WHAT ARE TRANSFER FACTORS? In a World Where Stress, Pollution, Poor Diet and New "Super bugs" Are Constantly Undermining People's IMMUNE SYSTEM

What are Transfer Factors? In a world where **stress, pollution, poor diet and new strains of "superbugs"** are constantly

undermining people's immune systems, Life recognizes the importance of innovation in nutrition. We know that in order to successfully battle these everyday challenges and to achieve overall well-being, continual advancements need to be made to help **support immune strength and promote better health for you and your family.**

One of the strongest forces in nature **for transferring and ensuring good health**, transfer factors, has taken their place in the forefront of nutritional science. Simply stated, **transfer factors are tiny molecules transfer immunity information from one entity to another as between a mother and her infant who she breastfeeds**

FRIDAY, APRIL 07, 2006

HERBS GINSENG & DONG QUAI - BREAST CANCER LINK?

Transfer Factor is NOT Vitamin, Mineral or Herb

A COMPLETE NEW DIMENSION IN NUTRITIONAL SCIENCE

Transfer Factor is a set of tiny natural immune messenger molecules made up of a sequence of amino acids that impart immune signals between immune cells. It transfers immune knowledge to an individual's naive immune system.

FEATURES

- **Support the immune system's ability to remember past invasions** allowing your body to **more quickly responds to**

similar health threats

- **Educate naive immune cells about a present or potential danger** in your body along with **a plan for action**
- **Boost your immune response, or balance suppressing an overactive immune system**

How Does Transfer Factor Works?

It works by 'teaching' your own immune system in 3 important ways:

- **Recognize** harmful invaders seeking to threaten health thus making the duration of an illness shorter. TF imprints recognition codes needed to identify the enemy. Our immune system routinely sifts and sorts through trillion of cells and their antigen codes, it may be lacking as many as 50,000 specific antigen responses.
- **Respond** to invaders by educating naive immune cells about a present or potential danger and passing on a plan of action. React properly—boost, suppress & balance.
- **Remember** past invasions, allowing your body to more quickly respond to similar health threats. Adds to memory bank.

Transfer Factor does not interact with drugs and has zero toxicity. It's all natural, safe and effective for all people of all ages

4Life Transfer Factor Plus Advanced Formula

4Life Transfer Factor Plus Advanced Formula with Transfer Factor E-XF

4Life Transfer Factor Plus Advanced Formula provides far reaching immune support. It combines the synergistic power of Transfer Factor E-XF with the proprietary blend Cordyvant to nourish, strengthen and activate the immune system.

Developed exclusively by 4Life using patented and patent-pending technology, 4Life Transfer Factor Plus Advanced Formula calls upon the knowledge of two sources, providing an enhanced combined effect of transfer factors from **both cow colostrum and chicken eggs**.

Cordyvant combines ingredients known to enhance the innate immune system, our first and instinctive response against foreign invaders. It includes:

Maitake and Shiitake Mushrooms known to support cellular function (immune system) and other healthy systems.

Cordyceps rich in polysaccharides, which help activate immune system response.

Inositol Hexaphosphate gaining attention for its preventative immune power.

Beta Glucan an important immune cell stimulator. They are the wake-

up call to white blood cells for healthy function.

Beta Sitosterol phytosterol that has been shown to help activate immune system response.

Olive Leaf Extract be instrumental in slowing the duplication of cells.

Research shows that the immune building effects of this revolutionary product increase immune system effectiveness by 437 percent!

I have been

researching health topics and formulating supplements for many years.4Life Transfer Factor Advanced Formula provides support to our bodies unlike anything this industry has ever seen. 4Life Transfer Factor Plus Advanced Formula adds an additional proprietary formulation for total and superior immune support for people of all ages.

William Hennen, Ph.D., 4Life's Chief Scientific Officer
What These Medical Doctors Say About Transfer Factor

Without a doubt Transfer Factor is the most significant discovery in health since the discovery of penicillin in 1928 and the polio vaccine in 1952. It is the next step in the evolution of nutritional science. This nutrient can affect the immune system like nothing else can.
Rob Robertson Jr., MD

There is no other product in a nutritional substance, nor a drug, that has this kind of power and ability to affect our immune system. With the increase of killer viruses, mutated germs, super-resistant germs, and food contaminations, our only hope and defense must lie within our own immune system.
Daryl See MD

SUCCESS STORIES

I first learned of 4Life Products in April of 2004, and

HISTORY OF TRANSFER FACTOR

- 1949 Discovered by **Dr. H. Sherwood Lawrence**. He discovered that an immune response could be transferred from a donor to a recipient through an injection of an extract of white blood cells. He concluded that this immune extract contains 'factors' that made it possible to transfer the donor's immunity to the recipient. **He called these molecule 'transfer factors.'** (Expensive but effective. Science and technology then was not advance enough to make it practical for general use.)
- 1989 Two researchers, **Dr. Gary Wilson and Dr. Greg Paddock** perfected what was to become a patented filtration process for the extraction of transfer factors from cow colostrum. Through this extraction technique, pure transfer factors can be collected in concentrated form, dried and then encapsulated for human consumption. (Economical and effective / Practical for general use)
- 1991 Dr. Sherwood's work is validated.
- 1998 ForLife Research starts marketing Transfer Factor under patent.
- 1999 The effectiveness and safety of Transfer Factor supplementation was validated by scores of clinical studies worldwide.

4Life Transfer Factor Becomes the First Dietary Supplement Approved for use in Hospitals in Russia

Approved: 31st July, 2004

Russian Ministry of Health

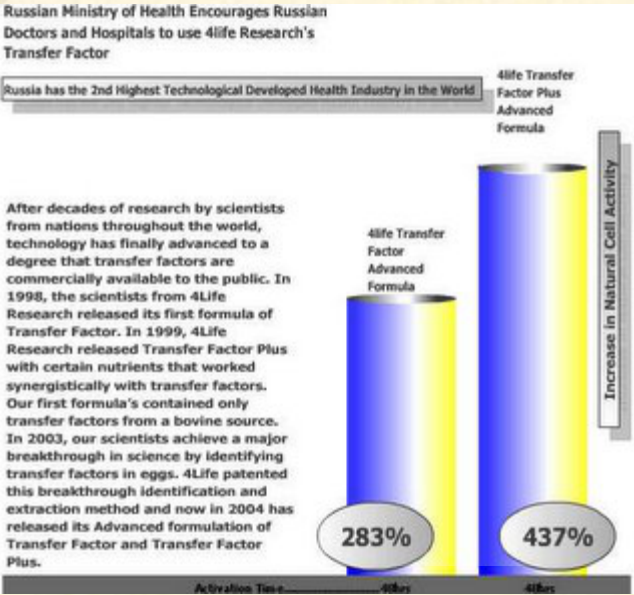

After ten clinical studies, the Russian Ministry of Health released a 32-page report to hospitals and doctors encouraging the use of Transfer Factor and Transfer Factor Plus. The scientists involved in these studies stated, **"We have never tested a nutritional product with such an outstanding effect on an individual's overall health. Transfer Factor Advanced Formula activated NK cell activity more than the Interleukin-2 (IL2) drug we used as the standard."**

Russia has the second most technologically advanced medical industry in the world.

since then, both my mother and I have used them. I want to tell you about my mother's

experience. She suffered from nasal allergies and had stomach problems. Since taking 4Life Transfer Factor Plus she seems to be educating her immune system and has a new energy level. She has also used BioGenistein Plus for help in maintaining proper hormone balance, which is necessary at her age. My mother feels happy, healthy and full of energy. Thanks 4Life!

Mariel De Juan N. 4Life Distributor
Florida

In May of 2004 I was bucked off my horse. After my body was whipped every which way, I flew out of the

saddle, already unconscious, and landed on my back and head on hard, rocky ground. I sustained multiple injuries, including a fractured pelvic bone, whiplash of the entire spine, a severe concussion and joint and soft tissue damage from my neck down to my knees. I was literally flat on my back for the first month after my accident. I have been in the care of specialists during my long and painful recovery. My pelvic fracture healed nicely but I continued to suffer much pain caused by the joint and soft tissue damage. Recently, I was introduced to 4Life Transfer Factor Plus. I began taking the product out of desperation, as well as my strong determination to find a way to get my quality of life at least back to where it was before my accident. I know that long periods of chronic, intractable pain can cause even up-beat people to feel depressed about life. Though I am, by nature, a happy, optimistic person, I was beginning to feel down much of the time. Through my desire to heal, the constant care of my doctor and the immune support I have received from Transfer Factor Plus I have noticed that I am beginning to feel more energetic. I can't help but notice that, to my delight, I am beginning to get excited about life again!

Devonna D. 4Life Distributor
Oregon

I have been taking 4Life Transfer Factor Plus for some time now. Since I began using 4Life Transfer Factor Plus Advanced Formula, I have experienced an even greater level of support for my immune system. I believe that the combination of transfer factors from bovine colostrum and egg yolk in the new Transfer Factor Plus Advanced Formula has generated a fantastic product which educates our immune systems.

4Life® Transfer Factor™ Advanced Formula
with **Transfer Factor E-XF™**

To fight advanced health threats, you need advanced support. 4Life Transfer Factor Advanced Formula includes our proprietary Transfer Factor E-XF blend to create a unique and highly effective supplement that provides unprecedented support to your body's immune system for keeping you healthy. It works by educating and strengthening your

immune system for superior health support throughout your life.

Developed exclusively by 4Life using patented and patent-pending technology, 4Life Transfer Factor Advanced Formula calls upon the knowledge of two sources, providing an enhanced combined effect of transfer factors from both cow colostrum and chicken eggs. Research shows that the immune building effects of this revolutionary product increase immune system effectiveness by 283 percent!

FEATURES

- Promotes the immune system's ability to remember past invasions, allowing your body to more quickly respond to similar health threats
- Educates naive immune cells about a present or potential danger in your body along with a plan for action
- Speeds up the recognition phase of a health threat, making the duration of an illness shorter
- Boosts your immune response, or balances it by suppressing an overactive immune system

"Every day we are faced with threats from our microscopic environment. What you can't see can hurt you! The uniqueness of 4Life Transfer Factor is that it not only supports, but also educates our immune system in a way that no other supplement can. This is important since no one will outlive their immune system."

—William Hennen, Ph.D., 4Life's Chief Scientific Officer

SUCCESS STORIES

"4Life Transfer Factor Advanced Formula has helped support my immune system's ability to deal with the challenging problems that come its way. I am back to my daily activities with rejuvenated zeal and vigor! Thanks a million Transfer Factor Advanced Formula!"

TC Brian Y. 4Life Distributor
Malaysia

"I've only been taking 4Life Transfer Factor for about ten days, but prior to that, I had to use a nasal spray for allergies every day because of a persistent running nose. After only a couple of days on 4Life Transfer Factor, I really felt a difference in my immune system. Thanks for a wonderful product!"

Transfer Factor CARDIO - for HEART

Targeted Transfer Factor is part of a revolutionary new system of support, scientifically researched and developed by 4Life. Independent studies have already demonstrated Transfer Factor's superior immune-boosting

capacity. And now, 4Life has identified and patented a way to target the power of transfer factors to directly benefit systems throughout the body, improving your bodies immune response against system-specific microbes and infections.

This advanced nutritional support is backed by an exclusive patent for obtaining specialized transfer factors from avian sources. These sources acquire their advanced immune knowledge after experiencing unique environments that have been specifically tailored to bolster immune function in particular systems throughout the body—such as the cardiovascular system. These specialized transfer factors are then extracted and concentrated, providing each of us with targeted nutritional support that is literally unprecedented in the health industry today.

This broad and basic patent facilitates the continued formulation of transfer factor products that provide targeted nutritional support. Additionally, this original patent protects 4Life's exclusivity within the transfer factor market and secures our opportunity for expanded patents with future development.

Our hearts deserve a break—not a breakdown. Our hearts work 24 hours a day, with no time off for good behavior. During a lifetime, a human heart will pump 55 million gallons of blood through nearly 60, 000 miles of blood vessels, delivering essential nutrients and oxygen to trillions of cells. We can give our hearts a highly deserved break by eating a healthy diet that contains an abundance of essential nutrients, regular aerobic exercise and the revolutionary support of 4Life's TF Cardio.

TF Cardio provides comprehensive support for the cardiovascular system. In addition to promoting targeted system support, it contains additional heart-healthy ingredients such as magnesium, arginate, red yeast rice, B vitamins, antioxidants and essential fatty acids to help support normal blood pressure and cholesterol levels—all necessary for healthy cardiac function.

Each day you come in contact with thousands of germs (bacteria and viruses)—in the air you breathe, foods you eat and objects you touch. But, you have an amazing protection mechanism that defends your health against these germs and other elements that can make you sick, your immune system.

Your immune system is a complex network of organs and cells. It works around the clock to defend your body against health threats and disease, and the ever-increasing environmental threats in today's world. Quality immune support has become essential to maintaining optimal system function and promoting long-term health.

4Life Transfer Factor is an exclusive supplement on the forefront of nutritional science. It's been recognized for years as the best colostrum-based transfer factor product for daily immune system support.

SUCCESS STORIES

"I started taking 4Life Transfer Factor over a year ago. At the time, I suffered from frequent problems with my throat. I really feel like Transfer Factor has helped support my immune system to be able to deal with this difficulty. I have recommended it to several people."

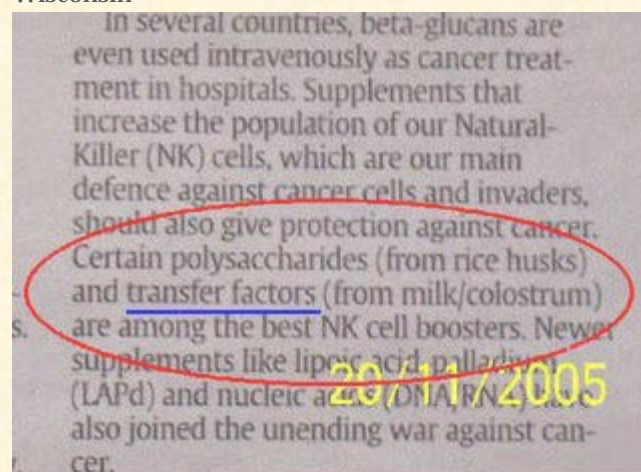

Linda N. 4Life Customer
Kentucky

"I am twenty-six years old. I was born legally blind in both of my eyes. Aside from having very bad vision I've always considered myself very lucky compared to most other people. I found out about 4Life Transfer Factor and how it has changed the lives of thousands of people all around the world. I was extremely skeptical about trying this product for myself. But curiosity killed the cat and I decided to try the product anyway because it was so unique. After taking the product for a few weeks I really feel like it has made a difference in my immune system, which has improved my quality of life. I feel like I have more energy throughout the day and it is easier for me to wake up in the morning. I can't imagine not taking my daily capsules every day in the morning."

Jawaune S. 4Life Distributor
Florida

"I had been experiencing many health challenges and really wanted to find a supplement which would help educate my immune system and assist me in my efforts to live a more healthy life. I became a believer in the 4Life products after taking 4Life Transfer Factor. I was so pleased with the way I felt and was excited about the product that I quit my regular job and started introducing others to the benefits of Transfer Factor. I have never been happier! Working with 4Life as a distributor has been the most gratifying and pleasurable job I have ever had! I feel absolutely blessed and elated that I am able to share the benefits of Transfer Factor and the financial rewards of 4Life with family, friends and people I meet!"

Truly Amazing Medical Recoveries

People taking "Transfer Factors" have reported the **total elimination of, or major relief from, ALL of these health problems, and MUCH MORE:**

Acne, AIDS Allergies Alzheimer's Arthritis, Asthma, Autism, ANY Auto Immune Disease, Bacterial Infection, Bladder infections, Boils, Breast Cysts, Bronchitis, Burns, Cancer (various types), Candida Yeast Infections, Chemotherapy, Chronic Fatigue Syndrome, Common Cold, Constipation, Cuts, Degenerative Disc Disease, Diabetes, Digestive problems, Ear Infections
Elevated PSA, Enlarged Prostate, Eczema, Fibromyalgia, Flu, Fungus Gastro-Esophageal Reflux, Gastro-Intestinal Problems, Heart Disease, Hemorrhaging, Hepatitis B, Hepatitis C, Herpes, High Blood Pressure (Hypertension), High Cholesterol, High Triglycerides, Hodgkins Disease Inflammation, Irritable Bowel, Joint Pain, Kidney Disease
Leukemia, Liver Disease, Low Energy, Lumbar/Back Spasms/Pain, Lupus Lyme Disease, Migraines, Multiple Sclerosis, Muscle Aches, Obesity, Periodontal Disease, Parasites, PMS, Parkinson's Disease
Prostate problems, Psoriasis, Radiation Therapy, Red/Sensitive Skin, Respiratory, Infections, Rheumatoid Arthritis
SARS, Shingles, Sinus Infection, Sleeplessness
Thyroid (Hyper- or Hypo-), Tumors, Vascular Disease

ALL such threats to health can be combated by a strong, healthy immune system that works as it was designed to do. Many of these are AUTOIMMUNE diseases, which GO AWAY when the IMMUNE SYSTEM is corrected.

NOTE: Transfer Factor does NOT CURE anything body's HEALTHY, INVIGORATED IMMUNE SYSTEM can bring about the CURE. People who have used Transfer Factors continue reporting TRULY AMAZING results.

And one thing you will notice as you read a FEW of their experiences, is how FAST most of them recovered or received relief, after taking Transfer Factors. This is because of HOW FAST Transfer Factors Mobilize, Train, Equip, and Send out on Patrol, a HUGE ARMY of your immune system's **Natural Killer (NK) cells** for your life. For a few examples:

One man's doctor had been after him to take insulin injections, as his Type One Diabetic Blood Glucose levels were too high. The morning he started Transfer Factors, it was 231. Within two days, it had dropped back into the normal range (80 - 120), and two weeks later, it was running between 96 and 110. His doctor said he didn't have to take insulin. Another Diabetic reported totally restored damaged Kidney functions, where they were at

the failing point, before.

One lady, a bedridden invalid suffering from extremely painful Fibromyalgia, AND painful, crippling Multiple Sclerosis episodes, with no strength from the neck down, is out pulling weeds in just 2-1/2 months, and jumping on a trampoline with her grandchildren.

And one hemophiliac who had AIDS from a 'Dirty' clotting factor transfusion many years ago, was totally disease-free in just a few months on Transfer Factor, according to his M.D.'s testimonial. Read their experiences and many more, below.

There IS a worldwide market for the products that can bring all of this about. People of the world are BEGGING for the CURE, which is already inside them. (It just isn't working properly.) And YOU can help spread the MIRACLE of a reactivated, healthy immune system that works as it was DESIGNED to do.

/>

Transfer Factor Cardio

– why it is so unique and special?

- Transfer factors are small messenger molecules that educate the immune system,

support healthy immune responses, and promote the body's ability to remember past health threats.

- Transfer Factor products are featured in the 2003, 2004, and 2005 Physicians Desk Reference For Nonprescription Drugs and Dietary Supplements, the standard supplement guide for physicians that can be found in virtually every physicians office, hospital, and pharmacy in the United States.
- Transfer Factor Cardio targets the superior immune-enhancing benefits of transfer factors to directly support the cardiovascular system.
- Transfer Factor Cardio is backed by a patented process proprietary to 4Life. (US Patent 6,468,534).
- Transfer Factor Cardio addresses total cardiovascular health, including supporting normal inflammatory response within the body, and protecting the health and integrity of the entire cardiovascular system.
- Transfer Factor Cardio promotes healthy homocysteine levels may be just as important as cholesterol for a healthy cardiovascular system. B vitamins, including folic acid, B6, and B12, support normal homocysteine levels. Antioxidants such as selenium, copper, zinc, and vitamins A, C, and E, have also shown to have beneficial effects for promoting healthy homocysteine levels within the body.
- Transfer Factor Cardio has Ascorbic acid, niacinamide, hawthorn, resveratrol, garlic, lysine, and red rice yeast extract to support proper circulation and healthy cholesterol levels.

HOW DOES TRANSFER FACTOR WORK?

It works by 'teaching' your own immune system in 3 important ways:

- **Recognize** harmful invaders seeking to threaten health thus **making the duration of an illness shorter**. TF imprints recognition codes (ID no.) needed to identify the enemy. Our immune system routinely sifts and sorts (police checks ID no.) through trillion of cells and their antigen codes (illegal alien ID no.) , it may be lacking as many as 50,000 specific antigen responses (no information of illegal alien IC no.)
- **Respond** to invaders by educating naive immune cells about a **present or potential danger and passing on a plan of action**. React properly—boost, suppress & balance.
- **Remember** past invasions, allowing your body to more quickly **respond to similar health threats**. Adds to memory bank

A warning has been given that women with breast cancer should ~~take~~ **avoid** the herbs Ginseng & Dong Quai as they ~~stimulate~~ **stimulate** the cancer cells - Australian Doctor.

Ginseng, breast cancer link

A WARNING has been given that women, particularly those who have had breast cancer, should not take the herbs ginseng and dong quai because they may stimulate the growth of breast cancer.

This follows laboratory tests that showed these Chinese herbs, which are commonly used to relieve menopausal symptoms such as hot flushes, significantly induced the growth of a breast cancer cell line.

Ginseng: further research needed before a positive link can be made.

Director of the natural therapies unit at Sydney's Royal Hospital for Women, Associate Professor John Eden, said the herbs were widely taken by women, especially those who had had breast cancer, because they did not want to take "real" oestrogens.

"If something's been shown to stimulate breast cancer cells, you have to have a concern for all women," Professor Eden said.

"The most obvious potential harm is for someone who has had breast cancer, but it is something with wider implications for all women.

"I would not want my wife

taking something that had been shown to stimulate breast cancer cells."

The study in *Menopause* found that when tested in vitro, dong quai increased the growth of MCF-7 cells - a human breast cancer cell line - 16-fold and ginseng by 27-fold.

The researchers said they believed the stimulation of the breast cancer cells acted via a pathway independent of oestrogenic activity, as the herbs failed to have an oestrogenic effect in either mice or cultured cells.

Black cohosh and licorice

root, also used to relieve menopausal symptoms, were studied but found not to induce growth in the cancer cells or have oestrogenic effects.

The researchers said: "Because of the lack of efficacy and the potential for adverse effects, use of these herbs in humans warrants caution pending further study."

However, a spokeswoman for the Therapeutic Goods Administration said the link was a preliminary finding involving high doses of herbs in a single in vitro study and further research was needed. ■

HOW TO BOOST UP & MODULATE YOUR IMMUNE SYSTEM AGAINST DISEASES

With a Strong Immune System you would NOT easily get Sick

Every moment of your life, **your immune system stands between you and death**. Transfer factor (TF) is a set of tiny natural immune messenger molecules made up of a sequence of amino acids that impart immune signals between immune cells.

Works in 3 ways: - Recognize harmful invaders seeking threaten health

. Respond to invaders by education naïve immune cells about present or potential danger and passing on a plan of action. . Remember past invasions allows body to respond quickly.

March 8, 2006 **Breast Milk Help Treat Cancer?**

BALTIMORE (US) — In the war against cancer, chemotherapy is often the weapon of choice. But **one woman believes an unconventional and controversial therapy** has added months to her life, Baltimore television station WBAL reported.

Doctors have now isolated "**transfer factors**" extracted from **cow colostrums (first milk) and egg yolk**. Simply stated, transfer factors are tiny molecules that transfer IMMUNITY INFORMATION from one entity to another, such as between a **MOTHER and her INFANT** who she breastfeeds.

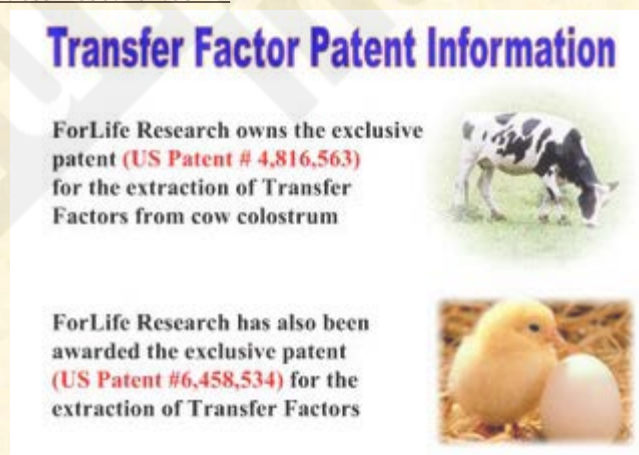

The "goodness" of breast milk is this **transfer of information** that keeps the baby healthy to fight diseases.

Now they are available in **capsules, chewable tablets or liquid form** as **nutritional supplements** to boost and **modulate your immune system** (equivalent "love" pill as love causes the secretion of certain hormones that are immunomodulators)

So not surprising with a strengthened immune system the Baltimore woman with cancer has prolonged her life with "breast milk". What if she had taken it much much earlier?

Check out the transfer factors and how it works from

or <http://www.transferfactorresearch.com/>

NOTE: Transfer Factor does **NOT CURE** anything. **When your own body is HEALTHY; its INVIGORATED IMMUNE SYSTEM can bring about the cure.** People who have used Transfer Factors continue reporting TRULY AMAZING results

TRANSFER FACTOR IS NOT COLOSTRUM

1. Colostrum contains cow's antibodies that can cause allergic reaction to humans. TF are non-allergenic.
2. Colostrum contain elements that may be rejected by the human system but TF is non-species specific.
3. Colostrum contains small amounts of random factors but TF contains highly concentrated 'factors'.
4. Have to consume large quantity compare to TF

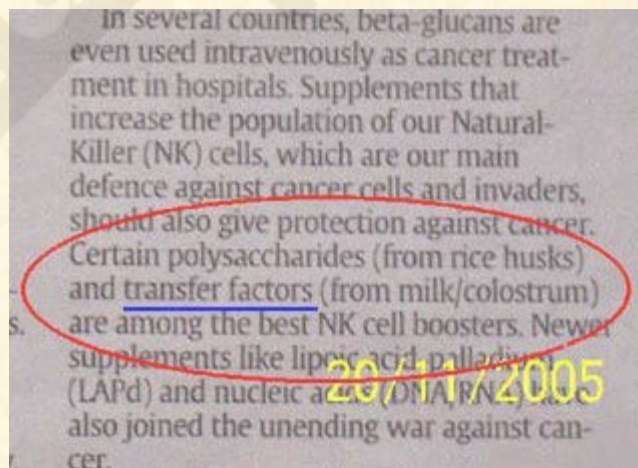

What you need is to **boast up the immune system using "transfer – factors", mineral or herb. It is a complete new dimension in nutrition.** Transfer factor (TF) is a set of tiny natural immune messenger molecules made up of a sequence of amino acids that impart immune signals between immune cells. It transfers immune knowledge to an individual's naive immune system.

Moreover, it works in 3 ways:-

- . **Recognize harmful invaders** seeking threaten health thus making the duration of an illness shorter. TF imprints recognition codes needed to identify the enemy
- . **Respond to invaders** education naïve immune cells about present or potential danger and passing on a plan of action. React properly – boast, suppress & balance.
- . **Remember past invasions** allowing your body to more quickly responds to similar health threats.

Check out **Sunday Star Nov 20 2005** Under "fit for life", the doctor mentioned, "**TF are among the best NK (Natural Killer) cell booster**" in the **circle**. It is also effective (for those with weakened immune system) against cold, coughs, diabetes, gout, arthritis, asthma, sinus, etc. and all diseases.

TF represents a new paradigm in nutrition and healthcare for all. Check it out for the following testimonial on Eczema:-

"My testimonial of Healing My Lifelong Eczema with Natural Means"

by Shirley Liipschutz-Robinson

at <http://www.shirleys-wellness-cafe.com/eczema.htm>

Eczema is an autoimmune disease - meaning the immune system is

New Trends - Fewer Breast Cancer Patients to Get Chemo

New Guidelines - **Fewer Breast Cancer Patients to Get Chemo**

Blasting women with toxic chemicals was considered the best way to save their lives. The bigger the cancer or the more it had spread, the more vile liquid doctors pumped into their veins to try to kill it. But there's been a sea of change in the last year.

Guidelines recently adopted in Europe and similar ones unveiled this weekend at a conference in Texas will result in **far fewer women getting chemotherapy in the future.**

The new advice calls for choosing a treatment based on each woman's particular type of tumor.

"In the past, we made all decisions based on **how big the tumor was** whether the lymph nodes were involved. If you had a lot of cancer, you got treated one way, and if you had a little cancer, you got treated another way," said Dr. Eric Winer of the Dana-Farber Cancer Center in Boston.

Details from

U.S. cancer guidelines: <http://www.nccn.org>

European guidelines:

<http://www.breastcancersource.com/breastcancersourceHCP/9678-13596-7-0-0.aspx>

<http://www.oncoconferences.ch/2005/Short-Conference-Summary-PBC-05.pdf>
ori

There were reports that patients subjected to chemo are very much weakened. That is why chemo treatments are spaced out. And many die not because of cancer but suffer from their weakened states. With a low immune system, many patients succumb to other diseases.

So it is important that for those undergoing chemo treatments to take natural nutritional supplements like Transfer Factor.

NOTE: Transfer Factor does NOT CURE anything. Your own body's HEALTHY, INVIGORATED IMMUNE SYSTEM can bring about the CURE. People who have used Transfer Factors continue

reporting TRULY AMAZING results.

In several countries, beta-glucans are even used intravenously as cancer treatment in hospitals. Supplements that increase the population of our Natural-Killer (NK) cells, which are our main defence against cancer cells and invaders, should also give protection against cancer. Certain polysaccharides (from rice husks) and transfer factors (from milk/colostrum) are among the best NK cell boosters. Newer supplements like lipolic acid, palladium (LAPd) and nucleic acids (DNA/RNA) have also joined the unending war against cancer.

20/11/2005

STAR, Nov 20 2005, Extract from "Fighting Breast Cancer" - Dr Amir Farid

=====Report by By MARILYNN MARCHIONENMedical
Writer=====

Dec 10, 2005 SAN ANTONIO-- For years, doctors have known exactly what to do with breast cancer patients like Eva Ossorio: Poison them. Blasting women with toxic chemicals was considered the best way to save their lives. The bigger the cancer or the more it had spread, the more vile liquid doctors pumped into their veins to try to kill it. But there's been a sea of change in the last year.

Guidelines recently adopted in Europe and similar ones unveiled this weekend at a conference in Texas will result in far fewer women getting chemotherapy in the future.

The new advice calls for choosing a treatment based on each woman's particular type of tumor.

"In the past, we made all decisions based on how big the tumor was and whether the lymph nodes were involved. If you had a lot of cancer, you got treated one way, and if you had a little cancer, you got treated another way," said Dr. Eric Winer of the Dana-Farber Cancer Center in Boston.

Under the new rules, hormone status - whether a tumor's growth depends on estrogen or progesterone - becomes the single most important factor in picking treatment.

That is why Ossorio, a 62-year-old nurse in San Antonio, last week was started on a hormone blocker rather than the chemo she formerly would have been given for her relatively large tumor. She was relieved.

"I don't care if I die tomorrow. I decided I didn't want chemotherapy," she said.

Women have reason to dread it. Chemo is a sledgehammer, killing all rapidly dividing cells whether they are out-of-control cancerous ones or healthy ones that naturally grow quickly, like those lining the mouth and stomach. That's why chemo causes hair loss, nausea and mouth sores.

But the worst part is, it only helps about 15 percent of those who get it after the usual surgery to remove their tumors. Roughly 25 percent get worse despite chemo. A whopping 60 percent would have been fine

with hormones alone.

"For the vast majority of patients, we probably overtreat," said Dr. William Gradishar of Northwestern University in Chicago.

"It's not that chemotherapy is not of value, it's that the value is smaller in women with hormone-driven disease," said Dr. Robert Carlson, a Stanford University physician who led the U.S. guideline-writing group. "We're trying to determine if the benefit is so small that we should not be recommending chemotherapy."

Several developments in recent years help doctors pick who really needs it.

First is the realization that breast cancers have different causes, arise from different types of cells, are driven by different genes, and tend to be different in women before or after menopause.

"Breast cancer must be understood as an umbrella of diseases," said Dr. Antonio Wolff of Johns Hopkins Medical Institute in Baltimore.

For example, three-fourths of postmenopausal women have tumors fueled by estrogen, called ER-positive disease. Drugs that block this hormone, like tamoxifen and a newer class of medications called aromatase inhibitors, work against those cancers - whether they have spread to lymph nodes or not.

On the other hand, women before menopause often have tumors that are ER-negative and orchestrated by bad genes. Hormones don't help in that case; these women benefit most from chemotherapy.

If hormone drugs are ball-peen hammers compared to chemotherapy, a medication like Herceptin is an even more refined tool. It targets the one-fourth of breast cancers that have too much of a protein on cell surfaces called HER-2 and leaves healthy cells alone.

A woman's HER-2 status is the next factor doctors will consider, after hormone status, in choosing treatments under the new guidelines.

You can see the possibilities: half of HER-2 tumors are ER-positive, but only 10 percent of ER-positive tumors are HER-2-negative.

These aren't black-and-white distinctions, either. Tumors can be weakly ER-positive or negative; same thing for HER-2.

New high-tech lab tests help doctors sort it out. They measure the activity of dozens of genes and reveal which ones are most active and what treatments would work best.

One such test, Oncotype DX, has found its way into more and more doctors' offices since presentations at the Texas cancer meeting last year showed its ability to predict which women benefit from tamoxifen and which do best on chemo.

Ossorio's doctor ordered the test because she thought it would convince Ossorio to have chemo. Surprisingly, it revealed chemo was very unlikely to help.

The test is expensive - \$3,400 - but many insurers cover it because it often prevents even more costly and unnecessary chemo, as it did for Ossorio.

Dr. Larry Norton, breast cancer chief at Memorial Sloan-Kettering Cancer Center in New York, uses it when situations are complex and treatment choices aren't obvious. He compares it to lab tests that pinpoint a germ so the right antibiotic can be prescribed.

"In the old days, people just said 'pneumonia.' Now we say 'what organism?' and that lets us identify how to treat the disease," he said.

But relying on factors like hormone and HER-2 status makes the accuracy of lab tests a life-or-death matter. Doctors warn about the wide variation in the quality of such tests, whether low- or high-tech.

"The right (test) is the one that is done right," not which type of test is chosen, Wolff told doctors at the Texas meeting who had come to learn about the U.S. guidelines. The new guidance was developed by the National Comprehensive Cancer Network, a group of leading cancer treatment centers, in cooperation with the American Cancer Society.

Acai berries in Transfer Factor RioVida drinks

Açaí Powder (pronounced ah-sigh-ee): Instant energy, increased vitality, ancient tonic for sexual disorders, anti-aging properties, anti-Cancer, improves cardio vascular system, lowers LDL (bad cholesterol), protects the prostate, anti-bacterial, helps allergies, improves digestion, helps with stress, improves fat metabolism, feeling of awareness, improved mental focus, anti-oxidant, better sleep, and sustained energy and strength.

What really sets Açaí apart from the berry/fruit products is the antioxidant content. Studies show that Açaí has up to 33 times the antioxidant content as red wine grapes. When compared to wolfberry, noni and mangosteen juice products, Açaí is 6 times more powerful in terms of antioxidant content. No other berry or fruit product can come close to matching the nutritional and antioxidant content of Açaí. According to a recent Russian study, transfer factors potentiate the action of antioxidants in the body, thereby increasing the benefits derived from antioxidants.

From deep inside the Amazonian Rainforest grows the **Açaí Berry**. Açaí contains the most complete array of vitamins, minerals, and essential fatty acids. Açaí contains Vitamin B1 (Thiamin), Vitamin B2 (Riboflavin), Vitamin B3 (Niacin), Vitamin C, Vitamin E (tocopherol), iron, potassium, phosphorus and calcium. It also contains the essential fatty acids Omega 6 and Omega 9, all the essential amino acids, and more protein than an average egg. The Brazilian natives believe the Açaí berry to have amazing healing and nutritional properties.

Apart from Acai other basic ingredients in RioVida Drinks

Lactoferrin (a derivative of whey): A good Iron source, antiviral, antibacterial, stimulates the immune system, promotes friendly intestinal flora, antioxidant, regulates iron metabolism and reduces cell degeneration (aging).

Pomegranate: Tones digestive organs, nausea, lowers blood pressure, increased resistance to infections, aid with diarrhea and dysentery, anti-intestinal parasites, helps prevent kidney and bladder stones, helps teeth and gum disorders.

Blueberry: Antioxidant, improved eyesight (especially

A major breakthrough in the functional food industry, 4Life Research brings the best of nutraceuticals and their patented Transfer Factor E-FX to create **RioVida**. 4Life Research is currently ranked the 15th fastest growing, privately held company in North America by the prestigious INC 500 Magazine.

After years of research, 4Life's scientists discovered how to stabilize their patented Transfer Factors into a liquid form, thus creating "Nature's Immune Food" with "Nature's Complete Food".

Infused with the Power of Transfer Factors E-XF molecules, Lactoferrin, Açai powder, Blueberry, Elderberry, Pomegranate, Apple, Purple grape, Vitamin C, natural fruit flavors all combined to create the first and only functional health beverage of its kind. This forbidden Amazon berry may be the key your new "fountain of youth."

In Portuguese, Rio Vida which means the "River of Life"

Available in twin packs, details from:

What are Transfer Factors? In a world where stress, pollution, poor diet and new strains of "superbugs" are constantly undermining people's immune systems, 4Life recognizes the importance of innovation in nutrition. We know that in order to successfully battle these everyday challenges and to achieve overall well-being, continual advancements need to be made to help support immune strength and promote better health for you and your family.

One of the strongest forces in nature for transferring and ensuring good health, transfer factors has taken their place in the forefront of nutritional science. Simply stated, transfer factors are tiny molecules that transfer immunity information from one entity to another, such as between a mother and her infant who she breastfeeds.

FEATURES

- Support the immune system's ability to remember past invasions, allowing your body to more quickly respond to similar health

Transfer Factor is NOT Vitamin, Mineral or Herb

A COMPLETE NEW DIMENSION IN NUTRITIONAL SCIENCE

Transfer Factor is a set of tiny natural immune messenger molecules made up of a sequence of amino acids that impart immune signals between immune cells. *It transfers immune knowledge to an individual's naive immune system.*

How Does Transfer Factor Works?

It works by 'teaching' your own immune system in 3 important ways:

- **Recognize** harmful invaders seeking to threaten health thus making the duration of an illness shorter. TF imprints recognition codes needed to identify the enemy. Our immune system routinely sifts and sorts through trillion of cells and their antigen codes, it may be lacking as many as 50,000 specific antigen responses.
- **Respond** to invaders by educating naive immune cells about a present or potential danger and passing on a plan of action. React properly— boost, suppress & balance.
- **Remember** past invasions, allowing your body to more quickly respond to similar health threats. Adds to memory bank.

Transfer Factor does not interact with drugs and has zero toxicity.
It's all natural, safe and effective for all people of all ages

Developed exclusively by 4Life using patented and patent-pending technology, 4Life Transfer Factor Plus Advanced Formula calls upon the knowledge of two sources, providing an enhanced combined effect of transfer factors from **both cow colostrum and chicken eggs**.

Cordyvant combines ingredients known to enhance the innate immune system, our first and instinctive response against foreign invaders. It includes:

Maitake and Shiitake Mushrooms known to support cellular function (immune system) and other healthy systems.

Cordyceps rich in polysaccharides, which help activate immune system response.

Inositol Hexaphosphate gaining attention for its preventative immune power.

Beta Glucans an important immune cell stimulator. They are the wake-up call to white blood cells for healthy function.

Beta Sitosterol phytosterol that has been shown to help activate immune system response.

Olive Leaf Extract be instrumental in slowing the duplication of cells.

Research shows that the immune building effects of this revolutionary product increase immune system effectiveness by 437 percent!

threats

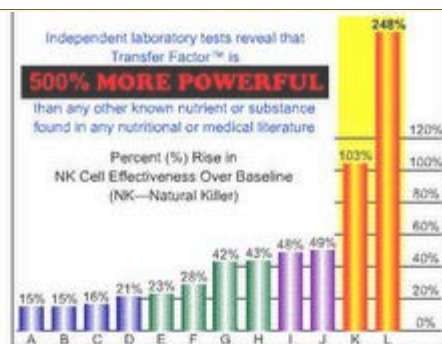

- Educate naive immune cells about a present or potential danger in your body along with a plan for action
- Boost your immune response, or balance it by suppressing an overactive immune system

4Life Transfer Factor **Plus** **Advanced** **Formula**

4Life Transfer Factor Plus Advanced Formula with Transfer Factor **E-XF**

4Life Transfer Factor Plus Advanced Formula provides far reaching immune support. It combines the synergistic power of Transfer Factor E-XF with the proprietary blend Cordyvant to nourish, strengthen and activate the immune system.

I have been researching health topics and formulating supplements for many years. 4Life Transfer Factor Advanced Formula provides support to our bodies unlike anything this industry has ever seen. 4Life Transfer Factor Plus

A	Nori (Morinda citrifolia)	G	Shiitake Mushroom
B	Aloe Vera Concentrate (acemannan)	H	Echinacea
C	Endocrine System Formula	I	Plant Polysaccharide Formula
D	Phytonutrient Formula with Garlic	J	IP6 highest of group previously tested
E	Bovine Colostrum	K	4Life Transfer Factor
F	Cordyceps Formula	L	4Life Transfer Factor Plus

Advanced Formula adds an additional proprietary formulation for total and superior immune support for people of all ages.

William Hennen, Ph.D., 4Life's Chief Scientific Officer

What These Medical Doctors Say About Transfer Factor

Without a doubt Transfer Factor is the most significant discovery in health since the discovery of penicillin in 1928 and the polio vaccine in 1952. *It is the next step in the evolution of nutritional science. This nutrient can affect the immune system like nothing else can.*

Rob Robertson Jr., MD

There is no other product in a nutritional substance, nor a drug, that has this kind of power and ability to affect our immune system. With the increase of killer viruses, mutated germs, super-resistant germs, and food contaminations, our only hope and defense must lie within our own immune system.

Daryl See MD

SUCCESS STORIES

I first learned of 4Life Products in April of 2004, and since then, both my mother and I have used them. I want to tell you about my mother's experience. She suffered from nasal allergies and had stomach problems. Since taking 4Life Transfer Factor Plus she seems to be educating her immune system and has a new energy level. She has also used BioGenistein Plus for help in maintaining proper hormone balance, which is necessary at her age. My mother feels happy, healthy and full of energy. Thanks 4Life!

Mariel De Juan N. 4Life Distributor Florida

HISTORY OF TRANSFER FACTOR

- 1949** Discovered by **Dr. H. Sherwood Lawrence**. He discovered that an immune response could be transferred from a donor to a recipient through an injection of an extract of white blood cells. He concluded that this immune extract contains 'factors' that made it possible to transfer the donor's immunity to the recipient. *He called these molecule 'transfer factors.'* (Expensive but effective. Science and technology then was not advance enough to make it practical for general use.)
- 1989** Two researchers, **Dr. Gary Wilson** and **Dr. Greg Paddock** perfected what was to become a patented filtration process for the extraction of transfer factors from cow colostrum. Through this extraction technique, pure transfer factors can be collected in concentrated form, dried and then encapsulated for human consumption. (Economical and effective / Practical for general use)
- 1991** Dr. Sherwood's work is validated.
- 1998** ForLife Research starts marketing Transfer Factor under patent.
- 1999** The effectiveness and safety of Transfer Factor supplementation was validated by scores of clinical studies worldwide.

In May of 2004 I was bucked off my horse. After my body was whipped every which way, I flew out of the saddle, already unconscious, and

4Life Transfer Factor Becomes the First Dietary Supplement Approved for use in Hospitals in Russia

Approved: 31st July, 2004

Russian Ministry of Health

After ten clinical studies, the Russian Ministry of Health released a 32-page report to hospitals and doctors encouraging the use of Transfer Factor and Transfer Factor Plus. The scientists involved in these studies stated,

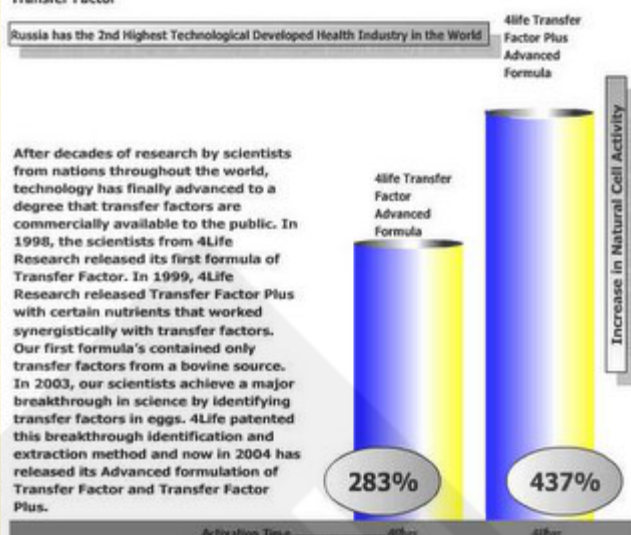

"We have never tested a nutritional product with such an outstanding effect on an individual's overall health. Transfer Factor Advanced Formula activated NK cell activity more than the Interleukin-2 (IL2) drug we used as the standard."

Russia has the second most technologically advanced medical industry in the world.

Russian Ministry of Health Encourages Russian Doctors and Hospitals to use 4Life Research's Transfer Factor

Russia has the 2nd Highest Technological Developed Health Industry in the World

After decades of research by scientists from nations throughout the world, technology has finally advanced to a degree that transfer factors are commercially available to the public. In 1998, the scientists from 4Life Research released its first formula of Transfer Factor. In 1999, 4Life Research released Transfer Factor Plus with certain nutrients that worked synergistically with transfer factors. Our first formula's contained only transfer factors from a bovine source. In 2003, our scientists achieve a major breakthrough in science by identifying transfer factors in eggs. 4Life patented this breakthrough identification and extraction method and now in 2004 has released its Advanced formulation of Transfer Factor and Transfer Factor Plus.

landed on my back and head on hard, rocky ground. I sustained multiple injuries, including a fractured pelvic bone, whiplash of the entire spine, a severe concussion and joint and soft tissue damage from my neck down to my knees. I was literally flat on my back for the first month after my accident. I have been in the care of specialists during my long and painful recovery. My pelvic fracture healed nicely but I continued to suffer much pain caused by the joint and soft tissue damage. Recently, I was introduced to 4Life Transfer Factor Plus. I began taking the product out of desperation, as well as my strong determination to find a way to get my quality of life at least back to where it was before my accident. I know that long periods of chronic, intractable

pain can cause even up-beat people to feel depressed about life. Though I am, by nature, a happy, optimistic person, I was beginning to feel down much of the time. Through my desire to heal, the constant care of my doctor and the immune support I have received from Transfer Factor Plus I have noticed that I am beginning to feel more energetic. I can't help but notice that, to my delight, I am beginning to get excited about life again!

4Life® Transfer Factor™ Advanced Formula with **Transfer Factor E-XF™**

To fight advanced health threats, you need advanced support. 4Life Transfer Factor Advanced Formula includes our proprietary Transfer Factor E-XF blend to create a unique and highly effective supplement that provides unprecedented support to your body's immune system for keeping you healthy. It works by educating and strengthening your immune system for superior health support throughout your life.

Developed exclusively by 4Life using patented and patent-pending technology, 4Life Transfer Factor Advanced Formula calls upon the knowledge of two sources, providing an enhanced combined effect of transfer factors from both cow colostrum and chicken eggs. Research shows that the immune building effects of this revolutionary product increase immune system effectiveness by 283 percent!

FEATURES

- Promotes the immune system's ability to remember past invasions, allowing your body to more quickly respond to similar health threats
- Educates naive immune cells about a present or potential danger in your body along with a plan for action
- Speeds up the recognition phase of a health threat, making the duration of an illness shorter
- Boosts your immune response, or balances it by suppressing an overactive immune system

"Every day we are faced with threats from our microscopic environment. What you can't see can hurt you! The uniqueness of 4Life Transfer Factor is that it not only supports, but also educates our immune system in a way that no other supplement can. This is important since no one will outlive their immune system."

—William Hennen, Ph.D., 4Life's Chief Scientific Officer

SUCCESS STORIES

"4Life Transfer Factor Advanced Formula has helped support my immune system's ability to deal with the challenging problems that come its way. I am back to my daily activities with rejuvenated zeal and vigor! Thanks a million Transfer Factor Advanced Formula!"

Transfer Factor CARDIO - for HEART

Targeted Transfer Factor is part of a revolutionary new system of support, scientifically researched and developed by 4Life. Independent studies have already demonstrated Transfer Factor's superior immune-boosting capacity. And now, 4Life has identified and patented a way to target the power of transfer factors to directly benefit systems throughout the body, improving your bodies immune response against

system-specific microbes and infections.

This advanced nutritional support is backed by an exclusive patent for obtaining specialized transfer factors from avian sources. These sources acquire their advanced immune knowledge after experiencing unique environments that have been specifically tailored to bolster immune function in particular systems throughout the body—such as the cardiovascular system. These specialized transfer factors are then extracted and concentrated, providing each of us with targeted nutritional support that is literally unprecedented in the health industry today.

This broad and basic patent facilitates the continued formulation of transfer factor products that provide targeted nutritional support. Additionally, this original patent protects 4Life's exclusivity within the transfer factor market and secures our opportunity for expanded patents with future development. Our hearts deserve a break—not a breakdown. Our hearts work 24 hours a day, with no time off for good behavior. During a lifetime, a human heart will pump 55 million gallons of blood through nearly 60,000 miles of blood vessels, delivering essential nutrients and oxygen to trillions of cells. We can give our hearts a highly deserved break by eating a healthy diet that contains an abundance of essential nutrients, regular aerobic exercise and the revolutionary support of 4Life's TF Cardio.

TF Cardio provides comprehensive support for the cardiovascular system. In addition to promoting targeted system support, it contains additional heart-healthy ingredients such as magnesium, arginate, red yeast rice, B vitamins, antioxidants and essential fatty acids to help support normal blood pressure and cholesterol levels—all necessary for healthy cardiac function.

Each day you come in contact with thousands of germs (bacteria and viruses)—in the air you breathe, foods you eat and objects you touch. But, you have an amazing protection mechanism that defends your health against these germs and other elements that can make you sick, your immune system.

Your immune system is a complex network of organs and cells. It works around the clock to defend your body against health threats and disease, and the ever-increasing environmental threats in today's world. Quality immune support has become essential to maintaining optimal system function and promoting long-term health.

4Life Transfer Factor is an exclusive supplement on the forefront of nutritional science. It's been recognized for years as the best colostrum-based transfer factor product for daily immune system support.

SUCCESS STORIES

"I started taking 4Life Transfer Factor over a year ago. At the time, I suffered from frequent problems with my throat. I really feel like Transfer Factor has helped support my immune system to be able to deal with this difficulty. I have recommended it to several people."

Linda N. 4Life Customer
Kentucky

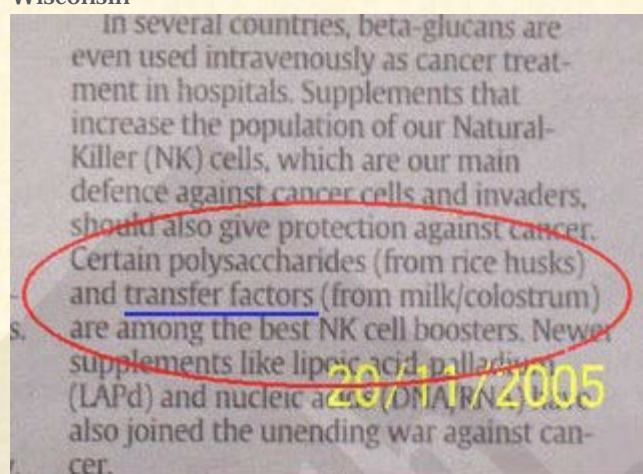

"I am twenty-six years old. I was born legally blind in both of my eyes. Aside from having very bad vision I've always considered myself very lucky compared to most other people. I found out about 4Life Transfer Factor and how it has changed the lives of thousands of people all around the world. I was extremely skeptical about trying this product for myself. But curiosity killed the cat and I decided to try

the product anyway because it was so unique. After taking the product for a few weeks I really feel like it has made a difference in my immune system, which has improved my quality of life. I feel like I have more energy throughout the day and it is easier for me to wake up in the morning. I can't imagine not taking my daily capsules every day in the morning."

Jawaune S. 4Life Distributor
Florida

"I had been experiencing many health challenges and really wanted to find a supplement which would help educate my immune system and assist me in my efforts to live a more healthy life. I became a believer in the 4Life products after taking 4Life Transfer Factor. I was so pleased with the way I felt and was excited about the product that I quit my regular job and started introducing others to the benefits of Transfer Factor. I have never been happier! Working with 4Life as a distributor has been the most gratifying and pleasurable job I have ever had! I feel absolutely blessed and elated that I am able to share the benefits of Transfer Factor and the financial rewards of 4Life with family, friends and people I meet!"

Truly Amazing Medical Recoveries

People taking "Transfer Factors" have reported the **total elimination of, or major relief from, ALL of these health problems, and MUCH MORE:**

Acne, AIDS Allergies Alzheimer's Arthritis, Asthma, Autism,
ANY Auto Immune Disease, Bacterial Infection, Bladder infections, Boils, Breast Cysts, Bronchitis,
Burns, Cancer (various types), Candida Yeast Infections, Chemotherapy, Chronic Fatigue Syndrome,
Common Cold, Constipation, Cuts, Degenerative Disc Disease, Diabetes, Digestive problems, Ear
Infections
Elevated PSA, Enlarged Prostate, Eczema, Fibromyalgia, Flu, Fungus
Gastro-Esophageal Reflux, Gastro-Intestinal Problems, Heart Disease, Hemorrhaging, Hepatitis B,
Hepatitis C, Herpes, High Blood Pressure (Hypertension), High Cholesterol, High Triglycerides,
Hodgkins Disease Inflammation, Irritable Bowel, Joint Pain, Kidney Disease
Leukemia, Liver Disease, Low Energy, Lumbar/Back Spasms/Pain, Lupus
Lyme Disease, Migraines, Multiple Sclerosis, Muscle Aches, Obesity, Periodontal Disease, Parasites,
PMS, Parkinson's Disease
Prostate problems, Psoriasis, Radiation Therapy, Red/Sensitive Skin, Respiratory, Infections,
Rheumatoid Arthritis
SARS, Shingles, Sinus Infection, Sleeplessness
Thyroid (Hyper- or Hypo-), Tumors, Vascular Disease

ALL such threats to health can be combated by a strong, healthy immune system that works as it was designed to do. Many of these are AUTOIMMUNE diseases, which GO AWAY when the IMMUNE SYSTEM is corrected.

NOTE: Transfer Factor does NOT CURE anything body's HEALTHY, INVIGORATED IMMUNE SYSTEM can bring about the CURE. People who have used Transfer Factors continue reporting TRULY AMAZING results.

And one thing you will notice as you read a FEW of their experiences, is how FAST most of them recovered or received relief, after taking Transfer Factors. This is because of HOW FAST Transfer Factors Mobilize, Train, Equip, and Send out on Patrol, a HUGE ARMY of your immune system's **Natural Killer (NK) cells** for your life. For a few examples:

One man's doctor had been after him to take insulin injections, as his Type One Diabetic Blood Glucose levels were too high. The morning he started Transfer Factors, it was 231. Within two days, it had dropped back into the normal range (80 - 120), and two weeks later, it was running between 96 and 110. His doctor said he didn't have to take insulin. Another Diabetic reported totally restored damaged Kidney functions, where they were at the failing point, before.

One lady, a bedridden invalid suffering from extremely painful Fibromyalgia, AND painful, crippling Multiple Sclerosis episodes, with no strength from the neck down, is out pulling weeds in just 2-1/2 months, and jumping on a trampoline with her grandchildren.

And one hemophiliac who had AIDS from a 'Dirty' clotting factor transfusion many years ago, was totally disease-free in just a few months on Transfer Factor, according to his M.D.'s testimonial. Read their experiences and many more, below.

There IS a worldwide market for the products that can bring all of this about. People of the world are BEGGING for the CURE, which is already inside them. (It just isn't working properly.) And YOU can help spread the MIRACLE of a reactivated, healthy immune system that works as it was DESIGNED to do.
