Share this as much as you can.

"10000 times stronger killer of CANCER than Chemo" .. do share it.. can save many lives, fill up hopes and build confidence in the patients...

The Sour Sop or the fruit from the graviola tree is a miraculous natural cancer cell killer 10,000 times stronger than Chemo.

...

Why are we not aware of this? Its because some big corporation want to make back their money spent on years of research by trying to make a synthetic version of it for sale.

So, since you know it now you can help a friend in need by letting him know or just drink some sour sop juice yourself as prevention from time to time. The taste is not bad after all. It's completely natural and definitely has no side effects. If you have the space, plant one in your garden.

The other parts of the tree are also useful.

The next time you have a fruit juice, ask for a sour sop.

How many people died in vain while this billion-dollar drug maker concealed the secret of the miraculous Graviola tree?

This tree is low and is called graviola ! in Brazil, guanabana in Spanish and has the uninspiring name "soursop" in English. The fruit is very large and the subacid sweet white pulp is eaten out of hand or, more commonly, used to make fruit drinks, sherbets and such.

The principal interest in this plant is because of its strong anti-cancer effects. Although it is effective for a number of medical conditions, it is its anti tumor effect that is of most interest. This plant is a proven cancer remedy for cancers of all types.

Besides being a cancer remedy, graviola is a broad spectrum antimicrobial agent for both bacterial and fungal infections, is effective against internal parasites and worms, lowers high blood pressure and is used for depression, stress and nervous disorders.

If there ever was a single example that makes it dramatically clear why the existence of Health Sciences Institute is so vital to Americans like you, it's the incredible story behind the Graviola tree..

The truth is stunningly simple: Deep within the Amazon Rainforest grows a tree that

could literally revolutionize what you, your doctor, and the rest of the world thinks about cancer treatment and chances of survival. The future has never looked more promising.

Research shows that with extracts from this miraculous tree it now may be possible to:

- * Attack cancer safely and effectively with an all-natural therapy that does not cause extreme nausea, weight loss and hair loss
- * Protect your immune system and avoid deadly infections
- * Feel stronger and healthier throughout the course of the treatment
- * Boost your energy and improve your outlook on life

The source of this information is just as stunning: It comes from one of America's largest drug manufacturers, the fruit of over 20 laboratory tests conducted since the 1970's! What those tests revealed was nothing short of mind numbing... Extracts from the tree were shown to:

- * Effectively target and kill malignant cells in 12 types of cancer, including colon, breast, prostate, lung and pancreatic cancer..
- * The tree compounds proved to be up to 10,000 times stronger in slowing the growth of cancer cells than Adriamycin, a commonly used chemotherapeutic drug!
- * What's more, unlike chemotherapy, the compound extracted from the Graviola tree selectively hunts down and kills only cancer cells.. It does not harm healthy cells!

The amazing anti-cancer properties of the Graviola tree have been extensively researched--so why haven't you heard anything about it? If Graviola extract is

One of America's biggest billion-dollar drug makers began a search for a cancer cure and their research centered on Graviola, a legendary healing tree from the Amazon Rainforest.

Various parts of the Graviola tree--including the bark, leaves, roots, fruit and fruit-seeds--have been used for centuries by medicine men and native Indians in South America to treat heart disease, asthma, liver problems and arthritis. Going on very little documented scientific evidence, the company poured money and resources into testing the tree's anti-cancerous properties--and were shocked by the results. Graviola proved itself to be a cancer-killing dynamo.

But that's where the Graviola story nearly ended.

The company had one huge problem with the Graviola tree--it's completely natural, and so, under federal law, not patentable. There's no way to make serious profits from it.

It turns out the drug company invested nearly seven years trying to synthesize two of the Graviola tree's most powerful anti-cancer ingredients. If they could isolate and produce man-made clones of what makes the Graviola so potent, they'd be able to patent it and make their money back. Alas, they hit a brick wall. The original simply could not be replicated. There was no way the company could protect its profits--or even make back the millions it poured into research.

As the dream of huge profits evaporated, their testing on Graviola came to a screeching halt. Even worse, the company shelved the entire project and chose not to publish the findings of its research!

Luckily, however, there was one scientist from the Graviola research team whose conscience wouldn't let him see such atrocity committed. Risking his career, he contacted a company that's dedicated to harvesting medical plants from the Amazon Rainforest and blew the whistle.

Miracle unleashed

When researchers at the Health Sciences Institute were alerted to the news of Graviola, they began tracking the research done on the cancer-killing tree. Evidence of the astounding effectiveness of Graviola--and its shocking cover-up--came in fast and furious....

...The National Cancer Institute performed the first scientific research in 1976. The results showed that Graviola's "leaves and stems were found effective in attacking and destroying malignant cells." Inexplicably, the results were published in an internal report and never released to the public...

...Since 1976, Graviola has proven to be an immensely potent cancer killer in 20 independent laboratory tests, yet no double-blind clinical trials--the typical benchmark mainstream doctors and journals use to judge a treatment's value--were ever initiated....

...A study published in the Journal of Natural Products, following a recent study conducted at Catholic University of South Korea stated that one chemical in Graviola was found to selectively kill colon cancer cells at "10,000 times the potency of (the commonly used chemotherapy drug) Adriamycin..."

...The most significant part of the Catholic University of South Korea report is that Graviola was shown to selectively target the cancer cells, leaving healthy cells untouched. Unlike chemotherapy, which indiscriminately targets all actively reproducing

cells (such as stomach and hair cells), causing the often devastating side effects of nausea and hair loss in cancer patients.

...A study at Purdue University recently found that leaves from the Graviola tree killed cancer cells among six human cell lines and were especially effective against prostate, pancreatic and lung cancers Seven years of silence broken—it's finally here!!!

This Product also help go for it...

Graviola 750, Maximize, Maximum International, 100 Veggie Caps, 5 bottles

Graviola 750, Maximize, Maximum International, 100 Veggie Caps, 5 bottles

It cured Cancer probably reduce it to Zero
Healthy Cell Formation, immune system
Prevention of abnormal cellular division
Cleaning abnormal tissue growth
Anti-tumor agents, anti-tumors, antimicrobial
No side effects like Chemo Therapy has
