"My parents told me that in order to be successful you must go to school, get an education and get a job. Upon completion of college, I went immediately into the teaching field for 15 years. Presently, I work in the Mental Health field as a Mental Health Specialist overseeing emotionally disturbed youth. After working 24 years in this field and being 72 years of age, even though it has been rewarding, I have discovered that you cannot get wealthy by working a job; however, I feel that this is my year for retirement.

?Even though I have been in several different network marketing businesses, I have not been able to fulfill my dream of being wealthy – living a lifestyle of the rich and famous, leaving a legacy for my family, and retiring debt free – not having to live off Social Security. When I looked at Kyäni, due to the leadership and support, I began to dream again. I could see myself retiring this year becoming financially independent; I could see myself with freedom to do what I want, when I want, and how long I want; I could see myself fulfilling all the dreams and aspirations, all the short term and long term goals that I had set up for myself throughout life. After getting in Kyäni, I put my head down and took off running and will never stop until everyone wins.

"The best part? The products actually work! Since I have been on the Kyäni products, my blood pressure is better. I sleep better every night and arise every morning without aches and pain. I am more focused. I have more energy and everyone asks to see my birth certificate because they don't believe that I am 72! I am so thankful, so grateful, so excited, and so amazed at this awesome opportunity provided to me by Kyäni!"
