**The current main problem by cancer and other diseases is not medical,
but rather practical, legal, political and economical nature based:**

**No practitioner physician can admit a cure on the level of the New Medicin to admit

I, the author of these sites, have had in February 2008 Kidney cancer. It was removed a cancer tumor and a half kidney. I was laid off 7 days after surgery and I have chemotherapy and rehabilitation decided rejected. I was curing solely myself only with changing completely my diet, my dietary habits and from my perspective with the most effective natural immune system booster on the world market. Confirmed through medical checks every 6 month with blood tests, MRT and X-ray I can say that I'm cancer free.

As a pleasanter effect was after a while my heavy asthma - lung function diagnosed 65% - also restless gone. My lung function is back on 100% and I'm very healthy in all areas.

Please read which natural treatment was helping me to recover on a very normal way.

Warning:

This information has not been evaluated by the FDA or 4Life. This information is not **intended** to promote any of the products as a medical cure. Nutrients do not cure diseases or destroy germs directly. **Nutrients reinforce the Immune System.**

The Immune System fights germs naturally and attempts to keep us well. Although there are masses of research indicating nutrition has a powerful effect on the immune system and health, all research is exposed to interpretation and contradictions. We cannot conclude in vitro studies (in the lab) will work in the human body as well. When analyzing in vivo studies (in the body) one must understand the nature of the study and products involved in order to draw a viable conclusion. Remember even doctors have different opinions. Some doctors will endorse natural products for medical use while others won't. A possible placebo effect must be taken into consideration when reviewing testimonies. The preceding information is provided as a source of self education.

Research can be complicated to transfer into real life situations. Positive results achieved in short term by in vitro and in vivo studies do not take into account long-term side effects- which could be positive or negative. There are herbs and nutrients that can turn to be harmful if consumed in large dosages such as vitamin A. When consuming nutrients along with medical drugs you should check for possible drug interaction problems with a pharmacist. Occasionally there are medical doctors visiting our board and share their opinions and experiences. Although we believe these medical professionals are sincere, keep in mind that even doctors may disagree on certain subjects. It is our desire to expose many different ideas for your consideration. Our focus is on supporting the immune system which can assist your body staying healthy. The testimonies and information on this website represent the opinions of the individuals involved only. We encourage you to use your common sense in expectations of consuming any nutritional product.

The Immune System is one of our defense systems against diseases. The Immune System is the body's actual agent involved in healing or recovering from illness. There are nutrients we believe can support proper immune functions. Neither it is our intent to indicate nutrition can always cause the immune system to prevent all illnesses or any illness in particular. Nor is it our intent to indicate nutrition can always cause the immune system to heal in case we are ill. However- we do believe research indicates nutrition is important for a healthy and responsive Immune System. There is an abundance of research taking place throughout the world about nutrition and its effect on health. There is a great deal of conflicting opinions and research. We live in an exciting time and many of us want to benefit from all of the breakthrough research going on. At the same time we want to be wise in our approach to healthcare. On this website we attempt to provide educational information through studies, opinions and testimonies that will provide a variety of perspectives for your consideration. We do not necessarily endorse any particular perspective.
