill with a virus believed to have come from a mosquito. My bones ached my glands were so swollen and painful when Doctors touched them I would vomit. One night while in bed our dogs started barking so I panicked thinking that the new house was being robbed. I went to jump out of bed but I fell to the ground my ankles and knees could no longer support me. The pain was excruciating. I sobbed and screamed dragging my body across the floor with every bit of strength to reach for the phone to call for help. I had to be in a wheelchair living off anti inflammatories and panadeine forte. **As I got better I progressed to crutches and as a result of this virus doctors have diagnosed me with reactive arthritis that I will have for life. I had been posting on Facebook about this and Pauline Jones reached out to me and said honey you need to try this. I began researching 7.2 and it matched everything I was looking for previously for my personal training so I asked how can I could also be a part of this. So Pauline and Damien guided me and I started using the products within a week the pain in my hands stopped and my ankles felt like new.** I did my first run in 3 months and I cried the entire way as I couldnt believe what my body was doing. It has changed me! My family are now using the products after seeing the results with me and we are not looking back! Its saved me, saved my youth. Im 23, I

have the world at my feet and I can take on anything... I feel fabulous. So through something sad that happened the law of attraction brought me 7.2 but it also gave me some wonderful people in my life and that is priceless. Thanks"... Anita W.A.
