lifeonthenet7 on Can An Alkaline Lifestyle Help Gout?

**Fibromyalgia Syndrome** is the term used to describe a cluster of symptoms that may include widespread pain and tenderness in “trigger points” on the body, which are usually sore to the touch.

This condition affects two to four percent of the population, mainly women, although men can also develop the condition.

There are many other symptoms that can be associated with **Fibromyalgia**, such as IBS, headaches and swelling and numbing in the arms and legs. A big problem with **Fibromyalgia** is the **anxiety and depression** that can set in when solutions can not be found.

Here is a recorded testimonial from a SevenPoint2 product user talking about her experience with the products. SevenPoint2 makes no health claims about their products, but there seems to be a large number of people coming forward with good results for a wide variety of conditions.

## Debbie's Story

*"A friend of mine Jodie introduced me to the product about a week ago and I was a little reluctant because I have had fibromyalgia for about 11 years and I have tried just about everything under the sun. I take Cymbalta, I have taken it for a number of years and I have brought myself up to the highest dosage possible. I have retired from teaching because of my fibromyalgia pain and the fatigue. I am also overweight and need to get off the sugar because I recently got diagnosed with diabetic type 2. I was introduced to the SevenPoint2 products and I said all right I will try it. You know it can't hurt. So last Monday I started the sugar cleanse... sugar detox and I started to drink, just one green shake in the morning, take my Recovery, take my alkaline boosters which do help you sleep like a baby. And by Friday I just had to weigh myself again because I had started on Monday I took a picture of myself and I weighed myself. By Friday I had already lost 5 pounds. And look I am a big girl, I am 225 pounds minus five now. So just in five days, I am not ingesting sugar and anything white and drinking one shake a day, that's all I did and ate a sensible dinner. I lost 5 pounds but most importantly my pain substantially lessened, I slept better, I felt better and I didn't have to take a nap when I got home from work. Because usually with fibromyalgia you do have a lot of fatigue. There were two days in a row I didn't have to take a nap, I like actually could do things. So I thank Juliana and Jodi for introducing me to the product and this week I feel fabulous, I am less pain, no nap, went to work with no problem. So it is a blessing and I look forward to adding in the second shake a day but I am truly not hungry enough to drink two right now. But I know eventually I will. And I am going to stay on the product that's for sure because*

*I've tried like I said everything and there is nothing out there for fibromyalgia patient to take other than vitamins, and Cymbalta and pain medications, and who wants to live like that. You know when you are in your 40's you have so much to live for. And medication is not the way to go. So thank you that's all I have to say." Debbie, USA*
