Nerium EHT helps repair neurons to have a healthy brain. It helps with all these issues. Focusing, memory recall, brain cognitive functioning and overall brain health. You see all these posts about Alzheimer's and Dementia, share this post about EHT. This supplement was developed for Alzheimer's & Parkinson's but during research they found out it does so much more for the brain. Alzheimer's actually begins in your 30's and 40's. 50% of 80 yr olds will be diagnosed with it. What if you took EHT?
